At the head-quarters of the 2nd Surrey Artillery Corps, Gresham-road, Brixton, on Monday, the annual distribution of prizes to the successful competitors in carbine-shooting during the year took place, and a handsome sword, subscribed for by the members of the regiment, was presented to their popular commanding officer, Major Durnford.

A match for the Harrow challenge cup took place, on Saturday last, at the Wimbledon ranges, between the 2nd Inland Revenue Company (Captain Ennis's), Civil Service Rifles, and No. 1 Company (Captain Curtis's) of the first battalion Queen's (Westminster) Rifles, and resulted in the defeat of the Queen's by twenty-nine points. The shooting of Private C. Paten and Lieutenant Burge for their respective companies was very good. As by the result of the contest Captain Ennis's company are still the holders of the cup, they are prepared to receive challenges, subject to the printed rules on which the cup is open to competition.

The prizes to the successful shots in the 3rd West York (Bradford) Rifle Volunteers were distributed on Saturday, in the Volunteer Barracks, at Bradford. Captain Forster, M.P., distributed the prizes given by the borough members, and briefly addressed the corps.

The zealous volunteers of Liverpool have formed themselves into a club for mutual improvement in military science. The members of the club take by turns the position of officer and private, and thus familiarise themselves with the complete duties of a soldier.

Late statistical returns show that the city of Vienna contains 1065 hotels for travellers, 238 cafés, and 331 beershops.

THE CHAMPION MEDAL OF THE LIVERPOOL ATHLETIC SOCIETY.

We give an Engraving of the champion medal which is presented annually by the Mayor of Liverpool for the time being to the most successful competitor at the Olympic festivals, which are held in June by the Athletic Society. The medal is presented at the winter festivals of the society. It is of gold, and, as will be seen, is in the form of a Maltese cross. In the centre of this cross is a gold medallion, elliptical in form and in high relief, on which is the figure of the Farnese Hercules. Encircling this is a band of white enamel, bearing in raised gold letters the motto of the society, "Mens sana in corpore sano." This is in its turn surrounded with a bright green enamel wreath of laurel, which, independent of its significance, gives a finish to the whole, and forms a pleasing contrast to the gold of which the cross is composed. The fortunate winner of the decoration for this year is Wm. Mitchell, Esq., of Fearnes Hall, Lancashire, who obtained three silver and one bronze medal similar to this in design, the possession of which entitled him to the champion's badge. Fifty-even other medals—gold, silver, and bronze, of the same design—were contested for by gentlemen amateurs from various parts of the country.

The Athletic Society, founded and assiduously sustained by its vice-president, Mr. John Halley, of Liverpool, has done a great deal to advance the cause of systematic physical culture, and the esteem in which it is held is evidenced by its popularity in the north, and the brilliant and crowded assemblages brought together at its various festivals. The winter festival of the present year, comprising the presentation of prizes by the president, S. R. Graves, Esq., and a grand assault at arms, took place on the 2nd inst. at the Theatre Royal, Liverpool.

ARRIVAL OF KING GEORGE AT ATHENS.

(From our own Correspondent.)

Athens, Nov. 25.

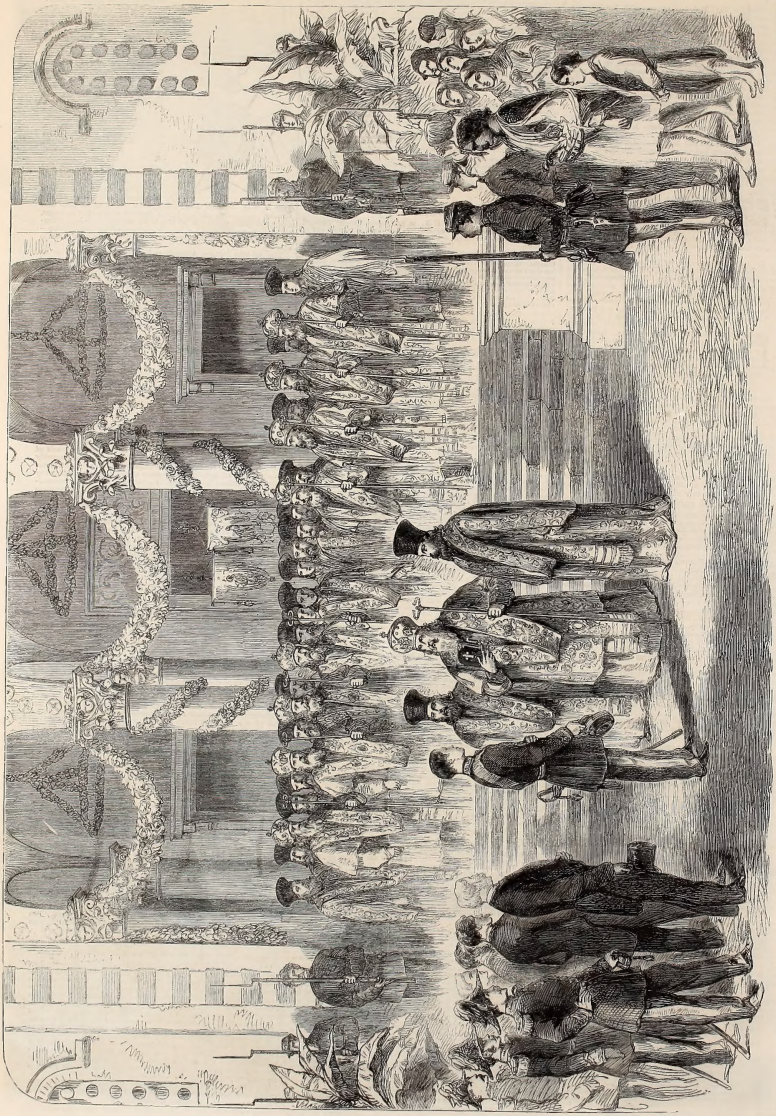
The ceremony of the King's coronation is deferred to a later period, on account of the mourning of the Court for the late King of Denmark. It will take place in the cathedral, under the auspices of the Greek clergy, whose costumes and deportment are very faithfully depicted in one of to-day's Illustrations from Greece.

The attention of the Government is principally devoted to the reorganisation of the army and the appointment of new nomarchs or prefects. It would appear that Bulgaris, the president of the Cabinet, is to some extent unpopular—not because he is of the English party, whose influence predominates completely, but on account of his having been mixed up with the sanguinary events of last summer in a regrettable manner. For this reason the Assembly has shown signs of resistance to his projects, and the Opposition has already succeeded in setting aside many of the promotions granted by Bulgaris to officers in the army. So far there is nothing unconstitutional in the proceedings of the Assembly; and for the rest matters are going on peaceably: the Government possesses the confidence of the country, and order reigns absolutely throughout the newly-constituted kingdom.

A discussion of some importance is being carried on in the journal *La Grèce* relative to the Greek debt. M. Ange Vlachos, a lawyer, advocates the non-payment, or, at least, partial repudiation, of the bonds issued in 1824 and 1825; firstly, because the present holders obtained them at a ridiculously low price; and, secondly, because, the kingdom of Greece as actually constituted being much smaller than the aspirations of the Hellenic nation would desire, the demand of the bondholders should, at any rate, be reduced proportionally. Our excellent Vice-Consul at Athens, Mr. C. L. W. Merlin, has published a very able answer to the repudiatory proposition, and proves the perfect right of the bondholders, whoever and wherever they may be, to be paid, and likewise the advantage of such a determination to the Greek nation, who, by pursuing the course indicated by a sentiment of honour and integrity, would thus re-establish its credit in the face of Europe.

Considerable anxiety is felt in Athens on the subject of the stipulations contained in the treaty for the annexation of the Ionian Islands. In the capital the exigencies of the British Government are regarded most unfavourably; and in the islands themselves the news of the proposed destruction of the fortresses, and their reduction to a state of territorial neutrality, has been received with manifest dissatisfaction.

I think I can promise you a letter of greater interest for next week, when you will receive a drawing of the ceremony attending the administration of the oath of allegiance to the National Guard, which took place a few days ago. In the mean time, I proceed to give a few notes that will serve to explain the two Illustrations from Athens in to-day's Impression.



THE ARCHBISHOP OF ATHENS RECEIVING THE KING IN FRONT OF THE CATHEDRAL.

This Engraving, which appears rather out of its chronological order, through an unavoidable delay in the execution of the details, records one of the most interesting and picturesque events of the day of King George's arrival in Athens. His Majesty, having reached the place of the cathedral in the Royal equipage drawn by six horses (depicted in a former Illustration), descended from the carriage and advanced towards the cortége of the eight Bishops, who were standing round the Archbishop of Athens, in front of the peristyle of the cathedral; whereupon the Archbishop, carrying the New Testament, came down the steps with two Deacons and held up the holy book to his Majesty to kiss. The entire body of the clergy, followed by the King and his suite, then entered the church, where a "Te Deum" was chanted with the ceremony of the Greek ritual. The costumes of the Archbishop and clergy in our Illustration were drawn at the residence of the Primate, to whom our Artist had the good fortune to be presented. The venerable priest is an old patriot, having played an active part in the War of Independence in 1821; and his sympathetic dignity and unvarying goodness have obtained for him the greatest veneration and affection of his fellow-countrymen. The costume of the Archbishop is distinguished from that of the Bishops merely by a cross on the breast. The dresses of the Archbishop, Bishops, and Deacons are white, embroidered with gold.

NEW ARMS OF THE KINGDOM OF GREECE.

The escutcheon of the new arms of the kingdom of Greece has been officially decided upon by the King and his Ministers in accordance with a design prepared by M. Rota, who kindly communicated the drawing to our Artist. The preceding arms of Greece had for supporters two lions (forming part of the arms of Bavaria), and in the middle of the cross was the Bavarian escutcheon. In the Danish arms, the supporters are two wild men; but for these, which might have been adopted out of compliment to the family of King George, have been substituted two figures of Hercules, certainly more Grecian if less dynastic. With the exception of these figures the new arms are the same as those which were borne by Greece during the War of Independence. For his private seal, the King will use the same escutcheon, with the addition of his family arms in the centre of the cross. His Majesty has chosen for device, "The love of the people is my strength."

The motto on the Grand Cross of the Greek Order of our Saviour, engraved in our last Number, ought to have been rendered, "Thy right hand, O Lord, is become glorious in power."

THE ARCHBISHOP OF ATHENS RECEIVING KING GEORGE IN FRONT OF THE CATHEDRAL.—FROM A SKETCH BY OUR SPECIAL ARTIST.—SEE PRECEDING PAGE.

"A SYRIAN GOWASS," BY CARL HAAG, IN THE WINTER EXHIBITION OF THE SOCIETY OF PAINTERS IN WATER COLOURS.—SEE NEXT PAGE.

"A SYRIAN GOWASS."

A "Gowass?" Perhaps the reader, if he has not travelled in the East and has not a retentive memory, may be unable to recall the meaning of the word. If so, we beg to inform him that a gowass is a sort of military policeman, gendarme, or armed guard. In the East every dignitary or person of distinction, particularly Governors, Pashas, Consuls, &c., retain a couple or more of these gowasses, who are stationed within the gates or entrances of their patrons' residences, or march before them when they go out in state and make ceremonious visits. They generally wear a sword and a pair of pistols, and in the cities and near their own quarters they also carry a long bamboo stick, with large ornamented silver top; but when on journeys in the country, of any distance, a long gun—a matchlock or single-barrel gun—is added to the sword-belt and the bamboo stick. Our reverent cowass (see page 589), in addition to pistols and gun, has holsters of his saddle a long but light gun, which he leans, and long, curved scimetar, has also a yatagban stuck in his sash or girdle. He is a very picturesque figure on guard over the company or caravan in the distance, who seem to be about to start in the cool of the day. They also appear to have made a halt in the desert, probably at Palmyra, judging from the ruins and the fact that Mr. Carl Haag, the painter of the water-colour picture, has engraved, as also of the very few artists who have adventured so far as the solitary and forsaken Queen of the Desert. The mess is already up, but the yellow rays of the setting sun still strike the distant ruins and, as it were, light up that mouldering mausoleum, and the tents under the unusual effect, together with the number of arms he wears, the showy and incongruous costume, and the swaggering attitude, combine to make this gowass quite an embodiment of the romance of the Exhibition in which it is placed, seem somewhat melodramatic. But it is easily conceivable that an Arab—and we see by the long hair and features that this is one—would, acting in the capacity of guard, not only consider himself bound to sleep on the outside of the tents, conscious of the real dangers of the desert. His cos une has a singular incongruity, showing an original element in the food, which is like that formed from the bournous of the Arab, while all the rest, Turkish trousers, Albanian-like jacket, waistcoat, &c., seem to have been put on anyhow anywhere. This is probably the real caste Arab; for the race is divided into three great classes, and subdivided into subdivisions. The three classes are the first and most noble are the Ebn-el-Arab, or Bedawi, termed by Europeans the Children of the Desert, who are shepherds and nomades; the second are the tillers of the soil, the Fellahin (the Fellahs, or labourers of Egypt); the third are Hadiri, or dwellers in towns. In all, derived from the same original stock, whether high or low, civilised or uncivilised, have a physical organisation which, if not peculiar, to any other race, is at least, as Mr. Lorrey, the French ethnologist, says that, "the perfectibility to be recognised in their organisms, and in those which belong to the external senses, really announces an innate intelligence proportional to that physical perfection which is *without doubt*, superior to that of the other northern races of the globe." In the first-named place, he thinks that the convolutions of the brain are more numerous and the body organisation of the Arab is finer than the European. Our own Pritchard ("Physical History of Mankind," vol. iv., p. 548) says: "It is certain that the intellectual powers of the Syro-Arabian people have in all ages equalled the highest standard of the human faculties. Connected by a bond of union, as yet mysterious, with the race of Misraim, the Hebrews and Phœnicians shared with them the earliest culture of arts, and practised writing a thousand years before the Greeks, and presented examples of the elementary sciences by means of which the human mind has made its most important progress, plainly derived from them." The general language of this race, attest that from them originated all the corresponding branches of knowledge."

SCIENTIFIC NEWS.

THE OBSERVATION OF THE MINOR PLANETS.—Now seventy-nine in number, and probably many more, to be discovered by means of the great astronomers of Paris and Greenwich. M. Leverrier having offered to observe whatever will be over-looked, Mr. Hind, at the latter place, will do so.

PLANETS FOR DECEMBER.—Mercury is in conjunction with the Sun on the 1st, and may be seen as an evening star towards the end of the month; but, having a southern declination, it is not very favourably situated. Venus is a morning star, rising, on the 1st, after the Sun, and is in Scorpio. Venus is brilliant as an evening star, but is not visible to the naked eye after the 11th. Mars is in Virgo at the 1st, and in Libra at the 31st. Jupiter rises before the Sun on the last day. Jupiter continues in Libra, and may be seen in the early part of the evening. Saturn rises about 6h. 30m. on the 1st, and about 4h. on the last, and is therefore not visible during the greater part of the night. Saturn rises about 8h. 30m. in the morning on the 1st, and about 6h. 30m. on the last, of the month. He is in Sagittarius.

In Virgo. Uranus is in opposition to the Sun on the 15th, and therefore is most favourably situated for observation. Neptune passes the meridian about 6h. and 7h. in the evenings in the beginning of the month, and as the planet is equal to an eighth-magnitude star, it may be well seen by means of a small telescope. The foregoing is selected from that interesting and useful publication, *Astronomical Register*.

THE SUN'S PARALLAX has been represented by eight seconds and a half, as determined by the lunar theory of M. Hansen, four tenths of a second are to be added, reducing the parallax to 8.8 seconds, and to this must be four millionths added. Mr. Stephan, at a meeting of the Royal Astronomical Society, thus represented the difficulties:—"Take a land measure of 8,000 miles, and you will find that the difference of 1-10th of a second is to this, that we have to look at the hair at a distance of 125 ft. The most delicate micrometer measures have made it as little as so much as a second, and a difference of 1-10th of a second amounts to about the same thing. We ought to be thankful that we are able to calculate and to observe such inappreciable quantities." The solar parallax deduced by Mr. Stone is 8 mln. 94sec.

COMET V. OF 1863.—We learn by a letter from M. Valz to M. Le Verrier, that the comet of 1863, last seen with the naked eye in the borders of the comet on Dec. 29, being that in the constellation Hercules. The observation of the said comet will be made from the Marseilles observatory, whether it will deviate from the place of the orbit. Observations of this kind are of the most interesting which give a deviation, if any, in the planetary orbit, therefore, to ascertain a fact which appears contrary to the admitted theory, that the planets and comets are governed by the same laws of attraction and repulsion of the ether. It will be very remarkable if this deviation should become an indication of the existence of ether. On the 4th of next month we will again hear the opinion of M. Valz of the comet; and we may hope that the full still feeble, may augment sufficiently to be seen by the naked eye.

On Dec. 29, he will be to observe in the zenith.

PHOTOGRAPHS OF THE DISCHARGE OF THE LEYDEN JAR.—M. Federsen states, in the *Annales de Chimie*, that he has established, by a long series of experiments, that there are intermittent discharges in the Leyden instrument, in which the electricity escapes successively by isolated spaces, as it were in the form of a series of interruptions of luminous points, and not, otherwise a continuous circuit. It is especially observed when we interpose in the circuit and successive discharges of the Leyden jar. Between these, in which the electricity flows out in the conducting circuit, forming a current. The intermittent discharge is produced when the luminous discharge itself becomes so sensitive through the passage of partial discharges traversing it in the form of sparks. M. Federsen has succeeded in obtaining photographs of the battery consisting from one spark to other with a gradually decreasing intensity. M. Federsen, by the employment of a rotating mirror, has proved that the discharge of the above-mentioned battery is oscillatory, which are now represented in coloured plates appended to his interesting memoir. He concludes from these experiments and observations, as mentioned in his opinion, have established the principles of the mechanism of the discharge, produced under the ordinary discharges, and given some of the principal laws which regulate it.

THE APPLICATION OF OZONES is gradually undergoing a great change in the manufacturing districts. Our readers will see by *Scientific American* that the proper place in which to grow them is a damp cellar, and that they are to be encouraged about the roots of existing trees, as scarcely less hateful to them than are to the fevered blasts of the wild prairie. So long ago as 1851 Dr. Angus Smith, in his "Air and Rain," found that the species have no affection for a high temperature, and that many prefer a low one; even those which grow in the Alps. It is said that in the Harlaxton region the mean heat is 1,000 and 11,000 ft. Where Humboldt tells us it is as cold as the mean heat of the Arctic circle. Parlo. One species of Epidendrum Mr. Linden found in Columbia at a place where the mean temperature was about 40 deg., where trees were water-logged, pitcher formed, and where it occasionally rises. In the hot lands, on a level with the sea, orchids do not seem able to exist; and yet we have gone on, nearly twenty years since, tempting orchids as if everything had been quiet in reverse. Mr. Weir, the society's collector, has been sent on a mission to obtain new species; his field of action being specially the Andes of New Granada, Quito, and Peru. It is to be hoped many cultivators will avail themselves of the opportunity of obtaining the plants which he may send home to give vitality, growing in the country a fair trial on the rational system. Instructions are given to a person who is employed in the service of the journal from which the foregoing remarks are selected.

FINE ARTS.

We have received, subsequently to those already given in our Number of the 28th ult., additional communications from correspondents relating to our article of the preceding week entitled, "Who discovered photography?" Perhaps the most serviceable of these is from Mr. Webedale, of Barnstaple. This gentleman's interests seems to render it highly improbable that the manufacture of the picture produced (" photographe") during the invention (a galvanic guarded secret) had any relation to the supposed, and, it would seem, very probable, production of Mr. Fox Talbot, of Bohn, near Birmingham, towards the close of the last century. Our correspondent says that many years ago he saw several pictures of the kind now in question. "They were in size about 24 in. by 16 in., mounted (he believes) on strainers in the usual way; on the back of each was pasted a printed label, headed 'Galvanic Pictures,' with directions for manipulation." "Polygraphic Copy of The Morning, by ——." He was continues her correspondence, but has been unable to find the name of the artist, "examined them and remarked that they must by either printed in the ordinary way from engraved plates, or by some similar perforated plates, a separate one for each colour." From what he himself recollects, they were devoid of minute detail or finish—in fact, closely resembled, for example, the plates illustrating, engraving of the figures, and colours being tolerably imitated, they were, Mr. Webedale had the opportunity of seeing, exceptionally when they (as these had become) were a little mellowed by time. Mr. Webedale has also found in the catalogue of the Polytechnic Exhibition, found by Mr. William Smith, the well-known authority in prints &c., a notice of the "Galvanic Pictures," and the precise he recollects seeing when young were no doubt some of those exhibited under the name of polygraphs. But if this subject does not occur, it is probable that it will be allowed to drop into oblivion. However, any pictures similar to those described would clearly have resulted from the action of the galvanic battery on sensitive papers, and the paper pictures of Egnitou submitted by Mr. F. P. Smith, of the Patents Museum, Wellington-street, Strand, to the Royal Society, are of more importance to the practice of photography at Soho, when already given, also sends us an anecdote of Francis Egnitou, which, although in the form of a letter, we have not room for, addressed to the directors of his information, is yet rather too good to be lost. He says by which he found the inventor so possessor of the secret of the process by which the "galvanic pictures" were produced.

"When Francis Egnitou was engaged in painting a window for the Duke of Norfolk, at Arundel Castle, the Duke himself was represented at the time, and soon afterwards, by the Duke of Norfolk and Sheba. Egnitou, wishing to represent the moderation of Lord Surrey, painted him in a plain dress, without the usual quantity of wine. The Duke, who had not the reputation of temperance, objected to the picture, and, in the course of the work, noticed the emptiness of the goblet, and immediately cried out, 'Oh! Egnitou, fill up ! fill up!' Nobody will know that's for me.' Egnitou, as he says, was very glad, in consequence, to find a list of Egnitou's best paintings on glass in the notice of the painter of the window at Arundel Castle.

A competition of designs for the decoration of the façade of the Liverpool Exchange has been announced, premiums of £100 and £50 of ceramic ware, coloured bricks, mosaics, and terra-cotta," but more than a hundred designs have made by the appointed judges. Mr. Beresford Hope and Mr. Digby Wyatt. The first premium is given by Mr. Hope, has been awarded to Mr. R. Edgar jointly with Mr. J. Ealing, Sheffield, and the second premium to Mr. Ed. Goldie, of the Potteries. Mr. Edgar is now one of Mr. Gilbert Scott's assistants, and Mr. Ealing, Sheffield, and the second premium to Mr. Ed. Goldie, of the being executed for the South Kensington Museum. It is time that the merits or demerits of ceramic—long ago employed for external decoration in Italy—should be tested in England. This interesting panel and glazed surface, ceramic productions seem to offer the greatest advantages, applying to internal decoration, indeed, as much as externally as possible, in the grimy circumstances of London and our great manufacturing towns.

We are glad to hear that the drawing which, as we announced by report at the time, had been missed from Mr. Mueller's series illustrating the "Norman Conquest" has been found, and is now in the hands of Mr. Gruner for the purpose of completing his engravings of the whole. The drawing, the local possession of which in the town of Senguc is being engraved by the distinguished German engraver just mentioned, is, we hear, to be published in an unfinished state, except the proofs. If art unions undertake to popularise such works of art as these, it is to be hoped, namely, outline-drawing as no severe and elevated, all the objections we have made to the system urged against the directions taken by these associations in their previous issues would be removed. The fate of art unions is chiefly remains for the public to show that they are ready to appreciate what is really excellent in art. Such a work as Mr. Mueller's would undoubtedly form one of the most intrinsically valuable publications ever offered to subscribers by art unions.

A Liverpool correspondent writes that the new and (as we understand) principally "lay" management of the local exhibition (viz., of the Royal Institution of Fine Arts) is fully equal to the expectations of the public. The amalgamation of the two rival societies, in every way so desirable, has been effected, and the result has been a collection of unusual interest. We have also had forwarded to us certain printed instructions relating to the mode intended to be adopted in the selection of works, and the conditions under which *offers* may be made, and interestingly permit artists to exhibit and sell works not their own property. Now, as we have already pointed out, upon former occasions, the interest of the exhibition into a mere general saleroom, we feel bound to protest against any such system being introduced into a society of this profession as it is to the managers. It is the more to be regretted that the new society has not, in its constitution, given more prominence to the fine arts. With all the complaints against the regulations, hanging &c., and the absence of many former contributors, the sales are yet said to be unusually lively. Besides which, the best picture in art was the sale last week, at Liverpool, by Messrs. Walker and Manning (by order of the executors), of Mr. Wm. Brown's collection of pictures, which brought, under the hammer, £3300—the prices averaging very high.

The prizes in connection with the Winter Exhibition of Pictures have been awarded as follows:—£100 prize for best figure-subject, Mr. Yeames, "Will they hang him?" £50 prize for best landscape, £50 prize for best landscape, Arthur Gilbert, No. 130, "Loch Brichat—A Bright Night."

The death of Mr. J. D. Harding, the well-known artist and teacher of drawing, is announced.

DRAWING AND PAINTING BOOKS FOR 1868.—The approaching new year is heralded by the appearance of the usual crop of diaries and pocket-books. The number of these, as well as of publications to the waste of all, especially of the commercial classes, has long been very large, and it is to be presumed that the supply continues equal to the demand, for very few quality that can be possessed by works of this kind. Messrs. De la Rue & Co. have, as usual, their nine best works, and all are distinguished by the style of their workmanship as well as the usefulness and accuracy of their contents.

At the general meeting of the National Shakspeare Committee, held on Tuesday, it was announced that the Archbishop of Canterbury, the Archbishop of Dublin, the Duke of Devonshire, Lord Brougham, and the Lord Chief Justice of England had consented to accept office as vice-presidents of the association. The general body were also informed that Lord Stratford de Redcliffe, Mr. Grote, Professor Owen, Professor Faraday, Mr. Charles Dickens, Mr. Palmer, Attorney-General; Sir Hugh Cairns, Q.C., M.P.; Mr. Sergeant Parry, Mr. Serjeant Ballantine, Mr. Serjeant Pulling, Mr. Serjeant Simon, Mr. Charles Selby, M.P., Sir A. S. Helps, Bart., Sir Lucullus Wraxall, Bart., Mr. Charles Parker, F.S.A., Professor Mason, and other distinguished men had joined the committee during the past month. Edward de Bunsen, Esq., Councillor of Legation, and Antonio Panizzi, Esq., have engaged to act as foreign secretaries to the committee. The following resolution was unanimously passed at the general body:—"That the following gentlemen be requested to act as a committee, with instructions to consider the principles which should govern the erection of a site for a Shakspeare memorial, to invite into the number of approximate site, and ascertain which of them may be obtained on and what conditions, the practice of erecting a public monument of a large and noble character—viz., the Duke of Marlborough, the Hon. W. F. Cowper, M.P.; the Attorney-General, Sir Hugh Cairns, Q.C., M.P.; William Tite, Esq., F.R.S.; G. B. Eastlake, Esq., M.P.; Wm. Hepworth Dixon, Esq., and J. O. Halliwell, Esq."

THE MAGAZINES.

The *Cornhill* is a capital miscellany this month. As usual, all the interest of the "Small House at Allington" is concentrated upon Crosbie; and Mr. Trollope has never been more powerful, for never more terribly true to the naked realities of misery, than in delineating the domestic wretchedness of this very unhappy home. Whether deliverance be yet in store for him we will not venture to predict; but the situation that concludes the last of the curtain is already evident; and we shall be surprised if the denouement upon July finds the character of Mr. Emma. Mr. Trollope might easily have reconciled his readers to this, had he thought proper; but the treatment of the subject obviously tends to render it impossible. "Margaret Denzil" is continued with much ability, though with less of the weird power that characterised the first instalment. Nothing in the magazine will attract such attention as Mr. Tennyson's experiments in classical metre. They confirm the opinion we have already entertained, that it is possible for a true poet, imbued with the spirit of antiquity, to write in them with effect, but that it is impossible for them to become more acceptable to the majority of readers, unless, indeed, in the very unlikely event of having given upon a vein of thought which requires them as the most appropriate vehicle of expression. The can hardly be the case, except when he is writing upon a strictly classical subject. Thus we can imagine that Alcaics might have appeared as natural a medium for an address to the shade of Horace as they seem mannered and artificial when conveying an apostrophe to Milton. The exercises, there is grandeur of expression and a fine voluminous cadence by his son, entitled "To Dante," and dainty grace and ease in the Hendecasyllabics. The translation "Homer Colours of the Double Dactylic Metre" is very good scherzo poem; "My Maiden Brief" a delightful bit of fun; and "Life in a Country House" a very unexpected combination of the shades of social life promised in an advertisement. The dark story of the German Countess is very interesting. Mr. Charles Allston Collins's "Jacob Omnium" lead the magazine their names and little more. Mrs. Kendall's story on the stage is far too slightly to be of service; and, however decorously "J. O." may avail himself of such points in Mr. Hughes's up his paper on the Crowley case, he cannot deny that it was calculated to smatter prejudice in the minds of readers who, for the most part, when it was most important that it should be, as far as possible, unbiassed.

Everything in *Macmillan* is good this month. Mr. Kingsley's story is continued with unabated spirit, and the anonymous tale, "A Son of the Soil," bids fair to develop a plot of rare merit. Mr. Arnold writes a touching notice of the late Colonel Shaw, Commander of the first negro regiment raised in the North, and a discriminating eulogy of the singularly pure, gentle, and considerate type which the increase of Negro Emigration is developing. A strange contrast is afforded by Professor Masson's very spirited account of the late Dr. Alton of Aberdeen, an Irishman from the North, "fiery and combative to excess, but full of manliness and generosity, and of her devotion. Mr. Masson" writes as assuringly as ever. His theme this time is the insalubrity of Calcutta, and, though he has perhaps not quite the power of Elgin's malady, the deplorable occurrence will have the effect of directing public attention to the subject. He strongly advocates the transference of the seat of Government, and recommends Jubbulpore as the most eligible site.

India also supplies material for one of the best contributions to *Fraser*. Mr. Bruce's masterly rendering of the charming episode of Nala and Damayanti is a delightful version of the sweeter pattern of womanhood than Damayanti, nor anything more affecting in its simplicity and pathos than her devotion. As Mr. Bruce perceived that the charm of the narrative consists in its simplicity; and, resisting all temptation to embellish, has produced a version which strongly recalls Mr. Tennyson's "Dora" in its perfect chastity of sentiment and diction. We hope to hear more of Mr. Bruce, who certainly is a man to be glad to welcome to our periodical literature considerable obligations. "Women and Scepticism" is a very thoughtful paper, which it will be our duty to take up and discuss. "The Reforms of the Future" is a sensible discussion of political contingencies, and "Lord Macaulay" covers the ground with a general estimate of the present position of the theatre, and the tendencies of recent pronunciation and delivery effected, and every sound principle of elocutionary criticism.

Blackwood opens with a poem by Sir E. Bulwer Lytton, melodious and tender, but the interest of the number attaches mainly to another finish which characterise the born singer, the true son of song. "Tony Butler" is very good, and Mr. Oakley, particularly, are well-conceived and unmistakeably real characters. "Lord Lisle Assat," and "The English and French Navies," are very practical and useful papers. "The Last Days of Marilyn" covers the old controversy as to the reality of the execution of the three women alleged to have been burned in Charles II.'s time for adhering to the Covenant. Like the innocence of Mary Queen of Scots, this is a question of temperament, and, viewed in accordance with political prepossessions. Nothing will convince a Scotch Covenanter that the evidence is not overwhelming, or a Whig that they were not. In our opinion the story is not proved to the satisfaction, and any imperfection in the testimony must be fatal to it. The recent discovery of the original trial would be a valuable matter for an article. The writer exposes the untrustworthiness of the volume published under the name of Sir Edward Nicholas, and is more guardedly respecting "Battle-Fields of the South," which we suspect to be a very ingenious but expedient fabrication, in so far as the narrative of the Western campaign is concerned. "The Last Days of Mr. Disraeli's admirable method and perspicuity, and the slight but vivid delineation of character is very successful.

The *Victoria Magazine* is hardly so good as usual. Mr. Townsend inquires, at some length, into the origin of tonsure. But, leave the question observe. Mr. Davies's paper on "Italian Protestants" is interesting, as is the production of an enlightened and sagacious as well as pious clergyman. Miss Cleaver Chase" is rather better than usual; and the new instalment of Mr. Senior's journal quite as good. Mr. Lockyer writes on the "Four Inclinations of Food," though scarcely attaining the Fraed standard of sparkle and transparency.

"Bella Donna," in the *Dublin University Magazine*, is wound up in a hasty, unsatisfactory manner, as to indicate it was originally intended to have been longer. "Wyber's Hand," on the contrary, improves considerably in interest and displays unquestionable power of the melodramatic order. The rest of the contents are common but undistinguished by any marked feature—a character which equally applies to *Bentley's Miscellany*, which is rather better than usual. "A Boarding-school Down South" is especially amusing.

Temple Bar has many entertaining papers. Mr. Sala describes a Manchester street with his accustomed verve. Mr. Yates tells an excellent story of a clerical swindler. Mr. Kennedy contributes a scholarly disquisition on Shakespeare's poetry and the Virgilian type, and Miss —— has some charming verses of her own. "De Mortuis" and "Quinty Dewsnapp" are also in the magazine, the latter a striking. Light reading may be found in perfection in *London Society*. A number of the contributions can have no easy task, and it is surprising how well they manage to "keep it up." The "Art Notes" of the month is also, for the most part, very readable.

Good Words is distinguished by one of those cogent discussions of a political question from the point of view of morality, which few can write so well as Mr. J. M. Ludlow, the author. Mr. Trollope contributes an interesting and pathetic story of the American war, founded on fact, and referring, we believe, to the brothers Crittenden. The discourse on "Poverty" by the late Edward Irving, is fully worthy of the illustrious author in its eloquence and loftiness of thought. No other magazine has so amusing a paper as "A Dutchman's Difficulties with the English Language."

The Christmas number of *Sunday Magazine* is excellent, chiefly on matters of especial interest to clergymen.

NATIONAL SPORTS.

WE spoke last week of the prices at Lord Stamford's sale as perfectly incomprehensible for a "without reserve" sale; and the public were soon after informed officially (so to speak) that no less than sixteen lots had been repurchased, so that the actual purchase-money sinks from 28,750 gs. to 9410 gs. The horses which remain in the stable, under William Butler's charge, are, it is said, Ensign (200 gs.), Stockpigeon (65 gs.), Revolver (410 gs.), Gemma (750 gs.), Gownsman (625 gs.), Guardsman (850 gs.), Cambuscan (5100 gs.), Acolyte (800 gs.), Procella (850 gs.), Leicester (900 gs.), Venus (580 gs.), Cassiope (700 gs.), Archimedes (3000 gs.), Londoner (1000 gs.), Thelassius (700 gs.), and Hydaspes (1350 gs.). Messrs. Tattersall were, of course, powerless to prevent it; but this affair has brought the buying-in, or what is delicately called the "repurchasing" system (which is too much in vogue) regularly under review, and it remains to be seen whether Mr. Naylor will endeavour to enforce his last bonâ fide bid of 5000 gs. for Cambuscan in a court of law. A spirited proceeding of this kind is sorely needed to give sellers a reminder. The *Sporting Life* states that 143 Derby two-year-olds have started this year, of which 99 are engaged in the St. Leger and three in the Oaks. Taking them throughout they are a very mediocre lot.

The coursing goes on without let or hindrance, and Cardinal York's blood is running with wonderful success. At the Ridgway Club, Mr. Campbell's Cadazooro and Calabaroono, own brothers by him from Canopy, divided one Puppy Stakes, and his Silver Rays, from Silver Steel, won the other; while Drop-o'-Drink was one of the three which divided the Diamor St. Leger. Sea Pink was beaten in her first course for the Ridgway Cup, and Attermire, Bow Fell, and Oscar were among the veterans which went down before Sampler for the Champion Collar. Rebe, when not quite in form, has been winning the Weston Cup at the West Herefordshire Meeting; and Ewesdale, by Larriston, the Bridekirk Cup, for which Tirzah, own sister to Truth, ran up. As a general thing, the puppies are considered far superior to the old dogs this season, and it is to them that coursers begin to look for a Waterloo winner. The meetings for next week are—Middle (Salop), on Monday; Cockermouth, on Tuesday and Wednesday; Bryn-y-pys and Elmsworth, on Wednesday; North Union Club (O), on Wednesday and Thursday; North Thoresby and Sunderlandwick, on Thursday; Baldock (O), from Wednesday to Friday; and Selby, on Thursday and Friday.

If the Birmingham Dog Show fell off in its general entries, it received an important accession of foxhound strength, as, instead of the usual meagre supply, no less than twenty-five hounds were sent from the Badminton, Berkeley, Warwickshire, Atherstone, and Worcestershire kennels. The Duke won three first prizes with Guardsman, Woodbine, and Magic; and a second with Woldsman, to the Warwickshire Talisman, who is also of his Grace's blood. Another second also went to Viscount Curzon with Joyful, and Lord Fitzhardinge's Trinket and Pomfret were highly commended. Jock and Venom, both bred by the renowned Jack Morgan, were again head among the fox-terriers, and in a Champion class for small pointers, Mrs. Gilbert won with Venus, the property of her late husband, Mr. Henry Gilbert, who died a few weeks since. Rienzi and Referee, from old Riot, and both the property of Sir George St. Gore, were the only dogs known to fame among a miserable lot of greyhounds. The setters showed a great falling off; and the retrievers, as the *Field* observes, formed a show in themselves. The general spaniel class had, also, some excellent dogs in it. We are glad to find that a handsome sum is being raised for a testimonial to Mr. Burdett, as it is owing to his efforts that dog shows have become, as it were, quite one of our institutions.

MONETARY TRANSACTIONS OF THE WEEK.

(From our City Correspondent.)

ALTHOUGH there is still a moderate demand for bullion for export purposes, the pretty general impression in moneyed circles is that the value of money in the Discount Market has seen its highest range; hence, more general confidence as respects the future has been manifested, and increased supplies of stock have been absorbed in the English market by the public generally. Prices have advanced, and, judging from the somewhat favourable tenour of the advices from Paris and Frankfort, there appears to be room for a high range in them. The Unfunded Debt has changed hands at a heavy discount. The next issue will bear interest at the rate of £3 per cent per annum.

Much uncertainty has prevailed in reference to the value of money in the general Discount Market. The demand for accommodation has been less active than in the previous week; yet the lowest rates for the best commercial bills are as follow:—

Thirty days' bills	8 per cent.	Four months' bills	8½ per cent.
Sixty days' bills	8 "	Six months' bills	8 9 "
Three months' bills	8½ "		

About £300,000 in bullion has come to hand, and about the same amount has been shipped, partly to the Brazils and partly to the Continent.

At the half-yearly meeting of the Bank of British North America a dividend at the rate of 6 per cent per annum was declared.

The dealings in Home and Indian Stocks on Monday were very moderate, and, in some instances, prices showed signs of weakness. Consols, for Money, were done at 90⅞ ½; Ditto, for Account, 90⅞ 91; Reduced and New Three per Cents, 90½ ⅝; India Five per Cents, 103½ ⅝; Ditto Bonds, 10s. dis. to par; Exchequer Bills, 10s. to 5s. discount. Bank Stock was 235 to 237; India Stock, 221 to 224; and Rupee paper, 103 to 104, and 113 to 114. On Tuesday the quotations were well supported:—Consols, for transfer, closed at 90¾ ⅞; Ditto, for the 7th of January, 91 to ⅛; Bank Stock, 235 to 237; Reduced and New Three per Cents, 90½ ⅝; India Stock, 221 to 223; Ditto, New, 106½ ⅝; Rupee Paper, 103 to 104, and 113 to 114; India Bonds, 15s. to 8s. dis.; Exchequer Bills, 12s. to 7s. dis. Comparative firmness prevailed in the market on the following day. Consols, for Money, realised 90⅞ ¾; for Account, 91⅛ ¼; Bank Stock, 235 to 237; Reduced and New Three per Cents, 90⅝ ¾; India Stock, 221 to 224; Ditto, New, 106½ ⅝; Rupee Paper, 102¾ to 103¼, and 112 to 113; India Bonds, 12s. to 5s. dis.; Exchequer Bills, 12s. to 7s. dis. On Thursday increased firmness was apparent in the market: Consols, for Money, realised 90⅞ 91; for Account, 91⅛ ⅜; Reduced and New Three per Cents, 90⅞ 91. Exchequer Bills, however, are dull, at 12s. to 7s. dis. India Five per Cent Stock is quoted at 106½ to ⅝.

Mexican Stock has continued dull, and prices have further declined. In the Confederate Loan a heavy fall has taken place, the quotation being 35 to 40. For most other Foreign Securities, the market has exhibited rather more firmness, and prices have had an upward tendency. Brazilian Five per Cents have marked 98; Ditto Four-and-a-Half per Cents, 1860, 8½ ex div.; Chilian Four-and-a-Half per Cents, 83 ex div.; Egyptian, 98½; Greek, 26½; Ditto Coupons, 12½; Mexican Three per Cents, 32⅝; Peruvian Four-and-a-Half per Cents, 85⅝; Portuguese Three per Cents, 48⅝; Russian Five per Cents, 91; Ditto, 1860, 87½ ex div.; Ditto, 1862, 88⅝; Spanish Three per Cents, 53¼; Ditto, Deferred, 47½; Ditto, Certificates, 12½; Turkish Old Six per Cents, 80; Ditto 1858, 69½; Ditto, 1862, 69¾; Venezuela Three per Cents, 24½; Ditto Six per Cents, 55½; Belgian Four-and-a-Half per Cents, 97¾; Dutch Four per Cents, 98½; and Italian Five per Cents, 70¼.

Joint-Stock Bank Shares have ruled heavy, and the quotations have in several instances declined 1 per cent. Alliance have sold at 44; Anglo-Austrian, 7; Australasia, 74½; Bank of Egypt, 25½; Chartered Mercantile of India, London, and China, 57 ex New; Colonial, 40½; Consolidated, 9⅝; Continental, 9; European, 4½; Hindostan, China, and Japan, 27½; Imperial Ottoman, 18; London and Brazilian, 52; London and County, 55¼; London and Westminster, 78½; Metropolitan and Provincial, 21½; Midland, 9; National Provincial of England, 133; Ditto, New, 39; Oriental, 56½; Scinde, Punjaub, and Delhi, 6; Union of Australia, 52½ ex New; and Union of London, 40.

Colonial Government Securities have been dealt in to a limited extent. Canada Six per Cents, 1877 84, have sold at 103½; Ditto Five per Cents, 91; Cape Six per Cents, 1890-1, 110; Ceylon Six per Cents, 105½; New South Wales Five per Cents, 1888-92, 101⅝; and Victoria Six per Cents, 108½.

The Miscellaneous Market has been tolerably active. British Indian Tea Shares have realised 1⅞; Canada Land, 84; Ceylon, 9⅝; Crystal Palace, 37; Discount Corporation, 6⅞; Egyptian, Commercial, and Trading, 3⅞; General Credit and Finance of London, 6⅞; Hudson's Bay, 42; International Financial Society, 9½; Joint-Stock Discount, 6⅞; Ditto, New, 4; London Financial Association, 22⅞; London General Omnibus, 2½; Mercantile Credit Association, 5⅝; National Discount, 9½; Oriental Inland Steam, 1⅞; Peninsular and Oriental Steam, 83½; Royal Mail Steam, 77; Berlin Waterworks, 8⅞; Chelsea, 26; Atlas Insurance, 13; Commercial Union, 8½; Guardian, 51½; Sun Fire, 208; Thames and Mersey Marine, 6½; Universal Marine, 5½.

American Securities have been more freely dealt in, with a steady market. United States' Six per Cents have advanced 2; Atlantic and Great Western, ½; Erie Shares, 3; and Illinois Central, 1 per cent.

The dealings in the Railway Share Market have continued only moderate. On the whole, however, it has shown more firmness, and prices have been tolerably firm. Annexed are Thursday's official closing quotations:—

Ordinary Shares and Stocks.—Caledonian, 118; Great Eastern, 49½; Great Northern, 125½; Ditto, A Stock, 130½; Great Southern and Western (Ireland), 96; Great Western, 63⅜; Ditto, West Midland—Oxford, 40½; Lancashire and Yorkshire, 109⅞; London and Brighton, 107; London, Chatham, and Dover, 43½; London and North-Western, 106⅞; London and South-Western, 101⅞; Manchester, Sheffield, and Lincolnshire, 48; Metropolitan, 112½; Ditto, New, 8⅞; Midland, 128⅞; North British, 52; North Eastern—Berwick, 101½; Ditto, Leeds, 58½; Ditto, York, 88⅞; Ditto, Stockton and Darlington, 37½; North Staffordshire, 77½; North and South-Western Junction, 11½; South-Eastern, 95⅞.

Preference Shares.—Bristol and Exeter Four per Cent, 94½; Great Eastern Five per Cent, No. 2, 110; Great Western, Four-and-a-Half per Cent, 100; Ditto, West Midland—Oxford, 120; London and Brighton Seven per Cent, 156½; London, Chatham, and Dover, 93½; Midland—Leicester and Hitchin, 95; South Eastern—Reading Annuity, 23.

Lines Leased at a Fixed Rental.—Lancaster and Carlisle, 210½.

British Possessions.—Atlantic and St. Lawrence, 61; Cape Town and Dock, 102½; East Indian, 106⅞; Grand Trunk of Canada, 20⅞; Great Indian Peninsula, 108; Great Western of Canada, 10; Madras Four-and-three-Quarters per Cent, 100⅞; Melbourne and Hobson's Bay, 57½; Delhi, 105½; Ditto, 2½.

Foreign.—Antwerp and Rotterdam, 8⅞; Bahia and San Francisco, 18½; Dutch-Rhenish, 17½; Great Luxembourg, 11½; Sambre and Meuse, 8⅞; San Paulo, 8⅞; Ditto, 21½.

The return of the Bank of England for the week ending Dec. 10 shows the following results when compared with the preceding statement:—

A decrease of circulation of	£ 884,525	An increase of other Securities of ..	£639,770
An increase of public deposits of ..	1,304,062	A decrease of bullion of	89,853
An increase of other deposits of ..	56,731	An increase of rest of	34,741
An increase of Govt. securities of ..	2000	An increase of reserve of	789,727

The total circulation is £20,801,207; public deposits amount to £8,620,855; and private deposits to £12,581,276. Securities are £32,622,659; and the stock of bullion is £13,008,617.

THE MARKETS.

CORN EXCHANGE, Dec. 7.—The supply of English wheat on sale in to-day's market was only moderate; nevertheless, the demand for both red and white qualities was in a sluggish state, and previous rates were with difficulty supported. Foreign wheat—the show of which was not to say extensive—moved off slowly, on former terms. Floating cargoes, however, were held at very full prices. Malting barley commanded full currencies, with a steady inquiry; but grinding and distilling sorts were very inactive, at barely late rates. The malt trade was in a sluggish state, on former terms. The sale for oats was in a sluggish state, at about previous currencies. No change took place in the value of either beans or peas. The flour trade was in a sluggish state, at last week's prices.

Dec. 9.—The demand for wheat was very inactive, at about stationary prices. All other kinds of produce moved off slowly, at Monday's currency.

English.—Wheat, Essex and Kent, red, new, 41s. to 44s.; ditto, white, 42s. to 50s.; Norfolk and Suffolk, red, 41s. to 44s.; rye, 32s. to 33s.; grinding barley, 25s. to 27s.; distilling ditto, 28s. to 31s.; malting ditto, 26s. to 39s.; Lincoln and Norfolk malt, 60s. to 64s.; brown ditto, 50s. to 55s.; Kingston and Ware, 60s. to 64s.; Chevalier, 66s. to 68s.; Yorkshire and Lincolnshire feed oats, 18s. to 23s.; potato ditto, 22s. to 26s.; Youghal and Cork, black, 16s. to 20s.; ditto, white, 15s. to 23s.; tick beans, 29s. to 31s.; grey peas, 33s. to 35s.; maple, 35s. to 38s.; white, 35s. to 37s.; boilers, 36s. to 38s. per quarter. Town-made flour, 37s. to 40s.; town households, 33s. to 35s.; country marks, 28s. to 31s. per 280lb; French, 35s. to 38s. per sack; American, 19s. to 27s. per barrel.

Arrivals this Week.—English and Scotch: Wheat, 140; barley, 210; malt, 340; oats, 1170; flour, 290. Irish: Oats, 500. Foreign: Wheat, 5970; barley, 14,730; oats, 1180; flour, 910 sacks, 1240 barrels.

Seeds.—Clover seed and canary move off somewhat freely, at full prices. In all other seeds very little is doing, at late rates. Cakes are very inactive.

Linseed, English, crushing, 66s. to 70s.; Calcutta, 60s. to 65s.; hempseed, 40s. to 42s. per quarter; coriander, 10s. to 14s. per cwt.; brown mustard seed, 10s. to 13s.; white ditto, 8s. to 11s.; tares, 5s. 6d. to 6s. per bushel; English rapeseed, 62s. to 65s. per quarter. Linseed cakes, English, £9 15s. to £10; ditto, foreign, £9 2s. 6d. to £10; rape cakes, £5 to £5 15s. per ton; canary, 56s. to 60s. per quarter; red clover seed, 38s. to 72s.; white ditto, 54s. to 74s. per cwt.

Bread.—The prices of wheaten bread in the metropolis are from 6½d. to 7d.; of household ditto, 5d. to 6d. per 4lb. loaf.

Imperial Weekly Averages.—Wheat, 40s. 9d.; barley, 33s. 6d.; oats, 19s. 5d.; rye, 29s. 7d.; beans, 35s. 3d.; peas, 39s. 7d.

The Six Weeks' Averages.—Wheat, 40s. 1d.; barley, 33s. 10d.; oats, 19s. 2d.; rye, 29s. 2d.; beans, 35s. 10d.; peas, 34s. 4d.

English Grain sold last Week.—Wheat, 145,235; barley, 132,260; oats, 14,739; rye, 45; beans, 4543; peas, 2701 quarters.

Tea.—The public sales have gone off slowly, at about previous rates. Privately, very little business is doing, on former terms.

Sugar.—All raw qualities have changed hands slowly, and prices have had a drooping tendency. Refined goods are inactive, at barely late rates. The stock of sugar is now 76,617 tons against 67,922 tons last year.

Coffee.—The market, generally, is steady, and prices are well supported. Stock, 10,106 tons against 8529 tons in 1862.

Rice.—There is a fair inquiry for most kinds, at the late advance in the quotations. Stock, 44,113 tons, against 67,700 tons.

Provisions.—The demand for most kinds of Irish butter is steady, at full prices. Foreign qualities are firm, and the best Dutch are selling at 112s. per cwt. Bacon is heavy, and 1s. to 2s. per cwt. lower. Lard is firm; but all other provisions are a slow sale.

Tallow.—The trade is heavy, at further reduced rates. P.Y.C., on the spot, 41s. per cwt. Stock, 70,764 casks, against 76,909 casks last year. Rough fat, 2s. 1d. per 8 lb.

Oils.—Linseed oil is dull, at 36s. per cwt. both on the spot and for the first six months of 1864. Rape is selling at from £38 to £41 10s.; olive, £52 10s. to £59; and fine palm, £35. French turpentine, 63s. per cwt.

Spirits.—Rum is selling freely, at full prices. Proof Leewards, 1s. 8d.; proof East India, 1s. 7d. to 1s. 8d. per gallon. Brandy is offering at from 3s. to 11s. 4d.; Hambro' spirit, 1s. 4d. to 1s. 5d.; English ditto, grain, 1s. 10d. to 2s.; ditto, rice, 1s. 8d. to 1s. 9d.; and English gin, for export, proof, 2s. 9d. to 3s. per gallon.

Hay and Straw.—Meadow hay, £3 to £4 10s.; clover, £4 to £5 10s.; and straw, £1 6s. to £1 12s. per load.

Coals.—Best house coals, 20s. 6d. to 21s.; seconds, 18s. to 19s.; Hartley's, 15s. 3d. to 16s. 6d.; and manufacturers', 15s. to 16s. per ton.

Hops.—The demand is steady, and prices are well supported. English qualities range from 90s. to 160s.; and foreign, 70s. to 160s. per cwt.

Wool.—Most kinds are firm in price, but the trade generally is less active.

Potatoes.—The supplies are moderate, and the demand is inactive, at from 45s. to 95s. per ton.

Metropolitan Cattle Market (Thursday, Dec. 10.)—For the time of year, the supply of beasts on offer in to-day's market was tolerably good as to number, and in prime condition. The demand for all breeds was in a sluggish state, at barely Monday's currency. The top figure was 5s. per 8lb. The show of sheep was moderate but prime in quality. The mutton trade was in a sluggish state; and, in some instances, prices were rather drooping. The extreme quotation for Downs was 6s. per 8 lb. We have to report a dull sale for calves, at barely previous rates. Pigs were tolerably firm in price; but milch cows ruled heavy. Per 8 lb. to sink the offal:—Coarse and inferior beasts, 3s. 6d. to 3s. 10d.; second quality ditto, 4s. to 4s. 6d.; prime large oxen, 4s. 8d. to 4s. 10d.; prime Scots, &c., 4s. 10d. to 5s.; coarse and inferior sheep, 4s. to 4s. 6d.; second quality ditto, 4s. 8d. to 5s. 2d.; prime coarse-woolled sheep, 5s. 4d. to 5s. 8d.; prime Southdown ditto, 5s. 10d. to 6s.; large coarse calves, 4s. to 4s. 8d.; prime small ditto, 4s. 10d. to 5s.; large hogs, 3s. 6d. to 4s.; neat small porkers, 4s. 4d. to 4s. 6d.; suckling calves, 12s. to 20s.; and quarter-old store pigs, 20s. to 26s. each. Total supply: Beasts, 1800; cows, 120; sheep, 3700; calves, 105; pigs, 360. Foreign: Beasts, 420; sheep, 800; calves, 90.

Newgate and Leadenhall.—The supplies of meat are moderate, and the trade rules inactive as follows:—Beef, from 3s. to 4s. 4d.; mutton, 3s. 8d. to 4s. 6d.; veal, 4s. to 5s.; and pork, 3s. 6d. to 4s. 8d. per 8 lb. by the carcass.

ROBERT HERBERT.

THE LONDON GAZETTE.

FRIDAY, DECEMBER 4.

BANKRUPTS.

MARTHA SEALES, Jermyn-street, Haymarket, poulterer.—G. BARNARD, Leigh, Essex, baker.—J. RAMSDEN, Downham-road, Kingsland, and Aldermanbury, commission agent.—S. MONSTER CANDELABRUM.

WE give on page 593 an Engraving of the magnificent crystal candelabrum, by Messrs. Defries and Sons, of Houndsditch, City, which was shown at the International Exhibition of 1862 for a few weeks towards its close, and which deservedly gained for the manufacturers high honours and praise. This vast structure of glass is well proportioned, and the glass column gives to the upper portion of the work an appearance of beauty and solidity combined which is not always found in works of this description. The great shields let into the curved and concave panels near the base are in one piece, and with the great bowl are 36 in. in diameter. Above these spring the main branches, sixteen in number, each bearing a cluster of seven lights. From another large bowl, above these lights, spring six arms, each bearing clusters of seven lights—the total number of lights being 154. At the top of the candelabrum, which is 22 ft. high, is the Royal crown of England, in crystal and coloured glass. Five candelabra on the same gigantic scale, and marked by the same exquisite finish, with slight differences in some of the details, have been completed by Messrs. Defries, to adorn the new palace of his Highness the Rajah of Hyderabad and Nizam of the Deccan, at a cost of more than £20,000.

STATUE OF WILLIAM HARVEY.

THE fine statue, by Mr. Weekes, R.A., engraved on page 592, has just been erected in the court of the New Museum, Oxford. It forms one of the series of lifesize statues, in Caen stone, of men who have been most famous in each of the sciences which the museum is intended to illustrate, and that are in course of being placed before the piers which carry the pillars and arches of the arcades of the court. As a work of art, few of the companion statues already placed will, as far as our memory serves, bear any comparison with it. The conception has an extreme boldness yet perfect propriety very rare in sculpture: and it is realised with directness and effectiveness, and by sound, skilful modelling. The expression of the bowed head abstractedly following a chain of profound reasoning commenced on the heart held in the right hand, and now tracking the pulsations so anxiously felt for by the left, is the most appropriate it is possible to imagine. Even in such a quite secondary matter as the treatment of the costume of the James I. period the work would be noticeable for its avoidance of fritter and display. It may for a moment occur to some that the introduction into the representation even of William Harvey of a heart is a sin against æsthetics, similar in kind, though not in degree, to that committed by Rembrandt in his celebrated picture of the anatomist Nicholas Tulp dissecting and demonstrating on a dead body in the presence of his pupils. But we must remember that cold, colourless marble is as different from the realistic material of painting as the subjects are wide of each other in the possible shock they may give the spectator. And a moment's reflection will convince one that, with the limited means a sculptor has at command to give identity to such a personage as the discoverer of the circulation of the blood, the introduction of a heart was not only allowable but really "essential by compulsion." We have no doubt Mr. Weekes has consulted the best authority for the likeness—namely, the portrait of Harvey, by Cornelius Jansen, in the Library of the College of Physicians, and engraved by Hall; but a mere resemblance would not have had the moral force of the sculptor's representation, so well calculated to compel the most heedless to remember that he also is "fearfully and wonderfully made."

It may not be out of place to remark that the universal genius, Leonardo da Vinci, from one of those grand guesses at truth which *almost* anticipated many modern discoveries, and appear now almost like prophecies, seems to have had some notion of the true theory of the circulation of the blood. This does not at all, however, take from the merit of the complete discovery and demonstration of the heart's action by Dr. Harvey. He it was, who, reasoning from the valves of the veins, the structure of the heart, its auricles and ventricles, the pulmonary artery and aorta, concluded that the essential action of the heart is the propulsion of the blood in the contraction of the systole, and not in its diastole, as supposed by physicians before his time; he it was who proved the existence and operation of that most wonderful force and beautiful arrangement by which the blood is waking or sleeping, conveyed for purification to the lungs, thence returned to the heart, for that mighty organ to distribute, through the arteries, vital energy to the remotest and minutest corner of the system; the stream when exhausted of its principle of life, to be re-collected through the veins, and forced back to the heart, for reconveyance to the purifying oxygen inhaled in the lungs. This was Harvey's great but not only discovery; and, through the fundamental certainty it introduced into a large field of medical science, it conferred a most important boon upon all succeeding generations of humanity.

The statue was presented to the museum by Henry Vaughan, Esq., of Cumberland-terrace, Regent's Park.

STATUE OF THE LATE DUKE OF RICHMOND.

THE statue engraved on the next page, has been erected in the town of Huntly, in Aberdeenshire, and recently inaugurated to the memory of his Grace the late Duke of Richmond. As a memorial of a distinguished Peer, a soldier who had seen active service, and a well-known representative of a class of Conservative opinions in the world of politics, the statue to the late Duke has public interest. But it was for being that which gained for him the title of the "farmer's friend" that his memory will be most cherished. To this sentiment we owe the erection of the present statue. It is the result of subscriptions from the Duke's tenantry in the North, particularly from those on the large estates of Strathbogie, &c., near Huntly. At the recent inauguration of this statue a statement was read which, as illustrating the character of the deceased nobleman and presenting a contrast to the conduct of some other large landed proprietors, deserves repetition. After paying a tribute to the Duke's unfailing courtesy, mentioning the large sums sunk by him in the improvement of his estates and the development of agriculture, and his having been one of the first to encourage the introduction of railways, the reader went on to say that, though this encouragement of enterprises of all kinds of course improved and increased the value of the Duke's own property, his motives were not merely selfish, as the following facts will prove:—"At the time when the leases of the Gordon property came to be renewed, the public press teemed with notices of the great increase of rent obtained by other landlords who had not been making the same sacrifices for the improvement of their property; but the late Duke of Richmond was never for a moment moved from the course he had adopted—never induced to offer his land to public competition, but, as you (addressing the tenants assembled at the inauguration) all know, expressed his desire to see around him the same tenantry, contented and happy; and he showed that these were not mere kindly expressions, by entering into such fair and equitable arrangements with them as should give the best prospect of their future prosperity."

The statue occupies the centre of the square of Huntly. It is of Redhall freestone, and the figure is colossal, measuring 9 ft. in height. The Duke is represented in his uniform as Colonel of the Sussex Militia, his sword by his side, the Waterloo and Peninsular medals and Order of the Garter on his breast, and a scroll in the right hand. The pedestal, 12 ft. high, is of Auchindoir freestone, with tablets of polished Peterhead granite inserted in the plinth for the inscriptions. The front inscription is as follows:—"Erected as a memorial of Charles Gordon Lennox, fifth Duke of Richmond, by the tenantry of the lordship of Huntly." The sculptor—who has executed his task creditably—is Mr. A. Brodie, a rising Scotch sculptor, whose merit was early recognised by the late Lord Lansdowne, that great patron of sculpture having purchased Mr. Brodie's statue of "Memory," which we engraved, from the International Exhibition of last year.

STATUE OF THE LATE SIR WILLIAM PEEL, R.N.

NOT long since we noticed a statue of Captain Sir William Peel, by Mr. Theed, upon its being placed in Greenwich Hospital. The English people had felt that few could be found more worthy of national commemoration than the gallant young officer of the Naval Brigade, who met so untimely a death in India. The wish of the public was that a monument to Captain Peel should be raised; but, before this wish could take effect, a brother of Sir William, the Right Hon. Sir Frederick Peel, generously presented the statue alluded to, entirely at his own expense, to our national naval hall and gallery at Greenwich. Now, India—the country where Sir William's services and those of the Naval Brigade, which he ultimately commanded, were so important—has, headed by Lord Canning, demanded a statue of the young hero. The same sculptor has been selected for its execution; but the statue for India differs widely from the former work in the attitude selected. The first represented Captain Peel advancing and drawing his sword, as if about to lead a charge of his bluejackets. In the second, as will be seen in our Engraving on the next page, the figure is in repose, the right hand resting on an anchor and coil of cables, the left holding a telescope, thus more obviously indicating the subject as a naval officer. The first was suggestive of the brave and ardent character of the gallant Captain; the second renders the keen observation and directing intelligence of the commander, while at the same time it keeps more within the scope of the rigid material—marble rarely admitting of the successful expression of rapid action, though we are bound to say Mr. Theed went farther than usual towards conquering this difficulty in the first statue. The

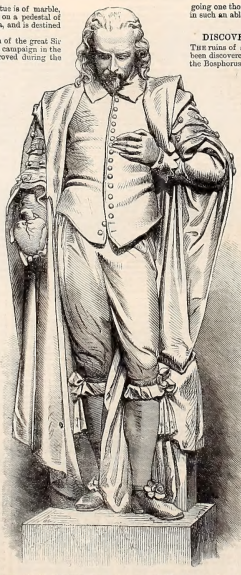
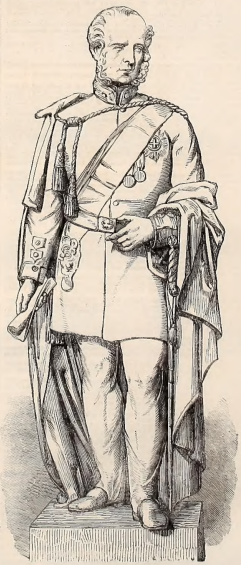
ikeness is in both works said to be quite satisfactory. The present statue is of marble, nd of colossal dimensions, measuring 8ft. 6 in. in height. It will stand on a pedestal of olished granite of similar height. The work has been shipped for India, and is destined o be placed in the Auckland Gardens, Calcutta.



We need scarcely remind the reader that Sir William was the third son of the great Sir obert Peel; that his personal bravery was signally displayed during the campaign in the Crimea, and that his capacity for command was quite as decisively proved during the going one thousand four hundred miles away from the sea, and afterwards carried it out in such an able and judicious manner."

DISCOVERY OF AN ANCIENT TEMPLE NEAR CONSTANTINOPLE,



THE ruins of an ancient temple, supposed to be the Temple of Jupiter Ourius, have lately been discovered by Dr. Millingen, of Constantinople, near the north-eastern extremity of the Bosphorus, at the s te generally known as the Genoese castles. It was in this ancient

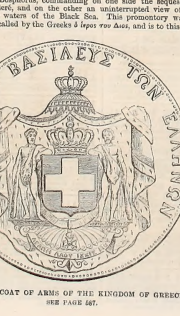
Indian mutiny; that he was very severely wounded in the thigh during the siege of Lucknow; but that his valuable life, when only thirty-three, was lost to the country, not from the effects of his wound, but from smallpox. Full particulars of the exploits during the Indian campaign of 1857-8 of Sir William Peel's naval brigade of the Shannon will be found in a published "Account" by Lieutenant E. H. Verney. "Sir William," says the writer, "was the mainspring of the machinery. He it was who first originated the idea of sailors

MAGNIFICENT CRYSTAL CANDELABRUM BY DEFRIES AND SON.—SEE PAGE 591.

fane or temple that Jason, the commander of the great Argonautic expedition, visited on a visit to King Phineas, as described by Herodotus, offered propitiatory sacrifices in order to obtain a favourable wind when on the far-famed voyage in quest of the Golden Fleece.

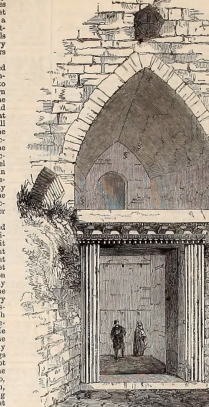
The situation of the castles is in itself one of great natural beauty, being on a bold promontory which runs out from the Asiatic shore of the Bosphorus, commanding on one side the sequestered Bay of Buyukderé, and on the other an uninterrupted view of the ever-changing waters of the Black Sea. This promontory was in former times called by the Greeks *ἀ Ἱερὸν τὸ Ἄκρον*, and is to this day known among the Turks as Hieros Kalessi, or the sacred castle. Dionysius Byzantius distinguishes the locality by terming it "Clavum Fonti," and describes it as being, as in fact it is, the narrowest part of the Bosphorus, across which a chain was formerly thrown interoipting all navigation and which vessels could only pass on paying the heavy toll demanded of them by the holders of these formidable straits.

The Genoese castles, so misnamed from the fact of their being once occupied by the Genoese, are supposed to have been built subsequent to the reign of Constantine the Great, about the period of the lower Roman empire, and were doubtless in their days of great strength and importance. They still possess much to interest both the archæologist and the lover of the picturesque, from the natural beauty of the situation and the manner of their structure. Over the gateway of the citadel may be seen a Byzantine cross inlaid in the castle wall, whilst amid the entwining ivy on the right-hand tower may be discovered a slab of marble, with the following inscription in Greek characters—"The light of Christ shines o'er all."



From the numerous marble slabs used in the construction of the towers, evidently taken from another edifice, it occurred to Dr. Millingen that here might be found some traces of the ancient Temple of Jupiter Ourius, and whilst carrying on some investigations, on July 18 last, he almost accidentally noticed that the stone in front of the old citadel was one of extraordinary size, and that it extended to some distance beneath the castle walls on each side; it was, moreover, somewhat remarkable, as being of pure marble. He accordingly commenced clearing the ground, when one of his sons suddenly exclaimed that he had found several eggs beneath the surface, but that he could not extract them! This at once proved to the learned Doctor that the marble slab, measuring some 12 ft. 6 in. in length, was architecturally carved; and, fearing to injure the work by rash or imprudent digging, he at once communicated a resumé of his observations to the British Museum, and solicited assistance for the undertaking. A prompt and favourable answer was forwarded to Constantinople to the effect that, if Sir Henry Bulwer could obtain permission from the Ottoman Government to clear the supposed structure, the British Museum would give all the necessary pecuniary assistance. But the Porte, fearing either that the ground contained hidden treasure, or that the relics would be removed to England, declined to accede to the request; but at same the time gave Dr. Millingen permission to clear the ground, and promising to advance sufficient means to defray the expenses.

The season of fine weather fast drawing to a close, Dr. Millingen was most anxious to carry on his researches before winter should set in; and, knowing how dilatory the Turks are in fulfilling their pecuniary promises, he at once set to work, and, after much care and labour, threw open the magnificent portal, of which we offer our readers an Engraving.



The lintel, as before stated, is 12 ft. 6 in. in length by 6 ft. broad, whilst the two upright columns are about 18 ft. high, and rest on a fourth block, or threshold, of marble of equal dimensions with the lintel. These massive stones are all of pure Parian marble, the lintel itself being exquisitely carved, though from the nature of the ground under which it has remained buried for so many years, and from the evident remains of the castle gateway it must formerly have been used as the doorstep of the entrance to the citadel.

Further investigations are being made in the interior of this Acropolis, with the view of ascertaining if any other portions of the temple still exist; and during the past month the work has been visited by many distinguished residents in Constantinople, including the Hon. E. M. Erskine, Secretary to the British Embassy; the English Consul-General, the Austrian Internuncio, and the French Ambassador.

It is to be hoped that Dr. Millingen will meet with all possible encouragement in this great undertaking; which will doubtless prove a most interesting addition to the annals of archæology.

THE NEW COAT OF ARMS OF THE KINGDOM OF GREECE, SEE PAGE 567.

PORTAL OF AN ANCIENT TEMPLE ON THE ASIATIC SHORE OF THE BOSPHORUS.

STEPNEY NEW MEETING HOUSE.

THIS chapel was recently opened for the church and congregation formerly worshipping at the Stepney Old Meeting House. The new building is in the Decorated style of Mediæval architecture, and is 96 ft. long and 57 ft. wide, affording accommodation for 1350 persons—740 on the ground floor, and in the side and end galleries 610. There are seven doors leading to the chapel and four stone staircases to the galleries, two in front and two in the rear of the building. The galleries have been so arranged as to look very light, as the front is perforated and the pews are kept as low as possible. The walls are faced with Kentish rag, with Bath stone dressings. The large front window and all the tracery of the side windows are filled with stained glass, by M'Millan and M'Donald, of Camden-town. The chapel is lighted with stars in the roof and a new kind of globe-light under the galleries, by Mr. Longman, of Sussex-square. The contract was taken by Messrs. Dove Brothers, at £7805, to which is to be added the cost of the spire and other matters, making a total of £9760. The architects were Messrs. Searle, Son, and Yelf, of Bloomsbury-street.

The church recently meeting at the Stepney Old Meeting House is now 218 years old. It was formed by six persons; and Henry Burton, who had been the Rector of St. Margaret's, Friday-street, was appointed pastor of this small congregation. This Henry Burton was one of the Evangelical ministers who fearlessly denounced the tyrannical innovations of Archbishop Laud. For this offence he was charged before the Star Chamber with sedition. He was convicted according to the law and practice of that Court, and was sentenced to have his ears cut off, to stand in the pillory at Westminster, and then to be imprisoned in a distant castle. The cruel sentence was executed. Henry Burton regained his liberty in the days of the Long Parliament. His prison studies converted him to Independency. When he came out of prison he was received all the way from Hounslow with a perfect ovation; the people greeted him as if he were a mighty conqueror. It was seven years after he had stood in the pillory that he went to Stepney and presided over the six persons who here constituted themselves into a Church of the Lord Jesus Christ. Of the six there is one, whose name was famous at the time, of the name of William Greenhill. In 1674 Matthew Mead and his friends built the meeting-house which has recently been removed. Some years before this period Mead had been compelled to retire into Holland to escape persecution in England, and had there been a co-pastor of the English exiles at Utrecht with John Howe, the prince of Puritan divines. He was held in such esteem that the States General of Holland sent him four large pillars to support the roof of his meeting-house. These, when removed the other day, were found in a state of almost perfect preservation. The place was so constructed as to be easily converted into dwelling-houses, should a necessity arise. Provision was made between the roof and the ceiling to ensure secrecy in seasons of surprise and intrusion. There was a trap-door, with an alarm-bell, which led to a suite of apartments over the ceiling, where the church was accustomed to conduct its devotions in perfect retirement. These apartments were inspected with much interest by some thousands of visitors the week before the place was pulled down in August last.

Two or three years ago it was found that either the Old Meeting House must be repaired and remodelled, at a cost of probably from £2000 to £3000, or a new one must be built. The Rev. John Kennedy, the pastor, and friends resolved on the latter alternative, and have now the happiness of seeing a new structure completed on a site immediately adjoining that of the old.

STEPNEY NEW MEETING-HOUSE.

*** *The charge for the insertion of Births, Marriages, and Deaths is Five Shillings for each announcement.*

BIRTHS.

On the 15th Oct., at Belmont House, Rangoon, the wife of George Bulloch, Esq., of a daughter.

On the 25th Oct., at Montevideo, the wife of James Fair, Esq., of a son.

On the 9th inst., at Upper Tooting, the wife of Alderman Rose, of a son.

On the 6th inst., at Barkby Hall, Leicestershire, the wife of P. Godfrey Chapman, Esq., of a daughter.

MARRIAGES.

On the 7th Oct., at Holy Trinity Church, New Westminster, British Columbia, by the father of the bride, assisted by the Rev. C. T. Woods, M.A., Henry Spencer Palmer, Lieutenant Royal Engineers, youngest son of the late Colonel J. F. Palmer, Madras Army, of Bath, to Mary Jane Pearson, eldest daughter of the Venerable H. P. Wright, M.A., Archdeacon of Columbia, Chaplain to the Forces, and Chaplain to his Royal Highness the Duke of Cambridge. No cards.

On the 3rd inst., at Holy Trinity, Lee, by the Rev. D. Harding, M.A., assisted by the Rev. B. W. Bucke, M.A., Incumbent, George Bohun Brown, Esq., Paymaster Royal Navy, late of Ilhas das Cobras, Rio de Janeiro, to Louisa Julia, second daughter of Charles Mouat, Esq., of Dacre House, Lee, Kent. No cards.

DEATHS.

On the 2nd inst., at the Royal Crystal Palace Hotel, Norwood, to the inexpressible grief of his family, John Ayscough, Esq., Admiral of the Red, aged 89.

On the 7th inst., at St. James, Bridgnorth, Shropshire, Ann, the beloved wife of John J. Smith, Esq., aged 74.

On the 7th inst., at 9, Blandford-square, Frances Clarinda, eldest daughter of J. E. Wallis, Esq., aged three years and six weeks.

On the 9th inst., at her residence in Queen-square, W.C., Charlotte Elizabeth, wife of T. N. R. Morson, of Southampton-row and Hornsey-road, aged 66.

ROYAL ENGLISH OPERA, COVENT-GARDEN.—Under the Management of Miss LOUISA PYNE and Mr. W. HARRISON.—On Monday and during the Week Balfe's successful Opera BLANCHE DE NEVERS—Miss Louisa Pyne, Mr. W. H. Weiss, and Mr. W. Harrison. To conclude with the Second Act of THE DESERT FLOWER. Doors open at Half-past Six; commence at Seven.—On BOXING NIGHT, Dec. 26, a New Grand Christmas Pantomime, by Henry J. Byron, entitled ST. GEORGE AND THE DRAGON, on a scale of unprecedented magnificence.

THEATRE ROYAL, HAYMARKET. Last Nine Nights of Mr. and Mrs. Charles Mathews. MONDAY, DEC. 14, and on TUESDAY and WEDNESDAY, at Seven, A GAME OF SPECULATION. Affable Hawk, Mr. Charles Mathews. After which, THE GOLDEN FLEECE. To be followed by UN ANGLAIS TIMIDE; otherwise, Cool as a Cucumber, in which Mr Charles Mathews will appear in the character performed by him in the French language in Paris for forty nights. Concluding with MY HUSBAND'S GHOST. On THURSDAY, FRIDAY, and SATURDAY (by desire), USED UP. Sir Charles Coldstream, Mr. Mathews. THE GOLDEN FLEECE, and UN ANGLAIS TIMIDE. On BOXING NIGHT, DEC. 26, Mr. Sothern will reappear in his famous character of Lord Dundreary, in OUR AMERICAN COUSIN, With a NEW CHRISTMAS EXTRAVAGANZA.

NEW THEATRE ROYAL, ADELPHI. Sole Proprietor and Manager, Mr. B. WEBSTER. Eleventh Week of Miss Bateman in the new play of LEAH. On Monday and during the Week, THE PRETTY HORSEBREAKER. Messrs. J. L. TOOLE, P. Bedford, and Miss Woolgar. LEAH. Miss Bateman. And, ICI ON PARLE FRANCAIS. Mr. J. L. Toole. Commence at Seven.

ROYAL LYCEUM THEATRE.—Under the sole management of Mr. FECHTER.—THIS EVENING, MONDAY, and during the Week, a Comedietta by W. Gilbert, entitled UNCLE BABY—Messrs. Widdicombe, Shore, Charles, Miss P. Leclercq, and Miss Carlotta Leclercq. After which, at Eight o'Clock, BEL DEMONIO, a Love Story, in Twelve Tableaux. Principal character, Mr. Fechter; supported by Messrs. Jordan, Charles, Brougham, Emery, Raymond, Moreland, Collett, Miss Kate Terry, Lavenue, Mrs. Lee, and Miss Elsworthy. Box-office open daily from Eleven till Five.

ST. JAMES'S THEATRE ROYAL, under New Management, will OPEN for the WINTER SEASON on BOXING NIGHT.

CRYSTAL PALACE.—SPECIAL CHILDREN'S ATTRACTIONS.—Week ending Dec. 19.—Open from Ten till Six. Admission, One Shilling. Children under Twelve, Half-price.

Nadar's Géant Balloon, Compensator, and Car in the Centre Transept.

Orchestral Band at 12.30 and 4, in the Concert-room—Solos on the Cornet by Mr. Levy; Clarinet, Mr. Papé. Herr Susman at 1.30. Mons. Wohlgemuth at 3. Great Organ Performance at 5.15 daily.

Desanges' Victoria Cross Gallery and Great Picture Gallery.

Great Fancy Fair in the Naves and Transepts. A large proportion of the articles are manufactured at the Palace, and may be purchased at wholesale prices.

Saturday—Concert, Half-a-Crown.

CRYSTAL PALACE.—JUVENILE DAYS. MONDAY NEXT and during the Week, Nadar's Géant Balloon; Mons. Wohlgemuth, the conjuror; Herr Susman, the extraordinary imitator of song-birds; and Great Fancy Fair.

Great choice of carriages. All kinds of goods, including china, porcelain, and Parian ware; British, Bohemian and other fancy glass, in great variety; French goods, fancy and other stationery, juvenile and gift books, ivory-work, the most extensive assortment of plated goods, jewellery, cutlery, juvenile toys and games, and every other article suitable for Christmas presents may be purchased.

Palace open for admission from Ten till Six (5.35 train from London Bridge). Palace lighted up at dusk.

One Shilling; Children, Half-price.

Trains from Victoria, London Bridge, Kensington, Euston, North London, and intermediate Stations. See Time-bills.

CRYSTAL PALACE.—THIS DAY. NADAR'S MONSTER BALLOON, "Le Géant," which ascended from the Champ de Mars, Paris, and passed over Germany, Belgium, and Holland, descending in Hanover, is now exhibited, with COMPENSATOR attached, inflated to its full dimensions, in the Great Transept.

CRYSTAL PALACE.—Great FANCY FAIR and BAZAAR for the SALE of all kinds of useful and fancy goods, many of them manufactured in the palace. An immense variety of articles suitable for Christmas and juvenile presents.

CRYSTAL PALACE.—CARRIAGES.—The newest designs and best constructed Carriages by nearly fifty of the most eminent builders may be inspected or purchased in the Crystal Palace Carriage Department.

NADAR'S BALLOON.—The Colossal Car, with its various fittings and appliances, is also on view. Visitors with children may pass through the Car and inspect its interior arrangements, during this week only, free of charge.

CHRISTMAS and JUVENILE PRESENTS. GREAT CHOICE at the CRYSTAL PALACE.

CRYSTAL PALACE.—SPECIAL ATTRACTIONS, commencing MONDAY NEXT, DEC. 14. Mons. H. Wohlgemuth, pupil of the celebrated Conjuror, Robert Houdin, will perform a selection of his most interesting experiments in Physical and Natural Magic daily, at Three o'Clock.

Herr Susman, the wonderful imitator of birds and animals, will perform, at Half-past One, in the Concert-room. Nadar's Géant Balloon, Compensator, and Car in the Centre Transept. Visitors with children admitted free to view the interior of the Car. Palace open from Ten till Six for admission. Lighted up at dusk.

Admission, One Shilling.

MR. GERMAN REED'S OPERA DI CAMERA ENTERTAINMENT, entitled JESSY LEA (written by John Oxenford, Esq., and composed by G. A. Macfarren, Esq.). Jessy Lea, Miss Edith Wynne; Gilbert Ashford, Mr. Whiffin; Hugh Tempest, Mr. Wilkinson; and Elspeth, Miss Poole. Scenery (Dungeness) by Mr. John O'Connor. Royal Gallery of Illustration, 14, Regent-street. Every Evening (except Saturday) at 8. Saturday Afternoon at 3.

THE INTELLECT AND VALOUR OF BRITAIN.—This Great PICTURE of the most illustrious men of the present era, painted from life, by T. J. Barker, Esq., K.L.H., is now ON VIEW at Messrs. HAYWARD and LEGGATT'S, 79, Cornhill. Admission, from Ten to Five, on presentation of private address card.—N.B. The Picture is illuminated by the patent Sun-light Burner.

MDME. TUSSAUD'S HISTORICAL GALLERY. Established 28 years at the BAZAAR, Baker-street. New Addition. A full-length Model of the Wretched Man, SAMUEL WILLIAM HUNT, is now added to the Chamber of Physiognomy. Open from Eleven a.m. till Ten p.m.

Admittance, 1s. Extra Rooms, 6d.

SACRED HARMONIC SOCIETY, EXETER HALL.—Conductor, Mr. COSTA. FRIDAY NEXT, DEC. 18, will be repeated the THIRTY-SECOND ANNUAL CHRISTMAS PERFORMANCE OF HANDEL'S "MESSIAH." Principal Vocalists—Mdme. Parepa, Mdme. Sainton-Dolby, Mr. Sims Reeves, Mr. Renwick, and Mr. Patey.

The Band and Chorus on the most extensive scale available in Exeter Hall, will consist of—including sixteen double basses—seven hundred performers.

Tickets 3s., 5s., and Stalls, 10s. 6d. each; at the Office, No. 6, Exeter Hall. Post Office orders payable to Mr. James Peck.

MONDAY POPULAR CONCERTS, ST. JAMES'S HALL.—MONDAY NEXT, DEC. 14, last Appearance but One of M. LOTTO. Beethoven's Septet (by desire). Executants, Lotto, Lazarus, C. Harper, Winterbottom, H. Webb, Paque, Severn, and Ries. Pianoforte, Mdme. Arabella Goddard. Vocalists, Mdme. Rudersdorf and Mr. Sims Reeves. Conductor, Mr. Benedict. Sofa Stalls, 5s.; Balcony, 3s.; Admission, 1s. Chappell and Co., 50, New Bond-street; and Austin's, 28, Piccadilly.

EXETER HALL.—THE MESSIAH on WEDNESDAY NEXT.—Grand Performance by the NATIONAL CHORAL SOCIETY. Band and Chorus 700. Conductor, MR. W. G. MARTIN. MR. SIMS REEVES and other eminent Artistes. Organist, Mr. John G. Boardman. Commence at 7.30. STARCH MANUFACTURERS
TO H.R.H. THE PRINCESS OF WALES.
GLENFIELD PATENT STARCH, used in the Royal Laundry, and awarded the Prize Medal, 1862.

DR. DE JONGH'S
(Knight of the Order of Leopold of Belgium)
LIGHT-BROWN COD-LIVER OIL,
prescribed by the most eminent Medical Men throughout the world as the safest, speediest, and most effectual remedy for
CONSUMPTION, CHRONIC BRONCHITIS, ASTHMA, COUGHS, RHEUMATISM, GOUT, GENERAL DEBILITY, DISEASES OF THE SKIN, RICKETS, INFANTILE WASTING, AND ALL SCROFULOUS AFFECTIONS,
is incomparably superior to every other variety.

SELECT MEDICAL OPINIONS.
Sir HENRY MARSH, Bart., M.D.,
Physician in Ordinary to the Queen in Ireland.
"I consider Dr. DE JONGH'S Light-brown Cod-liver Oil to be a very pure Oil, not likely to create disgust, and a therapeutic agent of great value."

DR. GRANVILLE, F.R.S.,
Author of the "Spas of Germany."
"Dr. Granville has found that Dr. DE JONGH'S Light-brown Cod-liver Oil produces the desired effect in a shorter time than other kinds, and that it does not cause the nausea and indigestion too often consequent on the administration of the Pale Oil."

EDWIN CANTON, Esq., F.R.C.S.,
President of the Medical Society of London, &c., &c.
"For several years past I have been in the habit of prescribing Dr. DE JONGH'S Light-brown Cod-liver Oil, and find it to be much more efficacious than other varieties of the same medicine which I have also employed with a view to test their relative superiority."

DR. DE JONGH'S LIGHT-BROWN COD-LIVER OIL is sold only in Imperial half-pints, 2s. 6d.; pints, 4s. 9d.; quarts, 9s.; capsuled and labelled with his stamp and signature, WITHOUT WHICH NONE CAN POSSIBLY BE GENUINE, by respectable Chemists and Druggists.
SOLE CONSIGNEES,

CRAMER'S PIANOFORTE GALLERY, 207 and 209, Regent-street the largest in Europe). The most varied assortment of Pianofortes by all the best makers. The new model Pianofortes, in handsome woods, and fitted equal to grand pianofortes. Pianofortes of the very lightest class are particularly suitable for India and the Colonies. Every article of exchange, without loss to the buyer, may thus within six months, be changed for a more expensive one. Lists of prices may be had through friends in the country.
Pianofortes by every maker of eminence will be found in the Gallery.

CRAMER'S ENGLISH PIANETTE, at 22 guineas.—Cramer, Wood, and Co. manufacture this stylish and elegant little Pianoforte, with the best repeating action, solid touch, agreeable and powerful tone. The case is of polished ash. In practising on this Pianoforte the fingers of the player will be strengthened much more rapidly than on an old instrument, loose to the key and worn in the bearings. In rosewood, with trichord treble, 25 guineas.
Purchasers of second-hand Pianofortes may be assured that this instrument has not the recurrent or elastic action, but the double or check action, and that it is not liable to get out of order. Also the only manufacturer known of in Ragland.—207 and 209, Regent-street.

CRAMER'S INDIAN PIANOFORTE. Cramer, Wood, and Co. manufacture for India a superior COTTAGE PIANOFORTE, in solid Mahogany, with metallic plate, trichord treble, repeating action, and check action, of extreme elevation. Nothing has been left under to the glasses. The mechanism of the Instrument as well as the Case has been secured throughout by screws. Tortoise-shell and ebonites have therefore been bestowed upon the manufacture, and they have obtained the highest recommendations for their excellent quality of tone and durability.
Cramer, Wood, and Co. deliver these Instruments free, packed in case lined with zinc, at any home port, for 50 guineas.—Height, 3 feet 11½ inches; width, 4 feet 4½ inches; depth, 2 feet 3 inches. Packing-case, 2 feet 6 inches by 4 feet 10 inches.

THE NEW PIANOFORTE.—CRAMER'S NEW PIANOFORTE, 50 guineas in Rosewood and 55 in Walnut.
Applicable to every purpose for which a Pianoforte is used; unsurpassing in quality of tone; and unrivalled in its touch.
Advantages to the Vendor.—Height diminished to 4ft. 2 in., forming one of the most convenient cottages which can be had, affording increased convenience to the accompanist, together with elegance of appearance.
It is the identical Instrument pronounced by the Judges of the public Cramer, Wood, and Co. may be permitted to observe that it is without exception the most perfect quality of tone, precision and elasticity of touch, durability of tuning, and the capacity to stand in any climate, that has ever been produced by any maker. Eight of these Pianofortes are out by the same workmen of the amateur. In the one case there is no hardness, and in the other he has not any tendency to become hard. Cramer, Wood, and Co. solicit attention, as remarkable, to the very best description being constructed by the same workmen, and under the same roof as the Grand Pianofortes of the Firm, there being fitted to the case, also the full grand. Cramer, Wood and Co. guarantee these instruments for any climate, and will exchange them within six months for any of the country purchasers, subject to the deduction of only £10.
Pianoforte Gallery, 207 and 209, Regent-street.
The largest in Europe.

PIANOFORTES by Broadwood, Collard, or Erard, for SALE or HIRE.—At CRAMER'S PIANOFORTE GALLERY, 207 and 209, Regent-street.

SECONDHAND PIANOFORTES. CRAMER, WOOD, and CO. have a number of 12GUINEAS, 15 GUINEAS, 20 GUINEAS, and 25 GUINEAS Pianofortes.
Cramer, Wood, and Co. are enabled to recommend them as of a sound and instrument, whether or not the hammers have been renewed. Cramer, Wood, and Co. will exchange them without the slightest reserve, and warrant every instrument they sell.
207 and 209, Regent-street.

REPAIRING PIANOFORTES. CRAMER, WOOD, and CO. give great attention to this Department of their business, and have a number of workmen for the purpose. Every article is to be new, or taken from mechanism.
207 and 209, Regent-street.

TUNE YOUR PIANOFORTES by the CHROMATIC SCALE.—CRAMER, WOOD, and CO. have a staff of experienced TUNERS are well known to the Musical Public.
207 and 209, Regent-street.

HIRE of PIANOFORTES.—CRAMER, WOOD, and CO. Hire Pianofortes by the Night, Week, or Month, and allow the Subscription to be Absorbed in case of Purchase. A large number of entirely new Instruments now ready to be sent out.
207 and 209, Regent-street.

PIANO MÉCANIQUE.—CRAMER, WOOD, and CO. are happy to announce that they have a few of these Pianofortes for SALE, fitted with a keyboard, similar to the ordinary Pianoforte, and with the mechanism complete. The instrument is very strongly made, and warranted to stand any change of climate. Price 100 guineas.

SIX-GUINEA HARMONIUMS.—CRAMER, WOOD, and CO. are playing the best 6 guinea Harmonium. Unlike the ordinary Paris Harmonium, it is put together with a thoroughness which will make it last for many years, and of remarkable power. Polished oak case.—201, Regent-street.

CRAMER, WOOD, and CO.'S GENERAL PIANOFORTE DEPARTMENT is under the direction and varied to be found in London. Prices from 6 to 100 guineas.
207 and 209, Regent-street.
The largest in Europe.

CRAMER'S ARTIST'S CONCERTINA, manufactured under the immediate superintendence of Mr. Richard Blagrove, possesses many of the best features of the various systems, combining facility of articulation, and general perfection of mechanism, those important requisites in the Concertina, which have rendered the Cramer and Wheatstone systems so deservedly popular, are retained in this instrument, including cane.—Cramer, Wood, and Co., 201, Regent-street.

ROOM IN CRANE-COURT, FORMERLY THE MEETING-PLACE OF THE ROYAL SOCIETY.

THE PRESENT MEETING-ROOM OF THE ROYAL SOCIETY IN BURLINGTON HOUSE.

THE ROYAL SOCIETY.

LAST year the Royal Society had been established just two hundred years; and on the 30th ult. (St. Andrew's Day) the Society held its two hundredth anniversary meeting. In its Journal-book we read that on the 30th of November, 1663, the society "met in a solemn manner," to elect officers, at nine a.m.; and celebrated their anniversary by dining together. John Evelyn, in his "Diary" says, under the above date:—"It being St. Andrew's Day, who was our patron, each Fellow wore a St. Andrew's cross of ribbon on the crown of his hat. After the election we dined together, his Majesty sending us venison." The attendance at the anniversary meeting just passed was unusually large; and the address of the president, Major-General Sabine, and the presentation of the medals, contributed to render this a very memorable meeting, independently of its bicentenary association: the enthusiasm at the dinner, which took place in the evening, was also of like fervour. It is peculiarly gratifying to record such warmth in the proceedings of this venerable parent society of the scientific institutions of England, more especially as its history is chequered with adverse migrations: some fifty years ago a needless alarm was felt for its welfare, and even then it was feared the offshoots of the society would weaken the parent tree. Such were the alarms of Sir Joseph Banks, who was president of the society for nearly half a century. What would the zealous chairman have apprehended from the sundry and manifold subdivisions of science which have taken place since his decease, in 1820—a little month after he had resigned the chair: for, notwithstanding the increase of new societies, incalculable beyond Sir Joseph's apprehension, the Royal Society continues to flourish, and the number of candidates for admission to its fellowship is yearly on the increase.

At this congratulatory epoch it may be appropriate and interesting to illustrate the past and present location of the society and briefly sketch its history.

The Royal Society is the oldest society of its kind in Europe, except the Lyncean Academy at Rome, of which Galileo was a member. The Royal Society originated in London, about 1645, in the weekly meetings of divers inquisitive philosophical persons, especially as regarded "the new philosophy, or experimental philosophy." This is supposed to be the club which Mr. Boyle, in 1646, designated "the Invisible or Philosophical Society," or "the Invisible College." They met at Dr. Goddard's lodgings in Wood-street, at the Bull-head Tavern, Cheapside, and at Gresham College. About 1648-9 some of the members seceded, to meet at Oxford, at Sir William Petty's lodgings, in an apothecary's house, "because of the convenience of inspecting drugs." Meanwhile, other members in London continued to meet, until, in 1658, they were ejected from Gresham College, which was required for barracks. Evelyn, Cowley, and Sir William Petty had their separate plans for a "philosophical college;" the poet Cowley got the start of the more practical philosophers in the race for the formation of the society, and subsequently sung its *carmen triumphale*. After the calm of the Restoration, in 1660, the meetings were revived at Gresham College, where certain members agreed to meet in term-time, and in the vacation at a member's chambers in the Temple; each member paying ten shillings admission and one shilling weekly, whether present or absent. Charles II. took great interest in these early proceedings, and this is said to have been the only wise act of his life. In 1662 he granted to the society its first charter: it is on four sheets of vellum, and has on the first sheet ornamented capitals and flowers, a finely-executed portrait of Charles, in indian ink; and appended to it is the Great Seal, in green WAX.

Next year, 1663, the King granted a second charter, which is of greater importance than the first, and Charles presented the society with the silver-gilt mace at present in their possession: this was said to be the identical "bauble" mace turned out of the House of Commons by Oliver Cromwell—until, in 1848, Mr. Weld, then librarian of the society, set the real truth before them. From this session date the *Philosophical Transactions*, wherein the proceedings and discoveries of the society are registered. In 1664 the King signed himself in the charter-book as the founder. The first charter, we may here mention, empowers the president to *wear his hat* while in the chair: and the Fellows addressed the president bareheaded till he made a sign for them to put on their hats—customs now obsolete.

In 1667 Chelsea College was obtained to the society for their meetings, laboratory, repository, and library; but the nuisance of Prince Rupert's glasshouse adjoining soon compelled the Fellows to vacate the college building, also too dilapidated. They then resumed their meetings in Gresham College, until they were dispersed by the Great Plague and Fire, after which they met in Arundel House, in the Strand. The Fellows now (1667) numbered 200, and their subscription was 1*l.* per week, from payment of which Newton, who joined the society in 1674, was excused, on account of his narrow finances: in this year he made his first communication to the *Transactions* of discoveries made by him in 1666.

In 1674 the society returned to Gresham College; and here they were fiercely accused of attempting to undermine the Universities, and to bring in Popery, &c.; but, a severer satire upon them was "The Elephant in the Moon," by Butler. Among their early practices was the Fellows gathering May-dew, and experimenting with the divining-rod; and Boyle believed in Greatrix's touching for the Evil. In 1686 Newton presented his "Principia" to the Society, whose clerk.

THE VICEREGAL PROGRESS IN THE HIMALAYAS: LORD ELGIN AND SUITE CROSSING THE RIVER BEEAS ON MUSSUCKS (INFLATED BULLOCK SKINS).—SEE NEXT PAGE.

Hadley, the astronomer, printed the work. The MS. entire in Newton's hand, is preserved in the library.

In 1703 Sir Isaac Newton was elected president. In 1710 the society purchased the house, of Dr. Brown, at the top of Crane-court, Fleet-street, "being in the middle of the town and out of noise." This house was built by Wren, after the Great Fire of 1666, upon the site of the mansion of Dr. Nicholas Barbon. This new purchase was considered unfortunate for the society. The house required several hundred pounds' repairs; the rooms were small and inconvenient compared with those of Gresham College; and the removal led to the separation of the Society from the College Professors, after being associated for nearly fifty years. Then the house in Crane-court, "though fair and handsome, did only begin to appear decent a long court, and "in a heavy rain a man could hardly escape being thoroughly wet." The house had a garden, which was a blessing. There is a small hall on the ground floor, and a passage from the staircase into the garden, fronting which are the meeting-room, 25ft. by 16 ft., and the library. In the latter was preserved the museum, wherein the society met from 1710 till 1757. It is preserved intact, and a new museum is the room in which Newton and others assembled. Indeed, he seems to have been elated with the removal here, notwithstanding it was a less commodious and observatory than Gresham-house. However, there were three other rooms on the second floor; garrets, and a platform of lead over them; and cellars, "spacious and better" than at Gresham College. The library and museum were removed here: the latter numbered several thousand specimens, the list of which fills forty pages of Hutton's "Philosophical Trans." The house, formerly included the present No. 8, in which was kept the society's library. In modern times, the Royal Society has occupied Somerset House, and then sold the Crane-court house to the Scottish Hospital and Corporation, who now occupy it. Of the other learned and scientific institution the anniversary was celebrated on the 30th ult., under the able presidency of Lord Palmerston, with the brilliant result of the addition of £1,000 to the hospital funds.

The meeting-room is embellished with a pair of fluted columns, and has an entablature of Corinthian order, with modillions. The portraits of the Duke of Lauderdale, by Loly; Mary Queen of Scots by Zucchero; the Earl of Bedford; the Duke of Buccleuch, the second Duke of Sutherland; Keith Milnes, Esq.; James, third Duke of Montrose; the Scottish Regalia; and a large whole-length portrait of William the Conqueror, and reproductions of the Bayeux Tapestry, by Mr. Pether, who gave a copy of a portrait which Wilkes painted for King William. The meeting-room is approached by a large staircase and hall, upon the site of Dr. Barbon's garden; this is now the chapel of the corporation.

Upon the removal of the Royal Society to Somerset House they transferred most of their valuable curiosities to the Royal Society. For their meeting-room they had assigned to them a noble apartment in the east wing of the north front of Somerset House; it has an enriched ceiling, by Pierce, and here they still meet on the 30th of November, until the close of Sir Joseph Banks's presidency. The chair, canvas with the arms of the society, and the table are still in the room, and upon the walls were hung the portraits of presidents, &c. In the room were portraits of Sir Joseph Banks, Dr. Wollaston, Sir Humphry Davy, Mr. Davies Gilbert, the Duke of Sussex, the Marquis of Northampton, the Earl of Rosse, and Lord Wrottesley. And in 1857 the society moved to Burlington House, which had recently been purchased by the Government, their meeting-room at Somerset House was given up, and the library and the museum were hid hitherto occupied the adjoining rooms.

In "Building, the fair palace," which Sir W. Chambers describes as "one of the finest pieces of architecture in Europe," the Royal Society were now located a large apartment in the western wing of the mansion, fitted up as their meeting-room. Here, in the elegant suite of rooms, with ceilings painted by Ricci, the president holds his anniversary meeting. Here, in the apartment to the left, immediately received the fellows at Kensington Palace; and the Marquis of Lansdowne at his mansion on the Queen's birthday.

The meeting-room at Burlington House is hung round with the society's pictures, of which Mr. Weld has prepared an interesting catalogue. Likewise, privately printed: they include portraits of Newton, by Jervas, Marchand, and Vanderbank; Viscount Brouncker (first president), by Lely; Sir Humphry Davy, by Pickersgill; Mr. Gilbert and his Majesty of Northampton, by Phillips; Sir John Pringle, by Sir Joshua; Hans Sloane, Lord Somerville, by Mr. Williamson, and Sir Christopher Wren, by Kneller; Dr. Wollaston, by Jackson; Sir Joseph Banks, by Phillips, &c. The society also possesses several fine marble and bronze busts of eminent members. It was at the anniversary meeting, Nov. 30, 1858, that the president, Lord Wrottesley, announced the newly added class of honorary members or Fellows that the measures rendered necessary by the removal of the society to Burlington House had been completed. Here they then met in an apartment which, by its size and decorations, may be said to be the society's world, for nearly 200 years, it has not been allowed to remain in the state of investigation into the causes of Nature, and thus promoting the best interests of its country and mankind. The noble Lord, accordingly, "that all the world might know adorned by some of the pictures of the most eminent of the many distinguished men by their lives and discoveries, who had left an imperishable name to posterity, and shed a halo of glory over the whole British nation," had that anniversary unveiled the bust of Sir Benjamin Brodie, the first instance of the chair being filled by a member of the College of Surgeons. Sir Benjamin resigned in 1859, and was succeeded by Professor Huxley, who, during the last anniversary addresses, instead of reviewing the papers read during the past year, as his predecessor had done, commenced one of the meeting particulars of certain important proceedings in which the council had been engaged. The address of Dr. Carpenter, on the 30th ult. was a masterly *coup d'œil* of the great scientific questions of the day: "the electric telescope," established at Melbourne, in the colony of Victoria, for the observation of the nebulæ in the southern stars of the southern hemisphere; the pendulum experiments to be made at the summit station of the Great Russian Arc, and Mr. Sabine's peculiar series of experiments at the points of the Great Indian Arc. The measurements to be made in Mysore, by Major Jackson, the government, originating from an early proposition of General Sabine; and the investigations into the analysis in its astronomical applications. Gun-cotton was next treated of, and the progress of the twelve years' rigorous experiments, establishing its perfect security by the Admiralty and War Department, was incidentally noted. Gun-cotton is now one of the defensive appliances at Charleston. The presentation of the medals followed. The Royal medal and the two Royal medals were awarded to Englishmen: Copley medal to Professor Stokes, who had a century to new services of geology; and Royal medals to the Rev. M. J. Berkeley, for vegetable cryptogamy; and M. Gaudot, for electrical researches.

We have to add that we say a few words of the relics and memorials preserved by the society: of Newton we have his autographs, relics of his apparatus, a portrait-bust, a cast of his hand, and mask of his face from the cast taken after death. Here, too, is the model of Harrison's time-keeper, made by Sir Benjamin Lewis Vulliamy and the delicate "balance left by Sir Joseph Banks, of which the following piece of pleasantry is attached:—"Upon the decease of Sir Joseph Banks, the secretaries wrote to his widow requesting her that the balance was lying in the apartments of the society, and requesting to know her pleasure thereon. 'Pay it into Coutts's,' was her ladyship's reply." The popular "History of the Royal Society," by Mr. Weld (2 vols., 1848), whence we quote the above notices, is well known for the minuteness and trustworthiness of its information.

THE VICEREGAL PROGRESS IN THE HIMALAYAS.
CROSSING THE RIVER BEAS ON MUSSUCKS.

OUR readers are aware that his Excellency the Earl of Elgin and Kincardine, Viceroy and Governor-General of our Indian Empire, the news of whose serious illness received last week caused such a shock throughout the community, has recently been engaged in travelling through the Himalayas and the Punjaub. His Excellency left Simla on the 20th of September, and crossed the river Beas on his way to the valley of Kooloo to the Rotang Pass, on the 8th of October.

The Beas is one of the great rivers of the Punjaub, which rises on the southern verge of the Rotang Pass, at an elevation of 13,000 ft. above the level of the sea. Flowing through the valley of Kooloo, a district fast rising in importance under British industry as a field for the production of tea, the Beas forms a rapid stream about 100 yards wide, intersecting the main road between Larjil and Bajaora. No bridge having yet been built at this point, and the rapid and rock-obstructed character of the stream forbidding the use of boats, the passage has to be made on mussucks, or the skins of bullocks made water-tight and inflated with air. On these the ferrymen float easily from side to side, propelling themselves by alternate strokes of their feet, aided by a paddle in each hand. The right bank, on which the accommodation of Europeans, a charpoy or native bedstead is placed on two mussucks, and seated thereon, the traveller is rapidly propelled over by the exertions of the ferrymen on the mussuck-men, while others surround and drive in the right direction the loose ponies, which, unfettered in any way, swim the rapid flood to swim the cold and rapid stream.

In our illustration, which is from a sketch by Dr. W. B. Beatson, surgeon to the Governor-General accompanying the expedition, the viceregal party, consisting of the Earl of Elgin, Colonel Ewart, the Viceregal aide, consulting the Beas, and the Rev. Mr. Cowie, the chaplain, have crossed over, and are crossing on a raft, prepared expressly for the occasion by Major Tod Brown, C.B., upon a floundering ambling pony, which is being driven by a native. A detailed account of the manner in which the crossing of the river is effected will be found in the following extract from a letter, interestingly entitled "Travels in Tartary, Ladak, and Cashmere."

MEMBERS AND OF PARLIAMENT.

ONCE and again a trial has been attempted in this column to show that the whole merit of the House of Commons is not monopolised by those who occupy the front row of the benches, and thus engross the attention of the public. Observation would show numbers of gentlemen without whose assiduous devotion to work as members of legislation, business, and private matters would not go on, and who have their reward, not in the garish fame of reported speeches, but in the testimony of their constituents, and in the good feeling which is felt for them by co-members of all parties, and the influence and even the confidence which they acquire in the House itself. Sometimes, but rarely, one of these members will emerge from what we will venture—not offensively—to call his grub state and take his place amongst the men who sleep or lounge on the benches in the intervals of this kind it is to be found in Mr. Solicron-Escott, member for North Devon, who, after the usual preliminary canvass, and contest, after an illness arising from a singular cause, which nearly proved fatal to the most accomplished of surgeons, after a long time, for Session, when he was often missed, while good wishes and hopes for his return were frequent. Mr. Solicron-Escott has sat in Parliament continuously since 1859; and yet when in 1863, Lord Derby gave him the presidency of the Poor-law Board, he told the electors of Wilts that he was not aware that he possessed even the civic eminence than otherwise. Every one acquainted with the former life of the late Mr. Escott, and his father-in-law, the present member and he was known to have sound opinions on several questions, and no doubt he was thought a comparatively silent yet efficacious worker, in the legislature. For some time after the death of the late Mr. Escott he was well fitted; and, when the retirement of Mr. Walpole caused the elevation to the peerage of some forty-year-old member of Parliament: for every one knew that the work would certainly be done, quietly and efficiently. And by Lord Derby's appointment of Somerville Home Secretary and an official more calculated to conciliate unfriendly feeling could not have been. Mr. Somerville has retained a position in the front rank of the Opposition, and yet without position, in reference to the House, possessing something akin, though of course, in a lesser degree, to that which the late Sir James Graham occupied, when, at the end of the Session of 1862, the illness superinduced by the fatigue of the Session of 1863 was not more than before. In his address to his constituents he discussed only of agriculture; but in the House on the occasion of observations on foreign systems, made by him during a tour abroad, he was turned even his enforced absence from the country to good account, and had some interesting things to say upon other than a manner, was a reservation. In the stirring Parliamentary times which succeeded the Reform Bill of 1832, Mr. Pendell Scrope was a man of mark in the House, inasmuch as he was constant more than ordinarily industrious, and yet he was never slightly, his hobby being something about the poor law—a steady, persistent, monotonous, sensible, commonplace speaker, if he did not exactly possess the "divine afflatus." Mr. Scrope was a party which belonged to him, coupled with a palpably benevolent belief in his own theories, that he was a favourite with the House, and Sir Robert Peel, Mr. Scrope has practically disappeared from view in the house; we believe we may correctly assert that he has never once opened his lips in Parliament; why, it is not easy to say. He was member for Stroud, long, long before Mr. Horsman wooed and won that constituency; and, we believe, after the death of Mr. Scrope's father's heart, he gazed upon his colleague, and—withered. Out of Chippenham, Mr. Scrope has not been heard of, and Chippenham could take shame to ourselves if we passed by one of its Parliamentary opponents, the present Mr. J. P. Scrope. This aspiring, and not without reason aspiring young member, is in a certain sense in the condition of single-speech fame in the house that is. Mr. Scrope has once made a very smart, telling oration; but in all his subsequent attempts, and they have been many, he has never succeeded in rising to the House; he has been as much pet down as any member is nowadays. Nevertheless, he has not given up the task; and he has, we believe, a declamatory style, but endeavours to be terse, antithetic, and pointed, although at present he is rather what may be called jerky, he may get on with practice, and then, as he certainly has the gift, become a star in the "Conservative Wednesday."

Sometimes, indeed, a member is neatly empty and ordinary talk overbearers, there may be heard a voice which seems directed to the house, but is not; it is that of a member who has made up his mind to think that its proprietor believes he is utterly demolishing some special opponent, if not gentleman opposite in general. It will be found to proceed from a back bench, and from the long-looking gentleman, who represents Hertford in the Conservative interest, and is the Right Hon. Sir Fitzroy Kelly's colleague in the borough. Mr. Austin Farquhar always seems to be in a rage when he is speaking; but he is not long-winded, and consequently we have not to suffer much after the lungs than of the temper and disposition. He is specially decisive in his style and way, but he does not understand that he has served in that country, our only record of his Parliamentary career is the life telling us that he has been attached to the Embassy at Vienna. We never saw Mr. Farquhar's name in the division lists, but he may be able to do any harm than his rather enthusiastic member. He has been returned for Hertford by a majority of seventeen, the petition examination of the Society of Arts, and was supported by his colleague, the Right Hon. Thomas Grant Baring, who represents the borough in all. No less than eleven offices—subordinate, but several of them important—he has held as a member of Lord Derby's Cabinet and Foreign, with every department he has had a certain familiarity. A son-in-law and, we believe, a supporter of Lord Derby's administration he has moulded his Parliamentary style on that of his chief and relative, and has so successful that, if one can imagine Lord Derby's style more lucid, more logical, more full of the finish of style, voice, and gesticulation. He, nevertheless, is not without a certain tact and aptitude for business; and if any one, speaking on a kind of simplicity, we had almost said ostrich, which seems to characterise the Earl of Malmesbury, on important matters, he would will find that there is a little more metaphysical muscle about Mr. Cowper than was imagined. He is, at least, a very active Commissioner of Works, and talks on questions of taste, architectural and horticultural, in a manner most curiously, because unconsciously, funny. Having once held the laughably-applauded office of Vice-President of the Committee of the Privy Council for Education, of course he talked on that subject at Hertford, if not like a book, by the book.

At a meeting at which the agriculturists of East Surrey congratulated each other on the appearance of their fat stock, Mr. Locke King seems to those who know his Parliamentary career slightly out of place. The member, the most remarkable, perhaps, for many years, in the humblest and most apologetic way, been introducing measures which set the hairs of Tories on end. Extension of the franchise, reform of the law of real property—which would strike, if indirectly, at the rights of primogeniture—abolition of property qualifications for members of Parliament (struck out of his list by being adopted by a Conservative Government), and all those horrid ideas which practical Radicals embody in bills which are quashed at the second readings; for these and more is Mr. Locke King accountable. Nay, once he put a Liberal Ministry out of office by, to his own utter astonishment and apparent horror, getting unutterably bill accepted by the House; but, as the only thing to bring Lord Derby back to power, and get him out of office, no harm was done; and there is no occasion for the ponderously penitential look and the depressed manner in which he has clung to the Treasury bench, one of the hardiest of the Parliamentary annuals, so far as persisting with the same measures is concerned, however, even he has yielded to the blighting influence of the present Parliament; and, like others, made no sign. His colleague, Mr. Alcock, is getting venerable now, but he has been in the House a prominent member (of the junior class on the Liberal side, and for many years than we care to remember. Of late he has got back to the position of a country gentleman and a church rates, and he brings in his bill regularly every year; but nobody ever takes any notice of it, and he formally consigns it to rest of every Session to the state of torpor in which so many private members' measures lie during the recess.

Considering the place which Mr. Gerard Noel holds in the Conservative party—that of deputy assistant whipper-in—it would be scarcely necessary to pass over in Parliamentary utterance which has been recently making. Mr. Noel possesses a certain aptitude for representing the Liberal party in Parliament—Rutlandshire may be, perhaps, physically, the smallest man in the house. But he is very neat and compact in figure, and has an intelligent face and certain epistol which he cultivates, he struggles, on the whole, successfully with a pert person and a countenance boyish in spite of a well-cultivated moustache. There must be something in the air of Mr. Disraeli would not have chosen him for his present confidential post. Indeed, he shows no want of ruthlessness in the discharge of unnecessary vocations; that is less surprising when one remembers that he is not so young as he looks, and has besides been a captain of hussars, having raised and fitted up a crack cavalry regiment. We do not call to mind his having ever made a speech in the house; but, judging from what he said at Oakham the other day, when he seemed to have been well in hand, he could imp his wings with most members of his class, if he had not been content to remain in the Parliamentary life, by executing whipping-in. Of his colleague, Mr. Heathcote, who, at the meeting in question, though in a different key, was also speaking, and sneered at Mr. Bright, we will say nothing in reference to his in Parliamentary doings, for a reason sufficiently obvious to ourselves.

The Isle of Thanet, Liberal agricultural speculation, a short while ago, miserly, brought together a curiously dissimilar Parliamentary representation of two members. Sir Fitzroy Kelly, who, was, it is said, once a Tory, but was returned by the Liberals at the last election for East Kent; and there was Sir Edward Watkin, whose views, we presume, are Liberal, even to the wearing of a blue coat and flat brass buttons (where are they now, Sir Edward?), and there was Mr. Knatchbull-Hugessen, deputy whipper-in to the present Government; and, of all persons in the world, Mr. H. B. Sheridan, famous for fire insurance and other companies, and for his connection with what is a flaming Radical, if is anything. By-the-by, the meeting being in Kent, and of agriculturists, how got he there? Why, Mr. Sheridan, we have heard that a French official had shot himself in the "bureau"—the proprietor of the house unknowingly the word to apply only to an article of furniture combining a bed and a chest of drawers! For ought we could discover to the contrary, all these adverse political elements did not clash in the least, but demeaned themselves towards each other as the antagonistic animals used to do some years ago in a big cage at the Surrey Zoological Gardens previous to Trafalgar-square. The fraternisation of the blue-coated Tory and the Radical Sheridan was especially amusing, almost ruggedly, bucolic in appearance, with the Radical member for Derby Wyke. It was almost deadly smooth in his aspect, could not but have been edifying. Again, we ask, how did their meeting in for East come about?

THE THEATRES.

The theatres already give note of preparation for the Christmas entertainments, which are generally found so profitable to managers and so pleasing to children and their elders. The houses, however, present pantomimes or burlesques. The LYCEUM, for instance, will entice no innovation on the use of Shakspeare, and will be entitled "The Seven Champions of Christendom." The same author is also engaged at the ROYAL SURREY, and bringing his dialogue to that theatre, will substitute the usual entertainment. The STRAND, of course, secures his services, which will be expended on a new classical, burlesque extravaganza, entitled "Orpheus and Eurydice." From the name of Mr. E. L. Blanchard is mentioned, we are sure that a pantomime from him will be found to be replete with the true elegance in its execution. This author has the ambition, which success should crown, of not only bringing his dialogue to a point that might find a place in Pope's "Rape of the Lock," without impairing the refined tone of the composition. It is to DUDLEY that the task of writing this clever verse is reserved, and the subject he has chosen is that of "Sinbad the Sailor; or, The Great Roc of the Island Valley and the Seven Wonders of the World." Mr. William Bevyley is exclusively engaged for the scenery. The ADELPHI will produce, as a burlesque for the Easter week, the subject belongs to the days of chivalry. Mr. Tom Taylor contributes to the OLYMPIC a burlesque *Revels*. At the PRINCESS'S the pantomime will have the name of "Jack," being brought out under the direction of Mr. T. L. Greenwood, the acting manager. SADLER'S WELLS will have a pantomime by Mr. Frederick Maddison. "Lucy of London one by Nelson Lee; and the STANDARD one by Mr. Suter. The HAYMARKET promises great things. Its pantomime is named "King Cole; or, Ride a Cock Horse to Banbury Cross; and, a Frog he would a Wooing go." At GOUGH'S Mr. Benjamin Frost has been engaged by Mr. E. T. Smith to prepare a pantomime, entitled "Harlequin John of Gaunt; or Harlequin and Old Friar Bacon and the Enchanted Brazen Head of Brentford." The MARYLEBONE pantomime will be named after the season, "Jolly King Christmas." The LYCEUM will produce an old piece, "Whittington and his Cat."

THE ROYAL ALHAMBRA.—This palatial place of amusement opened on Monday with every prospect of success. The great object of attraction was the ballet, which is produced in a manner fitted for being one of the best equestrian entertainments of the present time. The Parisian conductor has brought to the arena the whole of his high-trained stud of horses and an excellent company of female riders. The ballet of the last week, on Monday, in consequence of the excessive crowding and want of arrangement, was not that it is impossible to describe the entertainment. There can be no doubt that an equestrian performance, having the claims which this possesses, will at this time attract multitudes of spectators, if only because it is now a long interval of time since any such entertainment has been exhibited. Indeed, our gymnasts had begun to despair, and were ready to believe that their occupation was gone; but the reopening of the Alhambra will revive their hopes. The present management promises that every school of equitation will be represented, and that Paris, Berlin, Vienna, Madrid, and South America will contribute their best acrobats and riders. There is reason to believe that the troupe will be in the habit of dispensing with the orchestra as has been enlarged, and the musical accompaniments have been strengthened.

THE FARM.

THE SMITHFIELD CLUB CATTLE SHOW.

"VARIETY is pleasing," and, by way of testing the expression, we set off for Maiden-lane station on Friday forenoon to see the special cattle train arrive from Birmingham. It came up punctually to its time, looking like a sea serpent, with its thirty-nine trucks. There was quite an army of attendants, and, as if conscious of their looming gold-medal honours, the Herefords led the van. Countless vans, some adorned with pictures of bulls grazing, and bulls rampant, or rather pursued by dogs, awaited the cracks, who proceeded at once where glory and Brandreth Gibbs awaited them, and the rest, with more humble aspirations or antecedents, did the three quarters of a mile on foot, and safely within the hour. A two days' rest after the punishing gas and criticism of the Midlands did a good deal towards freshening up the candidates; and, by putting on five sets of judges instead of only three, the hall was thrown open to admission soon after two o'clock on Monday, instead of eight o'clock, as in the Baker-street days. The Prince of Wales, accompanied by the Crown Prince of Prussia and the Duke of Brabant, visited the building, with a numerous suite, in the course of the morning, and their Royal Highnesses' studies of "Sydney on the Pig," of which a copy was very appropriately presented to them by the well-known author-secretary of the building, would, no doubt, receive additional zest from the fact that the Royal Shaw Farm had that morning won its old place again in the pig classes. A good deal of dissatisfaction was felt by the members of the club at not being admitted to the galleries, as at Dublin Spring, during the morning, and the Smithfield committee made worse of it by defeating Mr. Torr's motion (to allude to the subject in the report as one worthy of consideration in future) by a majority of eleven to six. They may rest assured that it will be carried ere long. The most virulent opponents of the system as applied to the Royal have been obliged to veer round and do penance by helping to introduce the system at Islington; and with such galleries there can be no excuse for withholding the privilege. Letting a large body of people into the body of the hall during the operation would not find favour with many of the judges, who dislike being earwigged; and an excellent, and, in fact, a far better, sight can be got from above.

The most peculiar features of the cattle part of the show this year were the excellence of the Herefords, oxen and steers; the fine luck of the Norfolk feeders, and the remarkable reversal of many of the Birmingham decisions. In the Devon cow-class, for instance, the first and second were put behind the third; in the Hereford steer-class the first was beaten by a steer not thought worthy of a mention; in the Hereford cow-class the third supplanted the second; in the Hereford heifers the second beat the first, and the highly-commended shorthorn steer was placed before the third. The Devons throughout were a level lot, much better in the rump steaks than they were last year. Still, with them, as with many otherwise good specimens in the cattle classes, there was a lack of snugness in the forehand. Mr. Overman's third-prize steer, with rather a crick in his back, was No. 1 in the catalogue; and next to him stood the Earl of Leicester's second-prize one by "Overman," and with a remarkably bloodlike head. It will be remembered that the Earl was excluded by mistake from this competition last year. Mr. Wortley's winner in this class was of Hole and Quartly blood, and a wonderful specimen of maturity for two years and seven months, and with a twist which was like Mr. Heath's first-prize Passmore ox, a marvel to look at. The Earl of Leicester was beaten for second place in the ox-class by the Royal Norfolk farm, whose candidate bore examination better in front than behind. There was only one which looked like an ex-yoker; and "poor feet," except in one instance, had been pretty carefully looked after. Mr. Ford's first Devon heifer, of Quartly blood, was very neat and level, and especially good through the heart; and, considering she had had three calves in six years, Mr. Overman's first-prize cow had kept well together. The second, Mr. Heath's, was a Quartly, and terribly out of shape behind, after having borne twice as many calves in her eleven years' pilgrimage. The Birmingham first-prize steer, belonging to Mr. Shirley (who won the gold medal in 1859), had a wonderful top and nice quality of character, but was rather light in the thigh and flank. Still, quality and not size was the Islington password, and he could not make head against a much smaller one for his age, but still a very sappy, nice-breasted junior, from the Royal Flemish farm. The first Birmingham ox only came to get an H.C., and have his Abingdon victory over Mr. Aldworth's reversed; and Mr. Heath, who had owned the second prizeman, showed the strength of his '63 hand with another ox, bred by Mr. T. L. Maire, of Cound Arbour, near Shrewsbury, who has used the Berwick blood. This gold-medallist ran fair away from all the oxen and steers in the yard, and not a shorthorn man could grudge him his honours. He measures 5 ft. 7 in., and girths 9 ft. 4 in., and his table loins and tremendous depth were "a caution to see." It was, in fact, all he could do to carry such a load of thick flesh, the accumulation of just four years. His great spring of rib rather tended to make the second (Mr. Symonds's) a little shabby beneath, and Mr. Aldworth's fine, slashing ox, purchased from Mr. Monkhouse at the Hereford market of 1862, was a good third; but, though of capital quality, it was not so ripe as the winner, and fell off about the steaks and the tail-head. Mr. Groves's beautiful heifer, which (thanks to her wonderful forehand, and not her rumps) won such a high place at Birmingham, came so ill with "the foot and mouth" that she never entered the yard, and was judged at a great disadvantage, in an outside place, and put second to Mr. Bettridge's light-coloured and very fair Young Beauty, of Mr. Tudge's breeding. Mr. Pitt's cow was more successful in holding her own; but she is no flyer, plain behind, and uneven throughout. Mr. Philip Turner, who won last year, had a good one put up for this class; but she went wrong, and had to be slaughtered.

The shorthorn steers and oxen were only very middling as a lot. The eternal bull trade has told fearfully on these once grand ranks, which sadly needed Mr. Staniforth's ox to head them. Many of the entries were not in Smithfield condition at all, as if their owners had not made up their minds on the subject till quite late in the year. Mr. Thompson, of Badminton, won with a pretty fair one, but nothing more; and Sir Anthony de Rothschild's second might bear going on with for another year, but even then he would never be "a wrangler." In the ox-class the Birmingham order was kept exactly by the first three; but it is quite an open question whether Mr. Swinnerton's ox, bred by Mr. Stratton, is not quite good as Mr. Baker's, which stands very badly on its hind legs, and has anything but a gallant forehand. In the shorthorn heifer and cow classes there could be no question as to Mr. Swaisland's heifer and Mr. Matthew's cow (bred from Lord Walsingham's stock, and another Norfolk triumph) standing first; but it surpasses our comprehension, and that of some of the first judges at the show, why the heifer should have been preferred for the cup. The cow was full of true shorthorn character, very handsome and well made up, and as level as a die, despite her two calves; whereas the heifer has a head which does not bespeak purity of descent, and she falls away most awkwardly from the huggins.

The Brighton Show had made a most highly successful elimination of the Sussex ranks, and there were not a few revisions of judgment. Mr. Shoosmith's steer was first; but his eye seemed to tell that he was going back, and he was pretty nearly lame all round. In the ox-class Mr. Botting's cup-winner at Brighton, whose capital back rather drowned his fore quarters, had to lower his colours before Mr. Montefiore's older but smaller antagonist; and in the heifer or cow classes the first Brighton heifer was only third, and the first-prize cow nowhere, leaving the first and second places to be fought out between the Messrs. Heasman's Playful and Mr. Shoosmith's Lovely (the second at Brighton); another proof that youth will be served. Victory declared for the former; but it was a very near point, as one heifer had it in the loins and back and another in the fore quarter, and the price of the cut prevailed. There were eight fair Norfolk or Suffolk polls, with a roan and a red-and-white amongst them. Mr. Ralph Sneyd's six-year-old West Highland ox beat everything very easily; Mr. Eastwood walked over for the West Highland cow or heifer class; and Mr. M'Combie's big poll Angus, who seemed dwarfed by the building or not fond of travel, increased his prizes to £130, and will doubtless make a good end. Mr. Ewins Bennett won with a capital Welsh runt; but the Aberdonians were in no force with their crossbred steers, owing to their having entered their best at Darlington. In this class Mr. Overman was first with a roan Devon shorthorn, own brother, we believe, to the gold medallist of last year, and Messrs. Martin only third with their red, which beat Mr. M'Combie's for the cup at Aberdeen. However, the victor gathers only £20 on his circuit, and the vanquished £70. Mr. Allen Pollok's shorthorn polled Galloway heifer, which won again in the crossbred heifer classes, excited as much interest as anything. The second in this class was a Guernsey Devon, but all Devon save the horn; and there was also a Durham Indian, with a red skin and all Indian save the hump and the size. In the extra stock a Devon steer and shorthorn cow won the medals; and among the defeated ones were the freemartin, which has formed with its twin brother such a curious subject for a very sale challenge, and Mr. Giblett's Alderney cow, which made as near an approach to fatness as nature would admit of in one of that breed.

The Leicester entries made up 26 out of the 154, and Mr. Foljambe's took the silver cup (or "gold medal," as old usage still delights to call it. Colonel Lowther was also second in the next class, which was headed by a very thick compact trio of Lord Berners's—Buckley in every point, but rather larger. Only two Cotswold wethers came, and they were so bad that a silver medal and £40 were saved to the society. The Lincoln class was also as "mild" here as it generally is at the Royal; but the Romney Marsh, with their curious slouching ears, were few and good of their kind. Colonel Lowther converted his seconds into a first with his Leicester wether in the extra stock; Mr. Lynn was also first there with a capital ewe, bred as Mr. Foljambe's are partly, from Mr. Pawlett's blood; and a Cotswold ewe, the only one of the breed sent from Gloucestershire, retrieved the honours of her race among the extra longwools (not Leicesters). Still, the kernel of the sheep show was to be found, as of yore, in the Southdown classes, where the grand fixity of type came out in especial force among the leading pens. Mr. Rigden, being a steward, did not exhibit; and in the two wether classes, light and heavy, under twenty-three months, the House of Peers fairly whipped the Commons, and twice over Lords Walsingham, the Duke of Richmond, and the Earl of Radnor kept their order. In the older class the Duke of Richmond caught and beat Lord Walsingham, and in the extra stock they each won a first. The grander scale and the perfect rumps of the Merton flock quite carried the day, and it was a good lesson for an uncouth pen from Essex to be placed beside them. Mr. John Kent was nowhere this year, and Mr. John Overman's third-prize old sheep were big enough, but wanted style. The Duke of Richmond's first-prize wethers were very wonderful, but there was one sheep in Lord Walsingham's second prize pen which struck us as the best in the yard. John Day, Mr. Jonas Webb's old shepherd, brought his Lordship's sheep to the post in wonderful form, and it is well worthy of remark, as perhaps an unprecedented fact, that the merit of bringing the Osberton and Merton flocks to their present height rests with the Brothers Wood, who have thus carried off for their respective employers in one year the highest longwool and shortwool Christmas honours.

The Hampshire downs are gradually approaching the Southdown type, and acquiring their fine quality and meaty backs, while they retain their dark-coloured Roman heads and greater size as the badge of their tribe. Mr. Canning's first-prize pen were remarkably good, and it would be difficult to find heads and necks better set on. The judges—of whom Mr. Henry Webb, eldest son of Mr. Jonas Webb, was one—completely reversed, and, as it seemed to us, on good grounds, many of the Birmingham Shrop decisions. Mr. Henry Smith's pen, which were only commended there, won very easily here, as much for their firm, elastic touch as their beautiful quality and matching; while Lord Wenlock's first Birmingham pen played second to them. In the old class, Mr. Foster's first pen was unanimously rejected, as lacking Shropshire character; and, while Mr. Horley's stood first, the Earl of Aylesford's, which had not been noticed (perhaps on account of one sheep being a little dark behind the crown), came second, a position which Mr. Holland's forfeited on account of one sheep being rather hollow in its back. Mr. Charles Howard's Oxford Down blood beat a small class cleverly in Mr. Arthur Overman's hands, but the judges thought them a trifle short in their quarters. The Ryelands, with their nice firm touch and grand frontlets, headed the white-faced mountain breed (a designation to which many might query their title); and for the black and speckle-faced Mr. Eastwood's beat Mr. Peel's. A pen of odd, snail-eating Portlands, like small Exmoors, with upright shoulders and bad rumps, bore them company. The judges divided in the extra stock (Southdown ewes), one going for Mr. Foljambe's seventy-months ewe, which had kept her shape most wonderfully, and the other two for one of Lord Walsingham's rather more than a fourth of her age. The extra-stock medal for shortwools, not Southdowns, was given to a rare five-months Shropshire ewe of Mr. H. Smith's breeding, which was quite as good of her kind as any in his winning pen. Mr. John Overman and his Leicester Southdowns carried it all their own way in the crossbred sheep classes, In quality of wool and flesh they very closely follow the Southdown, and in form, and colour, and character of head they strain back to their Leicester sires, which are all from Mr. Hugh Aylmer's stock. We think we have seen the cross blended more to our minds three or four years ago, at Baker-street; but the other set of sheep judges considered them so good that they did not draw Mr. H. Smith's Shrops against them, as they intended to have done in case they were not satisfied, when they met to decide the third sheep cup.

The fifty-six pens of pigs (which shared their chamber with extra cattle stock) had fewer plums among them than usual, and about an eighth of them had a black mark put against them by Professor Simonds, for being over the specified age, or not of the same litter, &c. It is, however, recommended by the Professor, in his report, that to meet the difficulty of reading the mouths with absolute certainty, the pigs should not be exhibited quite so young. It must be remembered, however, that at Birmingham, where six months, and not four months, are the limit for the young pen, several "difficulties" have arisen. The bills of fare seem to extend every year. Mrs. Warren particularises "slop wash," Mr. Stearn winds up with "coal," and "rice" and "parsnips" seem to be more in fashion. Mr. De La Rue, of the Hazels, won his maiden first with "pure Essex" in the four-month class, with the Brothers Barber and their "improved Middlesex" in the next two places. Sir Thos. Lennard, who held no place to speak of with his Southdowns, headed the next class with his small whites, which were a day behind in age, and one place in front of Lady Chesterfield's "Bretby Whites;" while Mr. Stearn and his "small black Suffolks" held third honours. Mr. Coate gave a month away with his improved Dorsets, whose small noses would remind us of the hedgehog. Mr. Morland's first-prize pen of "Chilton Improved" justified all that was said of them when they won at Abingdon; and "Berkshire" and "Small Yorkshire" backed them up. "Improved Middlesex" could do nothing in this class, and a card informed us that they were sold to "——, the celebrated pork and sausage manufacturer, &c." The gold medal for the best pen in the yard was awarded to Major-General A. N. Hood's pen of Prince Albert's Windsor breed, being the fourth Smithfield trophy of the kind which has been won by the Royal Shaw Farm. Mr. Crisp was second, and both pens had made full use of the six weeks' pull in age which they had over the rest. Mr. Morland's, which were third, were at least three months younger. The extra stock comprised all ages, from four years eight months Improved Hampshire to three months twenty-seven days Stroxton Whites; and Mr. Stearn's twenty-one months Black Suffolks, and Sir Thos. Lennard's seven months twenty-three days Small White furnished the first and second. Taking these classes throughout, there was less high forcing than usual, and therefore much fewer symptoms of incipient apoplexy. The implement makers made an excellent display in the galleries; and it is quite anticipated that the attendance of shilling visitors will equal if not exceed that of last year.

The Lord Chancellor has appointed Augustus B. Abrahams, Esq., of the Middle Temple, to the office of Secretary of Presentations.

Captain Semmes's famous vessel, the Sumter, which is now under the new name of the Gibraltar, engaged in blockade-running, has arrived at Queenstown, from Wilmington, North Carolina. She left that port on the 14th of November, and has on board 330 bales of cotton, each bale, it is said, weighing 800 lb.

The library of the late Mr. Turnbull, who died shortly after his resignation of the appointment he held in the Record Office, has just been sold at the rooms of Messrs. Sotheby and Wilkinson. It was rich in county histories and in heraldic works of all descriptions, but more especially in what are usually termed "family genealogies." The sale produced £2779.

CURRENT LITERATURE.

Lays of the Scottish Cavaliers. By W. E. Aytoun. (1 vol. William Blackwood and Sons.) This is, to look upon, a kingly, a lordly, and a knightly book; it has an outer dress worthy of the kings, and lords, and knights whose deeds are the theme of the spirited strains imprinted upon its pages. Its claret-coloured binding, flashing with golden coats of arms, reminds one fitly of the holiday suits in which nobles thronged to festal gatherings. The illustrations, too, which adorn the pages full well deserve the handsome covers which preserve them, as it were, in a costly casket. They are gems of art wrought by skilful artificers—by J. Noel Paton and Walter H. Paton. The former is mighty in the delineation of figures, the latter graceful in landscape-scenery. The illustration which has been transferred to these pages represents the scene when Randolph Murray returns, after the fatal field of Flodden, to Edinburgh. Let the poet describe it in his own words:—

News of battle! Who hath brought it?
All are thronging to the gate.
"Warder, warder, open quickly!
Man, is this a time to wait?"
And the heavy gates are opened;
Then a murmur long and loud,
And a cry of fear and wonder,
Bursts from out the bending crowd;
For they see in battered harness
Only one hard-stricken man;
And his weary steed is wounded,
And his cheek is pale and wan.
Spearless hangs a bloody banner
In his weak and drooping hand—
God! can that be Randolph Murray,
Captain of the city band?

English Sacred Poetry of the Olden Time. Collected and arranged by the Rev. L. B. White. (1 vol. Religious Tract Society.) Amongst the many elegant gift-books of the season this is certainly not the least noticeable, whether we regard it merely from the point of view of sensuous attractiveness or from that of solemn appropriateness to the period. In either case, it deserves a high place amongst the excellent; and for those who consider that a combination of both is desirable in a Christmas present, it will have irresistible charms. The illustrations are by various hands. That which has been selected for transference here is by J. D. Watson. It reproduces, in how spirited and lifelike a manner the reader's own eyes will bear witness, a scene from "The Emigrants" of Andrew Marvell, who thus describes it in words:—

Thus sang they, in the English boat,
A holy and a cheerful note,
And all the way, to guide their chime,
With falling oars they kept the time.

Our English Lakes, Mountains, and Waterfalls. (1 vol. A. W. Bennett.) Here is another charming gift-book, to which Wordsworth has lent words, and the great Sun himself (under the able photographic superintendence of Mr. T. Ogle) illustrations. For the compiler has selected from Wordsworth's poems such passages as seemed suitable for adding poesy to the picture which the photographer has put upon paper; and the two arts together form a combination of loveliness inferior only to nature. To form an idea of the decision and yet softness of outline in the illustrations, and the ultra-pre-Raphaelite distinctness of every feature, the work must be seen. Pen is powerless to do justice to camera.

Ruined Abbeys and Castles of Great Britain and Ireland. By William Howitt. (1 vol. A. W. Bennett.) Again there is a combination of excellent literature and excellent photography. Messrs. Thomson, Sedgfield, Ogle, and Hemphill have directed the rays of the sun so deftly that they reflect to the life some of the loveliest objects upon which the eye could delight to linger: Kenilworth Castle, Carnarvon Castle, the Priory of Lindisfarne, Tynemouth Priory, Whitby Abbey, Netley Abbey, Hurstmonceux Castle, Croyland Abbey, Castleacre Priory, Richmond Castle, Byland Abbey, Jedburgh Abbey, Dryburgh Abbey, the Rock of Cashel, Holy-Cross Abbey, and Cahir Castle smile, frown, loom, lower, and look down upon you from all aspects, in all states of preservation or want of preservation, but with beauty in all aspects and in every state of preservation. To do justice to the green and gold and inlaid photography of the covers is impossible in writing; the eye must see it, and the eye must measure its worth.

Cruise of H.M.S. Fawn. By T. H. Hood. (1 vol. Edinburgh: Edmonston and Douglas.) The cruise was in the Western Pacific, and an interesting chapter upon that always attractive subject, Norfolk Island, is a consequence. But it is unnecessary to go further than the second page to see that the cruise was not without exciting adventure. For we there read that a gunner of the Fawn, an expert diver, who "had been employed to recover the treasure from the Peninsular and Oriental Company's ship Ava, wrecked a few years ago on the coast of Ceylon," having, in a gutta-percha dress, made his way into the Ava's saloon, was "busy searching for the bullion, when, to his horror, he saw a huge ground-shark come sailing in at the door. With great presence of mind he lay motionless on the locker, and watched it silently and grimly cruising about. One can well imagine his feelings when he saw its cold, green eyes fixed upon him, and felt it pushing against the leaden soles of his boots and rubbing against his dress, the slightest puncture in which would have been certain destruction. After ten minutes of suspense, which must have seemed an age, during which the monster came back twice or thrice to have another look at him, Mr. Pound's courage and coolness were rewarded by seeing him steering his way back as he came." Many more adventures there are recorded which, together with the twenty-one illustrations which enliven the pages, make the whole book readable and sightly. There are a chart and a learned appendix, which add value to the volume; and it is creditable to the enterprise of our colonial brethren that the author is, so far as we can gather, a native of, or certainly settler in, Queensland.

Travels in Mexico, South America, &c. By G. T. Vigne, Esq. (2 vols. W. H. Allen and Co.) The pen which wrote these volumes will write no more, or at least the hand which guided the pen will never guide it again; for the author, who had travelled and recorded the results of his travels to Ghuznee, and Cabul, and Afghanistan, and Cashmere, and Ladak, has reached "the bourne from which no traveller returns." Nor was he spared long enough to revise the sheets of the present work as they came from the press, so that the publishers, with reason, deprecate lynx-eyed criticism in respect of minute imperfections and blemishes. It is possible that had the author been spared his accounts might have presented a less fragmentary, unconnected, and desultory appearance; but in their unpolished form they will be found sufficiently interesting. From Governments to insects, from security of life and property to immunity from mosquitoes, every point has received the attention of the painstaking, conscientious traveller. It is clear that his wanderings amongst the Spanish Republics did not cause him to fall in love with democracy. For "any young democrat," he says, "aspiring to be a world-mender, whose fancies about the compatibility of liberty with equality and fraternity have become fixed ideas with indulgence, should reflect that he has hit upon nothing new. . . . A visit to these Spanish Republics, and an acquaintance with the anarchy, bloodshed, and rancour produced by the very numerous revolutionary attempts, failures, and successes which they have witnessed since the first dawn of their independence, would teach him to reflect that all government must be more or less artificial from its very commencement—that the very first arrangements of despotism, the very first steps from anarchy to order must be artificial. The power of the masses, by means of a too general suffrage, so plausibly swamping the name of tyranny while retaining its power, has always been succeeded by military despotism, &c." Might not the young democrat reply that the anarchical fruits in the Republics are traceable to the seeds of Spanish oppression sown years before, just as the evil propensities objected to in the freed negro are traceable to his former slavery; and that, consequently, the Spanish Republics are not fair examples? But we shall be accused of advocating democracy; let us, therefore, break off, and turn to a matter better suited to these pages—to wit, the excellent coloured engravings which accompany Mr. Vigne's narrative.

Countess Danner, the morganatic widow of King Frederick VII., is at the Castle of Glucksburg, suffering from erysipelas.

We understand that Sir Rutherford Alcock, our Minister to Japan, leaves for his post on the 28th inst.

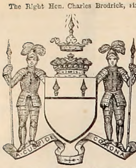
THE NEW DOUBLE-SCREW STEAM-SHIP FAR EAST.

THE DOUBLE-SCREW STEAM-SHIP FAR EAST.

The launch of this vessel took place from Messrs. Dudgeon's building-yard at Cubitt-town, Millwall, on Saturday, the 21st ult., in the presence of a large number of people, including Mr. J. E. Reed, Chief Constructor of the Navy; Mr. James Luke, Inspecting Officer of the Controller's Department of the Admiralty; Mr. John Dannen, Inspecting Engineer to the Admiralty; Vice-Admiral Sir Edward Belcher, Captain Thomas E. Symonds, R.N., patentee of a system of double-hooked and screw vessels, and others whose names are well known in connection with marine engineering. The launch of any first-class ship that may be destined to take a part in the vast commercial enterprise between England and the most distant parts of the earth must always be attended with a considerable degree of interest. In the present case this interest was much enhanced by the fact of the Far East being the first vessel of her class to which the double or twin screw system has been applied. She is intended for the China tea trade, and has been constructed of iron, under the supervision of Captain Henry Jones, her future commander, a gentleman well known in commercial circles in London as lately commanding the Ballarat. The Far East's principal dimensions are as follow:—Length between perpendiculars, 237 ft.; length of keel, 210 ft.; breadth of beam, 34 ft.; depth moulded, 22 ft.; depth of hold, 20 ft. 6 in.; depth at load water-line, 17 ft.; displacement of hull, 2200 tons; builders' measurement of tonnage, 1270 tons. On her upper deck she has a capacious poop and forecastle, and the usual house and cabins amidships. She is fitted with engines of 150-horse power nominal, which drive a two-bladed lifting screw under each quarter. The engines have circular combined cylinders, the diameter of the high-pressure cylinder being 24 in., and of the expansive cylinder 50 in., with a stroke of piston of 2 ft. The screws have each a diameter of 8 ft. 2 in., and a pitch of 16 ft. The two boilers have each six furnaces with 109 square feet of fireheat surface, and a tube surface of 1883 ft. The shafting of the screws projects through a wrought-iron tube of great strength, which is bolted on to a false iron bulkhead, clear altogether of the ship's frame. This tube at its outer end is connected with a massive wrought-iron slide, which guides the screw to the well when being lifted, or to the shafting when being lowered. The ordinary "chess-coupling" by which the screw is connected with the shafting is superseded in the Far East's shaft by a square head at the end, which fits into a corresponding recess in the boss of the screw, which is connected by a thrust block fixed on a sliding rest. The screws are lifted by a worm and barrel; the whole arrangement for lifting the screws into their wells on each quarter looks perfectly efficient, and is, at the same time, of that simplicity which is of itself the best recommendation of all similar mechanical arrangements.

The lower and top masts are of iron, bolted together through flanges, and the topgallantmasts, fitting closely into the topmast heads, give the ship a very light and lofty appearance. There are no tops nor topmast shrouds, but light iron crosstrees spread the rigging for the use of the hands going aloft, and preventive top and topgallant backstays are carried far aft of the lower rigging. The Far East is a handsome and noble ship, and reflects the highest credit on her builders.

PRIZE BIRDS AT THE BIRMINGHAM POULTRY SHOW.



No less than 1500 entries of poultry and 275 of pigeons made up the sum total of the largest exhibition of domestic poultry ever held at Bingley Hall. Amid so much excellence, our Artist, Mr. Harrison Weir (who was, as usual, one of the pigeon judges), had no slight difficulty in selecting specimens for his pencil. His choice has fallen upon Captain Heaton's first-prize Cochin-China pen (cinnamon and buff) of birds exceeding one year old. The gallant Captain (who purchased Mr. Kellaway's stock) bids fair to be the champion of the Cochin buffs, as this is one of the best pens ever seen, and he is also the owner of the second pen. There were only fifteen entries in the class, and three H.C.s and three C.s, besides the three prize pens. Viscountess Holmesdale's first prize silver-spangled Hamburg cockerell and Mr. Joseph Smith's first-prize nineteen months' white-crested Polish cock are both excellent birds, and Mr. J. W. Kellaway's first prize game bantam cock is almost perfect. Mr. J. T. Laurence's first-prize Jacobins, of "any other colour than red or yellow" were exceedingly good. The same may be said of the same gentleman's first-prize yellow Jacobins; and a grander bird than Mr. Peter Eden's first-prize black carrier cock has seldom been seen. Mr. T. D. Bayly's first-prize "Brown Call" ducks were wonderfully rich in colour, and Mr. J. D. Newsome's first-prize Cochin-China (buff and cinnamon) bantams very curious and good in their way. The Rouen ducks made up a splendid array of forty-four pens, and Mr. Henry Worrall's first-prize pen weighed no less than 29 lb., just 24 lb. less than the prize Aylesburys.

PRIZE BIRDS AT THE BIRMINGHAM POULTRY SHOW.

OBITUARY OF EMINENT PERSONS.

VISCOUNT MIDLETON.

The Right Hon. Charles Brodrick, sixth Viscount Midleton and Baron Brodrick, of Midleton, in the county of Cork, in the Peerage of Ireland, and Baron Brodrick, of Peper Harrow, in the county of Surrey, in the Peerage of Great Britain, was the eldest son (by his wife, Mary, daughter of Richard Woodward, D.D., Lord Bishop of Cloyne) of the Hon. and Most Rev. Charles Brodrick, D.D., Archbishop of Cashel, and was the grandson of George, third Viscount Midleton. He was born on the 14th of September, 1791, and was educated at Eton and St. John's College, Cambridge, where he graduated M.A. in 1812. He was called to the Bar, by the Hon. Society of Lincoln's Inn, in 1819. He took much interest in matters connected with public worship, and was a prominent member of the committee of the Church Missionary and of other religious societies. He succeeded, as sixth Viscount Midleton, his first cousin, George-Alan, the fifth Viscount, Nov. 1, 1845. He married, May 25, 1825, the Hon. Emma Stapleton, third daughter of Thomas, twenty-second Lord Le Despencer, by whom he had four daughters, two of whom died unmarried, and the younger of the two surviving, Albinia-Frances, is the wife of Alexander S. L. Melville, Esq., nephew of the Earl of Levin and Melville. Viscount Midleton died on the 2nd inst., at his seat, Peper Harrow Park, Surrey; and, as he leaves no male issue, he is succeeded by his only surviving brother, the Hon. and Very Rev. William John Brodrick, M.A., Dean of Exeter, and one of the Chaplains in Ordinary to her Majesty, now seventh Viscount Midleton, who was born on the 8th of July, 1798, and married, first, March 16, 1824, Lady Elizabeth Anne Perceval, widow of the Hon. John Perceval, and eldest daughter of Robert, sixth Earl of Cardigan, by whom (who died in the same year) he had no issue. He married, secondly, March 31, 1829, his cousin, the Hon. Harriet, fourth daughter of George, fourth Viscount Midleton, and by her has (with a daughter, Harriet) four sons—William, Barrister-at-Law, born in 1830, and married, in 1853, to Augusta Mary, third daughter of the Right Hon. Sir Thomas Francis Fremantle, Bart.; George Charles, Barrister-at-Law, born in 1831; Henry, born in 1838, married, in 1862, to Kathleen Henriette Frances, fourth daughter of the late Richard Brounker, Esq., of Boveridge, Dorset; and Alan, born in 1840. The present Viscount Midleton obtained a first class in literis humanioribus at Oxford, and has since held in succession the livings of Castle Rising with Roydon in Norfolk, and the rectory of Bath. He was elected Canon of Wells in 1854, and removed to the deanery of Exeter early in the present year. This family springs from Sir Thomas Brodric, of Wandsworth, Surrey, whose eldest son, Sir Adam Brodric, was Surveyor-General of Ireland in 1660, and whose second son, Sir St. John Brodrick, was grandfather of Alan Brodrick, Lord Chancellor of Ireland, created Baron Brodrick in 1715, and Viscount Midleton in 1717. His Lordship's great-grandson, George, fourth Viscount, was made an English peer as Baron Brodrick, of Peper Harrow, Surrey, with remainder to the issue male of his father, by virtue of which limitation the English barony of Brodrick has passed to his nephews, the Viscount Midleton just deceased and the present Viscount.

SIR THOMAS GEORGE SKIPWITH, BART.

Sir Thomas George Skipwith, ninth Baronet, of Prestwould, in the county of Leicester, was the eldest son of Sir Gray Skipwith, the eighth Baronet, by his wife, Harriet, third daughter of Gore Townsend, Esq., of Honington Hall, in the county of Warwick. He was born Feb. 9, 1803, and was educated at Rugby and at Sandhurst College, and served in the 2nd Dragoon Guards, where he attained the rank of Captain. He succeeded his father, as ninth Baronet, May 13, 1852. He married, first, July 15, 1840, Emma, daughter of Thomas Hatton, Esq., of Liverpool, which lady died, without issue, in 1842. Sir Thomas married, secondly, May 21, 1853, Jane, second daughter of Hubert Butler Moore, Esq., of Shannon Grove, in the county of Galway, by whom he leaves two sons and a daughter. He died at Leamington on the 30th ult., and is succeeded by his elder son, now Sir Peyton Estoteville Skipwith, the tenth Baronet, who is in his seventh year. This family, originally D'Estoteville, and afterwards Skipwith, from the lordship of Skipwith, inherited by marriage from the Saxon thane Baldric, is one of the oldest houses in the realm. Sir William Skipwith, of this line, was senior Justice of the King's Bench, temp. Richard II., and was so upright a Judge "that," says an old writer, "none wore with more purity the golden collar of SS.'s, called from St. Simon Simplicius, the Incorruptible Justicier, and none gave better example to succeeding Judges." Sir William Skipwith's descendant, Sir Henry Skipwith, Knight of Prestwould, "a very learned man, and a witty maker of fit and acute epigrams, poems, mottoes, and devices," so pleased James I. with his talents that he created him a Baronet, in 1622. From Sir Henry directly descended the Baronet just deceased.

ADMIRAL SIR J. H. PLUMRIDGE, K.C.B.

Admiral Sir James Hanway Plumridge, K.C.B., who died on the 29th ult. at his seat, Hopton Hall, Suffolk, was the son of James Plumridge, Esq., architect, of Littleworth, Berks, and was born in 1787. He was educated at the Naval Academy, Chelsea, and entered the Royal Navy sixty-four years ago, and was, from that time to the close of the late war with Russia, almost continually on active service. He served as Midshipman in the Leda, in the expedition to Egypt, in 1801, and, while holding the same rank on board the Defence, shared in the glory of Trafalgar. His conduct at Trafalgar gained him his commission as Lieutenant. He, as senior Lieutenant of the Melpomene, commanded the boats of that frigate at the destruction of a man-of-war cutter and some merchant-vessels, in 1809; and he was also senior Lieutenant of the Menelaus at the taking of the Isle of France; and of the Resistance, and served in her boats at the capture of a convoy at Port d'Anzo. Plumridge took part in the reduction of Genoa in 1809, acting as Aide-de-Camp to Sir Edward Pellew (afterwards Viscount Exmouth). At the breaking out of the war in Russia he was third in command of the fleet under Sir Charles Napier in the Baltic, and commanded the steam squadron at the destruction of the Russian munitions of war in the Gulf of Bothnia, in 1854; and subsequently became second in command of the fleet in those waters, took part in the capture of Bomarsund, and ultimately commanded two detached squadrons. Previous to obtaining his flag rank he was Captain Superintendent of Falmouth, which he held for the usual period, and was then appointed Storekeeper-General. He was M.P. for Penryhn from 1841 to 1847. He had been Commodore on the East India station; and in 1855 was appointed Admiral Superintendent of Devonport Dockyard. In 1855, in recognition of his eminent services, he was nominated a K.C.B., and was promoted to the rank of Vice-Admiral of the Red. He was made an Admiral of the Blue on the 27th of April last. He married, first, in 1821, Elizabeth, daughter of Admiral Hart, which lady died in 1827; he married, secondly, Harriet Agnes, daughter of the Right Hon. Hugh Eliot, which lady died in 1845; and, thirdly, in 1849, Maria, daughter of Colonel Skinner, R.A., who has given birth to a son just four days after its father's death.

WILLS AND BEQUESTS.

The will of George Stoddart, Esq., her Britannic Majesty's Consul, and a British merchant in the island of Madeira, was proved in the London Court by his two sons-in-law, John Walter Savill, Esq., and David Holland Erskine, Esq., of Portugal, British Consul; and James W. Weldon, Esq., of the London and Westminster Bank, three of the executors and trustees. The personal property in the United Kingdom was sworn under £140,000. The testator died at Torquay, Devon, on the 4th of October last, having executed his will in July, 1857, and a codicil in November, 1861. To his wife he has bequeathed the whole of his furniture and personal and movable effects in Madeira, England, and elsewhere, together with "The Quinta," in Madeira, and an annuity of £1000. The silver cup, cover, and stand presented to the testator by her late Majesty Queen Adelaide is to be held as heirloom with the Ballendrick estate, in Scotland, which estate is entailed on his eldest daughter. All other estates and property in England, Scotland, Madeira, the East and West Indies, and in the United States, he leaves amongst his children.

The will of Vere Essee Ward, Esq., of Southampton, was proved in London by his relict, to whom he has left the whole of his personalty absolutely, and has bequeathed to her his landed property and farming stock for her life, and upon her decease to their issue; but if none, then to his stepson and stepdaughter.

The late Mrs. A. E. Ward has bequeathed to the Sussex County Hospital £500; London Hospital, £500; Ratcliff Charity School, £200; Merchant Seamen's Orphan Asylum, £200; and the Church Missionary Society, £100.

Algernon Bertram Mitford, Esq., of the Foreign Office, has been appointed an acting third secretary in her Majesty's diplomatic service while employed abroad.

The commission appointed to publish the despatches of Napoleon I. has been dissolved for the present; but the work is to be shortly resumed. This commission, of which Marshal Vaillant was president, has been occupied with the work since 1854. The fifteenth volume was completed, which brought it down to the second half of the year 1807.

CHESS.

TO CORRESPONDENTS.

I. Remington Wilson.—You will find on looking again that the only Kt on the board is at Q B 5th (after taking White's Queen), and this does not attack the Bishop.

A Constant Reader.—1. A Pawn must be exchanged for a piece the moment it reaches the eighth square. 2 and 3. You should take a collection of fine problems and judge for yourself.

G. W.—The mate, we believe, cannot be given on the move of the Kt.

C. F. Smith.—It is better suited to a chess magazine than to a newspaper. The "general reader" entertains a positive aversion to "suicidal" problems eight or ten moves deep.

Nereus.—Your little effusion (No 2) admits of an easy mate in two moves:—1. Q takes Q. 2. B to K B 4th. Mate.

Zadig.—It shall be examined; but problems in *nine* moves are heavier metal than we like.

Ghost, Guernsey.—1. No; we think the best play was, taking with the Bishop. If the Kt takes Kt, then White takes Kt with Pawn; and, upon being checked, moves his King to Q sq. 2. You should procure the "Chessplayer's Handbook" or some other treatise on the openings, and judge for yourself.

Handy Andy, Limerick.—No notice can be taken of problems which have not their solutions attached to them.

Solutions of Problem No. 1031, by Horace, W. P. W., G. W. R., M. P., Silas, Delta, F. M., Gregory, Pip, Nemo; P. and O., Southampton; Try-again, Felix, Annette, D. C. L., Vigo, Argus, S. M. PROBLEM No. 1033.

By Mr. F. Healey.

BLACK.

WHITE.

White to play, and mate in three moves.

THE LATE GALES.—LIFE-BOAT SERVICES.

To the Editor of the Illustrated London News.

We are induced to solicit the powerful aid of the Illustrated London News to enable us to lay the claims of the National Life-boat Institution before the British public during the present unprecedented stormy period.

In consequence of the liberality of that public, the institution has been enabled, during the past twelve years, to increase the number of its life-boat stations from 12 to 125; so it may now be truly said that a life-boat is to be found on every dangerous point of our coast where a sufficient number of men is located to work it.

But this very extended field of the operations of the institution has necessarily involved a large and increasing expenditure, not only in maintaining its great fleet of life-boats, but also in rewarding the gallant men who are ever ready to man them.

But the institution does more than reward the men who go into its own boats. It also grants liberal payments to persons who, either in their own boats or by any other means, are instrumental in rescuing the shipwrecked sailors.

Thus it is that between 500 and 600 wrecked persons are now saved every year by the life-boats of the institution and other means, for which services it grants rewards.

The perusal of the reports of the dreadful effects of the late storm, and happily, also, of the successful efforts of so many daring services of our life-boats, which saved, during Thursday and Friday last, 125 poor fellows from a watery grave, cannot fail to excite the sympathy of every one.

We will only add that contributions are received for the National Life-boat Institution by all the London and country bankers; or by its Secretary, Mr. Richard Lewis, at 14, John-street, Adelphi.

We are, Sir, your obedient servants,

Thomas Baring, Chairman.
Thomas Chapman, Deputy Chairman.

Royal National Life-boat Institution, 14, John-street, Adelphi, Dec. 8.

THE DISTRESS IN THE NORTH.

On Monday the Earl of Derby presided at the ordinary weekly meeting of the Central Executive Relief Committee, in the Townhall, Manchester. The secretary reported that £149 had been received during the week, and that the total balance at the bankers was £237,849. Mr. Maclure's report for the month ending Nov. 28 showed that there were 248,824 persons employed on full time in the mills and manufactories of the cotton districts, as compared with 266,401 in October; 116,615 employed on short time, as compared with 106,857 in October; and 159,117 altogether out of work, as compared with 154,219 in October. Mr. Maclure, however, adds that some 11,000 of the persons set down as "out of work" have migrated into neighbouring districts or been absorbed in occupations not connected with the cotton trade in their own localities. The operation of the Public Works Act has found occupation for 1461 cotton operatives, in addition to 301 unskilled and 420 skilled labourers. The average weekly earnings per head are 10s. 10½d. There are, however, 1307 more persons in receipt of parish relief than there were in the previous month, and 1957 more solely dependent upon the committees. On the 28th ult. there was a decrease in the number of persons receiving parochial relief in twenty-seven unions in the cotton-manufacturing districts, as compared with the number so relieved in the previous week, of 739. The following grants, with many smaller ones, were made:—Ancoats, £1000; Stockport, £1000; Royton, £200; Crompton, £150; Lees and district, £300; Chorley, £250; Hyde, £1000; Ashton-under-Lyne, £2000; Tintwistle, £100; Chorlton and Ardwick, £500.

The Lord Mayor received, by the Indian mail of Monday, a cheque on the Bank of England for £7012 10s. from the committee of the Cotton Famine Relief Fund at Bombay. By the same mail the Lord Mayor received £116 7s. 11d., a balance of the money subscribed through the Kurrachee Chamber of Commerce. The amount now at the disposal of the committee is close on £60,000.

The Queen of Spain has conferred upon Count Fontani, of Malta, the honour of Knighthood of the first class of the Order of Charles III.

The King of the Greeks has written to congratulate his father on his accession to the throne, and the letter, it is stated, commences with the usual formula among crowned heads, "Monsieur mon Frère."

Arthur Edward Kennedy, Esq., C.B., has been appointed Governor and Commander-in-Chief of the Island of Vancouver and its dependencies.

On the night of the 24th ult. the Colosseum at Rome was illuminated with Bengal lights, at the expense of Baroness Rothschild, Messrs. Moseley, and a few other subscribers. Only those persons who could obtain the permission of the French Commandant de la Place were admitted to the enjoyment of this superb spectacle. It is some years since permission has been granted for the illumination of the Colosseum.

ECHOES OF THE WEEK.

Little more than two years have elapsed since the Northern and Southern divisions of the United States would indulge in a large fight in the field without loss of life or limb to any one hero. Any veteran who could have exhibited an honest yawn resulting from over fatigue in the use of his arms—or legs—deserved to be decorated. The parturient mountain was, in the end, at least blessed with something, although only a mouse; but it certainly seemed that American troops would have all their labour in vain. Their engagements resulted in no more than do the engagements of "many a gentle girl and boy;" they were broken off long before the happy day could possibly have been fixed. Or, they may be said to have resembled Barmecide feasts, at which all parties make much dumb show, but go away a trifle more hungry than when they came. But a time arrived when blood was tasted, and since then it has been difficult to say how much blood has been spilt. A remarkable indication of the magnitude of American battles comes in the shape of print. To the list of Northern journals, or magazines, a new one was added in November, under the title of *The Sanitary Commission Bulletin*, to be published twice a month, at a cost to subscribers of two dollars annually. This bulletin chronicles all reports and information concerning the sick and wounded of the Northern army, the moneys received and expended, the different hospitals of different cities, the number of patients going in and out, the doctors, the Sisters of Mercy, and everything besides that so dismal a subject can suggest. The scale is prodigious. Our own Crimean philanthropies might be added and not felt—put on board like a ship's long-boat. The United States' Sanitary Commission declare that their expenses at the present moment are forty thousand dollars per month; but that is quite independent of supplies from "every village Sewing Circle, or Soldiers' Relief Society, or Church, or Dorcas Association." They have thousands of noble women connected with their work; but they want tens of thousands, nay, "five hundred thousand, other women, of similar views and feelings before the supplies can be accumulated in adequate quantities." A novel kind of relief is the "Home," at Washington. Here, during a period of nine months, were received nine hundred men who had their discharge-papers with them, and consequently had no kind of claim on any military fund. They had been discharged in good condition, but had fallen into disease and want on the road; they would have perished, but for the Home. There is a fine spirit in all this, for which every Englishman does not give credit to the Yankee.

Yet all this charitableness, springing as it does from envy and hatred, may be as a mere nucleus of doctor and Dorcas to what may come if Mr. Lincoln remain advised by his present advisers. He is said to be severely attacked by the White House Fever, a disease which generally seizes U. S. Presidents in their first November, and invariably lasts four years: that is, from the day of one election to the day of the next. The fever consists in the restless longing for re-election. There may possibly be some connection between the fact of a General selected and the probable voting of an army for the next presidentship. If this be so; if the supposed influence of officer over man be so great, an unskilful commander may gratify Mr. Lincoln's four summers of vanity at the cost of some two million men. Of these a goodly number may average from six to twelve months in hospital; and charity will have to bridge over that terrible river of Time which never could be successfully forded by the exchequer of Mr. Chase. Perhaps, after all, the White House Fever may not be so deadly as alleged. No matter to the patient; to him it is a royal road to illness.

The late Sir George Cornewall Lewis devoted some time to the elucidation of cases of alleged longevity—a light and cheerful subject compared to the usual literary labours of Sir George. It may be conceded that he underwent and overcame much provincial newspaper reading; saw life and actual world matters in parish registers and Doctors' Commons bibliotheca; could see through a gravestone, and revive it clearly as Old Mortality himself; and was not given to be deceived by tales of elderly matrons. Sir George found no cases of centenarians which he considered fairly proved. And yet all the world believes them every day, and is diurnally astonished accordingly. On the 3rd inst., says ordinary report, Thomas Davies, of Swansea, pilot, died, wanting only twenty-two days to complete his ten times ten years, having been born on Christmas Day, 1763. Two days later died, at his residence in Devonshire, Mr. John Pringle, who attained his hundred and third year on the 19th of May last. This is a case which may easily be investigated. Mr. John Pringle is described as having been a sailor from his twenty-first year, taken a share of Nile and Trafalgar honours, and actually been coxswain to Nelson in the final fight on board the Victory. His name must be on the books, and something certain can be ascertained. It is pleasant to think of these old salts having long and easy lives after rough usage afloat. The brine has a preserving as well as a destroying property, which may be taken, *cum grano salis*, as consolation by many weeping mothers of England whose darling has cut adrift and surreptitiously sought the sea. For curiosity, it is pleasant also to believe in the legends wild of Jenkins and of Parr; and what lover of his kind would doubt the truth of that Countess of Desmond?—

> Who lived to the age of a hundred and ten,
> And died of a fall from a cherry-tree then.

It is not given to every giddy girl to be the subject of Thomas Moore's verses and the select quotation of Benjamin Disraeli. Lord Palmerston, by-the-way, is more of a believer in centenarians than his old friend and colleague Sir G. C. Lewis. He has just sent a donation of £60 from the Royal Bounty Fund to Mr. Edward Foster, centenarian, of Derby.

The Crawley court-martial should form the subject of an excursion to all parties who have a day and a few shillings to spare. Not that it is interesting, or edifying; nor that the camp is a pretty place, or the clubhouse an architectural triumph. The ground to be travelled is on the wrong side of the picturesque hills of Surrey, and a Great British Railway, on a cold December morning, is not most people's idea of a migratory heaven. But the trial is worth seeing, and hearing, for all that. It is what most Londoners have never seen, may never see again on so large a scale, and is totally unlike any other remarkable affair which they have seen. A court of law at Westminster is utterly different. Instead of wigs and gowns, there are magnificent costumes, blazing with stars and medals. The witnesses are thoroughly confident, and, above all, from first to last, from highest to lowest, a courtesy almost frigid and formal prevails. But the listeners find it wearisome in the extreme. The tediousness of writing the question, reading it, copying it, and writing down the answer—sometimes both question and answer being unheard or misunderstood by the Court, which is deaf, and then having it broken up into smaller paragraphs—all this is much more than can be patiently endured for a whole day. A little Old Bailey eloquence in the way of "bullying" would be found most refreshing. The listener would be glad if the prisoner would throw the usual pedalian missile at the President, the Judge Advocate, or the Prosecutor—he could not possibly care which so long as the boot were thrown. Or, gratifying to the feelings it would be if there should be a "disturbance in Court," which could be "promptly checked;" but at Aldershott there never are disturbances. There is not even a policeman to clear his throat during the eloquent passages, nor any eloquent passages to suffer from the temporary relief obtained by that representative of the majesty of the law. So much good manners and so fine a supply of gloominess have seldom before gone hand in hand.

Whilst the committee, anticipative of the great Shakspearean anniversary of April 23, 1864, is still in its infancy, it has this week contrived to get up an appearance of dotage. At the general committee meeting held on Monday it was decided, by a large majority, that William Makepeace Thackeray should not be invited to become a vice-president. This is a great error, and bears the appearance of slight, founded upon general prejudice or private pique. The exact ground of objection to Mr. Thackeray was that he had paid no attention to a request that he would join the general committee, and that no man could be a vice-president without having undergone that preliminary ordeal. The affair may be based upon accident unexplained, or upon hastiness resulting from wrong which cannot be explained. But the position is, that one of the foremost men in English literature is excluded from the right of sharing in the expression of national homage to Shakspeare. Mr. Thackeray, perhaps, will give a kindly look over vice-presidential names, and, remembering an ancient saying, be glad to think that England has many worthier names than his own. Perhaps not.

NEW BOOKS.

Next week, price 2s. 6d. (free by post, 2s 8d.),

SPECTROPIA; or, Surprising Spectral Illusions. Showing Ghosts everywhere, and of any Colour. With Sixteen Illustrations, and Descriptions by J. H. BROWN. Affording novel amusement for a winter's evening.

WEDDING CAKE.—HARRISON and CO., Makers to the Royal Family and H.R.H. the Crown Prince of Prussia. Established 1776.—142, Deansgate, Manchester.

HORNIMAN'S PURE TEA is choice and strong, moderate in price, and wholesome to use. These advantages have secured for this Tea a general preference. It is sold in Packets by 2280 Agents.

Sold by Grocers, Confectioners, and Druggists.

FRY'S CHOCOLATE CREAMS. A Delicious Sweetmeat, constantly growing in Public Favour.
Made by J. S. Fry and Sons, Bristol and London.

FRY'S HOMŒOPATHIC COCOA, Distinguished by Fine Flavour, Solubility, and Nutritious properties.

OSWEGO

PREPARED CORN, for Puddings, Custards, Blancmanges, &c. Manufactured and Perfected by T. KINGSFORD and SON, of Oswego, State of New York.
It is the original preparation from the farina of maize, established 1848, commands the highest price from the trade, and offers the best value to the consumer.
It is a quarter stronger than any of the imitations, has a finer grain, and is more delicate.
The Oswego has the natural golden tinge, and not the chalk white produced by artificial process.
KEEN, ROBINSON, BELLVILLE, and CO., Garlick-hill, London.

KEEN'S GENUINE MUSTARD. There are many qualities of Mustard sold. Obtain Keen's Genuine Mustard and full approval is guaranteed. FIRST MANUFACTURED 1742. Sold by most Grocers from the Cask, and in 1 lb. and ½ lb. Canisters.
KEEN, ROBINSON, BELLVILLE, and CO., London.

LETTERS PATENT 1823. PRIZE MEDAL 1862.

ROBINSON'S PATENT GROATS is the most valuable preparation for making pure and delicate gruel. Modern chemistry has shown that this food is easy of digestion and rich in nutriment.
ROBINSON'S PATENT BARLEY makes a delicious custard pudding, directions for which have been given by Mons. C. E. Francatelli. It is appreciated as a non-inflammatory drink, is excellent for mothers nursing, and has long been used with great success for rearing children by hand.
KEEN, ROBINSON, BELLVILLE, and CO., London.

ALL Good Cooks and Careful Housewives use Symington's PATENT PREPARED PEA FLOUR, perfectly wholesome, and requires no boiling. Packets, 1d., 2d., and 4d.; Tins, 1s., 1s. 6d., and 3s. All Grocers, &c.—Works, W. SYMINGTON and CO., Bowden Steam-Mills, Market Harborough.

CHEESE—STILTON in perfection.
HAMS—Small, first class.
BUTTER—Aylesbury, Fresh Daily.
CRAFT, Cheesemonger, Knightsbridge.

STARCH MANUFACTURERS
TO H.R.H. THE PRINCESS OF WALES.

GLENFIELD PATENT STARCH, awarded the Prize Medal, 1862. This unrivalled Starch is used in the Royal Laundry, and pronounced by her Majesty's Laundress to be the Finest Starch she ever used. Her Majesty's Lace-dresser declares it to be the best she has tried, and the above award by some of the most eminent scientific men of the age confirms its superiority.
WOTHERSPOON and CO., Glasgow and London.

COALS.—COCKERELL'S COALS, price 25s., cash. Central Office, No. 13, Cornhill, E.C.

DINNEFORD'S FLUID MAGNESIA is an excellent remedy for Acidity of the Stomach, Heartburn, Headache, Gout, and Indigestion, and as a mild aperient for delicate constitutions.—172, New Bond-street, London; and all Chemists.

ASTHMA SPECIFIC.—DATURA TATULA. By immediate contact with the air-cells and passages, the fumes of this plant afford instantaneous relief. The remedy is adapted for use by all patients. Introduced into this country, and prepared only by SAVORY and MOORE, Chemists to her Majesty and H.R.H. the Prince of Wales, 143, New Bond-street; 29, Chapel-street, Belgrave-square; and 1, Lancaster-terrace, Hyde Park, London.

PRATTEN'S SEVEN-GUINEA PERFECTED CYLINDER FLUTE, old system of Fingering. This Instrument, the result of many years' experiments, possesses all the reputed advantages of the Cylinder Flute on Boehm's and other principles, without changing the familiar Fingering of the old 8-keyed Flute, in addition to which, through Mr. Pratten's ingenious improvements in its construction, the manufacturers are enabled to produce this instrument at one third of the expense of any cylinder flute hitherto sold.

An Illustrated Prospectus may be had on application to the manufacturers, BOOSEY and SONS, 24, Holles-street, London, W.

BOOSEYS' MINIATURE PIANOFORTE, price 17 guineas, in Walnut, French polished, has the full compass, is in a simple but elegant case, and possesses great brilliancy, as well as an excellent touch. Boosey and Sons, Holles-street, London.

BOOSEYS' BIJOU PIANOFORTE, price 26 guineas, in Rosewood, or 27 guineas in Italian Walnut. The Bijou Pianoforte is in a highly-finished and elegant case, suitable for any drawing-room. The workmanship is of the very best description, the touch elastic, and the tone of that pure quality that especially distinguishes first-class English pianos. Boosey and Sons, Holles-street, London.

TESTIMONIAL from the ADMIRALTY, Somerset House, of the new £5 TELESCOPE:—"Gentlemen,—Wishing to test the power of your £5 telescope, I went on one occasion, at the end of my morning's rifle-practice, to the head of the pier, 2½ miles distant as the crow flies, and counted the bull's-eyes on a second-class target, and this was on a day when there was so much mist that a well-known seamark at a distance of seven miles was invisible. In conclusion, I have only to observe that, in my opinion, of all the telescopes exhibited this year at the Wimbledon meeting of the National Rifle Association, there was not one to be compared to yours for great power with great cheapness."—Your obedient servant, SAML. S. LEWES.—S. and B. SOLOMONS, Opticians to the Government, 39, Albemarle-street, Piccadilly. Powerful Pocket, Opera, Field, and General Outdoor Glasses.

POCKET BAROMETER, COMPASS, and THERMOMETER, all in one, the size of a watch, for telling the weather, the heights of mountains, direction of winds, and temperature of the air. Guaranteed for 12 months. Price £4 15s., sent free.—S. and B. SOLOMONS, Opticians, 39, Albemarle-st., Piccadilly.

ACHROMATIC MAGIC and DISSOLVING LANTERNS.—The advantage of achromatic lenses over the common lenses now in use is brilliancy and beautiful definition. No additional charge is made upon this improvement, as a large sale is anticipated. Catalogue sent free.—S. and B. SOLOMONS, Opticians to the Government, 39, Albemarle-street, Piccadilly.

SPECTACLES.—The Patent Newly-invented TINTED SPECTACLES are patronised by the majority of the nobility, including Viscount Palmerston. They give extraordinary relief by day and night to weak, dim, and defective vision. S. and B. SOLOMONS, 39, Albemarle-street, Piccadilly.

DEAFNESS.—The SOUND MAGNIFIER and INVISIBLE VOICE CONDUCTOR, for Deafness. It fits into the ear not perceptible, removes singing noises in the head, and enables deaf persons to hear distinctly at church and at public assemblies.—S. and B. SOLOMONS 39, Albemarle-street, Piccadilly.

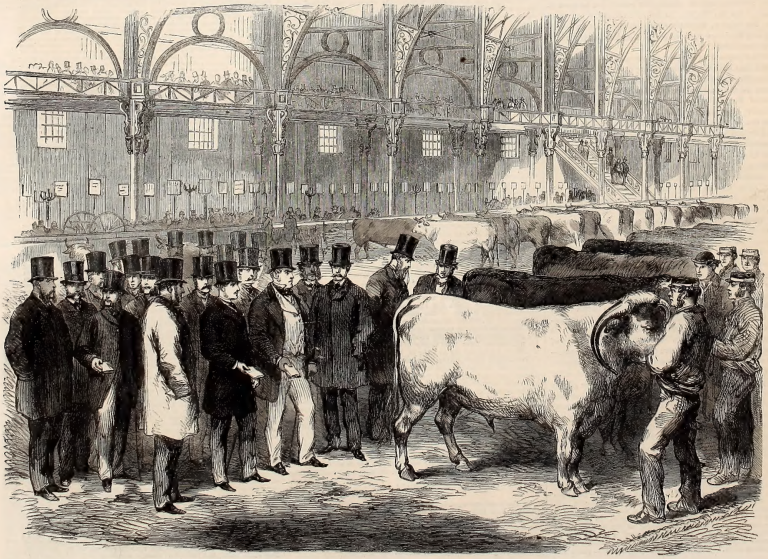
THOMAS and CO.'S PATENT SEWING-MACHINES.—These machines, made by the original patentees and introducers of the invention, with all the improvements which 15 years' experience has suggested, stand foremost and unrivalled for all practical purposes. They are guaranteed to perform their work efficiently, with exceeding rapidity, regularity, and durability, and give no trouble. The stitching (alike on both sides of the material) is without cord or ridge, and the thread cannot be pulled out. They hem, bind, gather, and braid with equal facility. Catalogues on application to 66, Newgate-street; and Regent-circus, Oxford-street, London.

NEW STYLE OF CARRIAGE, to OPEN and CLOSE at PLEASURE.—Invented and Patented by LAURIE and MARNER, Manufactory, Oxford-street, Union-street, and Tenterden-street, Hanover-square.

LONDON: Printed and Published at the Office, 198, Strand, in the Parish of St. Clement Danes, in the County of Middlesex, by GEORGE C. LEIGHTON, 198, Strand, aforesaid.—SATURDAY, DECEMBER 12, 1863.

THE ILLUSTRATED LONDON NEWS.

Nos. 1236, 1237.—VOL. XLIII. SATURDAY, DECEMBER 19, 1863. THREE SHEETS AND COLOURED SUPPLEMENT | 1s.



ROYAL REPLIES RELATING TO CONGRESS.

THE invitations addressed by the Emperor Napoleon to the Powers of Europe to assemble at Paris in congress, and so to reconstitute the fundamental pact as to reconcile the just rights of Sovereigns with the legitimate aspirations of peoples, have elicited replies from almost all of them. Their letters have been duly published in the *Moniteur*. They deserve and will repay perusal. Carefully collated with each other, they bring out just those practical difficulties of the Imperial project which led us, on its first promulgation, to place it, but not without a pang of reluctance, in the category of splendid dreams. We propose to review this correspondence as briefly as possible, and to deduce from it two or three inferences, which, on the whole, it appears to us to warrant.

The letters may be classified under three heads: that, namely, of decided refusal to attend or take part in the proposed congress; that of unreserved assent; and that of qualified assent only, to be made absolute on a satisfactory adjustment of preliminaries.

Great Britain is the only Power whose reply to the Emperor Napoleon's proposal falls under the first description. His letter to her Majesty, having been referred to her Constitutional advisers, was briefly, but in a spirit of general appreciation, acknowledged within a few days by the noble Secretary for Foreign Affairs, who requested, as a pre-requisite to guide the Cabinet to a definitive reply, preciser information as to the topics to be discussed, and as to the means by which the decisions of the congress were to be enforced. That information having been promptly and courteously supplied, Earl Russell pointed out, in his despatch of Nov. 25, how little reason there was to hope that any of the questions deemed suitable for the deliberations of congress would or could be peacefully settled by the assembled Powers; and how much more reason there was to fear that the Imperial proposition, made in the interests of peace, would ultimately increase the chances of war. The noble Lord, therefore, on behalf of the British Government, wholly declined being a party to proceedings which could hardly lead to good, and might probably terminate in armed strife, more or less general.

Nine of the European Powers accept the Emperor's invitation, without any formal reserve. Yet even in these cases it is curious to note how compliance is either based upon a supposition that the complying Power will endanger no right which it already possesses, or is coupled with an expectation that it will realise some advantage at present withheld from it. "We will certainly come," is the substantial purport of almost all these replies, "but we shall come in the fullest confidence that gain and not loss will befall us." Christian IX., of Denmark, accepts the invitation "frankly and without reserve." Leopold, of Belgium, is "quite inclined to join in so noble an object in so far as his Government could do so." William, of the Netherlands, "responds to the generous idea, and is willing to join all the other Sovereigns of Europe in realising it." Isabella of Spain does "not hesitate to afford his Majesty the assurance, in concert with her Government," that, if a pacific congress be assembled, "Spain will participate therein," and "will cause her voice to be heard in words of justice, peace and concord." Victor Emmanuel of Italy "adheres, with pleasure, to the proposal," "convinced that justice and the respect of legitimate rights are the true bases upon which a new balance of power in Europe can be founded." George of Greece accepts, "without reserve," and "flatters himself with the hope that the interests and

THE PRINCE OF WALES AT THE SMITHFIELD CLUB CATTLE SHOW.—SEE NEXT PAGE.

rights of the Christians in the East will find in his Majesty (the Emperor) a generous defender in the future international council." The Swiss Confederation "accept, with eagerness, the overture his Majesty has deigned to make," observing that "existing treaties proclaim the inviolability, the neutrality, and the independence of their territory," and that "these guarantees the Great Powers cannot but recognise, now as formerly, as both permanent and necessary." Lastly, not to particularise Sweden and Portugal, the Pope "co-operates in so laudable a project in a perfectly cordial spirit," "in order that the principles of justice, on these days so much misunderstood and trodden under foot, may be re-established to the advantage of society in its present agitated state; that violated rights may be admitted in order to be asserted in favour of those who have had to suffer by their violation: and, above all, in order that the real pre-eminence which belongs naturally to the Supreme religion, as being the only true one, may be re-established, especially in Catholic countries."

We come now to that portion of the correspondence in which the Emperor's invitation is accepted, if at all, in a qualified sense, dependent upon a previous satisfactory settlement of preliminaries. Thus Max, of Bavaria, "believes with pleasure that the proposal, followed by subsequent explanations on the subject, will be received by the Powers directly interested in the solution of these questions in the manner which is indispensable to assure its success," and, "in this supposition, does not hesitate to adhere to the proposed Congress." Ernest, of Hanover, "hopes that Germany, especially Austria and Prussia . . . will be enabled to afford her support to the task," and "in this case he will do himself a real pleasure in co-operating as much as possible." The Germanic Confederation "cannot refuse its support to a meeting to assure the peace and order of states of Europe," but "cannot concur in the hope of success, unless the treaties which established the Germanic Confederation, as well as the political edifice of Europe, were considered as the basis of the negotiations," and unless it were admitted that "no modification or cancelling of a treaty can be effected without the consent of the parties interested." William of Prussia "could not decline joining in the noble object which his Majesty proposes to the European Powers by inviting them to a general congress," because his Government "is in a position to lend its impartial and disinterested support to establish between the Powers convoked a preliminary understanding," and tells his "good brother" that the said Government "will be happy to receive from his Majesty may think fit to make respecting preliminary views." Francis Joseph of Austria, "before joining it, deems it indispensable to be enlightened upon certain preliminary points. In a word, he would wish to know, with all the accuracy, the bases and programme of the deliberations of the Congress which would assemble." Alexander of Russia tells Napoleon he "expresses an idea which has always been his (Alexander's) own;" but that, "in order that it may be practicable, it can only proceed from the consent of the other Powers; and, to obtain this result, he believes it indispensable for his Majesty to define clearly the questions which, in his opinion, should become the subject of an understanding, and the bases upon which this understanding would have to be established."

We will not pretend to conjecture how the Emperor of the French will deal with these embarrassing assents. The answers of the great Powers—Austria, Prussia, and Russia—charmingly acquiescent as they are in the abstract idea of solving the difficulties of Europe by a pacific congress, are nevertheless distinctly, that the questions in which they are directly interested can only be submitted to the deliberations of the assembled Powers on the preliminary understanding that they will be settled in the sense in which they were prepared to deal with by each of the Powers acting on its own undivided responsibility. The secondary and minor Sovereigns, as is natural, announce their readiness to attend, but seem to be fully alive to the fact that the success or failure of the scheme is not helped forward by their compliance, should England, Russia, Austria, and Prussia be unable to arrange matters beforehand with France. One feature of the correspondence, especially, augurs unfavourably for the success of the project. Several of the replies make no mention of claims or hopes in connection with the general assent which they express; but not a single one of them intimates any willingness to submit to sacrifices, if by that means the peace of Europe may be permanently secured. On the other hand, one may gather from the replies of Greese, Italy, the Pope, and Russia, perhaps also from that of the Germanic Confederation, that principles irreconcilably hostile will be brought to the congress, should it ever assemble, and that there is but small prospect of reconstituting Europe by the mere discussions of statesmen—but small chance of effecting a general reduction of armaments. We regret to be obliged to come to this conclusion; but, after attentively reading through and comparing the whole of the correspondence on this subject, we must say that, from the tone of the favourable replies, not less than from that of the doubtful and hesitating, we are convinced that the Powers are not yet sufficiently disposed to meet the proposed Universal Intercontinental Council without running an imminent risk of opening more serious quarrels than any they are likely to compose.

VISIT OF THE PRINCE OF WALES TO THE SHITFIELD CLUB HOUNDS.

There are few points upon which Great Britain is more tenacious than that Royalty should take an interest in those sports and pursuits which are characteristic of her as a nation. Hence the hearty welcome which has always been accorded to the Heir Apparent when he has mounted his hunter at the cover-side and ridden straight and well, or when he has appeared in the balcony or the inclosure of a grand stand, and watched all the exciting phases of "the sport of kings." Agriculturists may well wish to claim him as one of themselves, and more so when they remember what a thoughtful and earnest friend they have lost in his lamented father. This year was an especially auspicious one for his Royal Highness's visit to the Smithfield Club, Norfolk, the county of his adoption, had stood foremost among the best; and, as the prize-list showed, the good foundation which had been laid at the Royal farms during the Prince Consort's lifetime had not been laid in vain. His Royal Highness is at present a governor of the Royal Agricultural Society and a member of the Smithfield Club, and we trust that the day is not far distant when he may become an exhibitor at one or both of them.

FOREIGN AND COLONIAL NEWS.

FRANCE.

The Court continues at Compiègne where it will probably remain until close upon the Jour de l'An.

Marshal Forey has arrived from Mexico and gone to Compiègne.

General Fleury has gone to Copenhagen, to congratulate King Christian on his accession to the throne.

The Emperor has forwarded to the Minister of Marine a sum of 10,000 francs for the relief of the families of the seamen who perished during the late tempest.

In Monday's sitting of the Corps Législatif the Government bill for the loan of 300 millions of francs was laid on the table, and the President asked the Chamber to pass the bill upon the first reading.

In the Senate on Tuesday the debate upon the paragraphs of the Address was brought to a conclusion; and in the evening the debate was marked by one of the Marquis de Boissy's eccentric speeches. He quite startled the Senators by the onslaught he made on the obsequiousness of courtiers.

The Government has sustained a serious defeat in the elections at Paris and Lyons. In Paris M. Pelletan was returned by a majority of 5000 votes over the Government candidate, M. Picard (Ferry, Q.C., Paris). The Opposition candidate in Marseilles, beat the Government nominee, M. Sornay, by a large majority.

A smart shock of an earthquake was experienced on Wednesday at night at Nismes, Avignon, Montpellier, and other towns in the south of France.

According to a Vienna journal the Austrian Government has sent a note to the French Government definitively declaring the invitation to the congress to be unacceptable, and that it would not hold a congress at which England was not represented could arrive at no result.

A robbery of jewels to the amount of about £40,000, has just been committed at the Duke of Brunswick's residence in the Rue de Berlin, Paris. The servant-maid is supposed to be of English origin. One evening the Duke, on reaching home after a journey, was surprised not to see the man, as usual, and on going to his bedroom, where the property was kept, found a safe fixed in the wall, and a secret hand let substance, which proved to be a diamond of the value of 100,000f. On examining the cellars he was found broken open, and a bottle of wine, to the value of 18,000f. in gold had been taken; but 100,000f. in bank-notes contained in a pocket-book, and a number of valuable set of jewellery and other valuable property, had been left intact. Notice was immediately given to the police, and in a few hours the Duke had the satisfaction of learning that the wine had been captured at Boulogne with the diamonds and gold still in his possession.

ITALY.

The Minister, in his financial statement, delivered on the 12th inst., summaries the budgets of 1861, 1862, and 1863. The deficit for these three years was 1,000,000,000 francs, the loan of 1861 covering 500,000,000 and an issue of Treasury Bonds. 300,000,000 lire of this loan remain, however, without sale. The deficit with this sum and the proceeds of some fresh taxes, for which bills would be brought forward, the Minister proposed to meet the deficit for 1864. To cover the deficit of 1865 and the following years, the Minister calculates upon the profit of the Crown lands. He concluded by pointing out the economy realised in the public expenditure and the constant augmentation of public wealth. The Chamber of Deputies is engaged in discussing the budget.

The Pope has nominated, without the consent, and, indeed, contrary to the wish of the Italian Government, several new Bishops to sees in the Neapolitan Fortified Quadrilateral which now form part of the Italian kingdom. This fact is likely to create a strong sensation throughout Italy.

A detachment of French troops quartered at Ceprano has attacked a band of Italian brigands, killed several of them, and have captured, arrested, and perhaps for whom ransom had been demanded were released.

PORTUGAL.

The King and Queen arrived at Lisbon last week from Coimbra, and were received by the populace with cheers. The greatest joy and enthusiasm was displayed by the people. The city was illuminated in the evening.

SWITZERLAND.

The Chambers have nominated M. Dubs as President of the Federal Council, and M. Schenk as Vice-President, and M. Naeff, Forrerod, Kunrel, Frey, Goeseff, and Ploda as members of the same.

DENMARK.

Lord Wodehouse, sent from Germany to congratulate King Christian on his accession to the Danish throne, arrived in Copenhagen on Tuesday.

A telegram from Copenhagen announces that Sweden has withdrawn from the alliance with Denmark on the ground (according to a Danish newspaper) that the Treaty of London of 1852 and the treaties between Denmark and Germany concerns the London Treaty, Sweden considers itself free to act with the Powers signing the treaty.

THE SCHLESWIG-HOLSTEIN QUESTION.

The Federal Diet of Frankfort have voted seventeen millions of thalers for the purpose of executing Federal Execution in Holstein, and their Civil Commissioners to assume the Provisional Government of the Duchy in the name of the Germanic Confederation.

The four German Powers deputed to carry out federal execution in Holstein have issued a proclamation to the Holsteinians to evacuate Holstein within seven days. It is believed that the Danish Government will withdraw its troops and make no opposition, as a friendly understanding is said to exist with the Powers regarding the treaty.

The address in which the Prussian House of Deputies is expected to inform King William of the reasons why the Chamber will not grant the loan of £1,800,000 demanded by the Government declares that the Diet of Frankfort has no power to levy troops to compel the people to submit to the assertion of German rights, and urges the King to announce his withdrawal from the Treaty of London, and to recognise the Prince of Augustenburg as Duke of Schleswig-Holstein.

The Diet of Saxony have passed a resolution condemning the proceedings of the Diet in the Schleswig-Holstein question, and demanding the abrogation of the Treaty of London and the recognition of Prince Frederick of Augustenburg as Schleswig-Holstein.

The Wirtemberg Chamber of Deputies is to be added to the list of the German legislative assemblies which have passed resolutions in favour of the pretender to Schleswig-Holstein. It has, moreover, solemnly protested against the London Treaty, to which the Government of Wirtemberg has been a party.

Accounts from Hamburg represent that city and Altona as in a very excited state. The youth of Altona are enrolling as royal volunteers in the army of volunteers for the Prince of Augustenburg.

The Prince of Augustenburg has published a letter in which he thanks the people of Schleswig and Holstein for their fidelity, and says that he hopes speedily to commence the new organisation of the Schleswig-Holstein army.

AMERICA.

WAR INTELLIGENCE.

By the latest accounts from New York, to the morning of Dec. 9, we learn that General Meade, feeling Lee's position on Mine Run Valley too strong for assault, retreated on the 30th inst. to the north of the Rapidan. It is supposed that Meade will go into winter quarters near Washington. The *Washington Star*, an official organ, declares that Meade's campaign was a military failure. It is rumoured that General Sedgwick will supersede Meade.

The defeat of General Bragg was, it seems, not so disastrous as at first reported. The Confederates, surprised in their preconcerted retreat, were bewildered and disordered, but they soon regained their coolness, and showed so strong a front that the Federals had given up pursuing them, and General Grant had resolved on not prosecuting the campaign farther till the spring. Of the proceedings at Knoxville the papers have no doubt, and whether Longstreet has or has not retreated, after having attacked the city and been repulsed, remains uncertain. According to one account General Bragg has been superseded by General Hardee, who is preparing to resume the offensive against Grant.

From Charleston we have the old story of continued firing, with little result. Despatches have been received to the last inst. Gilmore was throwing twenty shells per minute into Charleston. The shelling of Fort Sumter had been discontinued.

Mr. Gunther, an independent peace Democrat, has been elected Mayor of New York by a large majority, defeating the Tammany and Mozart Hall and Republican candidates.

The Confederates keep up continual attacks on the steamers navigating the Mississippi.

Strong abolition resolutions have been introduced in the Missouri Legislature.

The famous guerrilla Morgan has broken prison and escaped from the Penitentiary at Columbus with six fellow-prisoners; and in spite of an immense reward offered by the Federals for his capture, "alive or dead," he has reached Toronto.

Thirteen steamers ran the Wilmington blockade on the 10th inst.

INDIA.

A telegram, anticipating the advices brought by the Bombay mail, conveys to us the intelligence that expected announcement of the Earl of Elgin's death, which occurred at Dhurmsala, on the 20th ult. [A memoir of the late Viceroy will be given in our Obituary column next week.] Sir William Denison, Governor of Madras, will assume the administration of the general government of India until Sir John Lawrence's arrival, which is expected to Calcutta.

By the same telegram we are also informed that all the hill tribes on the Punjaub frontier are in open rebellion against our rule. On the 10th ult. they attacked the British position with great audacity, but were gallantly driven back by our troops. The fighting was very severe; two English officers were killed and five wounded, and 200 natives were killed or wounded. General Chamberlain reports that he is confident of final success.

CHINA AND JAPAN.

Imperial operations against the Taeping rebels are still hanging fire on account of the difficulty of establishing a satisfactory arrangement with Captain Sherard Osborne. The foreigners in the rebel service, Burgevine and Ward, have withdrawn, owing to the service not coming up to their expectations.

Accounts from Japan state that there had been no further hostilities, and that the Daimio was believed to be anxious for the arrival of troops before undertaking any further operations against the Tycoon. Ostensibly the Satsuma or Daimio who have offended are to foreigners. It was asserted that some of the principal daimios had signed a petition against the Tycoon, whose authority was said to be greatly diminished.

AUSTRALIA.

(From our own Correspondent.)

VICTORIA.

Melbourne, Oct. 26.—From the recommendation of the Penal Discipline Commissioners to ensure the transportation of criminals to Australia would be carried into effect, a considerable public excitement has been manifested. Meetings have been held, not only in Melbourne and the other large towns, but in almost every country township, to protest against what in this case upon us. It may be said that the recommendation of the Commissioners is confined to Western Australia; but every one knows that there is no geographical or any other hindrance in the way of ticket-of-leave or other convicts landing their way from the west to the eastern part of this continent. Hence our dread, and our determination to resist, by every means in our power, the carrying into effect of the Commissioners' recommendation. In the face of the strongly-worded memorials which this mail will take to England, it is to be hoped that the Imperial Government will see us the assurance that our fears are groundless, and that another outlet has been found for the extension of population, which we are threatened to be inundated. Perhaps her Majesty can boast of an more loyal subjects than the inhabitants of these colonies; certainly no people have more sympathy when a sympathy was called for; and none have been more enthusiastic in their loyalty on the occasion of Royal State receptions. Still, from what has transpired within the last two or three weeks, it is evident that if England sends us her convicts in the future, she will not only be unable to extinguish our loyalty . . .

Mr. and Mrs. Charles Kean appeared for the first time here on the evening of Saturday, the 17th inst., at the Theatre Royal, Melbourne, when they performed in "The Wife's Secret," to a crowded house. Played again on the following Monday, but, as it was painfully evident that Mrs. Kean was suffering severely from the effects of the journey, she was unable to perform on the succeeding nights. Before the theatre for a week, to enable him to get rid of the business matters connected with the theatre, which I repeat was a necessity, but desired and, we feel sure, by no means welcomed by all the glory of their genius—the piece selected for the occasion being "Louis the Eleventh." To those who had the pleasure of hearing and seeing those inimitable actors before, this was, indeed, a treat. Mr. Kean's name since been given to a "Louis the Eleventh" hat, "The Wife's Secret," on alternate nights, to well-filled houses, and this evening "Henry VIII." will be performed.

The near approach of the time when Parr's Ali England Eleven will arrive here has stimulated our cricketers, and we now have preparations in progress. Already have several matches been fixed; and on the Melbourne ground, where the first match will be played, on the 1st prox., preparations are being made for the erection of a grand stand, which is to be a very handsome structure. The other Victorian grounds, Geelong, Ballarat, Sandhurst, Castlemaine—come over here specially to arrange for the Eleven playing three matches in that district—and Sydney, will be visited by the Eleven on the Christchurch, Canterbury settlement. Mr. Jones has guaranteed to pay the expenses of the Eleven, and we feel sure that all true-hearted and generous lucurred by the team during their absence from Melbourne. A better understanding has within the last few months been established between the cricketers and Mr. Marshall, the gentleman to whose enterprise we shall owe the visit of the Eleven, and we feel confident that they will do all in their power to make Mr. Jones's arrangements as pending be satisfactorily arranged, the Eleven will not, in all probability, be visited by any other team, and, therefore, should they meet with success, the cricketers of Victoria, Sydney, Mr. Marshall has, however, submitted a proposal to the cricketers of Victoria, which, if carried out, will be of a highly satisfactory nature, and will confer honour on their age and country.

From a return of the quarter's revenue ending Sept. 30 it is ascertained that, although there is a considerable decrease in the Customs revenue, the Crown Land Act end the rejection of the Annulled Land bill of the present Ministry, the Land Revenue of the country is in a healthy condition, and the general custom and other duties exhibiting no marked decline.

We have had a tremendous hail-storm, which has considerably affected business, retarded the crops, and led to fatal consequences in several places through the spouting of course with crossing swollen creeks. The yield of gold keeps well up, notwithstanding the existence of disturbing elements calculated to affect the industrial. The wet season has prevented the commencement of the wool season at the usual time this year. Large quantities are still in the hands of the squatters in the inland districts; and probably a few weather ere in they will arrive. It is said that the quantity and quality of this season's clip have been unusually good.

NEW SOUTH WALES.

Sydney, Oct. 26.—The police are using powder in checking the bushrangers of the western districts in their daring exploits. Gilbert and his gang pursue their nefarious calling in the Bathurst district, and Clarke and party still equally at defiance. They "stick up" whole townships, robbing shops and individuals of whatever valuables they can lay their hands on. They scour the stables of well-known breeders of horses, and select the fleetest steeds, upon whose backs they ride triumphantly round the country. Their deeds of daring have called them into heroes among certain classes, whose admiration and sympathy probably hinderers, to some extent, with the efforts of the police to capture them. There are now 300 policemen in pursuit; and Government have just announced that £500 will be paid for the arrest of each of the five or six ringleaders. The late Government intimated to the police authorities that, if they failed to arrest the desperadoes, another and different force would be organised. The existence of this bushranging system is attributable to the fatal error of allowing a criminal element to remain in the district of New South Wales; and perhaps no stronger argument could be adduced for

the circuitousness of transportation to these colonies than to point to the lawlessness and daring crime now so prevalent here.

The Cowper Ministry were defeated on their financial policy, and have resigned. The following are their successors:—Mr. Martin, Attorney-General and Premier; Mr. Foster, Colonial Secretary; Mr. Engar, Treasurer and Minister of Lands; Mr. Wilson, Minister of Works; Mr. Holroyd; Mr. Fawcett, Solicitor-General. Parliament has adjourned till the 24th proximo, to allow time for the ministerial re-elections.

The second international rifle-match between New South Wales and Victoria took place a few days ago. The contest was between 20 men on a side, and ended with 800 yards. As the total distance in Victoria's forty-shot volley exceeded that of the latter by 1,000 yards, the New South Wales men so completely outstripped their opponents in the matter of time that a volley of forty-eight upon target shooting. On both sides the shooting was very much better than it was last year.

SOUTH AUSTRALIA.

ADELAIDE, Oct. 26.—The great Moreta copper-mining case is causing no little excitement here. The property is said to be worth half a million sterling. The action is between the heirs of Captain Hughes, who originally retained for the petitioners; and, as that he can appear in the case in March next, a commission is issued at the Supreme Court here to take the evidence of Mr. Michie to the bar of South Australia.

The Agricultural Bill was introduced to-morrow (Tuesday), and it is expected that Parliament will be prorogued on Friday next.

QUEENSLAND.

BRISBANE, Oct. 26.—The accounts of the richness of the Peak Downs gold fields have not been confirmed; notwithstanding which numbers of people are flocking thitherward.

NEW ZEALAND.

The latest news from the seat of war is to the effect that General Cameron had appointed the 10th of October for the assault on Meremere, the great stronghold of the Waikato tribes, and that the bombardment was to commence in the result. The final arrangements had been completed on the 7th, and the troops were moving up the river in boats and canoes, from which their entire force will number about 3,000 men. Detachments of troops had been arranged to cut off the retreat of the Maoris across the river. Unless the enemy left their camps, which is unlikely, everything promises most speedy but desperate termination to hostilities. It is feared, however, that the natives will evacuate Meremere from struggling on the banks, thus prolonging the war. Some skirmishing has taken place at Taranaki, where a number of Maoris have been burned by settlers.

Sir Henry Havelock arrived by the last mail-steamer from England to join his regiment.

From Otago we learn that a new gold field had been discovered about twenty-five miles from Dunedin, from which most flattering reports had arrived. Dr. Hector, the explorer, had returned overland from the west coast, from which he had left on the 4th of October. From the sea to the summit of the margin of navigable rivers and lakes. The discovery will make the gold fields of the east districts more accessible from the west than from the east or the south coast.

CHURCH AND UNIVERSITIES.

The Bishop of London's weekly levée in London House will be resumed on Tuesday, Jan. 11.

A temporary church has been erected in the parish of Thornley, Durham, at the end of Mr. G. Wilkinson. The design is by Mr. Oxford Church, Sevenoaks, was reopened on the 8th inst., after a thorough restoration, under the direction of Mr. Street, at a cost of £2,700.

The new Church of St. James's, Hampton-on-the-Hill, was consecrated by the Bishop of London yesterday week.

The Rev. Thomas Scott, of Ramsgate, and the Rev. Thomas Fraser Stocks have been appointed by the Bishop of London to honorary prebendal stalls in St. Paul's.

The opening of the temporary church of St. Michael and All Angels, erected for use during the building of the permanent edifice in Mark-street, Bethnal-green, on Sunday week.

Ebing Church, near Southampton, was reopened on Tuesday week, after a thorough restoration and enlargement by Mr. Parry, architect, at a cost of £3000. The Bishop of Winchester preached.

The death is announced, in his eightieth year, at his son's residence, Brook Cottage, Tyler's Green, Penn, Bucks, of the Rev. Joseph Wilts, third and last surviving son of the late Archdeacon Paley, D.D.

Saturday, the 12th inst., was the anniversary of the death of Thomas Sutton, the founder of the Charter House, was kept within the old building with the usual appropriate celebration—Divine service, a Latin oration, and a banquet in the hall.

The church of St. Osmond, at Evershot, was rebuilt about ten years since, and was opened for Divine service for the first time on that day, thanks more especially to the Earl of Ilchester, Mrs. W. Jennings, and Mr. A. Martin, the architect, of Bristol.

The Archbishop of York consecrated Stonegrave Church, near Kerrigham, yesterday week. The building consists of a nave with clerestory, chancel, and aisle, the whole of which, with the exception of the tower, has been rebuilt by Mr. G. Jones.

St. Chad's Church, a chapel-of-ease in Frampton, near Boston, was consecrated on the 10th ult., the Bishop of Lincoln preaching. The little church is designed by Mr. Fowler, owes its existence chiefly to the liberality of Mr. J. Pearson, who gave £1000.

The Bishop of Lincoln preached, on the 1st inst., at the re-opening of Bowden Church, after a restoration, at the cost of £1,000, under Mr. Christian. Towards this good work the Rector, Archdeacon Davys, originally gave £500; but, the latter not being then in a position, it had to be repeated his donation.

The consecration of the long-deceased and beautiful Gregoriar's Church, Reading, was performed by the Bishop of Oxford on Wednesday week. The Rev. J. Yeoof, the perpetual curate, commenced the prayers, the Bishop preaching; after which £119 was collected at the offertory. In the afternoon the Bishop of Oxford, to whose energy this beautiful restoration may be mainly attributed, was the preacher.

A general meeting of the students attending the Aberdeen University was held in the public schools, Marischal College, on Monday and Saturday afternoon. Earl Russell; Mr. Grant Duff, M.P.; and the Lord Advocate for Scotland were nominated for the office, the two latter declining, the great majority of those present—about 700—were in favour of Earl Russell, who has therefore consented to accept the office. In all likelihood, therefore, the office will be withdrawn in favour of his Lordship.

On the 15th inst. the "Adelphi" of Terence was performed by the students of Westminster School in the presence of a large company, which included Dr. Trench, the late Dean of Westminster, and now Archbishop of Dublin, Lord Stanley of Alderley, Lord Wodehouse, Lord Lyttelton, the Queen Dowager, Lady Augusta Stanley, Mrs. Bradley, Mrs. Trench, and "sew," metered strong, and the advent of Christmas, which for Westminster School means the "Play," was celebrated by them in the wonted spirit of joyous, happy good humour.

St. Paul's Church, Birkenhead, was consecrated on Thursday week by the Bishop of Chester. The church is built on land donated at the corner of Argyle-street and Market-street, purchased by Mr. Brassey at a cost of about £1,000, and presented by him to the parish. The consecration took place at the appropriate name of St. Paul's Working Man's Free Church. The site has given £1000 as an endowment, in addition to the exchanging a house in Clifton Park, valued at another £1000, as a residence for the incumbent. The cost of building is about £5,000, and it will accommodate 850 persons. The architect is Mr. W. Scott. Among the special gifts are—the organ, by Mr. Bishop; the pulpit, by the Rev. Mr. Hughes; and a memorial to his son; and the font, by the architect.

The Prince of Wales has consented to be chairman at the *Guardian*.—To the Rev. W. Bras, B.A., Curate of Bedlington, by the inhabitants of Bedlington—a gold watch and chain, a gold clock, a Greek Testament, and a family Bible; Rev. R. S. Hopkins, Curate of Lydbrook—a handsome tea service, by the congregation, on his leaving to undertake the Incumbency of Hickenstone, Staffordshire; Rev. J. S. Stevens, Incumbent of Swallowfield, Berkshire—a purse of sovereigns and a silver salver, by the parishioners; Rev. R. M. Freeman—a pocket communion-service and Bible, on his leaving Curate of Bishop's Cleeve, Gloucestershire; Rev. Baird, on the occasion of his leaving the curacy of St. Philip's, Clerkenwell, for Clarendmarket Methodist New Connexion communion service, the Rev. Dr. Hook's "Commentary on the Gospels," and Dr. Hook's "Church Dictionary"; Rev. Percival Phillips—a handsomely-mounted timepiece, by the working parishioners of Shebear-cum-Sheepwash, North Devon.

PREFERMENTS AND APPOINTMENTS.—*Rectories*: The Rev. W. B. Gale to Whitbury, Gloucestershire; Rev. T. Lewis to Llandyfaelog, Brecknockshire; Rev. R. E. Harris to Chaddlesworth, Berks; Rev. G. Bull to Ainsley, near Wrington. *Chaplaincies*: Rev. C. Nanson, to the Marlborough Union; Rev. C. Walford to the Bromley Establishment; Rev. C. Wilson, Curate of Bishopton St. Paul, to the Union Workhouse, Sedbergh. *Curacies*: Rev. W. H. Denny to St. John's, Walbutch-green; Rev. D. Forrest, by Henry Byron, near Stamford; Rev. J. S. Major to St. Paul's, Walworth; Rev. W. B. Smyth to Twickenham; Rev. W. F. Hardcre to Kensington; Rev. G. H. Waterfall to Ashover, Derbyshire; Rev. J. M. Gresley, Curate of Seale, near Ashby-de-la-Zouch, to be Master of Repton Hospital, Derbyshire; Rev. G. Rowe, late Vice-President and Chaplain, to be Principal of the Diocesan Training School for Masters at York.—*Guardian*.

THE COURT.

The Queen, accompanied by the junior members of the Royal family and attended by her suite, left Windsor Castle, on Thursday, en route for Osborne, where her Majesty will pass the Christmas holidays.

On Thursday se'nnight the Queen attended Divine service in the evening at St. George's Chapel. Her Majesty occupied the Royal pew. Lord Clarence Paget was also present, and occupied a stall for the late Prince Consort as Knight of the Garter. The Rev. C. Tayefield, the Rev. J. Pack, and the Rev. and Very Rev. the Dean of Windsor were the officiating clergymen.

The Crown Prince and Princess of Prussia have attended Divine service at St. George's Chapel on the morning of each week.

On Friday se'nnight the Queen walked and drove in the castle grounds. Her Majesty was attended by Lady Churchill, Colonel Bouverie, drove out. The Crown Prince of Prussia and Princess Helena, accompanied by Prince Alexandra Royal, Baroness Von Stockmar, Count Furstenstein, Major von Schweinitz, Colonel the Hon. A. Liddell, and Lieut.-Colonel the Hon. D. De Ros, dined with the Prince and Princess of Wales at Frogmore House.

On Saturday last the Queen, accompanied by Princess Louise, walked and drove in the grounds of the castle. The Crown Prince of Prussia, attended by Major von Schweinitz, went to the Royal Military Library at Sandhurst. The Crown Princess of Prussia, Princess Helena, Prince William of Prussia, and the Princess of Hohenlohe, went to London to-day, attended by Baroness von Rosenbach and the Hon. Caroline Cavendish. Prince Leopold, attended by Mr. Buff, visited Prince Arthur at the Ranger's Lodge, Blackheath, and returned by the same train. Prince Alexandra of Denmark, attended by Major Teesdale, left Windsor Castle for London.

The Right Hon. Sir Henry Bulwer, her Majesty's Ambassador at Constantinople; Sir Robert Peel, Minister to Japan; and M. Antonio Pradilla, Minister from Columbia, were severally introduced to the Queen by Earl Russell at audiences of her majesty.

On Sunday last the Queen, the Prince and Princess of Prussia, Princess Helena, Princess Louisa, Prince Arthur, Prince Leopold, Prince Frederick William of Prussia, and the Prince of Hohenlohe, attended Divine service in the private chapel. The Rev. Dr. Stanley officiated. The Queen joined the Royal party at dinner.

Monday was the second anniversary of the death of the lamented Prince Consort. The Queen, accompanied by the junior members of the Royal family, proceeded early in the morning to the Royal mausoleum, where her Majesty is in the habit of constantly going; and remained there for a long time, the members of the household, including the servants, to go to the mausoleum and pay a tribute of love and regard to the memory of the illustrious personage whose regretted master. The Queen passed the day in complete seclusion.

On Tuesday, her Majesty, accompanied by Princess Louise, walked and drove in the castle grounds. The Crown Prince and Princess of Prussia, Prince William, Princess Charlotte, and Prince Henry of Prussia took their departure from Windsor Castle for Berlin at twenty-six o'clock for Dover, en route to Prussia, attended by Baroness Rosenbach, Baroness Stockmar, Count Furstenstein, and Major von Schweinitz. Lord Alfred Paget attended their Royal Highnesses to Dover. Princess Louisa, attended by the Hon. Mr. Colley, also left the castle to-day for Blackheath.

Mr. Gilbert Scott has had the honour of submitting to the Queen his new design for the Consort's Memorial.

Mr. George G. Adams, sculptor, has also had the honour to submit to her Majesty the memorial he has busts of the late Field Marshals Lord Seaton and Lord Clyde.

THE PRINCE AND PRINCESS OF WALES.

The Prince and Princess of Wales are at the Frogmore House. Their Royal Highnesses will proceed to Osborne on Tuesday next, where they will remain a fortnight on a visit to the Queen; after which they will return to Sandringham House, Norfolk.

On Sunday se'nnight their Royal Highnesses attended Divine service in the private chapel of Windsor Castle. Their Royal Highnesses afterwards lunched with the Crown Prince of Prussia. In the afternoon the Prince accompanied the Crown Prince of Prussia, Prince William, and Prince Henry to the Chapel.

On Tuesday, commissioned by the Tasmanian Government, has been honoured with a sitting from the Princess for her portrait. Mr. Wallis is now in the possession of Sandringham House, Norfolk, from the Prince.

Mr. Moore Edwards, commissioned to execute a bust for the town and Corporation of Toronto, has been similarly honoured.

THE CROWN PRINCE AND PRINCESS OF PRUSSIA.

The Crown Prince and Princess of Prussia, accompanied by their children and attendants, left Windsor, via Woolwich, for the Continent, on Tuesday morning. The Royal train left Windsor nearly after nine o'clock for South-Eastern Railway, and being under the command of Mr. Godson, the company's superintendent of the line. At Reading the South-Western and the Charing-cross branch of the South-Eastern the engine, which was under the management of Mr. Norwood, the chief inspector of locomotives, at Tonbridge, Mr. Cudworth, the locomotive superintendents, who were represented by Mr. Tealon (one of the directors). Mr. Rhodes, Mr. Knight, and Mr. Scudamore. The Royal Prussian party use the first passengers who have travelled over the Charing-cross line. The journey, a distance of 108 miles, was 108 miles, was accomplished in two hours and fifty-five minutes, without change of carriages, and the Prince and Princess both expressed themselves highly pleased with the facility and comfort afforded by the new route.

At the end of the Royal train at Dover a Royal salute of artillery was discharged from the castle batteries, and a similar compliment was paid on their arrival at Ostend, the guns of which were likewise fired with guards of honour from the 78th Highlanders and 80th Regiments. A large number of people was assembled on the pier, who loudly cheered the Royal visitors as they left the train, and seemed remarkably well, and she appeared gratified at the tokens of loyalty and affection which were manifested. Their Royal Highnesses crossed the Channel in the London, Chatham, and Dover Railway Company's steam-packet Wave.

His Royal Highness the Duke of Cambridge left Gloucester on Tuesday, for Badminton, the seat of the Duke and Duchess of Beaufort, in Gloucestershire.

His Excellency the Austrian Ambassador and Countess Appony left Chandos House, on Monday, on a visit to the Marquis and Marchioness of Stafford, at Cliveden.

His Excellency the Belgian Minister and Madame Van de Weyer have arrived in town from New Lodge, Windsor Forest.

His Excellency the Turkish Ambassador has arrived at the residence of the Embassy from the Continent.

The Duke and Duchess of Sutherland have arrived at Trentham, Staffordshire, from Dunrobin Castle.

The Duchess Dowager of Norfolk returned on Tuesday to town from visiting Lord and Lady Foley at Witley Court, Worcester.

The Marquis and Marchioness of Salisbury have left Hatfield House, Herts, en a visit to the Duke and Duchess of Wellington at Strathfieldsaye.

The Marquis and Marchioness of Lansdowne have arrived in Berkeley-square from a tour of visits.

The Earl of Carlisle has left Grosvenor-place for Dublin, to resume his duties as Lord Lieutenant.

The Earl of Westmorland has arrived at the Countess Dowager of Westmorland's residence, in Portman-square, from Compiègne.

The Emigration Commissioners' ship Vernon, 891 tons, Captain Golsmid, belonging to Messrs. Powell and Co., London, sailed from Southampton on the 8th inst. for Brisbane, Queensland, having on board 41 married couples, 10 single men, 10 single women, and 20 single girls, all of ages between the ages of 1 and 12, and 13 infants—in all 373 souls—under the care of Mr. Sheridan Rigbey, surgeon-superintendent.

METROPOLITAN NEWS.

The salary of the City Remembrancer has been fixed by the Common Council at £1000.

"The Tercentenary of Shakspeare" formed the subject of a glowing oration which was delivered at the London Mechanics' Institution, on Monday, by Mr. G. Linnæus Banks, one of the honorary secretaries of the National Shakspeare Committee.

The annual dinner of the Royal London Yacht Club, to which above seventy members and friends sat down, took place on Tuesday at Willis's, King-street, St. James's. The chair was taken by Mr. Arodekine, commodore.

Mr. Grote, the historian of Greece, who is one of the council, and at present treasurer, of University College, has offered to put up at his own expense, on the walls of the theatre of the college in Gower-street, a mural representation of scenes and persons of the Homeric poems, to be executed by the German sculptor, the late Mr. Gruner, R.I.

That portion of the Charing-cross Railway which runs between the Metropolitan station and Hungerford Bridge was formally opened on Tuesday morning by the Crown Prince and Princess of Prussia. Their Royal Highnesses were on their return to Prussia, and, having arrived at this new line, were enabled to travel from Windsor to Dover without leaving the railway carriage.

At the meeting of the Royal Geographical Society, on Monday, Lord Stranglord in the chair, a paper was read, communicated by Mr. Swinhoe, of Formosa, which island was opened to British commerce by the late Lord Elgin. Mr. Swinhoe was appointed Vice-Consul of Formosa, and visited differing parts of the island, concerning which post would be the best adapted for trade. In his communication he stated some of the results of his investigations concerning the natives of the island and its inhabitants. A paper was also read by F. A. Eton, Esq., giving an account of a journey from Makareh to Berrah al Mash.

The following is a list of the proposed schemes of metropolitan railway to be submitted to Parliament in the ensuing Session:—Charing-cross, Hungerford, and Richmond; Hammersmith and City Extension; North and South Western Junction; Hammersmith and Kensington Extension; Metropolitan Extension to Trinity-square, Tower-hill; Metropolitan Extension to St. John's Wood; Metropolitan Grand Union Canal (Northern); Charing-cross (Western); Wimbledon and Brixton; Tooting, Merton, and Wimbledon; Tooting and Hammersmith; Hammersmith, Kingston, Tooting, and London; Kew, Turnham-green, and Hammersmith; Hammersmith, Richmond, and South Coast; New Lines in Battersea; Paddington and Charing-cross.

The births of 2100 children—1112 boys and 988 girls—were registered last week in London. In the corresponding week of the years 1853-62 the average number (corrected) was 1928.—The number of deaths in London last week was 1211. The average number of deaths in corresponding weeks during the fifteen in each of the years 1853-62 is, with a correction for increase of population, 1416. Smallpox exhibits a great increase in its mortality compared with that of previous weeks. Only eleven cases of this disease were registered in the week ending the 5th inst., whereas the returns now announce that 30 deaths from smallpox occurred in the week ending the 12th inst. Measles also fatal in 113 cases, scarlatina in 37, whooping-cough in 18, diarrhœa in 17, and typhus in 16. Of the 1211 deaths in November, 1863, 1 person died at the age of 80 years and upwards, and eight of these were 90 and upwards. Accident—Thomas Hutchinson—the widow of a toolmaker died at the age of 100 years at 31, New Compton-street, St. Giles; she was accidentally burned to death in her own room for an account of her eight and memory were good to the last; a farmer died at the age of 101 years in Smith-street, Westminster. Mr. Lake—from medicine in his life. Last summer he was able to make hay and dig potatoes.

LAW AND POLICE.—Mr. Serjeant Shee has been appointed to the vacant judgeship in the Court of Bankruptcy, caused by the death of Mr. Justice Wightman.

The Lord Chancellor has decided that a composition deed, in a bankruptcy case, which does not give equal rights to all the creditors of an insolvent cannot be upheld, and it is immaterial whether the creditor who insists on equal rights be in the means before his Lordship a composition deed had been executed, which provided for the assent of a majority of the creditors only. To this deed the assenting creditors were to receive 5d. in the pound.—The insolvents' proceedings to pay his creditors in full, and to pay the £5 to the dissenting creditors. It was urged, however, on behalf of a non-assenting creditor, that, as the deed contained a proviso that any claimant on the composition fund be placed on a footing of perfect equality, the majority in the present instance might by their votes increase the composition to 20s. in the pound, and thus make the proviso nugatory. His Lordship considered this disadvantageous to the minority, upon whom the deed, therefore, was not binding.

Mr. Edward Wise, paid constable of the city of London police, endeavoured to utter a forged bill on the Marquis of Anglesey, was tried at the Central Criminal Court on Tuesday, and found guilty. He was found guilty, and was sentenced for six years.

The Lord Mayor has decided that the men who were killed by the fall of a house at Islington was conducted on Monday. The jury returned a verdict of "Accidental death." The deceased's father, in his evidence, stated that the accident had been caused by the insufficient strength of the front piers, and added that the tenement had been condemned by the district surveyor. The coroner said that was the decision of 18 against 5, and that he was one of the minority.

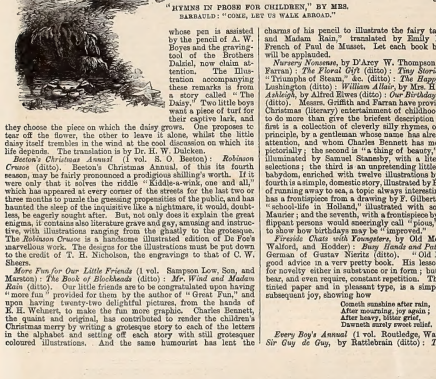
THE DISTRESS IN THE NORTH.

MR. FARNALL'S returns this week show an unfavourable change in the aspect of the cotton districts. Not only is a decrease observable in the total in the number of persons receiving relief was reported; this week there is an increase of 2,000. At the meeting of the Central Relief Committee, on Monday, Lord Derby read a letter which he had received from Sir George Grey relative to the late changes made in the Poor-law Board. The Poor-law Board, Lord Derby remarked, was a department which had been already done in this matter, but expressed his opinion that the Poor-law Board was somewhat under the subject of relief for first mortgage, which, from returns made to the committee, appear to be large on the amount of small sums. The Government, he understood, were desirous to aid the progress of public work in the distressed districts, and said, "provided £30,000 or £40,000 were spent in this way, and not in difficult to spend £20,000 or 30,000 expenditure upon useful public works by the commencement of the new year." The following are the latest returns:—In one case, were made, the figures in parentheses indicating the number of weeks over which the grants were extended:—Ashton-under-Lyne, £1,000 (3); Aston, £300 (3); Bacup, £400 (3); Dukinfield (5), £120; Farnington (4), £100; Rochdale (3), £750; Bolton (4), £200; Chadderton (3), £100; Hyde (3), £200; Leigh (3), £200; Middleton (3), £100; Stockport, £1,000; Tintwistle (3), £100; Wigan (3), £500. For superintendence of labour, Ashton-under-Lyne were made a grant of £100; Bacup, £144; Staleybridge, £200.

The London committee met yesterday week at the Mansion House, Mr. Alderman Rose, M.P., in the chair. The total amount received to the end of Thursday evening was £320,670, of which £146,795 had been remitted, including £20,000 for the Lancashire purposes. During the week ending £7360 had been received, of which £1636 was from colonial resources. Several grants were made.

CURRENT LITERATURE.

The Life and Adventures of Robinson Crusoe. By Daniel Defoe (1 vol. Routledge, Warne, and Routledge.) Christmas is preeminently the children's season. In deference to them Pantomime revisits the glimpses of the moon, Harlequin and Columbine, with their sledge, Pantaloon pats on his biggest spectacles, Harlequin dons his shiniest suit, Clown prepares his longest and most direct appeals to them, too, publishers issue dowry books; and so, in deference to them, "Current Literature" for this week devoted to publications intended for young persons principally. First, in virtue of its grand proportions, handsome exterior, and profusely illustrated interior, no less than of its unflagging popularity, comes the new edition of Defoe's immortal fiction, with a hundred engravings by the Brothers Dalziel, from drawings by Mr. Harrison Weir. Mr. Weir has improved from book to book, in the next page, are those which represent Crusoe getting down to the cable which he covered, and Friday saying expressing his gratitude for his deliverance.



Stories and Tales. By Hans C. Andersen. (1 vol. Routledge, Warne, and Routledge.) Let the hoard of children, Hans Andersen,

"HYMNS IN PROSE FOR CHILDREN," BY MRS. BARBAULD: "COME, LET US WALK ABROAD."

"STORIES AND TALES BY HANS ANDERSEN:" THE DAISY.

"ROBINSON CRUSOE:" CRUSOE GETTING DOWN TO THE CABLE.

"ROBINSON CRUSOE:" FRIDAY EXPRESSING HIS GRATITUDE TO CRUSOE.

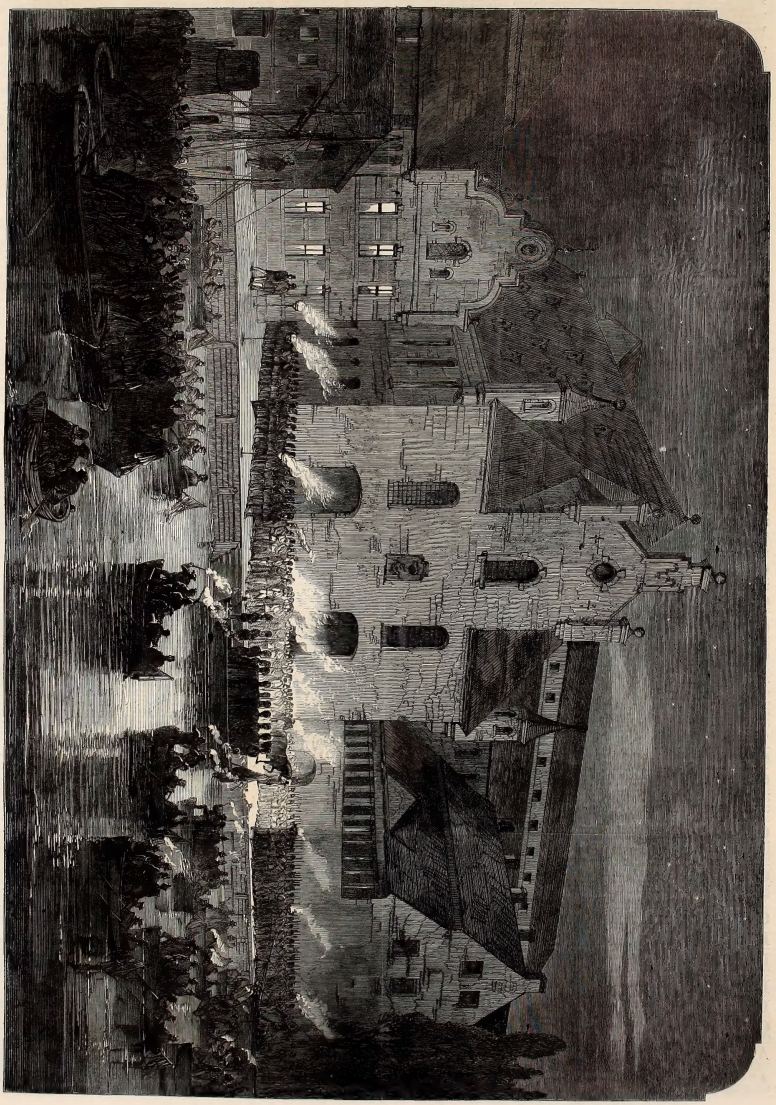
whose pen is assisted by the pencil of A. W. Boyes and the graving-tool of the Brothers Dalziel, now claim attention. The illustration accompanying these remarks is from a story called "The Daisy." Two little boys want a piece of turf for their captive lark, and they choose the piece on which the daisy grows. One proposes to tear off the flower, the other to leave it alone, whilst the little daisy itself trembles in the wind at the cool discussion on which its life depends. The translation is by Dr. H. W. Dulcken.

Boston's Christmas Annual (1 vol. S. O. Beeton): *Robinson Crusoe* (ditto). Beeton's Christmas Annual, of this its fourth season, may be fairly pronounced a prodigious shilling's worth. If it were only that it solves the riddle "Kiddle-a-wink, one and all," which has appeared at every corner of the streets for the last two or three months to puzzle the guessing propensities of the public, and has haunted the sleep of the inquisitive like a nightmare, it would, doubtless, be eagerly sought after. But, not only does it explain the great enigma, it contains also literature grave and gay, amusing and instructive, with illustrations ranging from the ghastly to the grotesque. The *Robinson Crusoe* is a handsome illustrated edition of De Foe's marvellous work. The designs for the illustrations must be put down to the credit of T. H. Nicholson, the engravings to that of C. W. Sheers.

More Fun for Our Little Friends (1 vol. Sampson Low, Son, and Marston): *The Book of Blockheads* (ditto): *Mr. Wood and Madam Rain* (ditto). Our little friends are to be congratulated upon having "more fun" provided for them by the author of "Great Fun," and upon having twenty-two delightful pictures, from the hands of R. H. Wehnert, to make the fun more graphic. Charles Bennett, the quaint and original, has contributed to render the children's Christmas merry by writing a grotesque story to each of the letters in the alphabet and setting off each story with still grotesquer coloured illustrations. And the same humourist has lent the charms of his pencil to illustrate the fairy tale called "Mr. Wind and Madam Rain," translated by Emily Makepeace from the French of Paul de Musset. Let each book be inspected and each will be applauded.

Nursery Nonsense, by D'Arcy W. Thompson (1 vol. Griffith and Farran): *The Floral Gift* (ditto): *Tiny Stories*, by the Author of "Triumphs of Steam," &c. (ditto): *The Happy Home*, by Henrietta Lushington (ditto): *William Allair*, by Mrs. H. Wood (ditto): *Lake Ashleigh*, by Alfred Rives (ditto): *Our Birthdays*, by Emma Davenport (ditto). Messrs. Griffith and Farran have provided so liberally for the Christmas (literary) entertainment of childhood that it is impossible to do more than give the briefest description of each work. The first is a collection of cleverly silly rhymes, on the *Gummer Go-too* principle, by a gentleman whose name has already attracted no little attention, and whom Charles Bennett has most worthily seconded pictorially; the second is "a thing of beauty," a souvenir tastefully illuminated by Samuel Stanesby, with a literary body of poetical selections; the third is an unpretending little book for five-year-old babydom, enriched with twelve illustrations by Harrison Weir: the fourth is a simple, domestic story, illustrated by Fitzwell; the fifth treats of running away to sea, a topic always interesting to English boys, and has a frontispiece from a drawing by F. Gilbert; the sixth is a tale of "school-life in Holland," illustrated with some spirit by G. De Maurier; and the seventh, with a frontispiece by D. H. Friston, is what flippant persons would sneeringly call "pious," and has for its object to show how birthdays may be "improved."

Fireside Chats with Youngsters, by Old Merry (1 vol. Jackson, Walford, and Hodder): *Busy Hands and Patient Hearts*, from the German of Gustav Nieritz (ditto). "Old Merry" conveys very good advice in a very pretty book. His lessons are not remarkable for novelty either in substance or in form; but they are such as will bear, and even require, constant repetition. The second story, told on tinted paper and in pleasant type, is a simple tale of trouble and subsequent joy, showing how



> Cometh sunshine after rain,
> After mourning, joy again;
> After heavy, bitter grief,
> Dawneth surely sweet relief.

Every Boy's Annual (1 vol. Routledge, Warne, and Routledge): *Sir Guy de Guy*, by Rattlebrain (ditto): *The Adventures of Rob Roy*, by James Grant (ditto): *Marian and her Pupils*, by Charlotte Lankester (ditto): *Every Little Boy's Book* (ditto). The first of these books contains a mass of literature, illustrated by a hundred cuts, and headed by an illuminated frontispiece, entertaining to boys; the second is a good-natured satire in poetry upon the volunteer movement, and is fantastically illustrated by Phiz (whose one young lady looks as opera-dancer-like and well as ever); the third needs no introduction; the fourth is a nicely-written account of one who tried, honestly and not unsuccessfully, to fulfil the most thankless of offices; and the fifth, with its 250 illustrations, forms "a complete cyclopædia of in and out door games, with and without toys, domestic pets, conjuring, shows, riddles, &c."

The Ice Maiden. By Hans Christian Andersen. (1 vol. Richard Bentley.) The Ice Maiden, who dwells in the glacier, whose pillow is the snow, and whose cheeks are ruddy with the glow of the Alpine sunset, loves the spouse of a mortal bride, and bears him away to her icebound home. Hans Andersen tells the tale; Mrs. Bushby has translated it from the Danish; Zwecker's drawings, engraved by Pearson, have illustrated it; the publisher has had it printed in noble type on delicate paper, has had it bound in blue and gold, and it now awaits the homage of those who pretend to taste.

Peter Parley's Annual for 1864. (1 vol. William Kent.) We have been for some time under the impression that "Peter Parley" is dead; but, even if it be so, we are quite ready to apply to him the phrase, "Le Roi est mort—Vive le Roi!" and to welcome the prince of annualists under the editorship of William Martin. He appears in a form likely to find favour with boys.

The True, Pathetic History of Poor Match (1 vol; Smith, Elder, and Co.): *Winter Wreavings*, by Isabella Law (ditto). Match was a dog and a brother, of the hairy terrier description so admirably drawn in the pages of *Punch*. His adventures and his sad end may here be read of by all children who like such dogs; and children who do not should be anxiously watched by parents and guardians, for, depend upon it, the symptom is a very bad one. There are four illustrations, of which that which represents Match in long clothes and a baby's cap is particularly grateful to the feelings. "Winter Wreavings" are a collection of poetical effusions, more than usually musical, tender, and pathetic. We would hint, however, with all deference to the writer, that *Arielle* (p. 95) is not a triolyiable, and cannot correctly be made to answer syllabically to *Christmas night*.

ARRIVAL OF THE REMAINS OF THE LATE KING OF DENMARK AT COPENHAGEN.—SEE PAGE 604.

CALENDAR FOR THE WEEK ENDING DEC. 26.

SUNDAY, Dec. 20.—Fourth Sunday in Advent. First General Assembly of the Church of Scotland, 1560. Lavalette's escape from prison through the devotion of his wife, 1815. Secession from the United States of North America begins with South Carolina, 1860.

Dec. 12, 1863. GEORGE A. ADDISON, General Manager.

SPECIAL APPEAL—CANCER HOSPITAL, 167, Piccadilly (Free).

TREASURER—William Lenthall Farrer, Esq., St. Dunstan's Inn-chbs.

SECRETARY—Mr. Henry Burgess, 167, Piccadilly.

In a recent address to the Governors of the Hospital by his Grace the Archbishop of Canterbury, his Grace considered as follows:—

"The Cancer Hospital was a most valuable Institution in especially detail. From the first symptoms of attack, one large cruzee has commonly been proportionately cured. Of 1000 cases, 500 had been cured, and of the remaining 500 a large part had died in a premature state, but had been relieved. It was to be observed that the Hospital was not in the true proportions and natural science—no one endued with the feelings of humanity could refuse to support it. They must think that £1000 was a small sum to be raised for so great a cure they would willingly each subscribe. He relief afforded by the Hospital was more costly approach the amount of misery which it endeavours to remove."

Any further information, and donations for the Hospital, will be thankfully received.

Secretary's Office, 167, Piccadilly. By order, W. I. COCKERILL, Sec.

ROYAL ASYLUM OF ST. ANNE'S SOCIETY, for Children of Persons who have been in reputable Stations of Life.—E. F. LEWIS, Secretary. Applications solicited for this ancient and peculiar charity.

THE ILLUSTRATED LONDON NEWS.

LONDON: SATURDAY, DECEMBER 19, 1868.

CHRISTMAS again! And England is, happily, at peace with all the civilised world; her condition is prosperous: the elasticity of her resources has been more marvellously demonstrated than ever; her manufacturing operatives are regaining employment; her defences are in the best order; there has been no epidemic to destroy the bodies of the people, or diseases to embitter their hearts; a beloved Sovereign is in good health and, apparently, about to come once more among us, as in the days before her great sorrow: the Heir of England is married to a wife of his own choice, and there is every promise of social happiness for those who will one day (may it be distant!) give tone to the social life of the nation; a Ministry which, by a curious combination of accidents, commands the confidence of all the parties, is in office; and, in a word, whence we will, it is impossible for the most resolute grumbler to say that he can point out a national misfortune.

Surely, this accumulation of evidence that the country is thriving must force upon the least patriotic the conviction that we have much to be thankful for at this festal Christmas time. And we honestly believe that when the English people gather, on Friday next, to inaugurate the season of festival, at their forefathers have done for ages, by a solemn recognition of the religious character of the feast, all these things will come to their hearts and form a Christmas litany. The sense may be coming; but hitherto we have been mercifully protected from it, and we have had both time and warning, so that we have been able to make preparations to meet with it, let it come from what quarter of the heaven it may. Another Christmas we may have a different record to set down; but nothing can obliterate the fact that England has enjoyed extraordinary tranquility and prosperity during years when most other nations of the world have been ravaged by war, convulsed by rebellion, or half ruined by anarchy. Let all this be remembered when, at the approaching festival, the people draw together to thank the Author and Giver of all good things.

By a time-honoured custom, at this season of the year the journalist is permitted to relinquish his ordinary duties, and for a few days to assimilate his tone to that of the rest of the world. For this week, at all events, we are allowed to forget the grim details of the fierce struggle between those whom we may call our brothers on both sides of the Atlantic, may perhaps be joining in battle while the Christmas bells are ringing and the Christmas anthem is pealing. We may forget the complications of foreign politics, and cease to speculate upon the contingencies of which special promises may be given by the oracular voice which on New-Year's Day will address the foreign representatives in Paris. We may spare our readers any discussion upon the fearful struggle in Poland, though, when the prayer goes up for prisoners and captives, few among us will fail to remember the Russians who are now groaning in Russian gaols or are shuddering under the Cossack whips that direct the march—sometimes made a whole year's journey—to Siberia. We need not even regret the presence of a French garrison in Rome—Rome, the capital of Pagan Kagesima—hope that we are not beginning a great and costly war in China—deprecate the exterminating views so remorselessly put forth on the New Zealand question—or affect to remonstrate with Australia on the convict business, though convinced—and never more thoroughly than by this last news of brigandism—that she is right. In the Christmas week we are not called upon to survey mankind from China to Peru, or to weft any one's sighing from India to the Pole. We may join our fellow-countrymen in keeping the great feast and in thinking and talking of little that does not connect itself with that festival.

But for a certain class of considerations we might perhaps indulge ourselves, for this time, with the luxury of silence. For, as a rule, if we do not talk politics, British, foreign, or social, we have not much call to be talking at all. It is not for a secular press to usurp the functions of the accredited ministers of religion, and to call antithesis and epigram to the aid of theological teaching. Such of our contemporaries as stray into this course, by way of vindicating their curious claim to be called religious journals, do not appear to us to be very successful in the substitute they proffer for the regular instructor in serious matters. We shall certainly not imitate them, believing as we do that there never was a time in English history when the all-important considerations that belong to the great Christian festivity were so ably and eamestly pressed upon the people by the priests of the Establishment, and by the ministers of other denominations as at the present time. Assuredly we shall not offer a lay sermon in the place of a leading article.

If we appear to depart in a slight degree from the line we are too happy to trace for ourselves, it is really on a ground of date, and not because the thoughts which we would urge will not be set out on Christmas Day in all places of worship with the utmost plain-speaking and affectionate zeal. But those addresses will come when the festival is on, and when we are advanced into the day which we should desire to see marked by benefits to all. We, on the other hand, write some days before the feast, and this is our excuse for dwelling upon the subject of charity. If we are fortunate enough to obtain the attention of those who are preparing for their Christmas, we have no doubt of doing good by reminding them that in the days which will precede Christmas Day there are ample and almost unique opportunities of practising charity. Friday for many who, if no such forethought be taken, will spend but a wretched one. Let us, therefore, recall to the recollection of all who have money, food, coals, clothes at their disposal—and who do not?—that there has not somewhere been a winter in which appeals to them a small one will become great in the eyes of the destitute. We believe that myriads of kind things are left undone because in comfortable circumstances people are apt to be unwilling to credit the smallness of the resources of the poor, of the marvellous way in which they can eut their scant gains into rent, food, and raiment; and of the proportionate value of aid which the benevolent often withhold because it seems so small. If generous-natured people, who do not judge of others by their own, but what they would wish to be slighted, could really be made acquainted with the habits of the poor, and could comprehend what penury means, they would soon be dissheared of the idea that any gift could be unacceptable, especially in the winter months. There is scarcely a coin, any article of clothing, or a present of any other necessary, that will not become an important element in the Christmas Day of the needy. If every reader of these lines would silently, or in council with friends, consider what he could do during the week happier by the individual charity of such reader, exerted between this and Christmas Day, the aggregate of happiness would be enormous. And what would be the sacrifice? We are not going, we suppose, to counsel self-denial whose privilege it is to urge the duty of sacrifice; we will confine ourselves to our own secular pulpit, and ask only the charity that can be afforded without sacrifice. Surely every one who reads these words can bestow a half-crown, or a garment, or half a sack of coals, or a tidy dinner. Those who will have shall be thanked for the suggestion when those who may carry it out have been thanked by the eyes of the receivers of such gifts.

Many thousands can do far more than this, and do it. They, however, are doing it without the need to be urged, and need no prompting from us. Our aim is to point out facts to those who do not know how much good they can effect. They have but to look around them; or, if they are unable to perceive with their own eyesight, let them ask their minister or their medical man to tell them of cases. Those suffering of the poor will have no difficulty. And for other persons whose money is ready enough, but whose time is still more precious, there are the magistrates' poor-boxes. Next to examining a case one's self, there is no better course than to trust implicitly the excellent magistrates, who have such effectual means of ascertaining that charity is not given to those who do not need it. We hope to read that in London assistance has been largely given in the tall way and in the provinces a similar machinery is ready and at the service of the benevolent. If the Christmas litany, of which we have given some idea, but which will be expanded and increased by any intelligent reader, contain a recital of things for which gratitude is due to the Author of all good, we can only suggest that the best means of helping the poor to believe that Christmas is not all selfish holiday, but a solemn memory for those who enjoy the numberless comforts of a happy home.

THE FARM.

OUR "talk is still of bullocks," and those Christmas markets, shows, and sales, which seems somewhat out of place while that portentous instrument, the Bill, which bills and bullocks together, is passing. It ranges from twenty to six degrees above freezing-point. The Islington Market records the following prices:—Beasts, 3s. 2d. to 4s. 6d.; sheep, 4s. 4d.; there were 19,976 beasts and 26,290 sheep entered with the clerk of the market, or about 2,000 more respectively more than last year. A few very superior Scots realised 4s. 10d. per stone, and a few Devon and Downs 6s. was the top quotation. Mr. M'Combie sent 62 of his prime "black brigade," all two years old, from Tillyfour, which were equal to former years, the Devons and Herefords in greater force than usual, the fatal foot-and-mouth disease as yet, rather elderly, retired plough beasts. At the private sales, 29 of her Majesty's Welsh Runts, fed in the meadows at Windsor Park, and rising six years old, averaged over £27 apiece. Six of Baron Anthony Rothschild's fat beasts realised, according to the *Mark Lane Express*, £450—or something like £75 per head. Last year a competition between some of the very first metropolitan and country butchers, the property of the Queen of the very highest quality, even made £40 to £47 10s.; and at Lord Dunham's, over which Mr. Wetherell, as usual, presided, three half-bred polled heifers averaged £38 16s. 8d., one of them—a red and white—going as high as £48. The total proceeds of the latter sale were £571.

The attendance at the Smithfield Club show was several thousands below last year, when the building had novelty to aid it. Next year we trust that any loss of this kind to the Company may be made up by the admission of the public to the galleries during the judging, which, especially at the Royal show, is generally all give the opening day on ticket it has never yet possessed. The delightful Baker-street sight to top p.m. source of the members is now a thing of the past, and this would be its pleasantest substitute. The Carlisle Christmas Show has prospered, and Mr. George Head (who has offered £240 for a Towneley bull last September at one of the county gatherings) comes well up. At Leeds, Capt. Tennant's Rosa, the Smithfield cup winner of last year, took a medal in the extra stock; and at Darlington Mr. Stewart won the 100-guinea cup for the best beast in the yard. It must be won three times in succession before it is claimed for good, and red and then a white ox had done the trick cleverly enough in 1861-2. This year Mr. Stewart had nothing good enough in his "training-stables" at Mains of Ecclemont; but a brother Aberdeen butcher, Mr. Mason, very handily helped the head of the guild in his need by selling him his own roan ox, which he had intended for Birmingham and Smithfield. It was no slight sacrifice, as, but for this gallantry, the roan would have put all the Smithfield sisters and cousins to shame, and Darlington, which had been rather building on one of Mr. Pease's shorthorn-fed Cleveland bays, "got beaten by" the crossbred. It was three years and seven months old, and bred by Mr. Mewe, of the Mains of Haulkerton district. It is, we believe, by a bull bred by Mr. Cruikshank, which united Booth and Bates blood in and, seeing what a number of good shorthorn bulls have been used for years past north of Aberdeen, the beasts of that district are a much pure blood in them as nine tenths of those which are entered as shorthorns in the English fat ranks.

ARRIVAL OF KING GEORGE AT ATHENS.
(From our own Correspondent.)

PIRÆUS, Dec. 4.

THE waters of Grecian politics continue to be troubled by two questions which now accompany the public mind in a disagreeable manner: the cession of the Seven Islands, with the stringent conditions sought to be imposed by the British Government, and the nullification of the decree which the Ionian Assembly adopted by a large majority shortly before the arrival of King George in Greece. M. Saripolos, the Ionian Commissioner here, has submitted a proposition for the revocation of the unpopular decree to the Assembly at Corfu, but without success. He was not even permitted to discuss the subject with that freedom which ought to characterise a chamber elected by a population ardent in its desire for liberty. Two deputies from the National Assembly have been appointed to convey its sympathies to King George on the death of the King of Denmark and to Her Hellenic Majesty on account of his disappointment at the illiberal conduct of the representatives, and intimated a strong desire that the decree be rescinded forthwith. It is difficult to foresee how M. Bulgaris will be able to conciliate his loyalty to his Sovereign with his firm intention of resisting the abrogation of the decree, which has already brought this otherwise able minister into unpopularity; and this divergence of opinions between the Throne and the Assembly is much to be regretted, as contrary to the ordinary course of differences of opinion between Sovereigns and their Chambers, it is generally the latter which is found on the side of the King of the Hellenes.

In consequence of having received my letter of recall, I hastened down to the Pirnus, where I have passed a day or two in wandering about the port while waiting for the departure of the *batsava-á-moyeur* of the Messageries Impériales. Although, not sorry at having a country that does not shine by its hospitality, which is less than Turkish, I, for the high pleasure of passionately exploring, consented to pay at Athens, they received an amount of comfort adequate to the sums demanded, the unpleasantness of the only one I met with patience. But it is sad to pay for dirty, thickly-populated rooms in the best hotels twice the charge that would be made in any other country, and under to give the Grand Hôtel d'Orient or Paris prices for meals altogether abominable and inexplicable in their composition. The Greeks of Athens are indeed a people whose impression that they are the direct descendants of Themistocles, and if they did not gain in the course of a hundred per cent over anybody else they would dishonour their pedigree, and to that would prefer retiring from the business.

But the badness of the hotel accommodation is not the only matter for complaint; the irregularity of the postal arrangements, the scarcity of wheels, the bad state of good roads in the interior, and the consequent exorbitant charges for travelling in the environs of Athens, are matters which demand reform. Although not sorry at having has passed away, but which has left behind it an accumulation of moral and material sterility that will require many years of good government to eradicate.

Before leaving Athens, I paid a visit of adieu to the illustrious marble remains of those ancient monuments which, after all, constitute the best title of the people of Greece to consideration and support. The Athens which appeared to me inundated with soldiers as I looked upon them for the last time, and the charming young girls of the Erechtheion appeared to revive and palpitate under the warm rays as they were reflecting glances towards the gigantic Parthenon, which neither bombs nor mines have been able to annihilate. The entire scene, under the clear and delicious light that issues from an ultramarine sky, appeared to be gilded over a delicious dark red, sufficiently transparent to allow the most minute details of the artistic combination of light and colour. After this, can it be said that the arts are useless? for who would think of visiting, or feeling an interest in, the modern city of Athens were it not that the genius of Phidias still hovers over the Greek capital from the summit of the Acropolis? Other Greek cities, as Argos, are full of interesting remains of ancient splendour with modern corruption and neglect. It remains to be seen whether the arrival of the new King, accompanied by the support of the European Powers, will be sufficient to impart a fresh impetus to a people which has been suffered to languish in the midst of scenes so well calculated to inspire a spirit of progress and civilisation, by the souvenirs of the primitive magnificence of their buildings and the wonderful development of those classical types and forefathers who honoured the marble temples of ancient Greece.

I terminate my letter by a short description of the "entrée" depicted by M. Mariani, whose pencil has thus kept the English public fully en courant with the events attending the arrival of King George in Athens. May his Majesty's reign prove as happy and as successful as his intentions are pure! In that case, bright days will be in store for Greece, and the future a picture of her long-lost moral and artistic worth.

THE KING'S GUARD TAKING THE OATH OF FIDELITY.

On Friday, Nov. 20, the oath of allegiance was administered to the National Guard at Athens on the Place de la Concorde (formerly called the Place d'Odeon). This large square is situated to the north of the city, on the road to Patissia. The Archbishop, followed by several members of the clergy, arrived on the ground at half-past 9 a.m. The oath of fidelity to the King and Constitution was taken by companies and by general acclamation; the Archbishop having on his right hand a Bible richly bound and covered with silver gilt, and, on his left, another Deacon, bearing the New Testament. The two Deacons were in robes of rich brocade, embroidered with gold. The costume of the Archbishop, of richer material, reminded one of the vestments of the upper clergy in the middle ages. The collar of the priests is black, as I think I mentioned on a previous occasion.

The ceremonial service, composed of the clergy and the superior officers of the national guard, proceeded to the drapeau of each battalion, for the administration of the oath, which was invariably taken with solemnity and extraordinary alacrity. For the illustration of this important ceremony our Artist selected the detachment with the most distinguished appearance, and consequently last-named hours, and was concluded amidst the patriotic exclamations of all present in favour of the King and the Constitution.

The regular army will take the oath of allegiance after its reorganisation, which is being rapidly proceeded with.

Mr. Edmondstone, late Lieutenant-Governor of the North-western Provinces of Bengal, has been made a K.C.B.; and Colonel C. B. W. Hervey, of the Bombay Staff Corps, a C.B.

A letter from Valencia, in Spain, states that the crop of oranges has been considerably reduced this year, in consequence of violent hurricanes which have prevailed in that neighborhood.

Mr. G. Lewis and Mr. Frederick Haines, F.S.A., have been appointed honorary secretaries for organising local and provincial committees in aid of the National Shakspeare Fund.

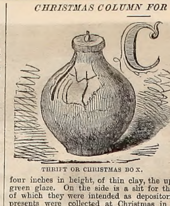
THE NATIONAL GUARD AT ATHENS TAKING THE OATH OF ALLEGIANCE TO KING GEORGE.—FROM A SKETCH BY OUR SPECIAL ARTIST.—SEE PRECEDING PAGE.

"THE FAITHFUL," FROM A PEN-AND-INK DRAWING ON VELLUM, BY THE HON. MRS. RICHARD BOYLE.—SEE NEXT PAGE.

"THE NATIVITY."

The taste for early Italian art and the due appreciation of its unequalled purity and nobleness are of quite recent date in England, and are a novelty even in Italy itself. This phase of art—and therein lies the secret of its unconsciously-exalted character—was not merely religious in a general sense, but it was essentially devotional and entirely subordinated to the service of the Church. For this reason it has very properly been designated also early Christian art. The spirit of this art became from various causes almost extinct soon after the Renaissance, and it has reappeared at very rare intervals.

We feel confident, however, that we may claim for the design by the Hon. Mrs. Richard Boyle first exhibited with the initials E. V. B. attached, in the Gallery of the Female Artists, and engraved on page 613, a singularly large measure of the true spirit of this early Christian art. In justice to the artist we may say that we fear some portion of the delicacy of the pen-and-ink drawing may of necessity have escaped in our Engraving, together with a little of its appropriate simplicity of execution and almost severe purity of expression; but still we trust sufficient of the merits of the original have been reproduced to justify our high opinion.



It will certainly assist to a proper estimation of the drawing before us, and it may not be out of place or unacceptable at the present moment to inquire into the modes in which the early Christian painters (who have evidently been Mrs. Boyle's models) treated the grand event which we commemorate in our great festival of next week. On this subject the most accessible authority is Mrs. Jameson's "Legends of the Madonna." We find then, that the Nativity, like the Annunciation, was treated by the early painters in two ways—as a Mystery and as an Event. And we must be careful to discriminate between them. In the first sense the Christian artist solely intended to express the advent of the Divinity on earth in the form of an infant; and in the all-absorbing wonderfulness of this greatest of all miracles he feels he may ignore all petty earthly accidents or circumstances historically connected therewith. But, with all this latitude, a leading idea, or "motif," seems almost invariably to be (as with our artist) to represent the Virgin in the act of adoring the Child, an idea which may have been taken from a text in the office of the Virgin—*Virgo quem genuit adoravit.* In the words of Jeremy Taylor, "she blessed him, she worshipped him, and she thanked him that he would be born of her;" "as, indeed," says Mrs. Jameson, "many a young mother has done before and since when she has hung in adoration over the cradle of her first-born child." But here the child was to be a descended God; and nothing, surely, can be more natural or more religiously suggestive than the manner in which many of the early painters have expressed this idea. In such pictures the locality is often indicated as a barn, a poor stable, or a rocky cave, and each becomes "a temple full of religion, full of glory, where angels are the ministers, the Holy Virgin the worshipper, and Christ the Deity." Very few accessories are, however, admitted besides those necessary to denote that the subject is a Nativity, properly so called, and not the Madre Pia. In the latter the Virgin is represented adoring the infant, but the accessories are purely ideal and poetical, and have no reference to time or place. Botticelli, Lorenzo di Credi, &c., excelled in works of this description.

In the mystical and poetical versions of the Nativity the Divine Infant lies in the centre of the picture, sometimes on a white napkin, sometimes with no other bed than the flowery turf; sometimes his head rests on a wheatsheaf, always here interpreted as the bread of life. He is often represented placing his finger on his lip, which expresses the *Verbum sum*—"I am the word," or I am the bread of life—and fixing his eyes on the heavens above, where the angels are singing the "Gloria in excelsis." Occasionally his great Sacrifice is prefigured by an angel, or the infant Christ himself, holding a cross, a nail, or a crown of thorns. Frequently angels, and sometimes Joseph, as well as the Virgin, are introduced joining in adoration. There are instances in which attendant saints, as St. Helena, St. Catherine, &c., and votaries or the donors of the pictures are introduced. St. Catherine is introduced in allusion to her marriage with the infant Saviour. Any picture bearing on this mystical marriage was, for intelligible reasons, a favourite subject in nunneries. In a large and famous Nativity by Giulio Romano, which once belonged to our Charles I., St. John the Evangelist and St. Longinus (who pierced our Saviour's side with his lance, and is afterwards said by tradition to have become an eminent convert) are placed side by side as equal witnesses to the divinity of Christ. "A most striking ideal Nativity," says Mrs. Jameson, "is one by Sandro Botticelli, which is, indeed, a comprehensive poem, a kind of hymn on the Nativity, and might be set to music. In the centre is a shed, beneath which the Virgin, kneeling, adores the Child, who has his finger on his lip. Joseph is seen a little behind, as if in meditation. On the right hand an angel presents three figures (probably the shepherds) crowned with olive; on the left there is a similar group. On the roof of the shed are three angels, with olive-branches in their hands, singing the "Gloria in excelsis." Above these are twelve angels, dancing or floating round in a circle, holding olive-branches between them. In the foreground, in the margin of the picture, three figures rising out of the flames are received and embraced by angels. With all its quaint, fantastic grace and dryness of execution, the whole conception is full of meaning, religious as well as poetical. The introduction of the olive and the redeemed souls may express peace on earth, or the olive may refer to the period of universal peace in which the Prince of Peace was born. By many of the Northern painters there are equally elaborate *fantasias*, so to speak, on this favourite theme, but the Italians—Lorenzo di Credi, Perugino, Francia, and G. Bellini—surpassed all others in the poetry and grace of their treatment. In later periods, the Nativity was almost invariably treated without the imaginativeness of fervid faith; the picture then belonging to the second class that we have mentioned, in which the subject is represented as an event, with all the accompanying earthly circumstances and human witnesses. In these pictures the ox and the ass are always introduced as fulfilling the prophecy (in the Vulgate translation), "He shall lie down with the ox and the ass." Even in these, however, the artists often allow themselves a certain latitude for imagination. As an instance of this, we may mention the famous "Notte" of Correggio, in the Dresden Gallery, in which the promised "Light to lighten the Gentiles" seems to be rendered literally, and rays of light, symbolical of Divine enlightenment, emanate from the body of the infant Saviour, an effect sometimes spoken of as original, but which is as certainly borrowed from earlier painters as it is repeated by Rembrandt (in his "Adoration of the Shepherds," in the National Gallery) and other later painters.

We trust we have said enough, and given sufficient examples to show, that the drawing we have engraved is conceived in the true spirit of early Christian poetic and mystic art. Yet it is free from servility of imitation. The crucifixion on the distant Calvary; the Garden of Gethsemane beneath; the star in the east; the nimbi round the various heads; the thorns hedging round the infant Saviour; the angel singing "Peace on earth, goodwill to men!" and accompanying herself on the Italian mandolino, are all naïve but poetical anachronisms entirely in the spirit of Early Italian art. The representation of the Crucifixion against an advanced dawn—of course symbolical of the rise of the "Sun of Righteousness"—is, it appears to us, in the highest degree poetical and suggestive. The doves, the roses, lilies, passion-flowers, and other floral emblems are introduced with taste. The whole is admirably composed, and the varied expression and beauty of the faces are quite equal to the elevation of the conception and the delicate unconventionality of the drawing.

Mr. Goodwin read a paper to the Society of Antiquaries, on Thursday week, upon some Hieratic papyri, which he has lately deciphered. It is a story of 300 lines, relating the adventures of an Asiatic wanderer, about B.C. 2400. This person flees from the Court of King Ammenemos I. into Ethiopia, where he is hospitably entertained, marries the daughter of a chief, and grows a rich man. In his old age he longs to return to Egypt, and writes to the King for pardon. The King returns a gracious answer, and a copy of his letter is given. The adventurer describes his return to Egypt, the awe with which the King's presence inspired him, the mistaken zeal of the courtiers, who, fancying that the King is about to punish the fugitive, cry out that he is guilty; the turning of the tables by the King, who pronounces him innocent, instals him in a splendid house, with a handsome pension, builds him a magnificent tomb, and continues to smile upon him till the day of his death.

CHRISTMAS COLUMN FOR THE CURIOUS.

THRIFT OR CHRISTMAS BOX.

CHRISTMAS has its duties as well as its *rites*; and, although some crusty folks may ignore the Christmas-box of to-day, there is evidence to show that they are, in their stinginess, spurning the wisdom of our ancestors. In the very interesting collection of London antiquities formed by Mr. Charles Roach Smith, and now in the British Museum, are specimens of "Thrift-boxes, small and wide bottles with imitation stoppers, from three or four inches in height, of thin clay, the upper part covered with a green glaze. On the side is a slit for the introduction of money, of which they were intended as depositories;" and, as the small presents were collected at Christmas in these money-pots, they were called *Christmas-boxes*, and thus gave the name to the present itself. These pots were, doubtless, of early origin; for we find analogous objects of the Roman period. One of the specimens in the British Museum is engraved above: it resembles the Roman *Paganalia*. Those described in the second series of "Pompeiana" are earthen boxes, into which money was slipped through a hole.

It is curious to note the changes in keeping Christmas—the going out of some customs and the revival of others. The Bellman, with his printed sheet of verses and woodcuts, is now rarely seen at Christmas; although his office was for all seasons, as guardian of the night, to bless the sleepers whose door he passed, and this was often done in verse. Herrick has some lines ending with—

> Past one o'clock, and almost two;
> My masters all, good-day, to you!

And Milton, in "Il Penseroso," has—

> The belman's drowsy charm,
> To bless the doors from nightly harme.

From the Bellman to Waits is not an abrupt transition. These disturbers of our slumbers at Christmas are the successors of certain old watchmen, who were bound by their tenure to keep watch in the lord's hall from Christmas until Twelfth Day. In the middle of the thirteenth century a tenant at Winterborne was bound, with another of the same tenure, to watch the lord's court by night whenever and as long as it should please the lord or the bailiff, and on the morrow was allowed a dishful of wheat. In one of the manors of St. Paul's Cathedral, a tenant was appointed to watch at the court from Christmas to Twelfth Day, to keep a good fire in the hall; and he received a white loaf, a cooked dish, and a gallon of ale. Sums paid on account of yule-waiting are entered three or four times in "Bolden Book." We quote the above from an admirable series of papers on "The Rights, Disabilities, and Usages of the Ancient English Peasantry," now in course of publication in the *Law Magazine* and *Law Review*. We may add, that waits are the remains of the musicians attached to the Corporation of the city of London; we find them mentioned in the "Liber Albus." A regular company of waits was established at Exeter in 1400; and, though suppressed by the Puritans, was restored in 1600. (Dr. Rimbault, in *Notes and Queries*, N.S., vii., p. 480.) Miss Baker, in her "Glossary," relates that the Corporation of Northampton, within the memory of her informant, had a band of musicians called the Corporation Waits, attired in long black gowns, two playing on violins, one on the hautboy, and another on a whip and club, or tabor and pipe. A Lincolnshire bagpipe was formerly provided in the streets of country towns "for the common dauncing."

In the *Law Magazine*, just quoted, we find that at Christmas, in olden times, tenants and other dependants, in many places, received from the lord an allowance of firewood, called the Christmas stock, or the Christmas brand; and at this time their poultry rents and other donations were usually due; in the Hundred Rolls of Huntingdonshire, donations at Christmas are called *lok*, or lok-silver. A tenant at Huntercombe, in Oxfordshire, on the feast of our Lord's Nativity, was bound to give to his lord a loaf, with a penny halfpenny, a gallon and a half of ale, a cock and a hen; and then, on the same day, the said John and his wife, with another person whom they might choose to bring with them, were to dine with the lord. In most of the manors of Glastonbury Abbey, the bailiffs and chief tenants dined in hall on Christmas Day, receiving bread and beer, meat and pottage; some of the tenants would bring their wives and a third person with them; they were required to furnish their own cups and dishes, and a napkin or tablecloth, if they wished to eat from a cloth; they brought, likewise, a bundle of wood to cook their pottage, unless they chose to have it undressed. This entertainment was called a "Ghest;" it was to be done liberally, and in good style. The tenant of a yardland at Pennard, near Glastonbury, could have at his gest, or, revel on Christmas Day ten loaves and ten pieces of meat—five of pork and five of beef—and he could have at the same gest ten men drinking after dinner in the lord's hall. There was never more revelling and confusion in an ancient hall than at Christmas. Let us fancy the noise, and smoke, and steam—cooks dressing meat as though they were mad, hounds lapping blood and fighting for bones, men and women crowding, laughing, squabbling, talking, all at once; lords and ladies gazing at the scene from the upper part of the hall.

This was one of the seasons for rendering services for tenures in socage, some of which were curious—as lifting up the right hand towards the King on Christmas Day, wherever he might be in England; and rendering a red rose at Christmas. In the Boston municipal records, fat capons are mentioned as part of an annual rent of Corporation lands in 1601:—"A fat capon to be given to the Mayor every Christmas Day." In the same year it was agreed that, in all future Corporation leases, two fat capons should be given to the Mayor every Christmas. (See Mr. Pishey Thompson's excellent history.)

In the "Paddington Charity Estate," as part of the manor assigned for the celebration of the anniversary of Walter, Abbot of Westminster, who died in 1191, we find "Bread and Cheese Lands," given by two maiden gentlewomen, for supplying the poor with bread and cheese on the Sunday before Christmas, and which were thrown from St. Mary's Church among the poor assembled in the churchyard. Bread and coals are now given instead to poor families inhabiting the parish.

At Oxford the celebration of Christmas was, before the Reformation, performed with a pageant. At Merton College he bore the title of King of Christmas, at St. John's he was styled Lord, but at Trinity he was Emperor. Jesus College has a huge silver-gilt wassail-bowl, which will hold ten gallons, and the ladle half a pint. But the most famous commemoration, which is performed to this day, is at Queen's, where the Boar's Head, "decked with rosemary," is brought in great state to the table of the Common Room, with the singing of the old Christmas carol and chorus, "Caput Apri defero."

Carols kept their ground even through the Reformation. Hone wrote, in 1825, few persons, perhaps, are aware that the number of carols now printed and published annually is upwards of seventy; and they have since greatly increased, *vivâ voce*, as well as in the publisher's shop, each succeeding Christmas adding to the number. The Christmas dressing of churches is now systematically carried out by the Church authorities, and even a manual of instructions is published. We doubtless had a Christmas tree in the streets of London more than four centuries since. Stow tells of a great storm on Candlemas Day, rooting up a standard tree in Cornhill, which was full of holme (holly) and ivy for Christmas. Then we read of a great Christmas tree in a pageant in the reign of Henry VIII., "in the hall at Richemonde."

Game pies are made, though rarely to the extent they were some four hundred years ago. In the books of the Salters' Company is a receipt for a Christmas pie, of the time of Richard II.; and a pie so made by the company's cook in 1836 was found excellent. The Corporation of the city of Gloucester present to the Sovereign every Christmas, as a token of their loyalty, a lamprey-pie, which is sometimes a costly gift, as lampreys at this season can scarcely be procured at a guinea a piece: so says a little book, "Fish, How to Choose," &c., recently printed at Launceston.

FINE ARTS.

The specimens of art-workmanship submitted in competition for the prizes offered by the Society of Arts amount to seventy in number, and are now placed for inspection in the society's great room, in the Adelphi, where they will remain until Christmas, when they will be removed to the South Kensington Museum. The works exhibited comprise a number of bas reliefs, after Raphael's "Three Graces," and after arabesques by Lucas van Leyden; specimens of metal repoussé work, after the first-named subject, and one after a Flemish salver; specimens of hammered ironwork, after a German arabesque; carvings in ivory, after a terra-cotta ascribed to Lucca Della Robbia; chasings in metal, after a reduced copy of Gibson's "Psyche" and after a bronze plaque; an enamel painting in *grisaille* after a German arabesque; paintings on porcelain, after a figure by Raphael and after arabesques by Lucas Van Leyden; pieces of marquetry, after a majolica plate; and a work in embroidery, after a German example in the Green Vaults, at Dresden. The idea of this competition was an excellent one; and, as a beginning, the response has fully justified the society in the reappointment of the committee to make arrangements for another competition. Messrs. Redgrave, R.A., Digby Wyatt, and John Webb have been requested to act as judges in awarding the prizes.

The National Portrait Gallery has been redecorated during the recess. The dirty walls have been re-painted a rich but unobtrusive reddish tone. The collection has also been arranged in chronological order. The following are the most recent additions:—"Lord John Hervey," Keeper of the Privy Seal to George II., and the subject of one of Pope's severest satires, presented by a descendant, the present Marquis of Bristol; "King Henry VIII.," when young, duplicate of a portrait at Althorp; "Catherine of Aragon," a lifesize bust picture from Lee Priory; "Sir Nicholas Bacon," the father of Lord Bacon and Keeper of the Great Seal under Queen Elizabeth; and a portrait of O'Keefe, the dramatist.

In a notice of Mr. Burton's cartoon of "Jehu and Joram," now in the Water-Colour Painters' Exhibition of Sketches and Studies, we suggested, knowing the artist had long resided in Germany, and drawing the inference from a slight academicism in the work in question, and also from an extreme vigour of action reminding of cartoons by Kaulback and Cornelius, that "its existence might, perhaps, be due to the influence of those German masters." A correspondent writes, however, from Ireland to say that he saw the cartoon in the artist's studio before its exhibition in 1849, and before Mr. Burton had visited Germany. It is due to the artist that this fact should be stated; nevertheless, the characteristics of the cartoon and the artist's subsequent residence in Germany seem still to indicate a proclivity to a style of art not uncommon in that country, but which would not have been suspected from Mr. Burton's more recent works.

A monument is now being erected at Ajaccio (the birthplace of the first Napoleon), in Corsica, to commemorate the Bonaparte family and the glory of the first empire. A group, representing Napoleon I. on horseback, in Roman costume, and his four brothers standing behind him, cast in bronze, each 6 ft. high, will be placed on a pedestal of white marble; and in the rear of this monument a triumphal arch, with three openings, is to be erected.

The working men of Leeds have determined to erect a statue to the late Sir P. Fairbairn as a public acknowledgment of the great services rendered by him to the borough.

Up to the present time, Mr. L. B. Guinness, the brewer, has expended £110,000 in restoring St. Patrick's Cathedral, Dublin. The total cost of the restoration, which will be wholly defrayed by Mr. Guinness, will probably amount to £150,000.

The annual prizes were awarded at a general assembly of the Academicians, under the presidency of Sir Charles Eastlake, on Thursday week, as follows:—The gold medal, books, and a scholarship of £25 for two years, to Francis Holl, for the best historical painting; to Henry Bursill, for the best historical group in sculpture; to Richard Phenè Spiers, for the best architectural design. The Turner gold medal to Frank Walton, for the best English landscape. Silver medals and books were likewise awarded to Arthur Ackland Hunt, for the best painting from the life; to George Smith, for a copy made in the School of Painting; to Arthur Ackland Hunt, for the best drawing from the life; to Francis Holl, for the next best drawing from the life; to Edward Evans, for the next best drawing from the life; to Richard Phenè Spiers, for an architectural drawing; to John Barclay Grahame, for the best drawing from the antique; to Augustus E. Mulready, for the next best drawing from the antique; to Charles B. Barber, for the next best drawing from the antique; to Samuel B. Long, for the best model from the antique; to Frederick S. Potter, for the next best model from the antique. A travelling studentship for one year, with an allowance of £100, was awarded to Thomas Henry Watson, for the best design in architecture.

MUSIC.

As usual at this season of the year, there is but little at present in the way of novelty at matters musical.

At Covent-Garden the combined attractions of "Blanche de Nevers" and "The Desert Flower" still attract but meagre audiences. Preparations are, however, being made on a large scale for the forthcoming pantomime. It is to the punning of Mr. Byron, the grotesque drolleries of Mr. W. H. Paine, and the gorgeousness of "transformation" scenery, that the management of the Royal English Opera for a time look to restore its fortunes.

The Monday Popular Concerts increase as they go on in their "popularity." On Monday last the demand for places was unprecedented, and the hall was filled to overflowing with an attentive and appreciative audience. Beethoven's magnificent septet in E flat was repeated, in consequence of its favourable reception a week or two back, the executants, as on the former occasion, being Messrs. Lotto, H. Webb, Payne, Severn, Lazarus, C. Harper, and Winterbottom. Mdme. Arabella Goddard's wonderful rendering of Woelfl's "Ne Plus Ultra" sonata was, as usual, productive of the greatest enthusiasm. The marvellous ease with which the fair pianist overcomes the apparently insurmountable difficulties of this work is now familiar to the *habitués* of these concerts. Mdme. Goddard afterwards joined M. Lotto in Dussek's sonata in B flat, the instrumental portion of the programme being wound up by Mozart's quartet in C (No. 6), the manifold beauties of which we should better have been able to enjoy had a great portion of the audience conformed to the printed request of the directors to avai themselves of the pauses between each movement to take thei departure. Vocally, the programme was unusually strong. Mdme Rudersdorff, in Schubert's "Gross ist Jehova der Herr," and in the spinning-wheel song from "Faust," sang like the thorough musician she is; and Mr. Sims Reeves declaimed Handel's "Deeper and deeper still" magnificently, while his graceful singing of Mendelssohn's "Hunter's Song" elicited such a hearty and spontaneous expression of delight and admiration from the audience as to induce the great tenor to depart from his usual rule and accept the encore.

The first Christmas performance of the "Messiah" was given on Friday in last week, by the Sacred Harmonic Society, with a completeness not to be surpassed. To the well-trained chorus of the society the music of "The Messiah" is, of course, familiar as household words, and on the present occasion they sang with extraordinary precision and effect. The "Hallelujah Chorus" was, as usual, productive of immense excitement and enthusiasm. Mdme. Parepa sang the music allotted to her to perfection, her splendid soprano voice "telling" with immense effect. Mr. Sims Reeves, though still evidently suffering from the effects of his recent illness, proved himself as unapproachable as ever as an exponent of sacred music, and Mdme. Sainton-Dolby's rendering of "He was despised" was as beautiful as ever. Mr. Patey made his first appearance as an oratorio singer, and created a most favourable impression. He divided the bass music with Mr. Renwick, who, though new to the profession, promises well.

The Students of the Royal Academy of Music gave their fourth concert at the Hanover-square Rooms on Saturday, and the result was creditable to the institution. Several original compositions by the students were given, all of which were more or less meritorious. The most noteworthy, perhaps, was a MS. scena, entitled the "Maid of Orleans," written by Miss Agnes Zimmerman

(King's Scholar). It is very cleverly written, and was charmingly sung by Miss Fanny Armytage. MS. overtures by Mr. Arthur Fox and Mr. T. Walstein were also deserving of praise, evincing considerable promise of better things to come. Mr. Charles K. Hall played Weber's Concert Stück, well, and the concert, generally, seemed to give satisfaction to the friends of the students, who mustered in great force.

M. JULLIEN'S CONCERTS are drawing to a close, after a prosperous season. The production of a descriptive quadrille, after the manner of those invented by his late father, was on Saturday night attended with success. It is called "The Congress Quadrille;" although why it is so styled is somewhat difficult to determine. It consists of popular airs of all descriptions and nations, strung together with quite enough "sound and fury," which, although not signifying much, was sufficient to satisfy the promenaders.

THE THEATRES.

NEW ROYALTY.—A new farce, somewhat of the coarsest, and entitled "Mad as a Hatter," has been produced at this theatre. It is said to have been written by Mr. Francis Marshall, and to be his first dramatic essay. An objection may well lie to the subject of the piece as a motive for fun; and, indeed, for some time the audience appeared rather grave than gay in mood; but the writer has evidently qualifications for farce-writing, and prevailed by force of them in the long run. The hero, Charles Hairbrain (Mr. D. James), is believed by his uncle, Mr. Crotchety Fuzzleton (Mr. W. H. Stephens), to be insane, and treated accordingly. The old gentleman will not trust him with a knife or fork, and makes him eat his lunch with a wooden spoon. Moreover, he has him examined by a couple of mad doctors, from whom he cannot escape without violence. At length he resolves to turn the tables on his crotchety uncle, and, passing off an acquaintance as a madhouse-keeper, places old Fuzzleton under his régime, has him bound in a chair, and offers to shave his head. All this is so wildly extravagant that it will scarcely bear detail; but the audience accepted it as the natural climax of an odd story and as a sufficient motive for the uncle yielding to the nephew's demand.

FREE-TRADE HALL, MANCHESTER.—The Shakspearean entertainment by Miss Edith Heraud and Herr Krueger was given at this hall on Saturday, and has been freely commented on, and much commended by, the local press. The *Guardian* states that Miss Heraud has a fine person, an expressive face, distinct enunciation, and declamatory power; and that Herr Krueger is far removed from commonplace and goes direct to the exhibition of passion, whatever it may be. The *Examiner* declares that Miss Heraud and Herr Krueger deserve peculiar praise for the admirable manner in which they discharged a truly onerous task. "The whole entertainment," it adds, "is in reality a capital intellectual exercise, and to realise its full merits requires a certain degree of culture in the audience as well as in the artists. Miss Edith Heraud possesses both great personal and mental qualifications, and a rare intelligence marks all she undertakes. Widely different as were the emotions she was called upon to portray, a nice discrimination pervaded the whole, which visibly told upon the audience." Of Herr Krueger, it adds, that there is no mistaking the fact that his task is indeed a labour of love. "His appreciation of what we may term the more hidden beauties of Shakspeare's text was very apparent, and altogether he produced an impression which was highly favourable."——On Monday, Tuesday, and Wednesday these two admirable artistes appeared at Cheltenham in "Macbeth" and other Shakspearean dramas.

COUNTRY NEWS.

An investigation is being carried on at Queenstown into the recent enlistment of a number of her Majesty's subjects for service on board the Federal corvette Kearsage.

Mr. Crossley, the ex-Mayor of Halifax, presented a bust of the Princess of Wales to the Corporation of Halifax, yesterday week, as a companion to that of the Prince, which he gave a short time ago. Mr. Crossley has also commissioned Mr. Marshall Wood to execute a bust of the Queen.

The trial of George Victor Townley for the murder of Miss Goodwin, of Wigwell Hall, was brought to a close, at Derby, on Saturday. A plea of insanity was set up; but the jury, after a few minutes' deliberation, found the prisoner guilty, and he was sentenced to death—Mr. Baron Martin stating that he "entirely concurred" in the verdict.

The large screw-steamer the Pampero, being built on the Clyde, which has lately been the subject of much speculation, on the allegation that, though ostensibly a passenger-vessel, she was intended for Confederate use as a war-ship, was on Thursday week seized by the Collector of Customs, acting under instructions from the Lord Advocate.

The *Gazette* of yesterday week contained an Order in Council directing an alteration in the Northern, Midland, and Norfolk Circuits, by which the county and city of York are taken from the Northern and annexed to the Midland Circuit, and the counties of Leicester, Rutland, and Northampton are taken from the Midland and annexed to the Norfolk Circuit.

The Birmingham papers narrate a desperate affray with three burglars which a Mr. Chivers, a gentleman residing at Birmingham, had early on Saturday morning. It was fortunate for Mr. Chivers that he encountered them singly. By his courage and determination Mr. Chivers saved his property, which was packed up ready to be carried off, administered a sound thrashing to two out of three ruffians, and, though he was unable to follow and apprehend them, yet marked them so that they are not likely to escape the attention of the local police.

The Earl of Leitrim has been cast in damages, to the amount of £100, by a Dublin jury, for a libel on Mr. Studdert, a sub-inspector of constabulary. The noble defendant, who appears to have been a good deal troubled with threatening notices, received one of these missives some time ago, and assumed that it was written by Studdert. He sent a series of letters to Dublin Castle on the subject; but the authorities there, finding that there was no evidence to substantiate so grave an accusation, declined to comply with his demand that Studdert should be brought to justice. These letters contained the libel which formed the subject of the trial which has just ended in a verdict against the noble Earl.

At a meeting of the Glasgow Faculty of Procurators on Thursday week—Mr. A. Bannatyne, Dean of the Faculty, presiding—it was announced that Mr. George Baillie, late Sheriff-Substitute of the western district of Perthshire, had executed certain deeds, conveying the sum of £18,000 to the Dean and Council of the Faculty, as trustees for the erection of free libraries and public schools. The sum so conveyed is at present vested in good movable securities, and the income derivable from the estate is to be accumulated for twenty-one years. At the end of that period it is expected that the sum conveyed will, at compound interest, amount to fully £40,000. With this sum Mr. Baillie contemplates the erection of one or more free public libraries, as the trustees shall then deem expedient, to be constructed on the principle of the public free library established by Mr. Brown, in Liverpool. Another object which Mr. Baillie has in view, if the funds should admit of its being carried out, is the establishment of public schools for the poorer classes, in which education will be given at such moderate fees as the trustees may think fit to exact. The meeting resolved to authorise the Dean and Council to accept of the trust conferred on them, and to express to Mr. Baillie their gratification at his disinterested gift.—*Scotsman.*

THE POST OFFICE LONDON DIRECTORY FOR 1864.—This useful and indispensable volume has long been the largest annual work of reference in the world. Every year, however, it grows larger; it this year contains 2428 pages, being ninety-six more than the volume of last year. London not only grows and furnishes more names and addresses for compilation, but new trades and pursuits to be classified. Among the fifty trades which appear this year for the first time in the Directory are boot and shoe elastic manufacturers, wind-engine manufacturers, pyrites merchants, paper-material dealers, church and schoolroom decorators, mica merchants, and talc merchants. The value of the volume depends, of course, on its accuracy and the lateness of the corrections rendered necessary by the constant changes taking place in the community. In the present issue we notice one or two cases, which will show to how recent a date the lists have been revised and the information brought down. The name of Bonamy Dobree, sen., Esq., whose death was announced on the 26th of November, is taken out of the Official Directory, p. 47; list of Directors of Bank of England, p. 83; and list of City Lieutenancy, p. 2281. The new Solicitor-General, Sir Robert Porrett Collier, gazetted Nov. 27, appears as such throughout the book:—Streets, pp. 325 and 710; Commercial, p. 925; Law, pp. 1986, 2008, and 2012; Court, p. 2104; and Parliamentary, pp. 2253 and 2262. The appointment of Sir Gillery Pigott, Baron of the Court of Exchequer, gazetted Dec. 4, is noted in two places:—Law, pp. 1985-1989; Court, p. 2185. The name of the new member for Andover, W. H. Humphery, Esq., gazetted Nov. 24, is inserted in Court, p. 2147; and Parliamentary, pp. 2256 and 2261; and the name of the new French Ambassador, Prince de la Tour D'Auvergne, who was presented at Court on the 2nd of December, is entered in the list of Foreign Ministers, p. 111; and Court, p. 2110.

CHESS.

TO CORRESPONDENTS.

*** The answers to very many chess correspondents are unavoidably postponed, from want of room, this week.

PERMENON, Lyons.—1. Both books could, no doubt, be forwarded to you by the ordinary Continental Conveyance Company. Your best course will be to apply to Mr. R. Simpson, Bookseller, 10, King William-street, Charing-cross, London. 2. You omit to say what problem your solution applies to.

G. B. F.—We have not met in London with a single copy of the Spanish chess magazine *El Ajedrez*, or the Italian one called *La Revista*. Have you applied to any of the foreign booksellers here?

A SUBSCRIBER.—The result of the tourney at Dusselford, briefly stated, was as follows:—Of the twelve players who took part in the combats, Mr. Max Lange won the first prize and Mr. W. Paulsen the second. In the "Concours de Problêmes" twenty-one competitors appeared, each furnishing two problems; in this contest, to Mr. I. Seeberger was adjudged the premier prize, and to Mr. V. Knorre the second, while complimentary honours were accorded to Miss Lina P— and to MM. Meyer, Stavenuter, and H. Lehner.

W. G. W.—THE PROBLEMS OF "I. B., OF BRIDPORT."—Your considerate suggestion has been anticipated. A collection of all the best problems composed by our lamented contributor, "I. B.," including several hitherto unpublished, and amounting altogether to nearly two hundred beautiful examples of chess strategy, is now being made. The whole, when properly classified, will be published on diagrams in a single volume, for the benefit of his wife and children, who, we regret to learn, are left in circumstances which render any assistance the sale of this little work may realise peculiarly acceptable. The volume, price only 5s., is to be published by Mr. Simpson, the chess bookseller, of 10, King William-street, Strand.

H. E. KIDSON.—It shall be re-examined and the result given next week.

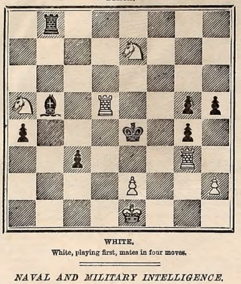
MATEO DE ZAMORA.—Your solution of Problem 1031 is perfectly correct, but it reached us too late for the insertion of your signature in the ordinary list.

I. M. HARVEY, Limerick.—The solution of Problem No. 1032 is quite sound. Look at the position again attentively until you have thoroughly worked it out.

L. E., Grand Parade, Brighton.—The numbers required were duly forwarded.

PUZZLED.—In a game played by consultation neither party can legally try conclusions by moving the men about. The rule on this point in "Chess Praxis" is as follows:—"If either party be detected in moving the men when it is not their turn to play, or in moving more than one man (except in castling) when it is their turn to play, they shall forfeit the game, unless they can show that the man was moved for the purpose of adjusting or replacing it."

*** An Amateur of moderate skill, desirous of playing a game of chess by correspondence, may meet with an antagonist by addressing "T. W.," Post Office, Cardiff.



SOLUTION OF PROBLEM NO. 1033.

WHITE.	BLACK.
1. B to Q Kt 5th (ch)	Kt takes B
2. R to K B 4th	Any move
3. Kt mates	

PROBLEM NO. 1034.

By Mr. F. HEALEY.

BLACK.

WHITE.

White, playing first, mates in four moves.

NAVAL AND MILITARY INTELLIGENCE.

ADMIRALTY.

The following promotions, consequent on the death of Admiral of the Red J. Ayscough, on the 2nd inst., have taken place:—

Admiral of the White Sir E. Harvey, K.C.B., to be Admiral of the Red.

Admiral of the Blue Sir J. Stirling, Kt., to be Admiral of the White.

Vice-Admiral the Right Hon. C. Philip, Earl of Hardwicke, on the reserved list, to be Admiral on the same list.

Vice-Admiral of the Red Sir H. D. Chads, K.C.B., to be Admiral of the Blue.

Vice-Admiral of the White Sir R. L. Baynes, K.C.B., to be Vice-Admiral of the Red.

Vice-Admiral of the Blue the Right Hon. Lord G. Paulet, C.B., to be Vice-Admiral of the White.

Rear-Admirals R. W. Hargood and Sir T. R. T. Thompson, Bart., on the reserved list, to be Vice-Admirals on the same list.

Rear-Admiral of the Red R. Smart, K.H., to be Vice-Admiral of the Blue.

Rear-Admiral of the White Sir L. T. Jones, K.C.B., to be Rear-Admiral of the Red.

Rear-Admiral of the Blue W. H. A. Morshead, C.B., to be Rear-Admiral of the White.

Capts. B. J. Sullivan, C.B., H. Bagot, the Hon. W. B. Devereux, and Sir G. N. B. Middleton, Bart., C.B., to be Rear-Admirals on the reserved list.

Capt. G. Giffard, C.B., to be Rear-Admiral of the Blue.

Retired Vice-Admiral G. O. Lempriere to have the rank and title of Retired Admiral, in pursuance of the Order in Council of May 7, 1858.

The Channel Squadron, consisting of the Edgar, the Black Prince, the Warrior, the Defence, and the Trinculo, left Plymouth on Tuesday for Lisbon. The Aurora, Resistance, and Royal Oak remain at Plymouth.

The examination of candidates for admission to the Royal Military College, Sandhurst, commenced on Thursday, before Major-General Hamilton, C.B., and the members of the Council of Military Education.

An order has been received at Portsmouth Dockyard for the entry of about 1000 men, artisans and labourers, in the various departments, to expedite the fitment of ships ordered to be brought forward for service.

Major-General Alexander Tulloh has resigned the post of Director of Ordnance, from ill health, and Lord De Grey has appointed Brigadier-General St. George, now president of the Ordnance Select Committee, to succeed him.

The "pardon" of Paymaster Smales—out of whose trial at Mhow the Crawley court-martial has arisen—has been followed by that officer's being placed upon half pay from the date at which he was struck off the strength of the Inniskillings.

The large military gymnasium recently erected at Chatham is complete, and only awaits the formal order from the War Office for its being taken over by the military authorities of the garrison. In future the exercises of the gymnasium will form a daily portion of the physical training of every officer and soldier at Chatham, they being, in short, incorporated with his daily drill.

The annual examination of the boys trained on board the Worcester, lying in the Thames, took place on the main deck of that vessel on Monday. The boys are intended for the merchant service, and the institution owes its existence mainly to the energy and munificence of the late Mr. Richard Green. Lord Clarence Paget, Secretary to the Admiralty, distributed the prizes, and gave the boys sound advice as to their conduct on first going to sea.

A series of experiments, in connection with floating targets, was made yesterday week. At 1000 yards the 600-pounder Armstrong sent a steel shell through the Warrior target (which had been moored out to sea for the purpose of being fired at); but the 300-pounder unfortunately missed it four times—the third shell bursting in the gun—and hence there was no opportunity afforded of comparing the relative effect of these pieces. It may, however, be added that the effect of the shell bursting was terrific, and shook the target nearly to pieces. The initial velocity of the 600-pounder projectiles was 1150 ft. per second.

An important addition was made last Saturday to the Royal Navy by the launch of the armour-cased screw steam-frigate Minotaur at the premises of the Thames Ironworks and Shipbuilding Company, Blackwall. The Minotaur is of the same size and class as the Agincourt, being built for the Government by Messrs. Laird, of Birkenhead, and the Northumberland, at Millwall. The following are the dimensions of the vessel:—Length between perpendiculars, 400 ft.; extreme breadth, 59 ft. 4 in.; depth in hold, 41 ft. 6 in.; draught of water, 25 ft. 6 in.; burden in tons, builders' measurement, 6812. Her engines are of 1350-horse power, and are fully calculated to perform a speed of fourteen knots an hour, notwithstanding the immense size and weight of the vessel. Her armour-plates are 5½ in. thick, or 1 in. thicker than in vessels of the Warrior class, and her backing is composed of 9-inch teak timber. The armour of the Warrior extends only over a length of 212 feet, the entire length of that vessel being 380 feet; but the Minotaur will be completely ironclad from stem to stern, leaving no part of the vessel unprotected. About one third of her armour has already been bolted to her sides. Her armament will consist of fifty guns of large calibre, the description of which has not yet been determined on—the Admiralty now being engaged in carrying out experiments on board the Excellent gunnery-ship, in order to ascertain the efficiency of 300-pounder rifled, 150-pounder roundshot, and other guns for arming men-of-war, and also an improved apparatus which has been invented for the purpose of working these large guns with ease and efficiency in the naval service. The Minotaur has been fitted for the reception, when necessary, of a powerful ram at her stem.

THE VOLUNTEER MOVEMENT.

The distribution of the prizes won by the 1st Middlesex Artillery in the annual prize-shooting of the corps at Plumstead during the past season took place yesterday week, at the head-quarters, in Leicester-square. A large number of the friends and supporters of the regiment was present. Lieutenant-Colonel Creed (late of her Majesty's Indian Artillery), the commandant of the corps, presided. He observed that the present establishment of the 1st Middlesex Artillery Volunteers consisted of seven batteries of 50 men each, making a total of 350 of all ranks. There were 219 effectives, for whom the capitation grant would be received; 99 recruits, who had been unable to attend a sufficient number of drills; and 27 in the band. Mrs. Creed then presented the prizes. After the distribution of the prizes a concert was given, and the proceedings terminated with a ball.

An interesting contest between the corps composing the right and left wings of the 2nd Middlesex Administrative Battalion, under the command of Lieutenant-Colonel Wilkinson, took place last week at Tottenham. The score made by the Barnet, Tottenham, and Enfield-lock corps (the left wing) exceeded that made by the Hampstead, Hornsey, and Highgate (the right wing), and, as was quite right under the circumstances in a military point of view, the rear company of the battalion (the Barnet corps) was at the top of the column. One of its members carried off as a trophy of the victory a handsome cup, awarded to the highest score on the winning side, and also the highest in the match.

The annual presentation of prizes to the 29th (North) Middlesex Rifles, by Colonel Viscount Enfield, M.P., took place on Monday evening, at the St. Pancras Vestry-hall, in the presence of a crowded auditory.

The 7th Surrey Rifles, under the command of Major Beresford, assembled at the drill-shed, Lower Kennington-lane, on Saturday evening last, for the last commanding officer's parade this year. After going through a variety of battalion movements, which were admirably executed, Major Beresford presented Sergeant Herman with a gold watch, value twenty guineas, subscribed for by the members of the regiment as an acknowledgment of his services.

The Maldon, or 23rd Essex Corps, celebrated its third anniversary last week. A report and balance-sheet were laid before the members, and it appeared that a balance of £143 remained in favour of the corps. The commemoration proceedings included, as usual, a dinner, at which Captain Hamilton, commandant of the corps, presided, supported by the members of the borough and about 100 other gentlemen.

Lieutenant-Colonel Ibbetson inspected the Saffron Walden corps, under Lieutenant Wade; fifty members of the 1st Cambridgeshire, under Captain Barlow; ninety members of the 8th Cambridgeshire, under Captain Clay; and twenty of the Saffron Walden Cadet Corps, at Cambridge last week. During the progress of the inspection, Colonel Ibbetson put Sergeant-Major Newton under arrest for "answering" him. At the close of the evolutions the gallant Colonel expressed his regret that the battalion was not up to the average standard of the volunteers whom he was in the habit of inspecting.

In Suffolk a match has taken place at the Sudbury range, between seven members of that corps and seven of the Hadleigh corps. The Hadleigh seven made a score of 374 against 349 obtained by their opponents.——The best shots among the Ipswich corps have commenced a competition for two challenge cups, which must be won six times before they become the absolute property of any member. The present holders are Private C. Johnson and Private J. Haward.——The Walton battery of artillery was officially inspected last week by Lieutenant-Colonel Knox, R.A.

MONETARY TRANSACTIONS OF THE WEEK.

(*From our City Correspondent.*)

THE Bank of France having lost nearly £600,000 in specie within the last few days, the market for Home Securities has been very inactive this week, and prices have had a drooping tendency. Consols, for Money, have realised 90⅞ ¾; Ditto, for Account, 91 to 91⅛; Reduced and New Three per Cents, 90⅞ ¾; Exchequer Bills, 11s. to 6s. discount. Bank Stock has been 234 to 236. India Five per Cents have sold at 106⅜ ¼; Ditto Bonds, 13s. to 5s. discount. There has been rather more inquiry for accommodation, and, for the most part, the rates have been well supported. However, a few short first-class bills have been done at 7½ per cent. On the Continent money is held at extreme rates. Nearly £800,000 in bullion has arrived, chiefly from Australia, America, and Mexico. A portion of that amount has been disposed of to the Bank of England, but several parcels have been withdrawn for export to the East. Most of the Continental exchanges are unfavourable; but there is still a profit on the import of gold from New York. The dealings in the foreign house have been much restricted:—Mexican, Turkish, Greek, Spanish, and Brazilian Bonds have given way, and the scrip of the Confederate Loan has declined to 36, buyers. Joint-stock Bank and Miscellaneous Securities have been dealt in to a fair extent, at steady currencies. The Railway Share Market, however, has been somewhat heavy, at barely previous rates.

THE MARKETS.

CONSIDERABLE inactivity has prevailed in the corn trade this week, and wheat has given way 1s. to 2s. per quarter. The value of other produce has had a drooping tendency. The show of fat stock for Christmas consumption has been unusually large, and of very fine quality. Sales have progressed slowly, at 5s. to 5s. 2d. per 8 lb. for the best Scots. In the Colonial markets the transactions have been on a limited scale. Sugar has declined 6d. to 1s per cwt. Tea, coffee, and rice have ruled about stationary. Tallow has fallen to 40s. 9d. per cwt., on the spot; but linseed oil is steady, at 35s. American turpentine is nominal; but French qualities are selling at 65s per cwt. Hay and straw have supported previous rates, but the demand for them has ruled inactive. Owing to short arrivals, the best house coals have realised 20s. 6d. per ton. Potatoes are coming to hand in full average abundance, and the inquiry for them is somewhat heavy, at from 50s. to 90s. per ton. In the various other markets the transactions have been on a restricted scale; nevertheless, the currencies may be considered tolerably firm.

LORD WALSINGHAM.

GOSWELL-STREET will always be famous as the residence of "Mr. Pickwick," but still more so as the *locale* of the Dolphin Yard, where the Smithfield Club first held its meetings, in a most supremely uncomfortable manner. The club has now such a fine balance (£4800) as its banker's that it keeps increasing the prizes year after year, and, as one of its leading members declared at the dinner, "it hardly knows what to do with its money." The president of such a society has certainly no need to be oppressed with care on its account. His duties throughout the official year are more honourable than onerous; and the list, since its establishment, towards the close of the last century, presents a very fine array of names eminent in the agricultural world. Lord Walsingham, who was born in 1804, has been creeping (since the late Mr. Jonas Webb gave up showing) to the top of the tree with his southdowns. He was then tempted to exhibit at local shows; and so, by judicious breeding and using the best of the Babraham rams, he has been enabled to wander farther afield, and to collar the *Rs* Richmond, Radnor, and Rigden, both at the Royal and the Smithfield. Four seconds and three thirds formed the aggregate of his prizes in 1858-67 for fat wethers above and under twenty-two months. Last week he won in three classes, took the silver cup for the best pen, and came second to the Duke of Richmond in two other classes. At the Royal Agricultural Society he was second with his pen of shearling ewes in 1860-2 besides winning a third and a second for old rams, and divers H.C.s and C.s; but at Worcester he came with quite a rush, and had the first prize in all the Southdown classes, and all the prizes in two of them. His Lordship has never given very high prices for shorthorns; but Beauty, the Islington prize cow, and a "very good one indeed" (as the "Nestor of shorthorns observed"), was bred from the Merton stock. The Norfolk President's year should long be remembered, as he and his countryman carried away seventeen firsts, six seconds, and two thirds. Nothing came amiss to them; and the shorthorn, Hereford, Devon, Suffolk, Galloway, Southdown, and crossbred classes of sheep and cattle all attest their prowess as breeders, or feeders, or both.

Our Portrait is from a photograph by Messrs. John and Charles Watkins, of Parliament-street.

LORD WALSINGHAM, PRESIDENT OF THE SMITHFIELD CLUB.

REMOVAL OF THE LATE KING OF DENMARK'S REMAINS.

SINCE the death of King Frederick VII., which occurred at his palace of Glucksburg, in Schleswig, on the 15th of November, the church bells have tolled throughout Denmark two hours morning and evening. The late King had forbidden the embalming of his body, and it was in consequence immediately inclosed in a leaden shell, and remained lying in state in a chapel at Glucksburg until Monday, Nov. 30, when, as described in our last Number, his Majesty's remains were removed, with much ceremony, to Flensburg, and placed on board the Royal steamer Schleswig, for the purpose of being conveyed to Copenhagen. Having proceeded down the "fiord," the Schleswig cast anchor, and proceeded the next morning on her mournful mission. Copenhagen was reached at four p.m. on Dec. 2, and the whole town was astir, the bells tolling. Before the coffin was disembarked darkness had set in. Innumerable torches were lit along the quays and in the port, and a naval cortège was formed of a peculiarly solemn character. The Royal barge, containing the coffin, surrounded by officers and guards, was towed by barges of the Royal navy, and surrounded by more than fifty boats bearing torches, solemn music announcing the progress of the almost mystic procession through a great part of the town surrounding the long inner basin of the port of Copenhagen. At six p.m. the pier of the arsenal was reached, where the landing immediately took place, and the coffin was placed on a hearse drawn by six horses. His Majesty King Christian IX., the Crown Prince, and other Royal Princes, the Ministers, and a great many other civil and military officers, joined the procession, and walked to the inner court of the Palace of Christiansborg, which was lined with horse and foot guards and brilliantly lighted up. The coffin was here removed and carried through the principal corridor of the palace to the Chapelle Ardente, or Castrum Doloris, where the Royal Chaplain received the body and said prayers. From the 10th to the 16th the Castrum Doloris was open to the public, and to-day the funeral ceremonies will close by the removal of the remains of his late Majesty to the Royal vaults at the cathedral of Roskilde. All the people of Denmark wear deep mourning in token of the severe loss they have suffered.

DEEDS, NOT WORDS.
"Why call ye me Lord, Lord, and do not the things which I say?"—LUKE vi. 46.

Not for ever on thy knees, man,
Would Jehovah have thee found;
There are griefs Jehovah sees, man;
There are burdens thou canst ease, man
Look around!

Work is prayer, if done for God, man;
Prayer which God, delighted, hears.
See, beside yon upturned sod, man,
One bow'd 'neath affliction's rod, man,
Dry her tears.

Not long prayers, but earnest zeal, man,
This is what is wanted more:—
Put thy shoulder to the wheel, man;
Bread unto the famished deal, man,
From thy store.

Not high-sounding words of praise, man,
Does God want, 'neath some grand dome;
But that thou the fallen raise, man;
Bring the poor from life's highways, man;
To thy home.

Worship God by doing good, man;—
Works, not words; kind acts, not creeds;—
He who loves God as he should, man,
Makes his heart's love understood, man,
By kind deeds.

Deeds are powerful, mere words weak, man,
Battering at high heaven's door.
Let thy love by actions speak, man;
Wipe the tear from sorrow's cheek, man;
Clothe the poor.

Be it thine life's cares to smother,
And to brighten eyes now dim;
Kind deeds done to one another,
God accepts as done, my brother,
Unto Him.

The above is from a volume of Poems just published by Hatchard and Co., 187, Piccadilly, London. The volume is elegantly bound, and the poems are beautifully printed on tinted paper, with gilt edges, size, square 8vo. Price 5s. A charming book for a Christmas present. Ask for "Poems," by G. WASHINGTON MOON, F.R.S.L. See also ILLUSTRATED LONDON NEWS, Dec. 5, page 580, "Who Shall Roll Away the Stone?"

Ready this day, Number 1, price 1d.,

DALZIELS' ILLUSTRATED ARABIAN NIGHTS' ENTERTAINMENTS will contain Pictures by the best artists, including J. E. Millais, John Tenniel, and J. D. Watson. Engraved by the Brothers Dalziel. The Text will be carefully revised, with a view to the suppression of the few words which, preserved in former editions, are felt to be unsuited to the taste of the present day. Weekly Numbers, 1d.; Monthly Parts, 6d. Ready Dec. 28.

NOTICE.—Messrs. Ward and Lock have arranged to produce a Series of Standard Works, under the style of Dalziels' Illustrated Penny Series. "The Arabian Nights" is the first Issue, which will be immediately followed by Dalziels' Illustrated "Goldsmith," commencing with "The Vicar of Wakefield."
London: WARD and LOCK, 158, Fleet-street.

STARCH MANUFACTURERS
TO H.R.H. THE PRINCESS OF WALES.

GLENFIELD PATENT STARCH, used in the Royal Laundry, and awarded the Prize Medal, 1862.

DR. DE JONGH'S
(Knight of the Order of Leopold of Belgium)
LIGHT-BROWN COD-LIVER OIL,
pronounced by the most eminent medical men throughout the world to be incomparably superior to all other kinds.

DISEASES OF THE LUNGS AND CHEST.

The extraordinary virtues of DR. DE JONGH'S Cod-liver Oil in pulmonary consumption may now be considered as fully established. No remedy so rapidly restores the exhausted strength, improves the nutritive functions, stops or diminishes emaciation, checks the perspiration, quiets the cough and expectoration, or produces a more marked and favourable influence on the local malady.

Dr. WAUDBY, late Physician to the Hereford Infirmary, bears the following high testimony to its efficacy in diseases of the chest from his own personal experience:—"I can take Dr. DE JONGH'S Oil without difficulty or dislike, and with as little inconvenience as water alone. Not only in my own case, but in many others I have seen, it has caused an improvement of chest symptoms and an increase of weight so soon and so lastingly as to be quite remarkable. I believe Dr. DE JONGH'S Oil to be the most valuable remedy we possess for chronic and constitutional disease."

GENERAL DEBILITY.

In cases of general debility, the restorative powers of Dr. de Jongh's Light-brown Cod-liver Oil have been remarkably manifested, and it has been resorted to with the most beneficial effects, after the whole range of ordinary tonics had been in vain exhausted.

BENJAMIN CLARKE, Esq., M.R.C.S., F.L.S., in testifying to its extraordinary efficacy in his own case, observes:—"Having myself taken both the Pale Oil and DR. DE JONGH'S Light-brown Oil for debility, I am able, from my own experience, to remark upon their effects and comparative usefulness as remedial agents. After the Pale Oil and all other remedies that I could think of had failed, I tried, merely as a last resort, Dr. de Jongh's Light-brown Oil. I received immediate relief, and its use was the means of my restoration to health."

SELECT MEDICAL OPINIONS.

SIR HENRY MARSH, Bart., M.D.,
Physician in Ordinary to the Queen in Ireland.
"I consider Dr. de Jongh's Light-brown Cod-liver Oil to be a very pure oil, not likely to create disgust, and a therapeutic agent of great value."

SIR JOSEPH OLLIFFE, M.D.,
Physician to the British Embassy at Paris.
"I have frequently prescribed Dr. de Jongh's Light-brown Cod-liver Oil, and I have every reason to be satisfied with its beneficial and salutary effects."

DR. LETHEBY,
Medical Officer of Health, and Chief Analyst to the City of London.
"It is, I believe, universally acknowledged that Dr. de Jongh's Light-brown Cod-liver Oil has great therapeutic power; and from my investigations I have no doubt of its being a pure and unadulterated article."

DR. LANKESTER, F.R.S.,
Coroner for Central Middlesex.
"I consider that the purity of this Oil is secured in its preparation by the personal attention of so good a Chemist and intelligent a Physician as Dr. de Jongh. Hence I deem the Cod-liver Oil sold under his guarantee to be preferable to any other kind as regards genuineness and medicinal efficacy."

EDWIN CANTON, Esq., F.R.C.S.,
President of the Medical Society of London.
"For several years past I have been in the habit of prescribing Dr. de Jongh's Light-brown Cod-liver Oil, and find it to be much more efficacious than other varieties of the same medicine which I have also employed with a view to test their relative superiority."

DR. LAWRANCE,
Physician to H.R.H. the Duke of Saxe-Coburg and Gotha.
"I invariably prescribe Dr. de Jongh's Cod-liver Oil in preference to any other, feeling assured that I am recommending a genuine article and not a manufactured compound, in which the efficacy of this invaluable medicine is destroyed."

DR. BARLOW,
Senior Physician to Guy's Hospital.
"I have frequently recommended persons consulting me to make use of Dr. de Jongh's Cod-liver Oil. I have been well satisfied with its effects, and believe it to be a very pure oil, well fitted for those cases in which the use of that substance is indicated."

DR. GRANVILLE, F.R.S.,
Author of the "Spas of Germany."
"Dr. Granville has found that Dr. de Jongh's Light-brown Cod-liver Oil produces the desired effect in a shorter time than other kinds, and that it does not cause the nausea and indigestion too often consequent on the administration of the pale oil."

DR. DE JONGH'S LIGHT-BROWN COD-LIVER OIL is sold only in capsuled imperial half-pints, 2s. 6d.; pints, 4s. 9d.; quarts, 9s.; labelled with his stamp and signature, WITHOUT WHICH NONE CAN POSSIBLY BE GENUINE, by respectable Chemists and Druggists.
Sole Consignees,
ANSAR, HARFORD and CO., 77, Strand, London W.C.

and all civilised countries.

THOMSON'S PRIZE MEDAL CRINOLINES
for Presentation at Court,
make the Dress set well,
and give elegance to the general appearance.

THOMSON'S PRIZE MEDAL CRINOLINES
become a Good Figure,
improve a Bad Figure,
lend grace to a Tall Figure,
add charms to a Graceful Figure,
give effect to a Short Figure.

THOMSON'S PRIZE MEDAL CRINOLINES.
All are improved by them;
all are pleased with them.

THOMSON'S PRIZE MEDAL CRINOLINES.
Ladies use them.
Nobility use them.
Princesses use them.
Queens and Empresses use them.

TO SUM UP the PROPERTIES of these CRINOLINES in a sentence—they are economical, convenient, healthful, graceful, fashionable, artistically beautiful, as well as popular, modest, ladylike, queenly, and well deserving the praise lavished upon them by all classes throughout the civilised world.
To see is to admire; to wear is to appreciate and discard all others.

LADIES' DRESS ARTISTICALLY CONSIDERED.—To dress in perfect good taste a lady should thoroughly understand the philosophy of apparel. Dress is not simply an article of use—a garment which the female sex indiscriminately can wear, and in which each will appear equally well; but it is a means whereby the especial nature of the wearer is clearly displayed. That which is becoming and appropriate to one is essentially out of place if worn by another; while some costumes (the Bloomer, for instance) possess no fitness for any, and simply serve to make the wearers ridiculous. Many things are merely utilitarian in character, and have no claim to the slightest beauty, but are stiff and unseemly. Such garments may be convenient for common use, but grace and elegance of costume are the truest signs of a lady. A woman of a tall figure, dignified in her carriage, and inclined to soberness of spirits, if she would preserve these characteristics, would doubtless select such stuffs for her dresses, of neutral tints, as would increase this impression, and would have them then made up in a simple, chaste style, and wear them with hoops. If the impression she desired to make were lively, she would probably choose bright colours, and add flounces and other trimmings.
The opposite of this lady, a brilliant, gay, little beauty, would select materials much higher in tone, and probably with brighter and more contrasted trimmings. Such a lady can wear hoops of a moderate size with great advantage. Indeed, the present fashion of hoops, which we are glad to see continues unchanged, notwithstanding all the gossips say to the contrary, is becoming to more persons than any style of dress heretofore adopted. It combines gracefulness and elegance with healthfulness and comfort. Since their introduction, spinal disease, once so common, has in a great measure disappeared; nor has any other complaint arisen in its place. There is no dress a lady can adopt, no matter what may be its material, its colour, or its fashion, that is not improved in its general appearance by being worn with hoop skirts. Through their aid dignity and grace are attained, and the sweeping line of the robe itself preserved in all its purity.
"Thomson's Crown Skirts are the best, both in shape and make."—Family Herald.

CAUTION.
CRINOLINES stamped "Thompson," "Thomson's Patent," or "W. S. and C. H. Thomson" are thus stamped to insure sale for inferior goods. Thomson's Prize Medal Crinolines are never stamped thus, but always with their Trade Mark, a CROWN.
N.B. Infringers are hereby notified that proceedings will be commenced, unless former infringements are settled at once.
*** Drapers are cautioned against all goods not bearing the Trade Mark, a Crown, or the Name or Trade Mark of Messrs. Thomson's Licensees, as they are Infringements, and render them liable for damages.

SOLD BY GOOD DRAPERS EVERYWHERE.
THOMSON'S PRIZE MEDAL CRINOLINES.
Trade Mark, a Crown.

CHAPPELL AND CO.'S PIANOFORTES AND HARMONIUMS,

50, NEW BOND-STREET.

CHAPPELL and CO.'S NEW ROOMS contain Pianofortes by every celebrated maker, and form a collection unequalled by that of any other Establishment.

The Instruments are classified in the following manner:—

Room No. 1.—Pianofortes of every description, from Ten to Thirty-five guineas.

Room No. 2.—Pianofortes from Thirty-five to Sixty guineas.

Room No. 3.—Pianofortes from Sixty to One Hundred guineas and upwards; also, Harmoniums of the best kinds.

Room No. 4.—Harmoniums of every description, from Six to Sixty guineas and upwards.

Rooms, Nos. 5, 6, 7, and 8 are appropriated to Pianofortes and Harmoniums for Hire.

Purchasers have thus the opportunity of hearing, side by side, Pianofortes by every recognised maker, and of forming a far more correct judgment of their various merits than can possibly be obtained by visiting the different factories, the acoustic properties of which necessarily differ greatly, and frequently deceive the ear even of the most skilful.

The superiority of tone of Alexandre's Harmoniums is too well established to need any comment; but, besides the Prize Medal, the Jury award was accorded to them for "novelty of construction of Harmoniums, cheapness, combined with excellence of manufacture and fine quality of tone."

An immense assortment may be seen suitable to the Schoolroom, Church, or Drawing-room, ranging in price from Five to One Hundred Guineas.

Any instrument may be exchanged within six months of the date of purchase should it fail to give entire satisfaction.

A perfectly new Pianoforte or Harmonium may be hired, if taken for twelve months certain.

CHAPPELL'S NEW TWENTY-GUINEA PIANOFORTE, with check action, in mahogany case and full compass. This instrument has only just been brought to perfection, and is a really superior Pianoforte at the lowest price possible. It has the very best check action, the full compass; is made in a hard and durable wood; and is in all respects a nice piece of furniture as well as a perfectly satisfactory pianoforte. Messrs. Chappell and Co. strongly recommend this Pianoforte as superior in all respects to secondhand or other cheap instruments. The advantage to pupils in practising on a good pianoforte, with a perfect touch, will be found inestimable.

SECONDHAND PIANOFORTES and HARMONIUMS.—ALEXANDRE HARMONIUMS and PIANOFORTES of every description, nearly as good as new, at greatly reduced prices. Secondhand Instruments of every description, and in great variety, by Broadwood, Collard, Erard, Chappell, Kirkman, &c.

TO MERCHANTS, SHIPPERS, AND RESIDENTS ABROAD.

CHAPPELL and CO., 50, NEW BOND-STREET,

are prepared to supply purchasers in any part of the world with the best MUSIC of every description, in large or small quantities, on the most favourable terms; also PIANOFORTES, from 25 to 50 guineas; and HARMONIUMS, varying in price from 5 to 100 guineas, all of the best manufacture, and selected from their stock, which is now the largest in London. Catalogues of Music or of Instruments will be forwarded (free) on application to Chappell and Co., 50, New Bond-street, London.

RIMBAULT'S HARMONIUM TUTOR. A concise and easy Book of Instruction for this popular instrument, adapted to sacred and secular music. Price 5s.

CHURCH HARMONIUM, with Two Rows of Keys.—Just published, A GUIDE TO THE USE OF THE NEW ALEXANDRE CHURCH HARMONIUM WITH TWO ROWS OF KEYS; to which is added, a Selection of Pieces by Classical Masters, expressly arranged for this instrument by Dr. RIMBAULT. Price 5s.

BROADWOOD, COLLARD, and ERARD. The best Pianofortes of every description, including all the newest kinds by these celebrated makers, may be tried side by side (and hired with option of purchase), at the new Showrooms of CHAPPELL and CO., 50, New Bond-street.

CHAPPELL'S FOREIGN PIANINO (the only Pianino to which the Prize Medal was awarded).—A very elegant Pianoforte, of small size, the full compass, check action, and most perfect touch, admirably adapted to small rooms, yachts, boudoirs, &c. Warranted to keep in tune, and to be the best and cheapest Pianoforte, with check action, three strings in the treble, and all the latest improvements.

Price, in mahogany, rosewood, or walnut, 25 and 26 guineas.

CHAPPELL'S ENGLISH MODEL COTTAGE PIANOFORTE.—To amateurs preferring the pure English tone of the Broadwood and Collard quality, the English Model will be found the most perfectly satisfactory instrument, at a moderate price. The action is of the same simple description as the above makers', and therefore especially adapted to the country, where the more complicated actions are objectionable to the tuners. In elegant rosewood case, with full fret, similar in all respects to other instruments at 50 guineas, price 35 guineas; in best walnut (similar to other 60-guinea instruments), 40 guineas.

CHAPPELL'S FOREIGN MODEL PIANOFORTE, price 50 guineas in rosewood: or in walnut, 60 guineas. This Instrument has Three Strings and the fullest grand compass of Seven Octaves. It is strengthened by every possible means to endure the greatest amount of wear, and to stand perfectly in any climate. The workmanship is of the best description; the tone is round, full, and rich, and the power equal to that of a Bichord Grand. The touch is elastic, and the repetition very rapid. No pianoforte, in all respects comparable, has hitherto been made in England at the same price. Every instrument will be warranted, and (if desired) exchanged within six months of the purchase.

CHAPPELL'S ORIENTAL MODEL PIANOFORTES.

No. 1.

Size, 4ft. 3in. by 2ft. 1in.; height, 3ft. 10in. Compass 6¾ oct. C to A. Neat case, with square fall.

Price 35 guineas.

No. 2.

Size, 4ft. 4in. by 2ft. 3in.; height, 4ft. Compass, 6¾ oct. C to A. Handsome case.

Price 45 guineas, net cash.

The above Instruments are thoroughly secured, and are constructed of solid mahogany, with metallic bracings, and everything necessary to resist the effect of extreme climates. They are of such excellent manufacture throughout, that they are confidently recommended as being admirably adapted for INDIA and for the EASTERN EMPIRE generally.

The price includes (1) packing-cases of tin and wood; (2) A suitable tuning hammer or key; (3) a tuning-fork; (4) some additional strings; (5) a Book on Tuning and Preserving the Instrument; (6) and the carriage to the Docks.

ALEXANDRE DRAWING-ROOM HARMONIUMS.

No. 1. Three stops, percussion action, additional blower, and in rosewood case .. .. 25 gs.
No. 2. Eight stops, percussion action, additional blower .. 35 gs.
No. 3. Sixteen stops, percussion action, additional blower .. 60 gs.

FULL DESCRIPTIVE LISTS (Illustrated) of Pianofortes and Harmoniums will be sent on application to CHAPPELL and CO., 50, New Bond-street.

NEW SIX-GUINEA HARMONIUM by ALEXANDRE, with five octaves; two footboards, and in oak case. These instruments are lower in price, and superior to all other cheap harmoniums. Descriptive Lists on application to CHAPPELL and CO. 50, Bond-street.

THE ALEXANDRE SERAPHINA ANGELICA.—This charming little instrument is played with one hand, by means of a keyboard, like the Harmonium, and has a compass of Three Octaves, including the semitones. It can be rested on the knees or on a table, the wind being supplied by the left hand; or it can be played with both hands, and the wind supplied by the foot, with the assistance of the new Patent Box. Price £5 5s.; with the Patent Box, £5 15s. 6d.

ALEXANDRE'S UNIVERSAL CHURCH HARMONIUMS. These Instruments are made to meet the requirements of large congregations at a moderate cost, and also to simplify the playing, by reducing the number of Stops without diminishing their general effectiveness for Church Music.

The full power is obtained, without taking the fingers off the keys, by a pedal (or, in the largest Instrument, by two pedals) worked by the heel. The Expression Stop is also rendered unnecessary, the whole of the Vibrators being inclosed in a Swell, to Bass or Treble.

The Cases are in solid Oak, and the Actions are made expressly to withstand damp.

No. 1 More Powerful than the Ordinary Six and Ten Stops.
Size, 3 ft. 6 in. by 1 ft. 6 in.; height, 3 ft.
Two Rows of Vibrators, equal to Flute, Cor Anglais, Clarinette, Bourdon. Two Draw Stops—viz., Tremolo and Expression.
One Row of Reeds always on, and the other drawn by Grand Jeu for the heel. Knee Pedals, Bass and Treble.
Price Eighteen guineas.

No. 2. More Powerful than the ordinary Fourteen-Stop Instruments.
Size, 3 ft. 10 in. by 2 ft.; 3 ft. high.
Four Rows of Vibrators, equal to Flute, Cor Anglais, Clarinette, Bourdon, Fifre, Clarion, Hautbois, Basson. Two Draw Stops—viz., Tremolo and Expression.
One Row always speaking, the others drawn by Grand Jeu for the heel. Knee Swell Pedals, Bass and Treble.
Price Twenty-four guineas.

No. 3. The most Powerful of all Harmoniums.
Size, 4 ft. 5 in. by 2 ft. 7 in.; 4 ft. 10 in. high.
Eight Rows of Vibrators, equal to Flute, Cor Anglais, Clarinette, Bourdon, Hautbois, Basson, Celeste throughout, Second Flute, Second Basson, Second Hautbois, Baryton, Bombardon, Musette, Octave Clarion. Four Draw Stops—viz., Expression, Tremolo, Flute throughout, Celeste throughout.
Grand Jeu for Choir Organ by right heel. Grand Jeu for Swell Organ by left heel.
Knee Swell Pedals for Bass and Treble. Extra Hand-blower at the back.
This is the most powerful and effective Instrument yet made for Church use or Large Halls.
Price Fifty Guineas.

NEW CHURCH HARMONIUMS, with two rows of keys, by ALEXANDRE.

No. 1, with double key-board, 8 stops, and 3½ rows of vibrators, in rosewood case, 45 guineas.

No. 2, with double keyboard, 22 stops, and 6 rows of vibrators, in rosewood or polished oak case, price 70 guineas.

No. 1, with 2½ octaves of German Pedals, 65 guineas.

No. 2, with ditto, 90 guineas.

These instruments surpass all others for church purposes, and are equally adapted to the organist's use in the drawing-room. Testimonials to the great superiority of the Alexandre Harmoniums from Professors Sterndale Bennett and Sir Gore Ouseley; also, from Dr. Rimbault, Mr. Goss, Mr. Turle, Herr Engel, and the most eminent professors and organists, with full descriptive Lists, will be forwarded on application to CHAPPELL and CO., 50, New Bond-street.

ALEXANDRE'S PRIZE EXHIBITION MODEL HARMONIUMS.

NO. 1.—FOR THE CHURCH.

With Thirteen Stops, Four Rows of Vibrators; with the addition of the new Venetian Swell, worked by the heel of the right foot, by which means a crescendo can be produced without the use of the Expression Stop. Oak Case. Price, 32 Guineas; or without the Swell, 30 Guineas.

No. 2.—FOR THE DRAWING-ROOM.

In Handsome Rosewood Case, with Percussion Action and Fourteen Stops. This instrument, finished in a style superior to any other kind, the whole of the interior mechanism being French polished, and consequently more calculated to withstand the effects of dust and damp. It has a Venetian Swell worked by the heel, thus doing away with the knee Pedals, which are sometimes objected to by Ladies. Price 60 guineas.

No. 2 is especially recommended for abroad, as less liable than any other Model to get out of order.

HARMONIUMS FOR HIRE at CHAPPELL'S.—ALEXANDRE'S best Instruments:—

	Per Month.
No. 1 and 2. One Stop	10s. 6d.
3. Three Stops	12s. 0d.

11. Fourteen Stops	35s. 0d.
12. Fifteen Stops	42s. 0d.
13. Eight Stops, Two Keyboards	35s. 0d.
14. Twenty-two Stops	42s. 0d.
DRAWING-ROOM MODELS.	
No. 1. Three Stops, Percussion and Knee Swells	21s. 0d.
2. Eight Stops	31s. 6d.
3. Sixteen Stops	42s. 0d.

N.B. A considerable Reduction from the above charges on Instruments taken by the year.

In the case of parties purchasing and paying for an Instrument within six months from the time of hiring, the amount due for hire will be given up in lieu of discount for ready money.

ALEXANDRE'S NEW PEDAL HARMONIUMS, with two rows of keys, may be used either in the drawing-room or church. The pedals are the full compass of 2½ octaves, with separate reeds and percussion. These instruments can be played in three ways—1st, as an harmonium, with expression; 2nd, as a chamber organ, with side-blower for foot; 3rd, as full organ, by a separate handblower.

No. 1, with 10 stops, 5½ rows of vibrators, price 65 guineas.
Ditto, 8 stops, without pedals, 3½ rows of vibrators, 45 guineas.
No. 2. 24 stops, 8 rows of vibrators, 90 guineas.
Ditto, ditto, with percussion to lower manual, 100 guineas.
No. 2, without pedals or percussion, 6 rows of vibrators, 70 guineas.

Testimonials to the great superiority of the Alexandre Harmoniums from Professors Sterndale Bennett and Sir Gore Ouseley; also, from Dr. Rimbault, Mr. Goss, Mr. Turle, Herr Engel, and the most eminent professors and organists, with full descriptive Lists, will be forwarded on application to CHAPPELL and CO., 50, New Bond-street.

ANTOINE COURTOIS' CORNETS-A-PISTONS are used by all the most celebrated performers of the day, and obtained a Prize Medal at the Great Exhibition, 1862.

EVERY DESCRIPTION OF PIANOFORTE AND HARMONIUM FOR HIRE BY THE MONTH OR YEAR.

CHAPPELL AND CO.'S NEW MUSICAL PUBLICATIONS.

CHRISTMAS PRESENTS.

FAUST FOR PIANOFORTE. The Opera complete, in cloth, lettered in gold. Price 7s. 6d.

FAUST COMPLETE, with the Words in English, Italian, or French, each 16s.

CHAPPELL'S COLLECTION of OLD CHRISTMAS CAROLS, with the Tunes to which they are sung; chiefly traditional, with some few of more modern date. Harmonised for one or more voices. Sixty pages, from engraved plates, and with ornamental cover. Price 2s. 6d.

The above collection of Carols has been gathered from various sources. Sometimes from the lips of the rustic singer, sometimes from old MSS., and sometimes from printed books. They have been carefully harmonised and arranged; some as solos, and others for four voices, and may all be played on the Pianoforte alone, or sung by a single voice accompanied by the instrument. The present Collection (unlike others) consists of the old traditional Carol tunes, with the original words.

CHAPPELL'S COLLECTION of NURSERY RHYMES, with FAMILIAR TUNES, for Voice and Pianoforte. Adapted to the capacities of young people. (Sixty pages, from engraved plates.) In ornamental cover. Price 2s. 6d.

This work has been prepared for the express gratification of the young, and contains a large number of the well-known ditties of the nursery:—"Sing a song of sixpence," "Little Bopeep," "Girls and boys," "Three blind mice," "What are little boys made of?" &c., &c. They have been carefully arranged for the Pianoforte (to suit the most juvenile performers), and may be played alone or sung to an accompaniment, as desired.

CHAPPELL'S ENGLISH BALLAD ALBUM: containing 36 Songs by Balfe, Wallace, Barker, Glover, Linley, Lover, Walter Maynard, and other popular composers, all with Pianoforte Accompaniments.

Price 4s., bound and gilt edges; post-free, 4s. 6d.

In this Album will be found many of the most popular ballads of these favourite composers.

CHAPPELL'S 1st ALBUM DE DANSE for the Pianoforte; containing 10 Sets Quadrilles, 50 Valses, 40 Polkas, chiefly by Charles D'Albert.

Price 4s., bound, with gilt edges; post-free, 4s. 6d.

CHAPPELL'S 2nd ALBUM DE DANSE for the Pianoforte; containing Quadrilles, Valses, Polkas, Galops, Schottisches, Varsovianas, Polka-Mazurkas, Redowas, and French Country Dances.

Price 4s. bound, with gilt edges; post-free, 4s. 6d.

N.B.—The two Albums de Danse comprise a complete collection of all music requisite for the ballroom.

CHAPPELL'S CHRISTY MINSTREL ALBUM: containing 53 Songs, with Choruses and Pianoforte Accompaniments.

N.B.—This collection alone contains various popular songs, including "I'm leaving thee in sorrow, Annie," "Friends of my youth," "I'm returning to thee, Annie," "Rosaline," &c.

Price 4s., bound, with gilt edges; post-free, 4s. 6d.

CHAPPELL'S SACRED VOCAL ALBUM contains 36 Songs and Duets, by Handel, Barnett, Glover, the Hon. Mrs. Norton, Smart, Abt, Moore, Marcello, &c. Price 4s. bound, with gilt edges; post-free, 4s. 6d.

CHAPPELL'S ITALIAN SONG BOOK: containing 32 Italian and German Songs, by Verdi, Mozart, Flotow, Schubert, &c., all with English as well as the original Words, and Pianoforte Accompaniments. Price 4s. bound, with gilt edges.

WALLACE'S OPERA, THE DESERT FLOWER, complete, with all the words, as sung at the Royal English Opera. In boards, price 21s.

BENEDICT'S CANTATA, RICHARD CŒUR DE LION, complete, with all the words, as sung at the Norwich Festival and St. James's Hall. Price 16s.

CHAPPELL'S MUSICAL GIFT BOOK. A Collection of Pianoforte Music and Songs, arranged for young performers. Illustrated and elegantly bound for a present. Price 5s.

HYMNS for the CHRISTIAN SEASONS, adapted to domestic use, for one or more Voices, with an Accompaniment for the Pianoforte or Harmonium. By Dr. RIMBAULT. Forming No. 45 of "Chappell's Musical Magazine." Just published. Price 1s.

BOOTH'S WESLEYAN PSALMIST. New Edition of this celebrated work. The organ or Pianoforte Score, price 18s.; or in cloth, 21s. Separate Voice Parts—Treble, Alto, Tenor and Bass—each 2s.; or in cloth 2s. 6d.

CHARLES HALLÉ'S STANDARD WORKS. CHARLES HALLÉ'S EDITION of BEETHOVEN'S SONATAS, carefully fingered and edited, complete in 3 vols., £1 1s. each.

Chappell's 50 Sacred Melodies.
Chappell's 50 Secular Melodies.

CHRISTMAS SUPPLEMENT
TO THE
ILLUSTRATED LONDON NEWS
1863

SATURDAY, DECEMBER 19, 1863.

THE VILLAGE CHOIR REHEARSING THE CHRISTMAS ANTHEM.—DRAWN BY A. HUNT.—SEE NEXT PAGE.

THE CHRISTMAS ANTHEM.

BY THE OLD DOCTOR.

We do not trouble ourselves very much, in our quiet village here, Layndon, with what goes on in other places. We are ten miles—at the Raven Hotel they call it eleven, but then the Raven keeps post-horses—from the railway, and we are not much visited, chiefly, I suppose, because there is nothing to come to Layndon for, unless it be for a sight of our old church, of which we are as proud as it is right to be in regard to a place in which we are warned against pride. But we manage very well, or at least entirely to our own satisfaction, without taking example from other folk, or having other folk constantly coming down to disturb our social harmony and put us out of conceit of what has been good enough for Layndon for many a long year. I know—for as the one medical man in the village I hear a good many things—that some of the other villages affect to look down upon us. I know what was said at the vestry meeting at Daresbrook about our having no gas, and I think that the churchwarden, who was in the chair, might have said a word against such uncalled-for remarks, especially as his youngest daughter married into Layndon. If I mention that there was an explosion of gas at Daresbrook the very next week, and that two of the gaswork man's pigs were blown in at a bedroom window, I am sure I do not set it down out of any unfriendliness. I am quite aware, also, that the people at Gladdington contrast the knobbly pebbles with which their streets are paved with our single narrow row of flagstones, which, I allow, are not in the best order; but I would rather see those flagstones than a distress put into a house for paving rates, and the collector of Gladdington will know to what I refer. We can bear these little insinuations that we are behind the age. Perhaps we choose to be behind it, and to let it clear the way for us. We could have all the improvements if we liked, for there is no want of money in the parish; and though, as I said before, we know better things than to indulge in pride, perhaps the subscription-list for the Lancashire folk will show that Layndon did better than Daresbrook, with all its gas, and than Gladdington, with all its paving. I know that Daresbrook sent £14 6s. 8d., while Layndon sent only £11, but Daresbrook has no right to include a cheque for £5 5s. which was paid by two commercial gentlemen to compromise the charge of breaking two cherubs off a tombstone. This went into the subscription, and it did credit to David Womblow, the stonemason, that he mended the cherubs for nothing but Daresbrook cannot justly call that fine a charity gift.

There is one thing that I will say. I am an old man now, and I travel about only in the exercise of my profession, which, I am happy to say, has taken care of me, in return for my taking care of it. But I went about a good deal in other days, and I used to be fond of attending cathedral services. Now, although Nichebury Cathedral is within twenty miles of us, I have not been there for years. But I will say this much—a cathedral has an organ, and the organist is a great man, and is allowed to conduct at the musical festivals (much, I am told, to the discomfiture of the musicians); and there are vicars-choral, and choristers, and all is done on a grand scale. But, for the real feeling of the music, I do not believe that at Nichebury or anywhere else the anthems are better given than in our own old church. I know this is a bold thing to say, and that I shall be told that I am simply making an insane comparison, whereas I am making no comparison at all. I should as soon think of comparing the architecture of Nichebury Cathedral with that of Layndon Church (though, by-the-way, I have heard that Mr. George Gilbert Scott thinks our east window one of the gems of sacred architecture); but I speak of the earnestness with which we go to work, and the real feeling of all our people. Now, it is notorious—I am sure I do not want to wound anybody; but the truth is the truth—that the grown-up persons who sing in the choirs always look as if they were bored, and the way the chorister-boys pinch one another and eat unripe fruit is perfectly inconsistent with propriety. I am a very quiet man, and I like to see such things done quietly and reverently. Perhaps at Daresbrook and Gladdington they may be good enough to call *this* behind the age; but I can afford to listen to remarks of that nature.

If there is one anthem with which we take more pains than another (though I will not say that it is so), it is the Christmas Anthem. We begin to rehearse it in October, but we work at it harder in the following month, and then we have the three weeks before Christmas for what Mr. Screebes, the clerk, calls polishing off. We have no organ, and I do not know why we should want one, as we have nearly all the instruments separately which are combined in the organ, while we have this advantage—namely, that a dozen players are co-operating instead of leaving all the work and all the credit to one. I consider that it is more churchlike, if I may use the expression, that as many people as possible should join in the service. But it is only right for me to say that Layndon could have, if not an organ, certainly a harmonium, if we wished it. The matter has been broached and the parish has been sounded, and there would have been plenty of money forthcoming; but it was clear there was a general feeling that we were quite satisfied with our present musical force. Mr. Screebes, who, though only a parish clerk, has had a sound education in music, considers that all the necessary effects can be got out of such a band as ours, if, as he says, it will only give its whole mind to the work. If a band will not do that, it may be very well to have a noisy machine to smother all blunders. But ours does give its mind to it.

I had a voice at one time, but after that fearful cold which I caught the night I was out in the snow with the poor gipsy woman in the fever my singing days were over. But though I can take no part, I like to sit in a pew and hear the rehearsals, and the rule that shuts out all who are not engaged in the business is relaxed in my favour. If I am wanted, my assistant sends for me; but I am not called out very often now—patients are very considerate, and desire that the younger doctor may come to them instead of troubling the old one, and this is kind. I can trust cases in Mr. Spinkling's hands, for he is a very shrewd and prompt young man, with much nerve, and people like his cheerful manner. I suspect, between ourselves, that though he does not come to church to the anthem rehearsals, he will be coming there one of these mornings to say a few words to that very pretty young lady who is now governess at Franton Hill. The children there seem to require a great deal of attention from him, and yet they are rosy enough. The young folks think that because we wear spectacles we can see nothing. Well, well! I can see enough to say that Mrs. Spinkling will be the prettiest creature in Layndon, and as for Daresbrook and Gladdington, there is not a girl in either that ought to be named on the same day.

I like to see Screebes at rehearsal. He wears spectacles, too. I made him do so, for he got into an awkward habit of losing the place in his Prayer-book, and not finding it in a hurry, and Mr. Mortimer, our worthy Rector, did not much like it, and, himself wearing glasses, he saw no reason for Screebes insisting on having young eyes. So, one day when I was attending him for rheumatism, I frightened him a little with a word or two about sudden loss of sight, and the safeguard which science offered, and the very next Sunday he had mounted a pair which Mr. Mortimer gave him, and the responses went twice as correctly. It is a good sight to see him drilling the children at the anthem, spreading out his fingers, and repressing their exuberant vocal efforts, but keeping them up, notwithstanding, so that they may not be extinguished by the accompaniments. His whole heart is in the work. I know that after one rehearsal, at which the children did not do very well, he took them away to his little house by the duck-pond, and kept them singing there till their parents went rushing about the village in alarm, and, finally, they discovered the whole party at supper on beans and bacon. Mrs. Mortimer, also, is a most valuable assistant, being a perfect musician; and, then, the children mind her, and half a look from her, if any one is careless, sets matters right in a moment. She always comes, and brings that lovely little Edith of hers, who is too young to do much singing, but who has a belief that she leads the entire affair. Mr. Mortimer comes for a short time to see how we get on, though, between ourselves, I do not think that he knows much about it, for I have seen him smile and look satisfied when everybody knew that they had been anywhere that time but in the right place. But it is well that the clergyman should be seen to take an interest in the business. Then there is the Rev. Cecil Swinton, the handsome young Curate. I do not know how it was, but he used rather, we fancied, to look down upon our performances, and could not be got to take any part in them. But all of a sudden he changed his manner, and joined us, and sang away in a style that made it very clear that he had sung other things besides anthems before he took Orders. He never missed a rehearsal. It was a curious coincidence that our choir was strengthened at the same time by another voice, that of Miss Muspratt, the sister of Mrs. Mortimer, and a very sweet young lady, indeed—just what a Curate's wife should be; but I am not saying, you know, that the Rev. Cecil Swinton thinks so. I only mention the coincidence.

I said that we keep our rehearsals private, and this is quite right, I think. The musicians are undisturbed, and, besides, the effect on Christmas Day is all the greater, because people have not been hearing fragments of the anthem. But when the time comes to put up the holly it is difficult to get the church clear. The wonderful reasons why the children who have been helping with the greenery, and do not sing, have for lingering in the hopes of hearing a little music—how they "thought they were told to stop," or how they "wanted to ask when they should come again," or how they had impossible messages from their mothers to Mrs. Mortimer, amuse us; but Mr Screebes is firm, and, in spite of Mr. Mortimer's good-natured plea in their favour, turns them all out before we go to work. All, that is to say, that he can find, for upon one occasion little Ellen Woodman was too many for him, and secretly trotted up into the gallery, hid herself, was put to sleep by the music, and woke up in a fright screaming for her mother. She was fetched down to be scolded dreadfully; but Mr. Mortimer would allow no scolding at all, and sat her in his own pew until the business was over. He is too much given to spoil children—that is certain; but Mrs. Mortimer is a firmer person, and I think Edith is kept in very tolerable order. I judge by the unhesitating way in which she takes cod-liver oil, which I have had occasion to prescribe for her, and which I myself would not take even if it would have the effect of macassar oil, and give me back the curls of my youth.

I have also said that there is nothing to tempt visitors to Layndon, and, if there were, no persons are likely to visit us on Christmas Day. But if a stranger should find his way into our village and should come, as I trust he would do, to morning service, he will hear our anthem and a short and excellent sermon from Mr. Mortimer, who is content on that day to confine himself to reminding us of our duty to be thankful for all happiness, and of our duty to show that thankfulness by trying to make others happy. He could preach a long and eloquent sermon if he liked, mind; but he never does upon this day. Then, if the stranger looks as if he had been pleased with our singing and our sermon, and likes to ask any questions about the place, he may address himself to a cheerful-looking old gentleman, whom he will recognise by his lingering nearly to the last, and by his wearing a large pair of gold-mounted glasses dangling on his waistcoat. Then, if the parties should seem to suit one another, and the stranger is inclined to stay, he may give the old gentleman his arm, and, in return, when they have reached a comfortable-looking house, with gables and ivy, at the other end of the village, the old gentleman will give him an invitation to hear all about Layndon over a Christmas dinner. For Mr. Spinkling is going to dine at Franton Hill (the children *will* have him, he says; but the pretty governess should teach them better than to say "will") and his chair shall be at the stranger's service. There will be no one else at the board, for all the Old Doctor's children have settled elsewhere, and there is no one in Layndon who does not spend this day with his own friends. A dozen households would rejoice to welcome the Old Doctor to their board, but he passes the evenings of his Christmas Days in one place only—in the room where hangs that picture of the gentle and faithful wife who for years made his home blessed—who used to listen, by his side, to the Christmas anthem, and who has gone before him to join the anthem that ceases not with Christmas Day.

S. B.

KING HENRY VIII. KEEPING CHRISTMAS

AND THE NEW YEAR AT GREENWICH.

BY E. F. BLANCHARD.

Royal residences in England are so few and far between that all records of them become more and more valuable as the days pass by. Excepting to antiquarians, the palace at Greenwich is a palatial residence long since numbered with the things which have been; or is only remembered by the few students of ancient customs and manners, who give to modern times pictures of what has gone before, making that which is indeed dead apparently more awake than sleeping. When gay holiday folk go down to Greenwich, some of them may be struck by two several ways of making the journey. Whilst speaking of Christmas revelry, the short, sharp journey by railroad seems to be the best means of getting over the ground quickly, as, indeed, under any circumstances, it must always be. But the idler, *flaneur*, or lounger, as the man with time on his hands may indifferently be called, will lovingly linger over the delights of the river passage, where many places of interest will strike him, from busy London Bridge to the comparative quietude of the moorings of the old Caledonian, hospital for seamen of all nations. Without paying more than ordinary general attention to such curious stations as Cherry-garden Pier, or the Thames Tunnel, where the Naiad or Osprey is always emptied of foreigners and re-filled by them, it is our present business to make Greenwich at once, and then to conjure up visions of the old place as it was patronised by Royalty some three hundred and fifty years ago. Londoners who remember the celebrated fair, and those youthful mutual adorers who still find annual pleasure in rolling down One-Tree-hill, or taking a pennyworth of observation from the telescopes on the mount, may be unaware that thereabouts a Royal residence stood from at least the year 1300 until a century later than the reign of Mr. John Anthony Froude's favourite King, Harry the Eighth. Mr. Gilbert's picture of Christmas and New-Year's festivities gives a good idea of regal merrymaking in the year 1513; but, as the Royal residence is probably unknown to a large majority of readers, a few words about the abandoned palace will be, doubtless, welcomed.

Greenwich was a Royal palace in the year 1300—the earliest fact about it known. Edward I., Longshanks, the "greatest of all the Plantagenets," as an admirer has called him, "made an offering of seven shillings at each of the holy crosses in the Chapel of the Virgin Mary, at Greenwich, and the Prince half that sum, three and sixpence." No modern chronicler is quoted. Here Henry IV. made his will, long before that scene of hunger for his empty chair with the Tennis-boy of France, as Leigh Hunt styled Harry of Monmouth. Henry V. granted the manor of Greenwich for life to his uncle Beaufort, Duke of Exeter; and after that it fell to Duke Humphrey of Glo'ster—a name well known amongst the non-dining fraternity of the Mall and Paul's Walk—who was, in fact, founder of Greenwich as it stands. In the year 1437 he obtained a Crown grant of two hundred acres, with license to himself and his wife "to embattle and build with stone, and to inclose and make a tower and ditch within the same and a certain tower within the park to build and edify." That same tower was built on the site of the present Observatory. Perhaps, in grateful acknowledgment of this grant, Humphrey Glo'ster was good enough to rebuild the Royal Palace, which stood on the spot where the west wing of Greenwich Hospital now stands and he called it, from its pleasant position, L'Pleazaunce, or Placentia. Then it changed hands—into the fortunate hands of Henry VII. Here Royal Harry was born, and here many of the principal events of his life were divided with what happened at Windsor.

Henry VIII. was born at the palace, 1491, June 28—same day as the coronation of her present Most Gracious Majesty, as the loyal reader will remember. Here, too, he married his first wife, Katherine of Arragon, widow of his brother Arthur, in the year 1510, when Lambard, the historian, describes it as "a pleasant, perfect, and princely palaice." Here he held tournaments, to which, as Stow describes them, all comers were challenged, and he kept Christmas "with great and plentiful cheer." At Greenwich, also, he married Anne of Cleves, but the records of that important event in Henry's life are but frail and scanty. But we know that over her wedding-ring she had a "keeper," inscribed within, "God send me wel to kepe." How well she was, and what was sent her to keep, English history knows.

Turning to something brighter than were most of the lives of Henry VIII.'s wives, we come to his celebrated merrymaking, portrayed on pages 628-629 by Mr. John Gilbert. Hall, the old chronicler, seems to say that such festivals held by Henry were by no means confined to Christmas Day, but extended to the jollities accompanying the inauguration of the new year. Mr. T. K. Hervey's "Book of Christmas" (now very scarce) is sufficient evidence that, in even very recent times, great licenses in social custom were allowed, and boars' heads were by no means unfrequent; but three hundred and fifty years ago the games were fast and furious, compared with anything that modern society could tolerate. Here is chronicler Hall's description of King Henry's Christmas at Greenwich verbatim, the ancient spelling being kindly sacrificed:—

"The King, this year, kept the feast of Christmas at Greenwich, where was such abundance of viands served to all comers of any honest behaviour as hath been few times seen; and, against New-Year's Night, was made in the hall a castle, gates, towers, and dungeon, garnished with artillery and weapons after the most warlike fashion; and, on the front of the castle was written, *Le Fortresse Dangerus*; and within the castle were six ladies, clothed in russet satin laid all over with leaves of gold, and every owde knit with laces of blue silk and gold: on their heads coyses and caps, all of gold. After this castle had been carried about the hall, and the Queen had beheld it, in came the King with five others, apparelled in coats, the one half of russet satin, spangled with spangles of fine gold, the other half rich cloth of gold; on their heads caps of russet satin, embroidered with works of fine gold bullion. The six assaulted the castle; the ladies seeing them so lusty and courageous were content to solace with them, and upon further communication to yield the castle, and so they came down and danced a long space. And after, the ladies led the knights into the castle, and then the castle suddenly vanished out of their sights.

"On the day of the Epiphany, at night, the King, with eleven others, were disguised after the manner of Italy, called a masque, a thing not seen afore in England; they were apparelled in garments long and broad, wrought all with gold, with visors and caps of gold; and, after the banquet done, these masquers came in with six gentlemen disguised in silk, bearing staff torches, and desired the ladies to dance; some were content, and some that knew the fashion of it refused, because it was not a thing commonly seen. And after they danced and communed together, as the fashion of the masque is, they took their leave and departed, and so did the Queen and all the ladies."

This pretty scene is the text of Mr. Gilbert's large drawing of Henry the Eighth's revelries. Contemporaneous accounts assure us that such jovial occasions were common enough at Court. For, whilst Henry was strong enough to defy the all-important Pope, he was a man who wanted but little unbending to associate with any of his courtiers disposed for an evening's amusement after the day's hunt, or fruitless chase of Herne the Hunter in the park on the opposite side of London. In the picture may doubtless be seen with him such men as Sir Edward Howard, Charles Brandon, Duke of Suffolk, who married his sister, the Queen Dowager of France; and Edward Neville—all his bosom friends, as much as if they had been school and college fellows. Also, there may be the Earl of Surrey contemplating poetry and the fair Geraldine, and little conscious of a Shakspeare and a rare Ben to revolutionise that decorous school of verse which he had done so much to conserve. Conspicuous are Henry himself and his Queen, and Wolsey is accommodated with nothing short of a second-best place. But yet the centre of attraction is the tower, which the King and his comrades are about to besiege, and which the fair ladies will presently surrender. Upon the whole, they look very happy where they are, guarded by merry buffoons, who drop flowers and morning-stars, and care but little for picking up the laugh of the light-hearted dame or the sigh of the enamoured maiden. The knights are going to the ladies, soon to play the sanctioned pranks of the seasonable revelry, and, before long, those young gallants will be questioned by the "patresfamilias" of the period as to their intentions in regard to Amabel, Amyrillis, or Sacharrissa. They will be happy—happy as the evening itself; and there is no doubt that that went off pleasantly enough.

FREEMAN'S PHANTOMS.

BY HAIN FRISWELL.

"At last," said John Freeman, shipping agent and citizen of ——, as he shut a private ledger with a sudden snap, and with a little key locked the heavy, square patent brass lock. "At last! At last!"

He repeated the words so often that they must have afforded him peculiar satisfaction. If they did no no sign appeared on his face. It was a hard, square face—not without marks of refinement—but without intellect; the brow was open and broad, the mouth shut and determined, the complexion a clear light brown, indicative of health and strength, but bearing traces of hard work, that hard work which had wrinkled his forehead and had made those shrewd-looking marks at the corners of his eyes. The eyes themselves were bright, clear, and cold, of a grey colour; the hair on the head was thin; and around the temples were lighter threads, which could be only seen in the sunlight, and not where John Freeman sat.

For he sat in his little office, in a street of a seaport town—a private room at the back, with a glass door, through which he could see his two clerks at work, when they were at work, in the outer office—the first floor front, a room hung with notices of sales by auction, of foreign timber, of steam in ventures, of notices of the date of sailing of many a good ship of goodly register, A 1, and copper bottomed; of placards which told of voyages to Jamaica, New York, to Prince Edward Island, or to Matamoras—a room in which there were great ledgers and samples of strange goods, and where heavy porters in fustian coats came and thrust in invoices of export and import goods, or took away bills of lading through the rail on the high wainscoted desks. But no clerks were then there, although a new desk within a fresh partition had been set up—for John Freeman's business was increasing every day, thanks to his energy, punctuality, and business habits.

John walked into this room and looked round him, took down a large ledger, and extracted some figures on a piece of paper. Then went again to his own office, and, sitting down, unlocked his private desk, and, chucking again the figures by the extract, rubbed his forehead and thin hair that grew above it, and said, "At last, ten thousand pounds!"

Still his eyes did not brighten, and he looked sternly at the opposite wall as he said, "Gained, one thousand pounds this year. Well, and what is that? Why, nothing—merely nothing. Fagging hard for ten years! Why, there's many a man in these stirring times, who, by a contraband adventure, has cleared the sum in ten months! Ay, double that, too—a paltry sum, a pitiful gain. Ten years' sun, taken as a nest-egg—a nest-egg that may attract other geese to lay other golden eggs in the same nest; and I to work for it, and for so long, too." He sighed, but the little ledger again, and locked it tightly, and was about to place it in his breast pocket, when a knock came at the outer door. John Freeman started, almost unpleasantly, and called out gruffly, "Come in."

He was busy piecing his ledger in his strong box, with his back to the door, when his visitor entered.

"I am sorry my clerks are gone," said he, speaking with his back to his visitor; there is some absurd notion now about Saturday half holidays, but if I can do anything I will. Holidays! who wants holidays? I'll be back to-morrow."

"I know you would, you good John, you," said a soft voice—the of a woman—nearly in his ear. "I know you would, John; and so I thought you might be working late, and I brought you down that letter."

"Oh, it is you, Suzy, is it?" said John, turning round and saluting his sister. "How do? Thank'ee for the letter. Ah! I see it is of no consequence, as a woman's." He flung on the table the unopened letter, the address of which was in a thin Italian hand, faltering and trembling, and weak and thin as the foreign paper it was written on. "If no consequence whatever; but thank you, Suzy, you're a woman of business."

"I wish I were only a man, John, to sit by you and help you," said Suzy, her voice and way warmth. "I should like to help you, indeed. It is all I care about now, except you, of course. And how goes business, John? Pretty well, ay? More ventures and more profits? I ought; it might be a commission for me, I brought it, especially as I had to come in the town; but as it is of no use here, it, John; burn it without reading it. It is not upon business, I dare say, and why need you distract your brain?"

Miss Susan made her way to the letter, but Freeman put his hand upon it, and said, "Susan, I never burn letters; they may be useful some day."

"Very good," said Miss Freeman, sharply, dropping her earnest intention; an intention which showed that she had a very strong interest in the letter. "Very good, I don't care; I thought that some old friend might have wished to be remembering on commission for her. Commission, don't you call it, John?"

"Yes, commission," he repeated moodily, not looking at Suzy's wicked eyes, which plainly told what a story her tongue had invented.

"Well, John," she continued cheerfully, "I'm off; I won't bother you; cast up your accounts for the year, like a good brother, and come and tell me whether you have not got more gold, more gold! And so away Miss Suzy bounced; a hard, well-built woman of thirty, bold, calculating, and clever, with sculpty principles, and no fear of ourling hair and her name; a woman who had always looked out for the main chance, who worked well for her brother and herself, and who, though three years younger than he, determined to keep him to herself.

"So," she said, "she's pestering him again, is she? I thought I had given her a pill, a bitter one, too, in the letter John let me answer. Now, go away, my good woman, if you have those sort of things you must take the consequences."

Those sort of things! The sort of thing was a fat brown baby, burnt brown by lying with its face to the sun, and being dragged by its weary mother from town to town to the seaport where its father worked—a seaport not far off now, thank Heaven! thought the weary mother. The poor thing—the mother, not the baby—gave one glance into Miss Susy's face and turned hopelessly away, just in time to be relieved by a stalwart workman coming late from the docks, who caught Susy's hard glance, and saw the poor woman turn away.

"Eh, lass!" said he, stuffing his finger into the baby's clenched fist. "Eh, lass! That sort o' thing's a fine one, at any rate. You'd better buy him a crust, or he'll swaller his fist tho'." And a ready sixpence fell into the mother's hands.

Suzy saw the whole affair with half a glance, which was as hard as a steel bead. "The folly of these people is immense. They will toll like horses for a shilling a day, and go and throw away half of it to a beggar. It is like their grand notions. It flatters their pride to be generous."

If it flattered their pride, it did not flatter Suzy's; and, as regards the matter of sixpence, the giver took its value out in good humour for the rest of the evening, during which Suzy walked to her next home, and sat waiting for John, and studying that interest table of which we are all too fond—the table of self-interest.

John Freeman, however, did not come. He had intended to be home early; but as the evening closed in the letter still lay unopened before him, and he sat there in deep thought. At length he started up, and with a snatch lighted his jet of gas, shut up his strong box and his book in it, closed every drawer in his desk, locked that, shut the shutters, buttoned his pockets like a man with a fatal resolution, locked the door, and then opened the letter.

Could little Susy have had cause to smile alarm! What was in it?

John Freeman at last made up his mind, and after opening proceeded to read what the thin note-paper contained, and the small, delicate hand had traced. It began thus:—

"Dear Mr. Freeman," but that was run through, and the letter went on thus—

"Dear John,—It is now just ten years since you gained my heart, and after much persuasion—how fond, how often repeated, I need not say—made me promise to become your wife. That promise I have never forgotten, although since then my father, who wished me so much to marry some one else, and my mother, who grieved at parting to leave me quite alone, are dead and at rest. You know that all of us had natural objections to long engagements, all except the writer of this, who trusted that the generous fervour of youth would last through life. I have waited for the man she loved till his vow had been kept and he had made his fortune. It would be ungenerous of me, John, and untrue, to say that in this long and weary waiting I could not have found, and might have found, a home for myself and mistress of a home. It is true that I have had many offers, but I could have married none because I love you."

John's hard eyes glistened a little, and the paper crackled and shook as he read this.

"And now," continued the letter, "and now comes the point to which I am coming. After a long separation, I have learned from a little girl almost into a mature woman. They have also taught me much; oh, so much! They have made me feel that man's love does not last as woman's does; they have taught me that I am not young. Years ago, I was sat, watching the sacred fire as it died down, year after year, till the glow had paled month after month, and the mass was charred and black, and cold as death. I have felt that, John, with you."

There were no tears upon the paper; it was written so neatly, so evenly, it in that weak hand that Miss Susy hated; no, there was not one sign of weakness, except in the last sentence, which was underlined by a dash, as he read them, a heavy drop fell on them from his own hard eyes.

"I have felt that so with you," he repeated; "and so have I; I have, by heaven, every day and hour till I won my prize at last. I am changed, too, Patty; I feel I am." He sat himself to read the letter again, and spoke more softly. He must have had tears once or twice over his eyes, for it was plain that something was the matter with the gas, which burnt dimly enough. He held up the letter to the lamp, but beyond the shadow of the paper upon the hard white ceiling he could see nothing more. He took out his desk almanac, as hard and dry as a miser's heart or a ship's biscuit, dangled, and gave commercial men all the trade events of the week, with the Sunday's lists of sailings, with a white cloth on the top growing larger and larger on the wall; a white circle, in which two diminutive figures grew also with the space upon the wall, and took form and action.

"And so, John, I have determined to take the step which will surely have to be taken, and to anticipate you in the determination, which I hope will be a small task, when you learn the advantage. Rumours I have heard that long ago you had achieved that which was to have been the reward of your ambition. I believe it true, for I have seen you every day grow colder and harder. My love has not changed, nor the heart where it always was found; it is still yours, John, still yours as firmly as ever; but it is content to be yours at a distance; and because it is yours, it forbids me linking my fate with yours, and becoming a burden with a man who could only add to my misery and to your embarrassments. Good-by, John, dear John, and God bless you. I feel happier even now I have written these words, because I feel that I have got an end to the long and wearying anxiety, the restless days and nights, the sickening of hope deferred, the misery of disappointed and unrequited love. Good-by! Your letters and presents I shall—the first words you have read which I thought once had the same fond look you had—these I have packed up and sent to you; in a short time our love will be but a memory with one—with the other forgotten. MARTHA CLEAVE."

The letter fell suddenly from John's hand, and he started as he was with a start, and looked up and stared at those unwelcome visitors at the opposite wall. There, in the magic circle, were two figures: the one, an elastic, bright-looking, upright young man of twenty-five, full of life and energy, overflowing with love for other, a sedate merchant, still young, but stern and unbending—a man in years and carriage. It was indicative of the reflecting mind of the elder, and of the impulsive mind of the younger, that the latter assumed the superiority over the other, for they were in high altercation, and treated the more staid and ripe man as if age had conferred with it folly and weakness. The younger man had some strong feeling, that everything he wished to say seemed frozen in his mouth, and that, when the elder figure seemed brought to a standstill, not a word would come out of John's mouth to help him; and he noted, also, that he felt much more sympathy for the elder than for the younger figure, although he could plainly see that both figures were himself, or, rather, his two selves. It was strange also that, although he knew that the younger one was himself, still he did not feel at all friendly towards him, and was once or twice hurt at his words, which he knew were his own, but which sounded like the recollection of a stranger's.

"So," said the young man, almost insolently; "so, you are now a British capitalist. You have achieved the dream of your youth, and the first use you make of your wealth is to break loose from engagements; and a promise which you once thought sacred as an oath—which was an oath"——

"Circumstance," said John's other self, calmly; "circumstances alter cases."

"Yes, I know," sneered the younger; "I know; it is the old story. You would quote, and now you would not. In the fever heat of what you called love you desired to possess a heart that you could call your own, for you were poor and struggling, and you felt somewhat lonely then."

The real John moved his lips—the elder shadow said, "I did, indeed."

The younger then went on. "In the deep, fervent feeling of young love, you promised what you felt. Her heart leaped up to meet yours; she believed in the pictures that you drew; she thought—what woman does not so think of him she loves?—that you were wiser, more clever, more capable than you are, and that a few short months—a year or so—would make your talents seen, and would grant you that modest stipend upon which she and you, with the money she had—and which was yours as freely as her love—could live cheerfully and happily, with children clinging round your knees."

"Such was my dream," said the other, sadly; "but the time has not yet come. Look at me now!"

"Look at you!" cried the other, with rare scorn, "look at you! What are you? A blighted, cowardly miser—a half-souled creature! Between your love and you the world stepped in. You worked at first with love and energy, you reached the goal which you had appointed, and then you faltered with delay—you would have a little more. Your fortune, you thought, should be larger than your wife's. It grew larger; it grew ten times as large last night. But, as it grew, your true heart shrunk and dwindled; and you did not hesitate to let the woman you loved wait and hope, and wait and hope, till hope itself became but shrunk despair, and patience folly!"

The younger figure dilated as he said this; the elder figure shrunk. John saw, as plainly as ever he saw in his life, that the younger was a gentleman of high blood and feelings, the latter a mere tradesman. He wished to aid the tradesman, out of mere fellow-feeling, but he could not. The elder phantom spoke.

"The world taught me a hard lesson; schooled me with icy sentences and frozen wisdom, but wisdom if you like. I resolved to put it back. I saw it worship gold and success; I determined to win gold."

"And to worship, too," broke in the younger. "You were not and are not, the only fool. People throw away youth, life, hope itself, and all those bright feelings they inspire, to follow in the dusty track which leads to fortune, and which, when won, they know not what to do with. Well, you have taken the course you once abhorred; you determined to succeed in it, and you succeeded. I am not so. Keep on your path yourself and by yourself; go on your selfish way, and hug the gold you win, but go alone, for I disown you."

The grand air with which the younger John said this might have made the elder phantom start with offended pride, or curl his lips with deadly sarcasm, or a thousand things, but it did no such thing. He absolutely smiled, as a man smiles at disgust, fell down on his knees, and shrank up tremblingly, and wept. In the thinnest of voices he seemed to plead. But young John stood up, like a prince of men, grand, calm, wise, and majestic. He shook his head, and turned away from the other phantom.

"Yes, I disown you. True to my promise, remembering how I loved, and what I found, unchanged, I must do so. You don't disowns you. No more gentle thoughts, no memories of summer days and winter frolics, shall be yours; your manhood's earliest, freshest riches are all gone; the coldness and the hope, the bitterness of heart which, if it felt another's woes and grew a moment saddened, was repaid a thousand fold by sharing the others' joys and simple pleasures. Go; gone man, for all, I tell you I disown you. You are not many men in one as others are. You have cut yourself away from the others of your youth. Go; ponder on your business, your money-bags, and books. Your mind is undivided and fitter to succeed, and I renounce you."

So saying, away walked young John like a gentleman, as he was, leaving the elder on his knees, confused and helpless. At the time of the departure of the younger phantom the elder one of Freeman felt such a despair, such an anguish and sinking at his breast, that he could no longer bear himself, and rushed up to his double and nervously threatening figure, and cried out, "You fool, you fool, you! Up. Run after him and lay all your gold at his feet; tell him to come back. Would you lose yourself, your goodness, the memory of your thoughts, your prayers, the childhood prayers, the many days of school—for mere gold? Get up, I tell you. Will gold buy it? No more than it will old blood or family ties, or a gentleman's thoughts, you oaf, you. Get up, I say."

The figure groaned, and sighed and did not rise, for Freeman's threats seemed to have little effect on him. "Get up," said John, "more earnestly, his head growing colder as every moment elapsed since the younger phantom left him.

The same hollow voice then spoke, "I learnt the lesson that you set me, John Freeman; it was you that told me every day that money with plenty of money would gladly marry you—that the sisters of rich merchants would add their store to yours, and give you prospective advantages until the money generated and grew double without your aid, and you were rich even beyond your wishes. I studied every day that refined selfishness which is called worldly wisdom; I prospered at my lessons, I loved my gold, and my gold grew with my love. What is the next lesson I shall learn to please you?"

But John Freeman was not to be taken in with this sort of answer from a phantom, and, feeling himself more and more lonely, he cried out more hastily than ever, "Get up; get up, you fool!" After him; offer him anything to buy back the fresh feelings and the wisdom of youth."

John pleaded so effectually that he forced his double on his feet, and then, by great exertion—for the other was slow to move—he drove the shadow from the bright and magic circle on the wall, which, as he stood there wondering and excited at himself, faded slowly, and grew into dim darkness on the wall.

"There is nothing the matter with the gas," said John, slowly folding up his letter and pocketing it. "Ah! I must go home to tea. Suzy will be waiting. I am glad of it at last; it has come at last."

What was he glad of? Not that Suzy was waiting; and waiting she had been, with a dry, semi-political novel in her hand which she had been trying to read; and the tea nearly as cold as the toast.

"Why, you dear John," said Suzy, "I suppose you have been making money enough for both of us. Well, I won't blame you. There is nothing like devotion to business."

"Umph!" said John.

"I believe," said Suzy, "that if the world were carried on upon strictly business principles, that there would be no poverty, nor dirt, nor trouble, nor anything which disturbs the routine of a well-regulated family."

"Umph!" said John.

"Here's your favourite journal, John. I've cut it and sliced it—and so Suzy had, and read it too—and there is such a capital article in it exposing the folly of all those who attempt to marry under a thousand a year."

"Umph!" muttered John. "I suppose, Suzy," he said, softly, "after all, the present dispensation has its advantages, and the different layers of society are of use to each other. If we had no poor we should have no servants and no rich; and—— but I am so confused that I do not know what to say. What o'clock is it?"

SEE "THE MASTER OF ARAN GARTH."—PAGE 626.

"About nine. No; it is half-past, I declare," said Susy, looking at the timepiece and herself in the glass.

"I shall go to bed," said John. "I want to go a little journey to-morrow, upon business, too."

"Well," said Susy, "I suppose it must be done occasionally. The wind and the rain do their business on a Sunday, and why not we? That's a good argument, John, is it not?"

"I do not know, I am sure," said he, meekly; "but I must be at my office, and I shall journey also to-morrow. Good-night!" and so John left Miss Susy, with her political novel and her dry thoughts of business; and she, who did not care for his presence very much, looked round the comfortable room, and plumed herself upon its being all her own.

The very next morning John was early down, breakfasted without waking Miss Susan, and went to his office. He took a master-key, and descended into a strong room where a heavy box stood—one of those strong boxes in which gold is placed to be shipped away abroad, for gold was scarce in America at that time, and John knew that when his money reached New York it would buy 10 per cent more goods than bills would—that is, realise its own premium as well as the profit on the goods it bought. In that particular box, ready to be transported aboard ship, was half John's fortune—five thousand pounds. Had Susy seen him cause this to be taken by two stout porters to an early train and to be ticketed for a little country station, she would have pronounced him to be mad. But it was evident that John thought otherwise.

When the train stopped at the station John hired a little horse and a light cart, the proprietor of which was hovering about in search o a job, and ordered him to transport the box and himself to Miss Cleave's cottage. The railway porters, who were full of the news of the gold-dust robbery which had lately been discovered, looked suspiciously at the box, and thought that it was "main heavy." They lingered about also to ascertain its destination, but, having heard Miss Cleave's name, they went away satisfied.

So the cart and the box of gold, with John Freeman sitting on the top of it very stern and determined, but handsomer than he had looked for many a day, arrived on a bright Sunday morning at Cleave Cottage, a little ivy-embowered, low, but pretty cottage, not much larger than a gentleman's park lodge, in which Martha Cleave and an old aunt spent their days.

Miss Cleave was going to church, and was in her bedroom putting on her bonnet; and so John was shown into the room she had just vacated—a room so full of Sunday quiet and peaceful calm that, when the big, heavy box was put down in its centre, John sat on it and wiped his heated, fevered brow, and sat with his hat in his hand wondering at the quiet, and stunned, as it were, with the noise of nothing.

The breeze, scented with garden sweets, lifted the curtains on one side and stole into the room, taking with them scents from a fresh nosegay on the table, played round John's thin hair and cooled his temples. As it did so once or twice, the man so hard grew softer, and softer, and softer. He looked round the room with an almost awful look. It was so different from his heated business-room, with telegraphic message-boys, noisy clerks, hurried clients, and persistent men of business, that he felt as if he had been buffeted about in a heavy storm and had escaped now into a quiet little bay, wherein he could perchance cast anchor, in happiness and peace.

Then away stole the breeze, murmuring and sighing, and John thought of his phantoms, and wondered whether the elder one would ever catch and bring back the younger, and then, his eye falling upon an open book, he went to the table, looking into it more out of vacant curiosity than anything else; for Miss Cleave was a long time making her appearance, and John had time not only to take up, but to read the book. It was "Herbert's Poems"—those quaint, poems; stiff, angular, and fantastic os Gothic carving, but, like it, preserving an ever-fresh poetry and beauty. So, almost without understanding the words, John read Herbert's sonnet on

SIN.

Lord, with what care hast thou begirt us round!
Parents first season us; then schoolmasters
Deliver us to laws; they send us, bound
To rules of reason, holy messengers.
Pulpits and Sundays . . .

"Ah!" thought John, "I have forgotten those, and made every thought run upon one track, upon one idea." He shut his eyes for a moment, and saw the younger phantom as he stood on the previous night, but, he thought, with less fierce denunciation in his looks. John read on, skipping a line or so:—

Blessings beforehand, ties of gratefulness,
The sound of glory ringing in our ears;
Without our shame; within our consciences;
Angels and grace, eternal hopes and fears.
Yet all these fences, and their whole array,
One cunning bosom sin blows quite away.

John Freeman felt almost stunned. The verse had been a holy messenger, and had opened his heart. He returned and sat down opposite his box and covered his eyes, and thought of his own bosom sin.

The door opened softly, and Miss Cleave stood before him, calm, elegant, fresh, and with the whole beauty of goodness beaming out of her pure eyes. John looked down, not caring to face her steady glance, so full of pure kindliness and an almost motherly friendship, but without, he thought, one ounce of love. But then Miss Cleave, in the secrecy of her chamber, had been at prayer. Hence it was that she had kept John waiting, and was then upheld by a secret power of which John knew little.

Martha saw that she must speak first; which, by the way, argued badly for her lover. Holding out her gloved hand—so small, so fresh in its Quaker neatness; and putting aside the little lace fall from her pretty white bonnet, she advanced towards him. Her clear tones, as she spoke, mingled with the church bells which rung out in the air of early autumn.

"John," she said; "Mr. Freeman, I suppose that you have brought me back my letters. Yours are now at your house, for I have had them taken by a careful messenger. I can understand why you come to-day. Time is valuable to you men of the world"—(the words stung John, though the speaker did not mean it)—"and so you have brought your message rather than write it. I can understand that, too. You were always prudent. As it is so, will you say your last words—I can bear them well—and let me go to church?"

"Let us go together," stammered John.

"That can hardly be," she said, sweetly. "Our paths are so different now, and I have been enabled to put away the love you know I felt, I hope for ever. My life henceforth will be spent here, I hope, in doing good, until quiet hours, and days, and years, gliding by easily and softly, will bring me gently to a quiet grave."

How soft and how roundly fell the voice; how sweetly, even without one tremor of emotion, one inflection of sadness, calmly and softly as those Sabbath bells.

But if she were calm her bosom heaved slightly, and her colour came flushing with maiden blush her ripe cheek, and with a cherry tint her pretty lips. If she were calm John was not. With a cry of anguish such as he gave the previous night when his phantoms were with him, he knelt down before her, saying hurriedly,

"Oh, Patty, Patty! do not leave me. I have grown selfish, mad, foolish; I have forgotten my better self, and it has forgotten me. I saw him—him, the John Freeman you remember ten years ago."

"Ten years ago," said Patty, looking up to heaven and speaking calmly, though the tears ran down her cheeks. "Ten years ago; ah! I saw him, too, last night. How noble, good, and generous he was; how careless of the world's verdict or applause so he were right; how tender, how compassionate; how ready to believe in good; how hard to be persuaded of evil——

She stopped, with her hand upon her heart, pressing the lavender silk boddice tightly, and crushing the delicate pink ribbons that fluttered in a strange unrest upon her bosom.

"Well!" said John hurriedly, "I saw him last night, and he has left me, Patty—left me with all his memories of youth, his better thoughts, his good purposes, his hope, his faith. Help me to find him, Patty; help me, for I am old, and worn; help me to find my better self."

He stared wildly about him, with outstretched hands. Patty sat down on a chair for one moment, and then stood up again irresolute.

"I shall find him soon," again said haunted John. "Look here, Patty, look here!" He fumbled away with a patent key at his box, and, opening it, showed her, not her letters, but a box of bright gold, showing all the brighter in the mouths of the little sacks into which John plunged his strong hands, bringing them out again full of bright sovereigns, and laughing strangely. "This is all your fortune, Patty. This is the money I give you to keep the letters; this is the dower with which I dower you in order that you may help me to find my better self."

Poor Miss Patty, whose courage had sustained her up to this point, had absolutely untied her bonnet-strings, taken off her gloves—as ladies do when about to give way—and had sat down and actually given way; and Freeman, very unlike a man of business, was kneeling at her feet, trying to clinch the phantom-hunting bargain by filling her lap and spoiling her pretty slate-coloured silk dress by a whole lapful of sovereigns. "Help me, Patty!" he cried, on his knees, holding up his hands, his face beautiful with emotion, his eyes beaming with love. "Help me, my darling! Help me to find my better self."

"Oh, John! dear John!" said Patty, putting one soft hand on his shoulder and one on his forehead, her calm eyes melting into little but deep wells of liquid love as she looked at him. "Has it come right at last. The search will not be difficult. I think I have found him now."

She pressed her lips to his eager lips and rested her cheek against his; and he and she both murmured the words with which I have begun this history, "At last! at last!"

* * * * * * *

John Freeman and Patty Cleave certainly went to church together, but whether or not on that particular Sunday, History does not say. Miss Susy was pleased to express herself "utterly disgusted with his romantic weakness," and to betake herself off on a visit to the daughter of a stony-hearted millionnaire, whom she had destined for John. She kept up this acquaintance with great self-sacrifice and spirit for some time, the rich daughter being both old and ill-tempered. But what would not Miss Susy do for a purpose? The stony-hearted millionnaire—stone being liable to decay—had evidently one soft part about his head or heart, for one fine morning he married Miss Susy, and she is absolutely able to look down on John and Patty as poor people.

But John is not poor, and is absolutely rich in love and happiness. It is to be presumed that the elder Phantom, after a good chase, caught and brought back the younger; for as John and Patty, man and wife, sat, upon one winter evening, in their pretty wayside cottage, just out of the town wherein Freeman and Co. were well known and respected, he told her how the night before, as he was in his office, executing some late and important business, the wall grew light again and again; the Phantoms came, not two, but three. The young one was between two very old Phantoms—one a pleasant grandsire, hale and hearty, with children round him; the other a crabbed, single old man, clutching useless money-bags, praying against death, yet cursing life—dreading the grave, yet hastening to it. John quite believes in the reality of these visions, and Patty has too much reason to be thankful to them to doubt the reality of Freeman's Phantoms.

TELL US A STORY.

BY GEORGE MACDONALD.

The Christmas dinner, pudding and all, was over; the wine and nuts had held out for a time, but had given in at last; and even snap-dragon would snap no longer. The children—some of whom were very young, and some with grey hairs, younger still—drew round the drawing-room fire. There were a grandfather and grandmother, and about fifteen grandchildren, with three papas and three mammas, besides two young aunts and three young uncles, one of whom the children called Uncle Bogie. He was, in fact, no uncle at all; but the children liked him best of all their uncles; and so did one of their aunts. The reason why they called him Uncle Bogie was that he knew all about bogies. You would have thought he had been the papa of all the bogies, he knew so much about them.

No sooner were they all seated, and the responsible ones thinking what to do next, than a long-haired, solemn little girl said, staring hard into the fire, and never turning her big, deep eyes towards the person she addressed:—

"Do tell us a horrid story, Uncle Bogie."

"You little Goblin!" said Uncle Bogie; "because you like horrid stories, you think every one else does."

"*I* do," cried one.

"And *I* do," cried another.

"And *I* do," cried a third.

And all the children called out "I do," except one child, whose face faded a little as she turned and got hold of her mother's dress.

"Uncle Bogie," said the child he had called Goblin, going up to him, "you know your head is full of stories about ghosts, and giants, and fairies."

"How do you know, Goblin?"

"I will tell you. Mamma says stories of that kind are all nonsense. And Auntie says your head is full of nonsense. So I know, you see."

"Which Auntie said so, Goblin?"

"Why, Aunt Kate."

By this time Aunt Kate's face was as red as the Christmas fire. Uncle Bogie caught sight of it, and, being very good-natured, replied instantly,

"Well, Goblin, Aunt Kate is quite right; my head *is* as full of nonsense as it can hold, and I must positively let some of it out. I will tell you a story directly."

"Oh! thank you, Uncle Bogie;" broke from all parts of the circle.

"What shall it be about then?"

"A wicked fairy."

"No; that's stupid. I'm tired of wicked fairies," said a scornful little girl.

"A good giant, then," said a priggish imp, with a face as round as the late plum-pudding.

"I am afraid I could not tell you a story about a *good* giant; for, unfortunately, all the good giants I ever heard of were very stupid; so stupid that a story would not make itself about them; so stupid, indeed, that they are always made game of by creatures not half so big nor half so good; and I don't like such stories. Shall I tell you about the wicked giant that grew little children in his garden instead of radishes, and carried them about in his waistcoat-pocket, and ate one as often as he remembered he had got some?"

"Yes, yes, Uncle Bogie; please do."

"He used to catch little children and plant them in his garden, where you might see them in rows, with their heads only above ground, rolling their eyes about, and growing awfully fast. He liked greedy boys best—boys that ate plum-pudding till they felt as if their belts were too tight."

Here the fat-faced boy stuck both his hands inside his belt.

"Because he was so fond of radishes," Uncle Bogie went on, "he lived just on the borders of Giantland, where it touched on the country of common people. Now, everything in Giantland was so big that the common people saw only a mass of awful mountains and clouds; and no living man had ever come from it, as far as anybody knew, to tell what he had seen in it. Somewhere near these borders, on the other side, by the edge of a great forest, lived a labourer with his wife and a great many children. One day Tricksey-Wee, as they called her, teased her brother Buffy-Bob till he could not bear it any longer, and gave her a box on the ear. Tricksey-Wee cried; and Buffy-Bob was so sorry and ashamed of himself that he cried too, and ran off into the wood. He was so long gone that Tricksey-Wee began to be frightened, for she was very fond of her brother; and she was so sorry that she had first teased him and then cried that at last she ran into the wood to look for him, though there was more chance of losing herself than of finding him. And, indeed, so it seemed likely to turn out; for, running on without looking, she at length found herself in a valley she knew nothing about. And no wonder; for what she thought was a valley with round, rocky sides, was no other than the space between two of the roots of a great tree that grew on the borders of Giantland. She climbed up to the side of it, and right up to what she took for a black, round-topped mountain, far away; but she soon discovered that it was close to her, and was a hollow place, so great that she could not tell what it was hollowed out of. Staring at it, she found that it was a doorway; and, going nearer and staring harder, she saw the door, far in, with a knocker of iron upon it, a great many yards above her head, and as large as the anchor of a big ship. Now, nobody had ever been unkind to Tricksey-Wee, so she was not afraid of anybody. For Buffy-Bob's box on the ear she did not think worth considering. So, spying a little hole at the bottom of the door, which had been nibbled by some giant mouse, Tricksey-Wee crept through it, and found herself in an enormous hall, as big as if the late Mr. Martin, R.A., had been the architect. She could not have seen the other end of it at all, except for the great fire that was burning there, diminished to a spark in the distance. She ran towards this fire as fast as she could, and was not far from it when something fell before her with a great clatter, and she tumbled over it, and went rolling on the floor. She was not much hurt, however, and got up in a moment. Then she saw that she had tumbled over something not unlike a great iron bucket. When she examined it more closely she saw that it was a thimble; and looking up to see who had dropped it, beheld a huge face, with spectacles as big as the round windows in a church, bending over her, and looking everywhere for the thimble. Tricksey-Wee immediately laid hold of it in both her arms, and lifted it about an inch nearer to the nose of the peering giantess. This movement made the old lady see where it was, and, her finger popping into it, it vanished from the eyes of Tricksey-Wee, buried in the folds of a white stocking, like a cloud in the sky, which Mrs. Giant was busy darning. For it was Saturday night, and her husband would wear nothing but white stockings on Sunday."

"But how could he be so particular about white stockings on Sunday, and eat little children?" asked one of the group.

"Why, to be sure," answered Uncle Bogie, "he did eat little children, but only *very* little ones; and if ever it crossed his mind that it was wrong to do so, he always said to himself that he wore whiter stockings on Sunday than any other giant in all Giantland."

At that instant Tricksey-Wee heard a sound like the wind in a tree full of leaves, and could not think what it could be; till, looking up, she found that it was the giantess whispering to her; and, when she tried very hard, she could hear what she said well enough.

"Run away, dear little girl," she said, "as fast as you can; for my husband will be home in a few minutes."

"But I've never been naughty to your husband," said Tricksey-Wee looking up in the giantess's face.

"That doesn't matter. You had better go. He is so fond of little children, particularly little girls."

"Oh! Then he won't hurt me."

"I am not sure of that. He is so fond of them that he eats them up; and I am afraid he couldn't help hurting you a little. He's a very good man, though."

"Oh! in that case," began Tricksey-Wee, feeling rather frightened; but before she could finish her sentence she heard the sound of footsteps very far apart and very heavy. The next moment, who should come running towards her, full speed, and as pale as death, but Buffy-Bob. She held out her arms, and he ran into them. But when she tried to kiss him she only kissed the back of his head; for his white face and round eyes were turned to the door.

"Run, children, run and hide," said the giantess.

"Come, Buffy," said Tricksey; "yonder's a great brake; we'll hide in it."

The brake was a big broom; and they had just got into the bristles of it, when they heard the door open with the sound of thunder, and in stalked the giant. You would have thought you saw the whole earth through the door when he opened it, so wide was it; and, when he closed it, it was like nightfall.

"Where is that little boy?" he cried, with a voice like the bellowing of cannon. "He looked a very nice boy, indeed. I am almost sure he crept through the mousehole at the bottom of the door. Where is he, my dear?"

"I don't know," said the giantess.

"But you know it is wicked to tell lies, don't you, dear?" retorted the giant.

"Now, you ridiculous old Thunderthump," said his wife, with a smile as broad as the sea in the sun; "how can I mend your white stockings and look after little boys; you have got plenty to last you over Sunday, I am sure. Just look what good little boys they are!"

Trickney-Wee and Buffy-Bob peered through the bristles, and discovered a row of little boys, about a dozen, with very fat faces and goggle eyes, sitting before the fire and looking stupidly into it. Thunderthump intended the most of them for food, and was feeding them first before planting them. Now and then, however, he could not keep his teeth off them, and would eat one by the by, and without salt.

"Now, Uncle Bogie, you know that's nonsense; for little children don't grow in gardens, I know. You may believe in the radish-beds: I don't."

"I never said I did," replied Uncle Bogie. "If the giant did, that's enough for my story. I told you the good giants are very stupid: so you may think what he had once sown. Indeed, the giant never really tried the plan. No doubt he did plant the children, but he always pulled them up and ate them before they had a chance of increasing.

The giant strode up to the wretched children. Now, what ma de them very wretched indeed was, that they knew if they could only keep from eating, and grow thin, the giant would dislike them, and turn them out to find their way home; but notwithstanding this, so greedy were they, that they ate as much as ever they could hold. The giantess, who fed them, comforted herself with thinking that they were not real boys and girls, but only little pigs pretending to be boys and girls.

"Now tell me the truth," cried the giant, stooping with his face down over them. They shook with terror, and every one hoped it was somebody else the giant liked best. "Where is the little boy that ran into the hall just now?" Whoever tells me a lie shall be instantly boiled."

"He's in the broom," cried one dough-faced boy. "He's in there, and a little girl with him."

"The mighty chimney-pipe," cried the giant, "to hide from me?" And he made a stride towards the broom.

"Catch hold of the bristles, Bobby. Get right into a tuft, and hold on," cried Trickey-Wee, just in time.

The giant caught up the broom, and, seeing nothing under it, set it down again with a bang that threw them both on the floor. But they were soon up and into it again. Then the giant made two strides to the boys, caught the dough-faced one by the neck, took the lid off a great pot that was boiling on the fire, popped him in as if he had been a trussed chicken, put the lid on again, and saying, "There, boys! See what comes of lying!" asked no more questions; for, as he always kept his word, he was afraid he might have to do the same to them all; and he did not like boiled boys. He liked to eat them crisp, as rashers, whether forked or not, ought to be eaten. He then sat down, and asked his wife if his supper was ready. She looked into the pot, and throwing the boy out on a dish, as if he had been a boiled fowl, stuck two skewers into him, and had the worst of it, answered that she thought it was. Whereupon he rose to help her; and, taking the pot from the fire, poured the whole mess, bubbling and splashing, into a deep dish like a vat. Then they sat down to supper. The children in the broom could not see what they had; but it seemed to agree with them, for the giant talked like thunder, and the giantess answered like the sea. And they grew chattier and chattier. At length the giant said,

"I don't feel quite comfortable about that heart of mine." And the giant spoke, instead of laying his hand on his bosom, he waved it away towards the corner where the children were peeping from the broom bristles.

"Well, you know, my darling Thunderthump," answered his wife, "I always thought it ought to be nearer home. But you know best, of course."

"Ha! ha! You don't know where it is, wife. I moved it a month ago."

"What a man you are, Thunderthump! You trust any creature alive rather than your wife."

Here the giantess gave a sob which sounded exactly like a wave going flop into the mouth of a cave up to the roof.

"Where have you got it now?" she resumed, checking her emotion.

"Well, Doodlem, I don't mind telling you," said the giant, soothingly. "The great eagle has got it for a nest-egg. She sits on it night and day, and thinks she will bring the greatest eagle out of it that ever sharpened his beak on the rocks of Mount Skyrack. I can warrant no one will touch it while she has got it. But she is rather capricious, and I confess I am not easy about it; for the least scratch of one of her claws would do for me at once. And she has claws."

"What funny things you do make up, Uncle Bogie! How could the giant's heart be in an eagle's nest and the giant himself alive and well without it?"

"Whatever you may think of it, Master Fred, I assure you I did not make it up. If it ever was made up, no one can tell who did it; for it was written in the chronicles of Giantland long before one of us was born. It was quite common," said Uncle Bogie in an injured tone, "for a giant to put his heart out to nurse, because he did not like the trouble and responsibility of doing it himself. It was, I confess, a dangerous sort of thing to do.—But do you want any more of my story or not?"

"O yes, please," cried Frederick, very heartily.

"Then don't put in and say more fault with it, or I will stop."

Master Fred was straightway silent, and Uncle Bogie went on.

All this time Buffy-Bob and Trickey-Wee were listening with long ears. *They* did not dispute about the giant's heart, and impossibility, and all that; for they were better educated than Master Fred, and knew all about it. "Oh!" thought Trickey-Wee, "if I could but find the giant's cruel heart, wouldn't I give it a squeeze!"

The giant and giantess went on talking for a long time. The giantess kept advising the giant to hide his heart somewhere in the house; but he seemed afraid of the advantage it would give her over him.

"You could hide it at the bottom of the flour-barrel," said she.

"That would make me feel chokey," said he.

"Well—in the coal-cellar, or in the dustbole. That's the place! No one would think of looking for your heart in the dustbole."

"Worse and worse!" cried the giant.

"Well, the water-butt?" said she.

"No, no; it would grow spongy there," said he.

"Well, what will you do with it?" said she.

"I will leave it a month longer where it is, and then I will give it to the Queen of the Kangaroos, and she will carry it in her pouch for me. It is best to change, you know, and then my enemies can't find it. But, dear Doodlem, it's a fretting care to have a heart of one's own to look after. The responsibility is too much for me. If it were not for a bite of a radish now and then, I never could bear it."

Here the giant looked lovingly towards the row of little boys by the fire, all of whom were nodding, or asleep on the floor.

"Why don't you trust it to me, then, dear Thunderthump?" said his wife, "I would take the best possible care of it."

"I don't doubt it, my love. But the responsibility would be too much for you. You would no longer be happy darling. Light-hearted, airy, laughing Doodlem. It would transform you into a heavy, oppressed woman, weary of life, as I am."

The giant closed his eyes and proceeded to go to sleep. His wife got her stockings and went on with her darning. Soon, the giant's pretence became reality, and the giantess began to nod over her work.

"Now, Buffy," said Trickey-Wee; "now's our time. I think it's moonlight, and we had better be off. There's a door in with a hole for the cat just behind us."

"All right! I'm ready," said Bob.

So they got out of the broom brake, and crept to the door. But, to their great disappointment, when they got through it they found themselves in a sort of shed. It was full of tubs and things, and, though it was built of wood only, they could not find a crack.

"Let us try this hole," said Trickey; for the giant and giantess were sleeping behind them, and they need not go back.

"All right," said Bob. He seldom said anything else than *all right*.

Now this hole was in a mound that came in through the wall of the shed, and went down for some distance. They crawled into it, and found it very dark. But, groping their way along, they soon came to a small crack, through which they saw grass, pale in the moonshine. As they crept on, they found the hole began to get wider and wider and upwards.

"What is that noise of rushing?" said Buffy-Bob.

"I can't tell," said Trickey; "for, you see, I don't know what we are in."

The fact was, they were creeping along a channel in the heart of a giant tree; and the noise they heard was the noise of the sap rushing along in its wooden pipes. When they had their ears to the wall they heard it gurgling along with a pleasant noise.

"It sounds kind and good," said Trickey. "It is, water running. We must get out somewhere or somewhere. I think we had better go on, and we shall come somewhere."

It was now rather difficult to go on, for they had to climb as if they were going up a pipe. In fact, now the channel was wide. Nearly worn out, they saw light overhead at last; and, creeping through a crack into the open air, found themselves on the fork of a huge tree. A great, broad, uneven space lay around them, out of which spread boughs in every direction, the smallest of them as big as the biggest tree in the country of common people. Overhead were leaves enough to supply all the trees they had ever seen. Not much moonlight could come through, but the leaves would glimmer white in the wind at times. The tree was full of giant birds. Every now and then one would sweep through it with a great noise. But, except an occasional chirp, twitter, or call, and the pipe in a great organ, they made no noise. All at once an owl began to hoot. He thought he was singing. As soon as he began, other birds replied, making rare good fun. In the confusion, the children found they could understand every word the birds sang. And what they said was something like this:—

"I will sing a song.
I'm the owl."
"Sing a song, you sing-song
Ugly fowl!"
"What will you sing about,
Now the light is out?"

"Sing about the night;
I'm the owl."
"You could not see for the light,
Stupid fowl!"
"Oh! the moon! and the dew!
And the shadows!—to-whoo!"

The owl spread out his silent, soft, sly wings, and lighted between two branches. Buffy-Bob, nearly smothered them, one under each wing. It was like being buried in a down bed. But the owl did not like anything between his sides and his wings, so he opened his wings again, and the children made haste to get out. Trickey-Wee immediately went in front of the bird, and looking up into his huge face, which was as round as the eyes of the giantess's spectacles, and much bigger, dropped a pretty courtesy, and said,

"Please, Mr. Owl, I want to whisper to you."

"Very well, small child," answered the owl, looking important, and stooping his ear towards her; "what is it?"

"Please tell me where the eagle lives that sits on the giant's heart."

"Oh, you naughty child! That's a secret. For shame!"

And with a great kiss that terrified them the owl flew into the tree. All birds are fond of secrets; but not many of them can keep them so well as the owl. So the children went on because they did not know what else to do. They found the way very rough and difficult, the tree was so full of humps and hollows. Now and then they plashed into a pool of rain; now and then they came upon twigs growing out of the trunk where they had no business, and they were as large as full-grown poplars. Sometimes they came upon great cushions of soft moss, and on one of them they lay down and rested. But they had not lain long before they spied a large nightingale sitting on a branch, with its bright eyes looking at the moon. In a moment more he began to sing, and the birds about him began to reply, but in a very different tone from that in which they had replied to the owl. Oh, the birds did call the nightingale some pretty names! The nightingale sang and the birds replied like this:—

"I will sing a song.
I'm the nightingale."
"Sing a song, long-long,
Little Neverfail!"
"What will you sing about,
Light in or light out?"

"Sing about the light
Gone away;
Down away and out of sight,
Poor lost day;
Mourning for the day dead,
O'er his dim bed."

The nightingale sang so sweetly that the children would have fallen asleep, but for fear of losing any of the song. When the nightingale stopped, they got up and wandered on. They did not know where they were going, but they thought it best to keep going on, because then they might come upon something or other. They were very sorry they forgot to ask the nightingale about the eagle's nest, but his music had put everything else out of their heads. They resolved, however, not to forget the next time they had a chance. They went on and on till they were both tired, and Trickey-Wee said at last trying to laugh,

"I declare my legs feel just like a Dutch doll's."

"Then here's the place to go to bed in," said Buffy-Bob.

They stood at the edge of a last year's nest and looked down with delight into the round, mossy cave. Then they crept gently in, and, lying down in each other's arms, found it so deep and warm and comfortable and soft, that they were soon fast asleep.

Now close beside them, in the hollow of a tree, was another nest, in which lay a lark and his wife; and the children were awakened very early in the morning by a dispute between Mr. and Mrs. Lark.

"Let me up," said the lark.

"It's not time," said the lark's wife.

"It is," said the lark, rather rudely. "The darkness is quite thin. I can almost see my own beak."

"Nonsense!" said the lark's wife. "You know you came home yesterday morning quite worn out, you had to fly so very high before you saw him. I am sure he would not mind if you took it a little easier. Do be quiet and go to sleep again."

"That's not it at all," said the lark. "He doesn't want me. I want him. Let me up, I say."

He began to sing; and Trickey-Wee and Buffy-Bob, having now learned the way, answered him:—

"I will sing a song.
I'm the lark."
"Sing, sing, Throat-strong,
Little Kill-the-dark,
What will you sing about,
Now the night is out?"

"I can only call;
I can't think.
Let me up—that's all.
Let me drink!
Thirsting all the long night
For a drink of light."

By this time the lark was standing on the edge of his nest and looking at the children.

"Poor little things!" You can't fly," said the lark.

"No; but we can look up," said Trickey.

"Ah! you don't know what it is to see the very first of the sun."

"But we know what it is to wait till he comes. He's no worse for your seeing him first, is he?"

"Oh! no, certainly not," answered the lark with condescension; and then, bursting into his matins, he sprung aloft, clapping his wings like a clock running down.

"Tell us where," began Buffy-Bob.

But the lark was out of sight. His song was all that was left of him. That was everywhere, and he was nowhere.

"Selfish bird!" said Buffy. "It's all very well for larks to go hunting the sun, but they have no business to despise their neighbours for all that."

"Can I be of any use to you?" said a sweet bird-voice out of the nest. This was the lark's wife, who staid at home with the young larks while her husband went to church.

"Oh! thank you, Mrs. Lark," answered Trickney-Wee.

And up popped a pretty brown head; and then up came a brown feathery body; and last of all came the slender legs on to the edge of the nest. There she turned, and, looking down into the nest, from which came a whole litany of chirpings for breakfast, said, "Lie still, little ones." Then she turned to the children. "My husband is King of the Larks," she said.

Buffy-Bob took off his cap, and Trickney-Wee courtesied very low.

"Oh, it's not me," said the bird, looking very shy. "I am only his wife. It's my husband." And she looked up after him into the sky, whence his song was still falling like a shower of musical halfstones. Perhaps she could see him.

"He's a splendid bird," said Buffy-Bob, "only you know he *will* get up a little too early."

"Oh, no! he doesn't. It's only his way, you know. But tell me what I can do for you?"

"Tell us, please, Lady Lark, where the she-eagle lives that sits on Giant Thunderthump's heart."

"Oh! that is a secret."

"Did you promise not to tell?"

"No; but larks ought to be discreet. They see more than other birds."

"But you don't fly up high, like your husband, do you?"

"Not often. But it's no matter. I come to know things for all that."

"Do tell me, and I will sing you a song," said Trickney-Wee.

"Can you sing too?"

"Yes; and I will sing you a song I learned the other day about a lark and his wife."

"Please do," said the lark's wife. "Be quiet, children, and listen!"

Trickney-Wee was very glad she happened to know a song which would please the lark's wife at least, whatever the lark himself might have thought of it, if he had heard it. So she sang.

"Good-morrow, my lord!" in the sky alone,
Sang the lark, as the sun ascended his throne.
"Shine on me, my lord; I only am come,
Of all your servants, to welcome you home.
I have flown for an hour, right up. I swear,
To catch the first shine of your golden hair!"

"Must I thank you, then," said the king, "Sir Lark,
For flying so high and hating the dark?
You ask a full cup for half a thirst:
Half is love of me, and half love to be first.
There's many a bird that makes no haste,
But waits till I come. That's as much to my taste."

And the king hid his head in a turban of cloud,
And the lark stopped singing, quite vexed and cowed.
But he flew up higher, and thought, "Anon
The wrath of the king will be over and gone;
And his crown, shining out of the cloudy fold,
Will change my brown feathers to a glory of gold."

So he flew, with the strength of a lark he flew.
But, as he rose, the cloud rose too;
And not a gleam of the golden hair
Came through the depth of the misty air;
Till, weary with flying, with sighing sore,
The strong sun-seeker could do no more.

His wings had had no chrism of gold;
And his feathers felt withered and worn and old;
And he sank, and quivered, and dropped like a stone.
And there on his nest, where he left her, alone,
Sat his little wife on her little eggs,
Keeping them warm with wings and legs.

KING HENRY VIII. KEEPING CHRISTMAS AT GREENWICH.—DRAWN BY JOHN GILBERT.—SEE PAGE 622.

CH.—DRAWN BY JOHN GILBERT.—SEE PAGE 572.

Did I say alone? Ah, no such thing!
Full in her face was shining the king.
"Welcome, Sir Lark." "You look tired," said he,
"*Is* is not always the best way to me.
While you have been singing so high and away,
I've been shining to your little wife all day."

He had set his crown all about the nest,
And out of the midst shone her little brown breast;
And so glorious she was in russet gold,
That for wonder and awe Sir Lark grew cold.
He popped his head under her wing, and lay
As still as a stone, till the king was away.

As soon as Tricksey-Wee had finished her song, the lark's wife began a low, sweet, modest little song of her own; and after she had piped away for two or three minutes she said—

"Your dear children, what can I do for you?"

"Tell us where the she-eagle lives, please," answered Tricksey-Wee.

"Well, I don't think there can be much harm in telling such wise, good children," said Lady Lark; "I am sure you don't want to do any mischief."

"Oh, no, quite the contrary," said Buffy-Bob.

"Then I'll tell you. She lives on the very topmost peak of Mount Skycrack; and the only way to get up is to climb on the spiders' webs that cover it from top to bottom."

"That's rather serious," said Tricksey-Wee.

"But you don't want to go up, you foolish little thing. You can't go. And what do you want to go up for?"

"That's our secret," said Tricksey-Wee.

"Well, it's no business of mine," said Lady Lark, a little offended, and went and told the news to her husband. So she flew away to find some breakfast for her little ones, who began to cry and were chirping very impatiently. The children looked at each other, joined hands, and walked off.

By this time the sun was up, and they soon reached the outside of the tree. It was so knobby and rough, and full of twigs, that they managed to get down, though not without great difficulty. Far away to the north they saw a huge peak, like the point of a church, going right up into the sky. They thought this must be Mount Skycrack, and turned their faces towards it. As they went on they saw a giant or two now and then striding about the fields far through the woods; but they kept out of their way. Nor were they in much danger; for it was only one or two of the border giants that were so very fond of children. At last they came to the foot of Mount Skycrack. It stood in a plain alone, and shot right up, I don't know how many thousand feet, into the air, a long, narrow, spearlike mountain. The whole face of it, from top to bottom, was covered with a network of spiders' webs, with threads of various sizes, from that of silk to that of whipcord. The webs shook, and quivered, and waved in the sun, shining like silver. All about ran huge, greedy spiders, catching huge, silly flies and devouring them. Here they sat down to consider what could be done. The spiders did not heed them, but ate away at the flies. At the foot of the mountain, and all round it, was a rim of water, not very broad, but very deep. Now, as they sat watching one of the spiders, whose web was woven across this water, somehow or other lost his hold and fell in on his back. Tricksey-Wee and Buffy-Bob ran to his assistance, and laying hold each of his legs succeeded, with the help of the other legs, which struggled spiderfully, in getting him out upon dry land. As soon as he had shaken himself and dried himself a little, the spider turned to the children, saying,

"And now, what can I do for you?"

"Tell us, please," said they, "how we can get up the mountain to the she-eagle's nest."

"Nothing easier," said the spider. "Just run up there and tell them all I sent you, and nobody will mind you."

"But we haven't got claws like you, Mr. Spider," said Buffy.

"Ah! no more you have, poor, unprovided creatures! Still, I think we can manage it. Come home with me."

"You won't eat us, will you?" said Buffy.

"My dear child," answered the Spider, in a tone of injured dignity, "I eat nothing but what is mischievous or useless. You have helped me, and must help you."

The children rose at once, and, climbing as well as they could, reached the spider's nest in the centre of the web. They had not found it very difficult; for wherever too great a gap came the spider spun a strong cord and stretched it just where they would have chosen to put their feet next. He left them in his nest, after bringing them two enormous honey-bags, taken from bees that he had caught. Presently about six of the wisest of the spiders came back with him. It was rather horrible to see them all round the mouth of the nest, looking down on them in consideration, as if wondering whether they would be nice eating. At length one of them said,

"Tell us truly what you want with the eagle, and we will try to help you."

Then Tricksey-Wee told them that there was a giant on the borders who treated little children not better than radishes, and that they had narrowly escaped being eaten by him; that they had found out that the great she-eagle of Mount Skycrack was at present sitting on his beard; and that, if they could only get hold of the heart, they would soon teach the giant better behaviour.

"But," said the spider, "if you get at the heart of the giant, you will find it as large as one of your elephants. What can you do with it?"

"The least scratch would kill it," said Buffy-Bob.

"Ah! but you might do better than that," said the spider.—"Now we have received to help you. Here is a little bag of spider-juice. The giants cannot bear spiders, and this juice is dreadful poison to them. We are all ready to go up with you and drive the eagle away. Then you must put the heart into this other bag and bring it down with you."

"But how can we do that?" said Buffy. "The bag is not much bigger than a pudding-bag."

"But it is as large as you will find convenient to carry."

"Yes; but what are we to do with the heart?"

"Put it into the bag, to be sure. Only, first, you must squeeze a drop out of the other bag upon it. You will see what will happen."

"Very well, we will," said Tricksey-Wee. "And now, if you please, how shall we go?"

"Oh, that's our business," said the first spider. "You come with me, and my grandfather will take your brother. Get up."

So Tricksey-We mounted on the narrow part of the spider's back, and held fast. And Buffy-Bob got on the grandfather's back. And up they scrambled, over one web after another, up and up. And every spider followed; so that, when Tricksey-Wee looked back, she saw a whole army of spiders scrambling after them.

"What can we want with so many?" she thought; but she said nothing.

The moon was now up, and it was a splendid sight below and around them. All Glantland was spread out under them, with its great hills, lakes, trees, and animals. And all above them was the clear heaven, and Mount Skycrack rising into it, with its endless ladders of spiderwebs, glittering like cords made of moonbeams. And up the moonbeams went, crawling, and scrambling, and racing, a huge army of huge spiders.

At length they reached the very top, where they all stopped. Tricksey-Wee and Buffy-Bob could see above them a great globe of feathers, that finished off the mountain like an ornamental knob.

"How shall we drive her off?" said Buffy.

"We'll soon manage that," said the grandfather spider. "Come on, you, down there!"

Up rushed the whole army, past the children, over the edge of the nest, on to the she-eagle, and buried themselves in her feathers. In a moment she became very restless, and went picking about with her beak. All at once she spread out her wings, with a sound like a whirlwind, and flew off to bathe in the sea; and then the spiders began to drop from her in all directions on their gossamer wings. The children had to hold fast lest the wind of the eagle's flight should knock them off. As soon as it was over they looked into the nest, and there lay the giant's heart—an awful and ugly thing.

"Make haste, child," said the spider. So Tricksey took her bag and squeezed a drop out of it upon the heart. She thought she heard the giant give a far-off roar of pain, and she nearly fell from her seat with terror. The heart instantly began to shrink. It shrunk and shrivelled till it was nearly gone, and Buffy-Bob caught it up and put it into the bag. Then the two spiders turned and went down again as fast as they could. Before they got to the bottom they heard the shrieks of the she-eagle over the loss of her egg; but the spiders told them not to be alarmed, for her eyes were too big to see them. By the time they reached the foot of the mountain all the spiders had got home, and were busy again catching flies, as if nothing had happened. So the children, after renewed thanks to their friends, set off, carrying the giant's heart with them.

"If you should find it at all troublesome, just give it a little more spider-juice directly," said the grandfather, as they took their leave.

Now, the giant did give an awful roar of pain the moment they anointed his heart; and fell down in a fit, and lay so long that all the boys that knew escaped if they had not been so fat. One did, and got home in safety. For days the giant was unable to speak. The first words he uttered were,

"Oh, my heart! my heart!"

"Your heart is in the dough, dear Thunderthump," said his wife. "Really a man of your size ought not to be so nervous and apprehensive. I am ashamed of you."

"You have no heart, Doodlem," answered he. "I assure you that at this moment mine is in the greatest danger. It has fallen into the hands of foes, though who they are I cannot tell."

Here he fainted away. But Tricksey-Wee finding the heart begin to swell a little, had given it the least touch of spider-juice.

Again he recovered, and said:

"Dear Doodlem, my heart is coming back to me. It is coming nearer and nearer."

After lying silent for a few hours, he exclaimed,

"It is in the house, I know;" and jumped up and walked about, looking in every corner.

Just then, Tricksey-Wee and Buffy-Bob came out of the hole in the tree root, and through the cat-hole in the door, and walked boldly towards the giant. Both kept their eyes busy watching him. Led by the love of his own heart, the giant soon spied them, and staggered furiously towards them.

"I will eat you, you vermin!" he cried. "Give me my heart."

Tricksey gave the heart a sharp pinch, and down fell the giant on his knees, blubbering, and crying, and begging for his heart.

"You shall have it, you shall have it, when properly," said Tricksey

"What do you want me to do?" said he, whimpering.

"Take all those boys and girls and carry them home at once?"

"I'm not able; I'm too ill."

"Take them up directly."

"I can't, till you give me my heart."

"Very well," said Tricksey; and she gave the heart another pinch. The giant jumped up in a fury, and, catching up all the children, thrust some into his waistcoat pockets, some into his breast-pocket, put two or three into his hat, and a bundle of them in his arms. Then he stumped off to the door. All this time poor Doodlem was sitting in her armchair, crying, and mending a white stocking.

The giant led the way to the borders. He could not go very fast, for Buffy-Bob and Tricksey managed to keep up with him. When they reached the borders, they thought it would be safer to let the children find their own way home. So they told him to set them down. He obeyed.

"Have you put them them all down, Mr. Thunderthump?" asked Tricksey-Wee.

"Yes," said the giant.

"That's a lie," cried a squeaking voice; and out came a head from his left waistcoat pocket.

Tricksey-Wee pinched the beast till the giant roared with pain.

"You're not a gentleman. You shall have it," she said.

"He was the thinnest of the lot," said Thunderthump, crying.

"Are you all there now, children?" asked Tricksey.

"Yes, Ma'am," said they, after counting heads very carefully, and with some difficulty; for they were all stupid children.

"Now," said Tricksey-Wee to the giant, "will you promise to carry off no more children, and never to eat a child again, all your life?"

"Yes, yes I promise," answered Thunderthump, sobbing.

"And you will never cross the borders of Glantland?"

"Never!"

"And do you promise never to again wear white stockings on Sunday all your life long?"

The giant hesitated at this and began to expostulate; but Tricksey-Wee, believing it would be good for his morals, insisted; and the giant promised.

Then she demanded that, if she gave him back his heart, he should give it to her wife to take care of him for ever after. The poor giant fell on his knees and began again to beg; but Tricksey-Wee giving the heart a slight pinch, he bawled out,

"Yes, yes! Doodlem shall have it, I swear. Only she must not put it in the flour-barrel, or in the dustbole."

"Certainly not. Make your own bargain with her.—And you promise not to interfere with my brother and me, or to take any revenge for what we have done?"

"Yes, yes! my dear children; I promise everything. Do, pray, make haste and give me back my poor heart."

"Wait there, then, till I bring it to you."

"Yes, yes. Only make haste, for I feel very faint."

Tricksey-Wee began to undo the mouth of the bag. But Buffy-Bob, who had got very knowing on his travels, took out his knife with the presence of cutting the string, but in reality to be prepared for any emergency. No sooner was the heart out of the bag than it expanded to the size of a bullock; and the giant, with a yell of rage and vengeance, rushed on the two children, who had stepped sideways from the terrible heart. But Buffy-Bob was too quick for Thunderthump. He sprang to the heart and buried his knife in it up to the hilt. A fountain of blood spouted from it; and, with a dreadful groan, the giant fell dead at the feet of little Tricksey-Wee, who could not help being sorry for him after all.

"Silly thing!" said one little wisehead.

"What a horrid story!" said little Goblin, still staring into the fire.

"Now darlings, go to bed and dream about it," said one of the mothers.

"No, thank you, mamma; I had rather not," said an older girl. "I don't think it at all a nice story for supper, with those horrid spiders, too."

"Well, you must go to bed now, anyhow."

"More nice, first, mamma: mores sung," pleaded a very little one, who, not understanding the story, had yet been pleased with the bits of verse in it.

"Well, as Uncle Bogie."

"More sing. Untle Bodie, please."

"Yes, my darling," said Uncle Bogie, lifting her on his knee. "You shall have more sing."

So he thought for a little, and then repeated the following verse:—

THE OWL AND THE BELL.

"Bing, Bim, Bang, Bome!"
Sang the Bell to himself in his house at home,
Up in the tower, alone and unseen,
In a twilight of ivy, cool and green;
With his Bing, Bim, Bang, Bome!
Singing base to himself in his house at home.

Said the Owl to himself, as he sat below
On a window-ledge, like a ball of snow,
"Pest on that fellow, sitting up there,
Always calling the people to prayer!
With his Bing, Bim, Bang, Bome!
Mighty big in his house at home!

"I would move," said the Owl, "but it suits me well;
And one may get used to it, who can tell?"
So he slept in the day with all his might,
And rose at the end of flapped out in the hush of night,
When the bell was asleep in his tower at home,
Dreaming over his Bing, Bang, Bome!

For the owl was born so poor and genteel,
He was forced from the first to pick and steal;
He scorned to work for honest bread;
"Better have never been hatched!" he said.
So he slept all day; for he dared not roam
Till night had silenced the Bing, Bang, Bome!

When his six little darlings had chipped the egg,
He must steal the more: 'twas a shame to beg.
And they were so fierce that they did not sleep well:
"It's their ginzards," said Ma; said Pa, "It's the bell!
For they quiver like leaves in a wind-blown tone,
When the bell bellows out his Bing, Bang, Bome!"

But the Bell began to throb with the fear
Of bringing the house about his ears;
And his people were patching all day long,
And propping the walls to make them strong,
So a fortune they had to sat, and like a mouse,
For he dared not shout his Bing, Bang, Bome!

Said the Owl to himself, and hissed as he said,
"I do believe the old fool is dead.
Now—now, I vow, I shall never pounce twice;
And stealing shall be all sugar and spice.
But I'll see the proper, ere he's laid in the loam,
And shout in his ear Bing, Bim, Bang, Bome!

"Hoo! hoo!" he cried, as he entered the steeple,
"They've hanged him at last, the righteous people!
His swollen tongue hangs out of his head;
I am sure of it—see the old brute is dead!
There let him hang, the shapeless grome!
Choked, with his throat full of Bing, Bang, Bome!"

So he danced about him, singing Too-whoo!
And flapped the poor Bell, and said, "Is that you?
Where is your voice with its wonderful tone,
Banging poor owls, and making them groan?
A fig for you now, in your great hall-dome!
Too-whoo! is better than Bing, Bang, Bome!"

So brave was the owl, the downy and dapper,
That he flew inside, and sat on the clapper;
And he shouted "Too-whoo! till the echo woke,
Like the sound of a ghostly clapper-stroke:
"Ah! ha!" quoth the Owl, "I am quite at home—
I will take your place with my Bing, Bang, Bome!"

The Owl was uplifted with pride and self-wonder;
He hissed, and called the echo thunder;
And he sat the monarch of feathered fowl;
Till—Bang! went the Bell—and down went the owl,
Like an avalanche of feathers and foam,
Loosed by the booming Bing, Bang, Bome!

He sat where he fell, as if nought was the matter,
Though one of his eyebrows was certainly flatter.
Said one of the owlets, "Pa, you were wrong;
He's at it again with his vulgar song."
"Be still," said the Owl; "you're guilty of pride,
I brought him to life by perching inside."

"But why, my dear?" said his pillowy wife;
"You know he was always the plague of your life."
"I have given him a lesson of good for evil;
Perhaps the old ruffian will now be civil."
The Owl looked righteous, and raised his comb,
But the Bell bawled on his Bing, Bang, Bome

"Now! you must go to bed, now."

In this all the mammas were of one mind; so, after various and elaborate *Good-nights*, the little ones went off to sleep, and, I am afraid, to dream.

THE HAIRDRESSER OF TETHERHAM.

BY WESTLAND MARSTON.

CHAPTER I.

Had Common-Councilman Jacob Poppleton been asked, about forty years ago, who was the most important person in the seaport and borough of Tetherham, he would, had he replied honestly, have awarded that distinction to Jacob Poppleton himself. There would have been a fair leaven of self-conceit in the assertion, no doubt; yet it would not have been so absurd as it may appear when we state that Mr. Poppleton was simply the hairdresser and perfumer of Tetherham aforesaid. We say *the* hairdresser, because, although Tetherham had its half dozen barbers who professed to handle the scissors as well as the razor, their very existence would have been ignored by the august Poppleton. It was in his windows alone that you might contemplate the two busts in wax, on which art had lavished its resources, one effigy being that of a florid cavalier, with masses of dark, wavy hair, a snowy brow, perfectly arched eyebrows, and the longest fringe of jet-black lashes; the other that of a lady, blessed with a wealth of auburn ringlets, but whose pallid complexion and passive expression suggested how long and hopelessly she had gazed on the masculine charms in her vicinity. Nor did the interior of the perfumer's shop belie the expectations which these works of art naturally excited. In a glass case upon the counter was a glittering array of silver-mounted smelling-bottles, delicate phials of perfume, scissors, pencilcases, choice tortoiseshell combs, and aromatic soaps, from the last of which, when the case was opened, a delightful fragrance—the incense, as it were, of this temple of elegance—subtly diffused itself. Indeed, to my boyish mind, an influence of almost religious awe reigned in Mr. Poppleton's shop. There were various causes for this effect. First, the green curtain, which ran behind the window, toned down into a sort of ecclesiastical solemnity the sunbeams that fell upon walls painted to resemble oak, and upon the well-polished chairs used by ordinary customers. Then, there was the mystery of an inner room reserved for select patrons, which, when the door was ajar, disclosed a vision of rich carpet and of stately chairs, backed with green velvet and studded with brass nails. Above all, there was the imposing presence of Poppleton himself. He was short and stout of build. A sense of self-importance lurked in every line of his grave but complacent face. His words were few, his gestures slow and oracular.

That our hero had grounds for a reasonably-good estimate of himself has already been hinted. You will please to observe that Mr. Poppleton was no common hairdresser. His father had ministered in the same capacity to the old families near Tetherham when some of them—a stanch though small band—still wore powder. A generation earlier, when that custom was almost universal, his grandfather had presided in the present shop. His great-grandfather and the immediate ancestor of that worthy had also been hairdressers. Jacob was, then, enabled to boast a line which had made the human head its peculiar care, and which reached from the days of full-bottomed wigs and black patches to those of the wavy locks and ringlets which bespoke the exquisite in the days of George IV.

As a man having himself a pedigree, Jacob naturally admired the old country people of his neighbourhood, and looked suspiciously upon innovators and men of yesterday. The chief object of his veneration in the former class was John Varnham, Esquire, one of the members for Tetherham. Mr. Varnham had a seat close by the borough, and came of a family which had represented it in the Commons even longer than the Poppletons had officiated as its hairdressers. For nearly two hundred years there had never been a Parliament in which a Varnham had not sat for Tetherham; never an election at which a Poppleton had not voted for a Varnham. Setting aside Jacob's affection for his wife and only child, his ruling passion may be described as a devotion to Mr. John Varnham and his political interests. The latter, in his turn, was much attached to his humble friend, whose faithfulness he valued, and whose eccentricity he relished.

One fine October afternoon, Mr. Varnham drove into Tetherham, and, having sent the carriage with his daughter and her governess further into the town, entered Poppleton's shop. The patron was at once shown into the inner sanctum. His arrival had been remarked, and the shop was soon filled by the townspeople, anxious, on the pretext of custom, to indulge their curiosity with a glimpse of their member. For this privilege, however, they had to wait. Half an hour passed, during which nothing of interest was seen but the shadow of Jacob's head on the glass door. That head was gravely shaken at certain points of the conversation, while its owner busied himself with the hair of his distinguished customer.

Mr. Varnham was predicting that the next Session would be fraught with danger to the country. The Opposition was daily gaining strength, and likely to push the Government hard on the question of Parliamentary Reform.

"Yes, my good Poppleton," continued Mr. Varnham, "if these men once come into power, they will swamp the constituencies with a host of new voters; and, instead of returning two members for Tetherham, I may have to fight for my own seat."

"Good heavens!" ejaculated Jacob, in his emotion applying the scissors with a recklessness that was perilous to his patron's left ear.

"I don't say," resumed the latter, "that I am opposed to temperate and well-considered improvements; but such wild and sweeping innovations"——

"Exactly, Sir," interrupted the zealous Poppleton; "what becomes of the landed interest?"

"With which," pursued the other, "all our institutions are bound up!"

"Beyond doubt!" groaned the hairdresser, with a shake of the head that presaged the approaching dissolution of society.

We need not further report a dialogue which consisted in the constant iteration of doleful predictions on the one side and equally doleful assents on the other. In due time, Mr Varnham's carriage returned, giving the loiterers in the shop leisure to admire the sweet face and elegant costume of Miss Varnham, a young lady of fifteen, who, in company with her governess, awaited her father's reappearance. At length, the great man issued forth, and, after a few genial words to the group in Jacob's shop, drove rapidly off.

You may be sure that with the quidnuncs in the shop Mr. Poppleton, fresh from his interview with the member, was a man of no common importance. Nor did he neglect to improve the occasion. Longing to be questioned, yet feigning unconsciousness, as one to whom interviews with statesmen were of common occurrence, he touched briefly on the weather and the state of the markets, then assumed an air of abstraction, which he had often found serviceable in stimulating curiosity. His customers, on the other hand, though no less eager to gain information than Jacob to impart it, were yet too much in awe of him to venture on direct questions. So for a few minutes there was silence, only broken by the snip-snap of the scissors plied by the elder apprentice and John Poppleton, the hairdresser's son.

"Mr. Varnham be looking main well," at last observed a small farmer, without addressing any one in particular.

"Main well, indeed," responded the baker and confectioner. Jacob coughed dubiously twice.

"Looks arn't allast to be trusted," remarked the shrewd-looking plumber, translating, as he thought, Jacob's cough into plain English.

"Nowt wrong, I hope?" asked the farmer, in an undertone.

At this point Mr. Poppleton's taciturnity began gradually to thaw. He assured his hearers that, so far as Mr. Varnham's health and fortunes were concerned, there was no pressing cause for apprehension. To further questions he made no instant reply, perhaps because he was for the moment intent on giving edge to a razor. That task accomplished, he touched the blade significantly, and said, as one who muses aloud, "It may come to this!"

"To what?" gasped the baker, with a whiteness of complexion that could scarcely be accounted for by his occupation.

By way of answer, Jacob held up the razor.

"Yes; it's nigh at hand," he continued, after a pause. "You've heard of the French Revolution?"

His auditors dismally assented.

"But that sort of thing ar'nt likely to happen in our country," laughed the shrewd plumber, who prided himself on having an opinion of his own.

"Ar'nt it?" said Jacob, sardonically. "Ar'nt evil-disposed folks already clamoring agen the landed interest? Ar'nt they taking to monster meetings, burning of hayricks, and threatening letters? Ar'nt they denying the vested rights of the gentry in their own boroughs? How did they begin in France? Why, they attacked the landed interest. Now they're doing the same thing here."

After this unusual expenditure of breath the speaker relapsed into silence.

"Some of them agitating chaps will have a precious sight to answer for," observed the farmer.

"And here comes the head and front of 'em," cried another of the company, pointing out a tall, sparely-built man, who was quickly approaching.

The person indicated was Mr. Frank Driver, who, having begun life as a marine clothier, had made a good deal of money by supplying outfits to the crews of ships that traded between Tetherham and the ports of Northern Europe. His ambition had kept pace with his prosperity. No longer content to be a purveyor for seamen, he had gradually extended his connection, and was now the clothier, par excellence, of Tetherham and the neighbourhood. Mr. Driver had enlarged his premises; rebuilt his frontage, and, by the aid of plate glass, pilasters, and stucco, given a metropolitan character to his shop which he thenceforth designated "The Emporium." To Jacob Poppleton "The Emporium" was an eyesore and an offence. His conservative nature abhorred all kinds of change, and he loved to recall in the Tetherham of his manhood the features which had been dear to him as a boy. He regarded, therefore, with special disfavour the flaunting, London-looking shop, which had ousted a time-honoured tenement from its place and stood staring with huge, immodest eyes of glass amidst its meek, gable-ended neighbours. "The Emporium," however, was in the mind of our hero the least of Frank Driver's sins. It was Frank Driver who sneered at the landed interest; Frank Driver who declaimed against the abuses of the pension list, who opposed church rates, spoke evil of the members for Tetherham, also of its Mayor and Corporation. Finally, it was Frank Driver who had been the life and soul of the "blue" party, when Mr. Luke Driffield, chairman of the New Dock Company at Tetherham, attempted to wrest one of its seats from the Varnham interest. It was hardly surprising, then, that Common Councilman Poppleton, who always seconded the nomination of Mr. Varnham, should look somewhat austerely upon the energetic figure which, with swinging arm and with hat pushed back from the forehead, was now almost at his door. Nothing daunted, however, by the hairdresser's solemn frown, Driver halted to accost him.

"So, friend Poppleton," he cried, with a bantering laugh; "you're a great man to-day; been closeted with our distinguished and immaculate member, I hear! Well, make much of him while you have him."

Jacob made no reply, and did his best to ignore the presence of "that low man," as he was accustomed to designate the presumptuous Driver. The latter, much too thick-skinned to heed Jacob's lofty contempt, repeated his sinister chuckle and passed on.

But when his customer had departed, after being indulged with sundry fragments of th· conversation with Mr. Varnham, Jacob gravely approached his son and laid his hand upon the lad's shoulder.

"My boy," said he, "promise me two things. Whenever thy father shall be called to his place, keep stanch to the Varnhams, and never own that low man, Driver, for a friend."

Mrs. Poppleton, who had entered the shop, was greatly moved at this appeal. In her eyes Jacob was the embodiment of human wisdom and virtue; so she rebuked her son rather sharply for not at once responding to the paternal adjuration.

John was just then absorbed in watching the procession of Miss M'Tabinet's pupils as they went by on their evening walk. But he soon roused himself, and replied cheerfully, "Of course, father; the Varnhams and Royal red for ever!"

But the lad evaded any pledge of enmity to Driver, whose daughter Margaret—at once senior pupil and junior teacher in Miss M'Tabinet's seminary—was now passing the hairdresser's door. Margaret was an arch-looking, blooming maiden on the verge of seventeen, who already knew how to set off her charms by nicety in her attire. Poor John, endowed with a susceptible nature, had often watched Margaret admiringly in her daily walks, and he now thought it hard that he must, under no circumstances, press the most perfectly-gloved hand in Tetherham, far less throw himself at the little feet which, in their delicate boots, were now waking light echoes on the pavement.

It was now seven o'clock, and the unsuspicious hairdresser, contented with his son's answer, indulgently released him for an evening stroll. On John's return the shop was closed, and the Poppleton household were assembling for supper in the old parlour, which, with its deep recesses and long beam across the roof, looked the picture of quaint comfort in the October firelight. This was the hour dearest to Jacob's heart. Not even the deference paid to him as a political oracle yielded a content so full as that afforded by the bright face of his comely wife, or by the playful sallies of John, who had gradually learned how tender a nature lurked under the somewhat formal manners that had overawed his childhood. At this social time, when the toils of the day were over, Jacob was seen at his best. The cloth having been removed and the Hollands produced, he compounded a beverage of modest strength, and, having ladled out three wine-glassfuls of the same, distributed them to his wife, his son, and the apprentice. Having lit his pipe, Mr. Poppleton proceeded to regale his lady with the latest Tetherham news, which on this occasion proved so interesting that John Poppleton and the apprentice often paused in their game at draughts to listen. There was a plan in agitation to establish a seaside resort about three miles from Tetherham. The scenery at this point was bold and romantic; the medical sages in the neighbourhood were agreed as to the rare healthiness of the climate, and even such poor accommodation as the huts of two fishermen supplied had this year been eagerly seized upon by an invalid family from the county town. The speculation, in short, looked so promising that Jacob had resolved to invest in it, a purpose to which the dignity of becoming a freeholder and belonging to the landed interest had not a little conduced. His rather grave and immobile face grew flexible, and his small, gray eye twinkled with unusual light, as he pictured a future line of seaside villas which should be called "The Varnham Esplanade," and one pleasant cottage to which Mrs. Poppleton and himself might occasionally repair, or in which John and—who could say?—perhaps a Mrs. John Poppleton to be, might spend one very particular month which is traditionally free from life's common toils and vexations. At this humorous notion the apprentice laughed outright and the sensitive John laughed and blushed. He quickly rallied, however, and begged his father to name the family in Tetherham from which Mrs. John Poppleton was to be selected. All the good neighbours blessed with daughters—the Drivers excepted—were then passed in sportive review, John displaying no little shrewdness and good-natured satire in criticising their peculiarities. Jacob, as in duty bound, called his son to order, and gently rebuked him for disrespect to his elders and betters. But the reprimand was so far neutralised by the pleased smile on the paternal lips that the delinquent continued his offences until the production of the family Bible called the household to devotions. These being concluded, the lads retired for the night. There was a wistful look in Jacob's face as his son disappeared. Contrary to custom, the good man refilled his pipe, a long interval between each whiff denoting the abstraction of his mind. It was indeed no light matter on which he was now pondering. The changes in fashion and the rapid improvements in the hairdresser's art had left Mr. Poppleton in the rear, not only of the metropolis, but of many country towns. Averse as he was from new-fangled changes, the demand of the public for novelty could hardly be resisted with success. Jacob felt that unless he kept abreast of the times some competitor might arise to dispute his pre-eminence in his own birthplace. He had relations in London, and he had almost determined to place John with them that he might acquire the latest secrets of his craft. To part from the boy, who for nineteen years had been under his own eye, was a grave trial to this affectionate father. But Jacob, though a tender man, was not a weak one, and to-night the speedy execution of his project seemed to him more than ever desirable. He was musing between those long intermitted whiffs how he could best break the matter to Mrs. Poppleton.

CHAPTER II.

Jacob's purpose was carried out. John went to London, and returned after an absence of three years.

During that period the land had been convulsed by political strife. Another Monarch wore the crown, class had been arrayed against class, the Commons and the Throne had been in collision with the Peers, and the Reform Bill had been passed.

Tetherham had suffered from the new Act even more severely than Mr. Varnham had predicted. That ancient borough had been included in Schedule B, and deprived of one of its members. A new election was looked for shortly. The democratic Driffield, backed by the Dock Company and a strong party of new voters, had again thrown down the gauntlet to the Varnham family, and began his canvass. Frank Driver was once more inveighing against that "corrupt and boroughmongering house," not only with his usual energy, but with the exultation of expected triumph. Jacob Poppleton groaned inwardly when he marked the enthusiasm of the crowd for Driffield and heard of daily accessions to his ranks. But our friend masked his sufferings with Spartan fortitude. Often when the blue band and banners filed down the street, followed by Driffield and Driver, a long line of committee-men with blue rosettes, and a shouting crowd at their heels, Jacob would affect to mistake them for itinerant showmen, and to wonder why the magistrates permitted the disturbance. If apprised of his error, he would carelessly stroke his chin and say, "Oh! the blues, is it? Well, they could always get up a noise."

One day, after feigning his usual indifference before others, he turned to John when they were once more alone, and exclaimed anxiously, "John, we must put our shoulders to the wheel in earnest Varnham and the landed interest are in danger."

The young man, who with a block on his knees was combing out a lady's wig, answered by some remark upon the quality of the hair.

Jacob turned, and, perhaps for the first time in his life, darted on his son a glance of keen suspicion.

We must here digress to observe that the lapse of three years had told powerfully not only upon the State, but upon that humble unit in it named John Poppleton. Quick and observant, and with a relish for new ideas and manners, which was partly due to his methodical training, John was at once surprised and delighted by the chances of independent thought and action which London presented. At the time of his arrival the capital, like the provinces, was engrossed by the one question of reform. At the hairdresser's where young Poppleton was placed he often heard political doctrines which shocked him, so opposed were they to the teachings of honest Jacob. Soon, however, these new views began to have a charm for the lad's mind, and he espoused them with all the zeal of a youthful convert. He studied the journals, attended debating societies, and at times enlivened their meetings by his own eloquence. Progress, enlightenment, and popular rights became his watchwords; and, in brief, he returned to Tetherham with a stock of principles which, had they been suddenly avowed, would have appalled his father to the soul.

Filial respect induced John to keep silence as to his new convictions when at home; but in other places his vanity and, it is fair to add, his honesty made him less cautious. Whispers began to reach Jacob that there was a wide difference between himself and his hopeful heir upon the vital subjects of the landed interests and the rightful influence of the aristocracy. To such insinuations Jacob was for a time deaf. Naturally slow of perception, it seemed incredible to him that his son should hold any other sentiments than those in which he had been reared, and which, moreover, had formed for ages the family creed of the Poppletons. It is true that there were certain changes in John's habits and deportment which his father did not cordially approve. He would look grave when the former, no longer limiting himself to a modest wineglassful of hollands and water, called out, "Governor, push the bottle," and proceeded to compound a more liberal allowance. He thought, also, that if John must smoke he might have contented himself with a clay pipe, and looked unfavourably upon the well-coloured meerschaum which was produced with such conscious pride. Nor was it without a vague uneasiness that he now and then heard the puppy speak of Tetherham as a place behind the age and describe its magnates as "slow coaches."

Still there was such a dash in his bearing, such cleverness, or at least what simpleminded Jacob deemed such, in his playful sallies, that the pride and fondness of the parent perhaps more than qualified his feelings of disapproval.

The repeated allusions of the neighbours to John's heretical opinions produced, however, an effect at last. The elements of doubt often remain latent and undefined until some special occasion rouses them into distinctness. Such was the case with Jacob on the day of which we write. John's lukewarmness in the interest of Mr. Varnham flashed on him like a revelation, of which the pained, suspicious look already mentioned.

"I expect an answer when I speak," observed Mr. Poppleton, with forced calmness.

"Of course, father," replied John, a little hoarsely, while he busied himself with my Lady Dummy's curls, and reddened with apprehension, felt even more on his father's account than on his own.

"I say," resumed the latter, "we must all work hard for Mr. Varnham; you're a man now, John, and must do your duty."

"But, dear governor," said John, diplomatically, "all people haven't your interest in politics; it's a gift, you know."

"John Poppleton," was the reply, "your father's a red, your grandfather was a red, his father was a red; the Poppletons have always been reds. What's up now?"

"Why," answered the perplexed young fellow, "men are not all made alike."

"No, they aren't," rejoined Mr. Poppleton; "some of 'em's made Popplefuns some of 'em's made Drivers. I want to know which you are."

"Pray let's drop the subject, father; you know I didn't begin it."

"John, if I thought you wasn't a red" ——

"Well, Sir?" (rather proudly.)

"I'd disown you," said Jacob, in a low, stern whisper.

"I've a right to my opinions," replied the young man, with a kindling face.

"To the opinions of your father; all others is luxuries, and will have to be paid for."

After which sarcasm, with even more grief at his heart than bitterness on his tongue, Mr. Poppleton withdrew.

It so happened that John had that day business at the marine village of Surscombe, which, in accordance with the project named in our last chapter, had been recently founded. We may here mention that Mr. Poppleton had incurred serious responsibilities in the speculation, and that it had, so far, resulted in disappointment. The chief cause for this ill success had been the establishment of a still more attractive seaside resort in the same neighbourhood which Surscombe was in course of erection. To Surscombe, however, John took his way, with a mind at once wounded and provoked by his father's rebuke—an unjust return, the former thought, for the long and deferential submission of his conscientious opinions.

His errand having been accomplished, John began his homeward progress amidst indications of a coming storm, which he still hoped to escape by quickening his pace. The day had been oppressive; for when he started, but a south-west wind and a rising bank of dark cloud had induced him to provide against contingencies by taking his waterproof cloak on his arm.

The prudence of this measure was now shown by the gathering masses of cloud, which soon broke in gusty rain. Equipping himself in his cloak, John pushed manfully on, while the rain, which increased in violence, drifted in his face, swelled into noisy brooks the little rivulets which here and there trambled seawards through the hollows of the cliffs, and wrapped all the landmarks of the coast in impenetrable gloom.

Our pedestrian now observed looming before him in the dense atmosphere a solitary figure, apparently unprotected and long sufficiently severing from the severity of the storm. As he gained on the figure there was something in its outline and carriage which made his pulses beat quicker with expected recognition.

His conjectures were right. A minute or two showed that the object of his old, silent admiration, Margaret Driver, was before him. Since his return, in spite of his father's mandate, John had at times exchanged greetings with Driver and his daughter. The former, having heard that young Poppleton was at heart more of a blue than a red, had bestowed on him a few cordial words and meaning smiles. More than once when they met Miss Driver chanced to be on her father's arm, and joined in his courtesies with a certain coyness that increased their significance. The romantic sentiments which John had formed cherished for Margaret now revived in still greater force. Three years in town had rendered him more fastidious than ever; and the young governess, with her beauty, accomplishments, graceful manners, and taste in dress, stood out to him in bewitching contrast to the homely maidens of Tetherham in general.

Margaret, now a teacher of French and music on her own account, had been staying some at Surscombe on this eventful afternoon. Less prudent than John, she had taken no precautions against the weather, and, in spite of warnings, had left the village to return home.

This occurred one of those happy chances which relenting Fate sometimes throws in the way of lovers. John had no time in improving his good fortune. Accosting Miss Driver, he gained permission, after a few protests, to wrap her in the cloak of which he had divested himself, and then, as a matter of course, walked by her side towards Tetherham.

Their way led along the cliffs, which offered few chances of shelter. Besides this, Margaret was so thoroughly drenched that to delay on the road would have been the height of imprudence. Our pair, therefore, pursued their walk without interruption, and, towards the close of it, at a diminished speed hardly consistent with the inclemency of the weather. To John, however, their tardy progress seemed travelling by express. Margaret, on her side, was so absorbed in a revival of the scenes of London, and the power to render young men agreeable and interesting, that she was quite startled when a martial air from the blue band, which was playing under cover at the Dragon, apprised her that she had entered the High-street and was almost at her father's door.

Mr. Driver, who had just returned from the blue committee-room, was standing at the entrance of his shop when his daughter and John Poppleton arrived. A few words from the young lady explained the situation, and not only called forth her father's hearty thanks but a request that John would drop in that very night to take his bread and cheese, and a supplementary pipe, in Mr. Driver's parlour.

With warm acknowledgments, but without giving any distinct promise, John, who had never felt more comfortable than in his soaked garments, walked rapidly home, and was soon in his father's presence. There was an ominous cloud on Mr. Poppleton's brow. "Change your clothes," he said, "then come to me."

In a few minutes John again presented himself.

"John," began the stern parent, "it's best to come to the point at once; you've been in company with the blues."

"The blues, father?"

"You've been seen holding intercourse with that low man, Driver, in his own shop; and at this time, too, when he's doing his best to hound on the mob agen Mr. Varnham."

"Mr. Driver has a right to think as he likes, and, although the blues may't last many days, I'm sure the gentry with them, I don't see why they're to be called a mob."

"I an't going to take lessons from you, Sir, as to my language; you've been rid too easy, John; if the snuffle won't do I shall try the cat-o'-nine-tails and short of it is, that if your shadow darkens Driver's door again you may stay there; that's all."

Now, if the grief which Jacob felt at his son's conduct had been laid to the latter gently, the sense of filial duty might have proved stronger even than the attraction of Margaret herself. But, a harsh prohibition, enforced as it was afterwards by chilling silence, nearly roused the feelings which it ought to control. To be denied the natural rights of thought and action, not only wounded John's affection, but that sense of self-importance, which is never more keen than in those just entering upon manhood. So John left the shop that evening, convinced that now, if ever, he must assert his independence.

In spite of this resolution, he had already passed and repassed Mr. Driver's door without making up his mind to knock, when he was accosted by Mrs. Driver and Margaret, who had been to call upon a neighbour and were now returning. The matron immediately welcomed him as an expected guest, and, upon hearing his dubious response, overwhelmed him with hospitable entreaties. John still hesitated, when Miss Margaret deemingly added her entreaties to press him no further. They must not put force, she said, upon Mr. Poppleton's inclinations, nor presume from his polite kindness in the afternoon that he would treat them without ceremony, and drop in as so short an invitation.

The effect of this little speech was just what the sly maiden had anticipated. John made no further resistance, and was soon installed in Mr. Driver's comfortable parlour. The warmth of the fire had at first felt more off rather supper. Mr. Driver's talk, though a little boisterous, was genial and amusing, and he had the tact to avoid politics for the night. Before he drew John and Margaret into conversation, while Margaret leaned back in her chair with pleased attention, twisting pipe-lights with her taper fingers and resting on the fender the little unsullied feet of which she was wondrously vain. In time the presence of the pianoforte induced Mr. Poppleton to request that she would place herself at the instrument. She complied, and did not quit it until she had displayed, in a double succession of vocal execution, in which it was difficult to say whether her archness or her pathos were the more captivating.

It was already late when John withdrew, taking with him earnest requests for the repetition of his visit. It had proved even more delightful than he had expected. He had no longer a doubt that Margaret Driver was the most enchanting of her sex, and that she, or no one, should be Mrs. John Poppleton.

On reaching home the door was opened by his father. The young man had prepared himself for disagreeable inquiries and subsequent reproaches. But, instead of these, Jacob, with a finger solemnly pointed to John's candle which was set on a bracket in the hall, bade him good night, and went at once to his room.

At breakfast next morning Jacob returned his son's usual greeting, and replied briefly to his direct questions. But he never volunteered a remark—an omission which, coupled with his stern though composed look, at once alarmed and puzzled John. Poppleton senior was unwise between her husband and her son. She drew the latter aside, and then heard for the first time of the disagreement which had taken place. The distressed mother earnestly besought John to obey his father's wishes. Her entreaties might have prevailed, at least for the time, but for the coarse taunt by Jacob himself.

Mrs. Poppleton retired to her housekeeping duties, and father and son were once more alone. The latter was on the point of entering the shop for his daily occupations.

"Take off your apron, Sir," said Jacob. "You're not wanted in the shop."

"Why not?"

"Because I know what's due to a fine gentleman who has lived long enough to disgrace his father's opinions and take part with his enemies. It's my business, no doubt, to feed and clothe such a superfine young fellow; and perhaps I ought to be rather proud of the chance. But to let him serve me, you see, is a thing not quite out of place. The apprentice and my old journeyman, James Dodd, whom I shall send for, will attend to the shop. You're a free man, Sir. If you want employment you can join the operatives at Driver's committee-room; or, if you prefer society, why, there's Driver's house up the street."

"Father! Will you hear me?" cried John.

"No!" said Jacob, turning on his great coat.

"Not even hear me?"

"John," said the other, softening for a moment; "if you're going to say that a father's word's law to you, and that you'll break, at once and for ever, with the Drivers, you may."

There was no answer. Mr. Poppleton buttoned up his coat and went out.

Deeply hurt as he was, John had yet no thought of obeying his father's taunting injunction, but remained at his post in the shop. That day, and for several days after, Jacob was rarely at home. The time of election was drawing near, and he was straining every nerve to secure Mr. Varnham's return. To attain this end, as the state of the canvass showed, no common energy would be needed. Every absentee voter in the interest of the Varnhams, and there were many, the great landlords of the neighbourhood, and even the ladies in their families, were incessant in their canvass. Even poor Miss Varnham, the daughter of the invalid, was driving constantly about, and although she said little, her young winning face, and the recollection of her kindness and charity, perhaps did better service than all the unbecoming zeal of her more forward and strong-minded sister. Who could recall Miss Alice Varnham from the days when the child's golden curls fell beneath his hand on the little mourning frock worn for her mother, now wondered how any heart could resist her pleading look. While gazing on her tears raised to his eyes at the bare thought that the old link between Tetherham and the Varnhams might be on the point of severance.

The day of election came at last, and the whole town was astir with the dawn. Never before had there been in Tetherham such a rattling of post-chaises with coerted postilions; such a cavalcade of squires and farmers with staff favours; such masses from shop, factory, and dockyard, choking the narrow streets, and shouting for the blue banners which swayed to and fro with the pressure of the crowd. But why give the details of such a well-known scene. Of course you will suppose that Driver's balcony was draped in blue, and that a large, red flag, with the inscription, "Varnham and the Landed Interest," floated from Poppleton's window; that throughout the day perspiring committee men were clearing their way through lanes of excited faces; that cheering and yelling were at times alternated with street vows and fights, and that all these elements of sound and fury were occasionally blended. The result of the poll is all that concerns us; and this we cannot more surely learn than at Mr. Poppleton's shop.

Little business was done that day. John and his mother were at the shop door watching the passing throng, when sounds of a scuffle, accompanied by loud hooting, arose in front of Mr. Driver's house. Shortly afterwards, Jacob, in rather forlorn condition, made his way from a group of blues, who followed him with threats and derision. He had been roughly jostled, then knocked down, and was now hastening to his own door in a battered hat and rent coat, from which his red favours had been ruthlessly torn.

John ran immediately to protect his father and offered him his arm. But Mr. Poppleton waved him off, rushed into the shop, and, throwing himself into a chair, relieved his feelings in bursts of bitter laughter. For some minutes no more coherent mode of expression seemed at his command.

When at length he did speak it was to his wife.

"Wish that fine gentleman joy, Mary," he gasped, pointing to John. is new friends have won the day. Mr. Varnham's turned adrift. Luke Driffield's the member, and ——"

Here another fit of laughter checked his utterance.

His son attempted to soothe him. "Surely, father," he said, "I've not brought this about."

"Oh! they're a lot to be proud of, Sir," resumed Jacob. "They kept our men back in true English style, with brickbats and bludgeons. How comes it you're not amongst them? Like loves like, you know. A brave lot! They set on me too to one, and I just got off with life, by the help of a constable. Why don't you go to them, and stand treat?"

"Father!" exclaimed John, sternly.

"Why did you miss the fun? You might have seen it all from Driver's balcony. There he stood with his pert hussy of a daughter."

"Stop, Sir! You've no right to speak so of Miss Driver."

"Be still, John!" said his mother authoritatively.

"I can't be still," cried John excitedly. "To please him I've choked my own judgment and feelings, given up the common right of a man to say what he believes and to act as he thinks best. But if he chooses to insult Margaret Driver it's time I should tell him to his face that if ever I take a wife she'll be the woman."

All Jacob's violence was gone. He simply turned to his son and said, in tones intense from the very quietness, "Remember, when that day comes you've no longer a father."

For a month after this memorable scene Jacob scarcely exchanged a word with his son except upon necessary business. It was in vain that Mrs. Poppleton pleaded with the latter. His father's sternness was hardening him into a misanthrope. Nor were his own woman's efforts more successful with her husband. "Mary," said he, "if your let me be quiet I can perhaps bear all that's to come. If you talk of his I shall lose my wits."

At length John made up his mind to confide what had passed to Mr. Driver. The oratorical clothier, softened by his triumph, felt no great ill-will to Jacob, and one day went to him with a message of peace and explanation. But his mission proved idle. He, however, when Jacob left the shop by an inner door, which he closed in the face of his visitor. One evening, a fortnight later, John briefly told his father that he had proposed to Margaret Driver, and that his suit had been accepted.

"Very good," was the answer "you're going to Driver's house, I suppose?"

"Yes."

"Then I've only one favour to ask. Enter mine no more."

"Very well, Sir" said the young man wrath-way.

But when parting from his betrothed that night, John's heart, subdued perhaps by the influence of love, yearned to his father. He resolved once more to knock at the old door and seek for reconciliation.

It happened, too, that after his scarcely-tasted supper, Jacob felt a strange restlessness which impelled him to go abroad.

"I must have a breath of air, Mary," he said; "I shan't be away long."

The poor wife and mother meekly raised her swollen eyes and smiled a faint assent. She had a dim hope that he might be going in search of John.

Anxious to shun the few loiterers yet in the streets, Jacob took the first byway that offered, and soon struck into the turnpike road. He passed through the toll-bar, and walked on until he reached the avenue of Varnham Park. The moon was near her full, and the meeting trees cast a fine waving network of light and shade upon the path beneath them. The hairdresser, who was known at the lodge, passed the gate, and did not halt until the white front of Varnham Hall—spiritualised, as it were, by the moon—met his architectural descendant—above before him. At first, the sight of the old building, with its gables and long irregular roof, kindled afresh Jacob's wrath against the inhabitants of Tetherham, and against his son, whom he regarded as their ally in the late conflict with the Varnhams. But, by degrees the familiar scene before him brought back thoughts of days that were no more. Jacob's heart, touched through his memory, felt that pathetic contrast between the present and the past which presches kindness and forbearance from the instability of all things around us. As he walked back the images of other years thronged in his mind, and among them that of she lad whom he had just banished from his roof.

Then a cry which he had stifled for weeks rose from the father's heart. Re-entering the park, the irreconcilable feeling fell into Driver's house, between which and his own he continued to pace until the hour of eleven was pealed from the church clock. Five minutes later he heard Mr. Driver's door open and a farewell for the night exchanged between the host and his guest. Jacob then walked slowly homewards; he had proceeded but a short distance when his son overtook him.

"Is it you, father?" asked the latter, and his tones were gentle and mournful.

Alas! from the moment that Jacob had heard Driver's voice, the old bitterness returned. He thought, too, that John's subdued manner gave signs of yielding, and once more he resolved to force submission by severity. So, he answered his son's question in hard and implacable accents.

"What do you want with me?"

"I was going home, father. May I?"

"You remember what I said?"

"Do you keep to your word?"

"Have you often known me break it?"

"Then all's over between us. Good-by! don't let this fall too hardly on mother."

He waited a minute for an answer, for a sign; but none came.

Jacob heard his retreating steps. One sharp pang shot through the father's heart; then a vague stupor came over him, and he stood for some minutes rooted to the spot where John had left him.

At length he roused himself, shivered, as if the mild air had been that of December, and stole feebly to his own door.

CHAPTER III.

John Poppleton was married without delay to Margaret Driver, whom he took for the honeymoon to a watering-place some twenty miles distant. About a week before his son's return, Jacob Poppleton, while passing through the market-place, was struck by a new sign-board in front of some vacant premises which had recently been purchased by Mr. Driver. Workmen had been busy for some weeks in repairs and improvements, and a name, &c., outlined on the sign-board showed that a new tenant was about to take possession. The brief inscription ran thus—JOHN POPPLETON, HAIRDRESSER AND PERFUMER.

Soon afterwards Jacob entered the parlour where his wife was sitting.

"I've a bit of news for you, Mary," said he; "there's a new hairdresser in Fairham."

The poor fellow tried hard to put the matter lightly, but Mary saw at once through his feigned indifference.

"Oh, Jacob!" she cried, with a quick presentiment of the truth, "it's not—it's not—"

"Yes, it is; he's been and set up agen me."

Spite of himself his lip quivered, and he hid his face in his hands.

For awhile his wife was silent, in respect to his emotion. Then she ventured to remove one of his hands, on which her tears fell as she exclaimed, "It's a sore trial, Jacob!"

"Truth, Mary, love!" he said; "thou'st seen me as thou'lt never see me again. Let me say my say and have done with it. I know flesh and blood ain't easily got over, especially with a mother. If so be thou can't keep from seeing him at times—see him. I lay no orders on thee as to that. But never tell me aught of him. Let his name drop between us, now and for ever."

John's conduct, however, was not without its palliations. It was with the utmost reluctance that he had taken the step which his father regarded as the climax of filial treachery. Mr. Driver was naturally loth to lose his daughter's society, and all his power over her husband was almost absolute. It was Driver who had supplied funds for John's start in life. The town of Tetherham, the former segment, would yield a good living for two hairdressers at the least. If John did not take the field some one else would, and that some one would be less friendly to Jacob. Present animosities would in time blow over, and, though father and son would for awhile be rivals, they might in the end unite their interests.

This last consideration subdued John into assent, if not into contentment. But his better motives were, of course, a secret to Jacob, who met his son in the street on the day of his return, and gave him the cut direct. The family fend was by this time a public affair, and all Tetherham was in excitement.

His employer once undertaken, John did not suffer it to languish. His tact, vigour, and modern ideas, aided by Mr. Driver's money, soon produced results. The town gossips, who had all their lives looked upon the elder Poppleton's shop as a useful institution, stared at the bold improvements which his rival introduced. John's inner saloon was a perfect conservatory, vases of flowers being ranged at intervals on both sides through the entire length. The townsfolk had scarcely recovered from this pleasant surprise, when it was regaled with a new one in the shape of an elegant fountain, which on special occasions played scented water. But smaremen required more than mere fluid and novelty which graced John's window. This was nothing less than a bust in wax of the illustrious lady whose taste then gave law to the feminine coiffure of the country. By a mere mechanical contrivance the bust, crowned with a tiara that glittered like diamonds, was made to revolve slowly before the delighted spectator.

John had from the first been patronised by the blue party, who regarded him as a martyr in their cause. His liveliness and address, together with the wonders displayed in his shop, brought over to him a large neutral section, and even many of those who, though hostile to his opinions, did not think it necessary to regulate their taste by their politics. Before long custom at the shop of Mr. Poppleton, senior, began sensibly to decline, and he had the pain of seeing himself deserted by some of his oldest supporters. It might have been otherwise had Mr. Varnham and his daughter remained at the Hall, but they had both left for the Continent a few weeks after the election.

At the end of a twelvemonth Jacob found his income seriously reduced. Nor did the calamity of fast-declining patronage come alone. His exception was one which did not admit of very rapid gains, and a great part of his savings had been invested in the unlucky speculation at Sarcombe. There was yet another source of disaster. Part of the land which he owned at Sarcombe had been bought at public auction. Jacob's solicitor was dissatisfied with the vendors' title, and advised his client to decline completing the purchase. Jacob, rather litigious than he believed himself enraged, suffered the matter to go into Chancery, and a decree had been obtained in favour of the vendors. Thus our unfortunate friend was not only saddled with a worthless bargain, but with the heavy costs which his resistance had provoked.

Grave rumours as to Mr. Poppleton's affairs began to circulate, and there was something in his altered appearance which gave them considerable weight. In his best figure, listless manner, and quiet speech it would have been hard to recognise the self-satisfied but kindly man who had so long basked in the light of an even prosperity and in the reflected radiance of Mr. Varnham.

There was a change, too, in the very aspect of the shop. The unpurchased goods were becoming tarnished or spoiled beneath the glass case; the painted oak was assuming a look of sickly yellow; the green curtain, though worn and faded, was not replaced. The testimony which inanimate things bear to the decayed fortunes of their owners was visible in old Jacob's surroundings.

John Poppleton did not hear without a pang of his father's condition, nor without prompt efforts to remedy it. He wrote him a conciliatory letter, but it was returned unopened. At once ventured to accost him in the street, but was met with a withering frown, which showed that all advances were hopeless. He then sought to make an envoy of his mother, who ventured at rare intervals to call at his house. The poor woman complied, and was upbraided for her submission with trembling lips, when Jacob sternly cut her short. He reminded her of the compact between them—she was permitted to see her son solely on the condition that she never named him.

"I've given you fair warning, Mary," he said; "if you speak of him you shall see him no more."

So Mary shrank into silence; and when, a few weeks later, a son was born to John, she dared not tell her husband, but sat that night by the fire, swaying to and fro in dumb grief, because the new blessing had brought a new torture.

Another month passed, and Jacob could no longer hide from his wife the critical state of his affairs. One December night, when the shop was closed and the apprentice dismissed to his walk, Jacob placed his chair by Mary's, who was sitting as usual in the chimney-corner, with her head propped upon her hand. He took her hand kindly, and she raised her sunken, care-worn face, on which the traces of more than a year's grief were too plainly written. Somehow, those records, so imperceptibly deepened, had never struck Jacob before as they now did. He spoke to her with a tremulous tenderness, very different from the hard, sharp tones which it was become his habit to use.

"Mary," he began, "thou'rt the one blessing left to me, and, perhaps, I oughtn't to complain of anything while I've still thee. However, as thou'st guessed ere this, affairs have gone contrary. Our means is reduced, and we must squire our expenses according. And now I've got something to say. It may make thee wince at first—it did me—but thou'lt get over it. Mary, I must sell the old house and shop to pay law bills, and I must take some small, cheap place where the few that's stood by me so long will follow me still."

Intensely as Mary loved her son, she both loved and venerated her husband. His very strongest sensed to her like the ways of Providence—inscrutable, but, no doubt, right. So, when Jacob told her so gently the pang that was before him, her tried heart was fairly overcome, and she wept her last remonstrance and sobbed aloud.

"Whist, Mary; whist, love," he faltered, "I've thee yet."

Encouraged by his tenderness, Mary ventured once more to plead for her son.

"Dear Jacob," she said, "we might be so happy still. I'm sure John would help us."

"Help us, Mary! Do you think I would take help from him?" he exclaimed, starting from his seat and dashing his clenched hand violently upon the table.

"Oh, have pity!" she implored, clasping her hands, "this is killing me!"

The cry, which seemed wrung from her heart's depths, went to that of her husband. Gazing on her emaciated face, a terror struck him that his wife might prove too. For a moment he saw that John and Mary's sake he could triumph over the wrath born of outraged love. But the bitter thoughts of his poverty returned, and his pride rallied.

"Mary, love," he said, "I would give my life for thee, that's sure-sure. I won't deny, too, that there are times when I'm a weak—weak fool; and the thought of him, as he was when a boy, comes back on me like a ghost. But I'm not that fool. I'm myself again, and wanted it first—as I may do—I could, perhaps, forgive him. But to make it up with him now I'm in want—I can't! I can't! The bread he helped me to would choke me."

Mary urged her husband no further. One consoling revelation had escaped him in the struggle of his passions. She went back to her place and murmured, "He loves him still."

Early in the following week Jacob met with his lawyer, the apprentice opened the parlour door, where Mary was sitting, and announced Miss Varnham. After fifteen months' absence she had returned unexpectedly to her father, so that the young lady's presence was the first intimation to Mary of their arrival.

Miss Varnham had alighted at the hairdresser's door for various articles which she had been accustomed to supply. She first inquired eagerly for her father's old friend, and then asked to see Mrs. Poppleton. Shocked by her altered appearance, Miss Varnham hastened to her side, and overwhelmed her with kind words, opened the sufferer's heart. Her visitor did not leave until she had heard all the sorrow which had come upon the humble pair since her departure.

Having comforted the poor woman to the best of her power, Miss Varnham left her, but, before returning home, drove to John Poppleton's shop.

Having heard who had been, his face lightened up as it had not done for many a day. In the course of the week he received a summons to attend the young lady at the hall.

Mrs. Varnham, his wife, he embraced her before setting out, "you look almost your old self to-day."

And so he did. He felt as if the old times were come back.

It was a bright, frosty morning when he once more took the well-known road. Again, on entering the avenue, past scenes crowded on his memory. He recalled the day of his marriage with Mary, when he had driven through the wedding favours of the hall-servants' room. He remembered the present Mr. Varnham's marriage, and the gallant show of the bridal party as it passed up the avenue to the church. He remembered, later, the order premises, when the mother of Alice Varnham was borne to her last resting-place. And another image intruded in spite of him—that of the curly-headed urchin whom, by way of treat, he had sometimes taken to the hall—that of the boy who, when old enough to be of use, had often trudged merrily thither by his side.

These last recollections he struggled hard to repress. That boy had lived to become estranged from the foot of his father, and he had to be the son-in-law of Driver, lived to be the successful rival of his own father. Still, Mary's appealing look would steal in. To resist it he had to think of her. So he kept his eyes on the ground. He was fallen in the world, John was prosperous. It should never be said that interest was his motive for reconciliation—never!

On reaching the hall Jacob met with a surprise. The servant had announced him, and he was about to enter the room, when a figure emerged from it that took away his breath, a figure that had all the attributes and even the air of young Mr. Varnham. No, it was indeed Mr. Varnham say, quite pleasantly, "Good morning, Mr. Driver."

The next instant Jacob's hand was in the cordial grasp of Mr. Varnham.

"Welcome, honest friend," said the Squire, "there goes an old acquaintance of yours."

Jacob drew himself up. "Frank Driver, Sir, is no acquaintance of mine."

"I'm sorry to hear it," said Mr. Varnham, laughing.

The hairdresser's amazement increased. "You seem to forget, Squire," he answered, reproachfully, "that Driver's the head of the blue lot."

"True," laughed Mr. Varnham again, "but he's an honest fellow, and turns out first-rate. I have just given him an order."

An order to a blue, and that blue Driver! Jacob had a vague idea that either he or Mr. Varnham had lost his senses.

But the latter went on in the most merry humour.

"I see I've given you a shock, my stanch old friend, but it's nothing to what's coming. Look there!"

He pointed to the window before which a gentleman, looking something more than thirty, and of a lively, pleasant aspect, was passing with Miss Varnham.

"Now, my dear fellow's name, Poppleton," said the Squire.

Mr. Poppleton shook his head.

"You never would. Well, his name's Driffield."

"Driffield!" echoed Jacob, aghast.

"Yes; Charles Driffield, barrister-at-law, and nephew of the member for Tetherham."

The good gentleman now entered upon a series of explanations which, in substance, were as follows—More than a year since Charles Driffield had met Mr. Varnham and his daughter at one of the German spas. Mr. Luke Driffield was then on the point of applying to Parliament for powers to extend the Tetherham Docks. Mr. Varnham, though no longer member for the town, was still an influential person there, especially in this case, as he possessed land adjacent to the docks. Charles Driffield, who was professionally connected with his uncle, availed himself of his casual meeting with Mr. Varnham to open an important negotiation. In the conduct of it he showed so much courtesy and intelligence that the acquaintance between the two gentlemen soon ripened into intimacy. Mr. Charles Driffield's political views were not those of Mr. Varnham; but the young man's moderation on points of difference, his general accomplishments, good taste, and engaging manners, secured the favour not only of Mr. Varnham but of his daughter. In short, when Charles Driffield returned to London he left the best impression on the minds of both, and when business subsequently brought him again to Mr. Varnham's retreat, it soon became evident that there was a warmer feeling than esteem between the rising barrister and Alice Varnham. Mr. Varnham would, doubtless, have preferred a son-in-law of his own politics. Nor could he at once get over the fact that Charles was the nephew of his successful opponent at Tetherham. But he frankly admitted the high qualities which his daughter's suitor otherwise possessed, and was eventually content to ensure her happiness, even at some personal cost.

Such was the statement which Mr. Varnham now made to Jacob, whose ability, he thought, deserved this mark of confidence. The recipient of it was for a time completely bewildered. That Miss Varnham should marry a Driffield seemed to him like an infraction of the laws of nature. On the other hand, his deference to Mr. Varnham was such that he could hardly condemn an arrangement which had received his sanction. Perplexed by these opposite feelings, Jacob remained silent until his patron reminded him that Miss Varnham was expecting his arrival.

Mr. Poppleton was at once ushered into the young lady's own room, where she soon joined him, greeting him with all the warmth of old and tried friendship. In doing so, however, she was, while her own hair (much, by-the-way, to the chagrin of her maid), Miss Varnham ran guilty on describing the various scenes which she had visited and the habits of the people. She carefully avoided questioning her colloquists at Tetherham, avoiding, however, all reference to his domestic troubles. His task was approaching completion when she archly inquired if her father had mentioned the coming change in her own condition.

Jacob rather awkwardly offered his congratulations. "But," continued he, "I ought to have behaved such news, Miss Alice, except from Mr. Varnham's own lips."

The fair diplomatist had now brought her companion to the very point which she desired.

"It will surprise papa besides you, my good friend," she said. "In some respects Mr. Driffield's opinions are opposed to my father's. It is not every father who will overlook such differences in a son-in-law simply because he is a rising and accomplished man."

"No, Miss; it isn't every father that would see things in that light."

"Certainly not. I know how much I owe mine for his goodness. But he is wise as well as good, and I trust that he will not act on his affections at will; and that young folks fall in love, not because they choose but just because they can't help it."

"Just so, Miss Alice," said Jacob, who rather winced under this liberal doctrine, "surely young folks should fight against love when it happens to be wrong."

"That is, when either of them is found to be unworthy. Yes, in that case. But when they're both good and upright, and thrown often together, if love springs up then, I don't think they can help it any more than a bird can help singing in the spring. I'm sure, when you courted Mary, you were not thinking of it, but through any other eyes than your own—not even through your father's."

"It would have been an unhappy thing, Miss, for me to have gone agen his will."

"But good fathers will not cross their children unnecessarily; and even when the parent has some minor objections to overcome, he will have his reward in doing so. Mr. Driffield is there's not a good friend. Children are sometimes called from earth before their parents. Should this be my case, what a dear comfort would my father find, then, in the name of his daughter to be—in the knowledge that through all the years in which a child clings to a parent he had been all to me that he should be; and that, when in time the new love came that should lay heart with his, he resigned every thought of self and acted only for me."

Miss Varnham noticed that Jacob seemed to avoid her look, that his hand was unsteady, and his voice constrained when he spoke again.

"You'll be happy, Miss Alice, I'm sure," he faltered.

Alice saw that this was an attempt at a diversion, and, like a skilful general, proceeded to check it.

"Yes, I trust I shall; I shall be leaving the old place and the old friends. But they will not forget me, I hope. You will not?"

"Ah, Miss!"

"You would do your best to send me away quite contented?"

"Heaven knows it, Miss Alice; but what can a poor, broken-down man"—

She laid her light hand on his, and looked beseechingly into his face.

"Jacob Poppleton, forgive your son; heal the poor mother's heart-that's almost broken. Do this for her sake—for your own—for your love to Alice Varnham."

"Miss Alice," he cried, with emotion, "he don't want my love—he don't care for my forgiveness."

"If he does not," said Alice, gravely, "that's another matter. Step this way, Mr. Poppleton."

The hairdresser, whose duties were now ended, followed Miss Varnham across the hall into an apartment opposite. When the door opened, he found himself in the presence of Mr. Varnham.

John started up. "Father!" exclaimed he, with brimming eyes, "make me and my mother happy—forgive me!"

He seized his father's hand, which the latter attempted to withdraw.

"Grasp him firmly, John," exhorted Mr. Varnham. "Don't let him go. He smiles, doesn't he? No! what's better for our purpose, he weeps. Come, old friend," he added, approaching Jacob with irresistible kindness, "admit that you're conquered."

And Jacob's sobs proclaimed that the victory was indeed won.

"Father, John," continued Mr. Varnham, "I have one house and one fortune. The shop and all I have is yours."

"No," said Jacob. "I forgive you, John; but I'll never take alms from you."

"What do you mean?" asked Mr. Varnham. "You're rich enough to buy a fair share in the concern. Talk of alms, with your property at Sarcombe!"

"The very speculation," said Jacob, "that has ruined me."

"But it would prosper in any hands," replied Mr. Varnham. "It will be hard if I and Alice can't persuade some of our London friends to pass in autumn at Sarcombe, just to bring it into fashion. In fact, I should make a very good thing of the place. I'm a little jealous, too, at having no share in a property so near my own. In a

"THE HAIRDRESSER OF TETHERHAM:" JACOB POPPLETON DENOUNCING THE "BLUES."—DRAWN BY L. HUARD.

word, Jacob, I shall think myself fortunate if I can purchase your interest at some advance on the sum you gave for it."

Little remains to be told. The reader will imagine that before Christmas the names of "Poppleton and Son" duly appeared over the shop of the latter, and that the great Christian anniversary was thankfully celebrated by the reunited family. It may be worth recording that Mr. and Mrs. Driver were that day amongst their guests. We dare hardly say that since then the old animosities between the hairdresser and the clothier have been altogether forgotten; but their bitterness has gradually abated, especially since the year when Luke Driffield resigned his seat to his nephew the son-in-law of Mr Varnham.

THE NEW GOVERNOR-GENERAL OF INDIA.

SIR JOHN LAWRENCE, her Majesty's new Viceroy and Governor-General of India, left London on Saturday week for Marseilles, where he embarked for Alexandria on his way to India. He was born, in India, in 1811, and is a younger son of the late Colonel A. W. Lawrence, by Letitia Catherine, daughter of the Rev. George Knox, of Lifford, in Ireland. He was educated at Londonderry School, and afterwards entered Haileybury. In 1829 he went to India as a "writer;" in 1831 he became assistant to the Chief Commissioner and Resident at Delhi. Towards the close of 1833 he was appointed officiating magistrate and collector of Delhi. He held the same office at Panipat. In July 1836, he received the office of joint magistrate and deputy-collector of Goorgaon and Southern Delhi; and in the following November the office of officiating magistrate of the southern division only. In 1838 he was in sole charge of the Goorgaon district, and conducted the settlement of the duties at Zillah Etawah. From February, 1840, till December, 1842, he took a leave of absence, and came to England. Hitherto Mr. Lawrence was chiefly known as an Administrator of Customs. In 1846 he obtained his first reputation of a high class as a Judge, magistrate, and collector over an important district of Southern Bengal. Sir Henry Hardinge heard of him and took a fancy to him, and henceforth his career was a great success. In 1847 he was appointed Commissioner of the Trans-Sutlej provinces, which had been recently added to our Indian empire after the Sikh campaign. He refused to shape the political, agricultural, and fiscal systems of these provinces with such masterly power as at once to stamp him as a man of mark in administrative ability. After the assassination of the British Envoy at Moolt-tan, and the subsequent hostilities which resulted in the capture of that place, the union of Shere Singh and Chuckar Singh, the thorough defeat of the Sikhs by Lord Gough at Feroze-pore and Goojerat, and the annexation of the Punjaub to the Indian empire of Great Britain by Lord Dalhousie, Mr. Lawrence was chosen, in company with his distinguished brother, Sir Henry Lawrence, the Resident at Lahore, and Mr. Marsh, to form the board for administrating the affairs of the Punjaub. How Mr. Lawrence introduced an admirable system of government into the Punjaub—how he disbanded the Sikhs and persuaded many of them to enlist in the British service—how he raised an irregular force of ten regiments for the protection of the western frontier—are facts known to all the world. The Punjaub was an example of the success of British systems of government and civil institutions. In 1856 he was made a civil K.C.B. for his services in the Punjaub, and as agent to the Governor-General for the north-western provinces of Hindostan. During the Indian mutiny we saw the result of his great administrative genius. Not only did the Punjaub remain signally faithful to us, but its troops were spared to stem the tide of rebellion and to aid in the re-capture of Delhi, the turning-point of the rebellion. In 1857 Sir John was created a G.C.B.; the following year he was created a Baronet and was sworn of the Privy Council. On his return to England he received the freedom of the cities of London and Glasgow, and was honoured by a vote of thanks from Parliament. He was created a Knight of the Star of India in 1861, with Lord Clyde and Lord Harris. Sir John Lawrence married, in 1841, Harriette Katharine, daughter of the Rev. Richard Hamilton, and by her has had issue three sons—John Hamilton (born in 1846), Henry Arnold (born in 1848), and Charles Napier (born in 1854)—and five daughters.

THE RIGHT HON. SIR JOHN LAIRD MAIR LAWRENCE, BART., G.C.B., K.S.I., HER MAJESTY'S NEW VICEROY IN INDIA.

TESTIMONIAL PRESENTED BY THE WEST-END COMPANY OF THE IRISH RIFLE VOLUNTEERS IN LONDON TO THEIR CAPTAIN, A. B. LEECH, ESQ.

TESTIMONIAL TO CAPTAIN LEECH, OF THE IRISH RIFLE VOLUNTEERS IN LONDON.

A SILVER tankard (value 50 guineas) was recently presented by the members of the West-end Company of the London Irish Rifles to their Captain, Arthur Blennerhassett Leech. The tankard, which was made by Messrs. Hancock, of Bruton-street, stands on a polished ebony pedestal, and is 14 inches high. It is elegantly chased with shamrocks; the shield being supported by figures of an officer and private of the corps, and the cover surmounted with a figure of Hibernia. It bears the following inscription:—"Presented by the West-end Company of the Irish Volunteers in London to their friend and Captain, Arthur Blennerhassett Leech, as a token of their regard for him and their appreciation of his untiring exertions in behalf of the regiment since its formation." Mr. J. S. Purnell, the Lieutenant of the company, presided at a dinner given on the occasion at the Rainbow, Temple Bar—the vice-chairs being efficiently filled by Ensign Davis and Colour-Sergeant Harty.

TESTIMONIAL TO CAPTAIN C. F. HAWKER, OF THE 2ND MIDDLESEX.

On the 27th ult., the fourth anniversary of the formation of No. 16 (War Office) Company of the 2nd (South) Middlesex Volunteer Rifle Corps was celebrated at the head-quarters of the Regiment, Beaufort House, Walham-green. After the dinner (at which were present 110 members of the company) Ensign Morse, in the absence of Lieut. Gaskoin, addressed Captain Charles F. Hawker, the officer commanding the company, in a pithy speech and, on behalf of all the members of the company, presented him with a piece of plate, bearing the following inscription:—"Presented to Captain Charles F. Hawker, by the officers, non-commissioned officers, privates, and honorary members of No. 16 Company, 2nd (South) Middlesex Volunteer Rifle Corps, as a token of their esteem and affection.—27th of November, 1863."

THE RAPPAHANNOCK IN CALAIS HARBOUR.

We stated in our Number for the 5th inst. that the Rappahannock, a screw-steamer bearing the Confederate flag, had put into Calais Harbour; and, on account of the interest attaching to the war-vessel, we give an Engraving of her lying at Calais pier on page 616 of our present Impression. There are some curious circumstances connected with the Rappahannock, alias the Scylla, of London, alias her Majesty's steam-sloop Victor. The Admiralty, a short time ago, disposed of her Majesty's screw gun-vessel Victor, and, on being sold, she was permitted to undergo some repairs under the superintendence of the dock-yard officials. It was stated that she was intended for the China trade, and she was ostensibly fitted with that view, while her name was changed to the Scylla, of London. Several suspicious circumstances, however, occurred, and the dock-yard officials made a report to the Admiralty. The result was the receipt of an order at Sheerness directing her to be stopped. The order, however, arrived a few hours too late. Those in charge of the vessel evidently suspected the intentions of the Government, and had her taken out of the harbour. She immediately afterwards hoisted the Confederate flag, and she now sails under the name of the Rappahannock. On leaving the Nore, the Rappahannock sailed direct for Calais Harbour, which she entered as a Confederate privateer. The Customs' authorities at Calais, in answer to a question, have received instructions from Paris to allow the Rappahannock to leave whenever her captain pleases. It is said that the Admiralty have also sold the Amphion, Cyclops, and Phœnix to "private purchasers." About the middle of October instructions were received at Chatham, directing that in all cases in which vessels of war were sold out of the service "the greatest care should be taken in removing all the gun fittings and returning them to the War Department. The Victor, Cyclops, and Phœnix were, no doubt, stripped of their gun fittings, but these could be replaced without much difficulty.

TESTIMONIAL PRESENTED BY THE WAR-OFFICE COMPANY OF THE 2ND (SOUTH) MIDDLESEX VOLUNTEERS TO C. HAWKER, ESQ., THEIR CAPTAIN.

THE MASTER OF ARAN GARTH.

BY THE AUTHOR OF "ABEL DRAKE'S WIFE."

THERE is a stillness over Aran Garth this Christmas Eve; such a stillness in the air, and such a light in the sky as these may have been that night when the shepherds of the East kept watch over their flocks. The moon shines over the house; stars glitter through the avenue-trees; and the deer graze among the twisted oak-tree shadows with their breath visible in the frosty air. The oaks and elms and limes in the little wood are all struck dumb by frost, and have left an unnatural silence through the place. A little while leveret is at play with the shadows on the path; and the fact of her playing there so fearlessly, and the great stillness together, cause one to turn in wonder to the gabled house to see if there are any signs of human life within, or if those stone lions on the steps, and those stone figures on the roof-tree may have got if Aran Garth to themselves to rule over in their grim frozen silence for ever.

Yes, the chimneys smoke; there is light in several windows—a very bright light from the large one overlooking the court. They were merry in that room awhile since. A deep, gruff, but musical laugh incessantly made the windows shake in their frames; and the large shadow of a head covered with crisp curls kept passing across the blind.

But all is quiet in that room now, and the shadow comes up on the blind no more, nor comes it across any other of the lighted windows.

Here, all the wide, arched, two dark windows, and the moonlight pours through them into the most desolate room in the house. It is called she "Hunter's Room," because the old masters of Aran Garth used to come here when they returned from the hunt, and sit and smile in muddy boots, and pet their favourite hounds, and drink till their unsteady hands let the wine-jugs fall to the floor, which is still covered with dark stains, and, by-the-by, fault marks, of old wine.

What have we to do with this room to-night? The chimney-place is fireless; the heavy bolt is drawn across the door; there is nothing here, surely, to catch the eye in the walls and the floor and the roof.

Nay, look again a little lower, almost under the window. Who is it sits in the grim oak chair, with hands clenched and body bent? It is the master of Aran Garth; the same whose shadow we saw on the blind whose laugh made the house ring a few minutes since. His hands are clenched, and he is looking down at the stained floor, and the moonlight falls about him, showing threads of silver in the crisp curls.

It is a head that looks little accustomed to bow down as it is now bowed. In the square brows, and fair Saxon features there is a strength of will that is almost kingly.

What mystery have we broken in upon, looking with the moonlight through the two dark windows?

How come the Stephen Shore to be sitting bowed down in the darkness, and the bolt of the door drawn? How comes he to be here and thus to-night of all nights, when every one thinks he must be rejoicing, for to-morrow his son comes home, the son he has not seen for years.

But see, he lifts his head at last, lays his palms on his knees, and raises himself slowly upright in the chair. He has gone through some trial during those minutes he has sat there, for his stony, blue eyes stare round the room as though he scarcely remembers having entered it. Presently, with a heavy sigh, he leans forward and brings on a nail and shining in the moonlight; and, as a man just awakened from heavy sleep will try to sharpen his senses by an effort to remember, he looks hard at the thing his eyes first rest upon—a nail, they open, so Sir Stephen seems to feel that it is only by recollecting what that bright thing on the wall is that he can find his way out of the painful stupor into which he has fallen.

After looking at it for some time, with those large vacant eyes, with a sort of unconscious curiosity, he strides across the room, reaches it from the nail, and, returning to his chair, sits down with it in his hands.

He turns it over and over in the moonlight in a mechanical, listless way, looking at its bent handle and broken rim, and the armorial carvings dented and chipped. Now he holds it quite still; his attention is attracted by some small old letters; it is the motto of his house—"A deadly enemy, but never a traitor."

A dark flush slowly rises in Sir Stephen's cheek as he reads; his eye fills with anguish, and he laughs—a bitter, harsh laugh.

"Thou'rt wrong, old mug," he says aloud, flinging it from him; "get thee to the dust, and tell them there is a traitor in the line at last—a traitor to his own sire!"

And once more the large head bows low and the strong limbs tremble.

When he lifts his face again it is changed; it is no longer bitter, but has an expression of passionate self-questioning on it as if some small voice in his heart pleads against the charge he laid to himself.

He looks back on his past life for evidence against himself.

Ay, look far back, Sir Stephen; look back some eight-and-twenty years, and see yourself, in your early youth again, dreaming of love under the blossoming chestnut trees of Aran. A fair face was in Aran Garth in those days, but never the face of his dreams. No actual image of an ideal bride haunted him; but he seemed to hear her voice in the early spring mornings calling to him from under the birds as he awoke. She breathed on him with the March primroses, and glowed near him in the morning skies. In the storms of April he seemed to see her angry struggling as the shaken trees, the moaning water, and dishevelled flowers, as though she yearned for a human form in which to come to him. Through long June nights, as he lay upon the grass awake, he seemed to hear her footsteps in the silent paths, and to feel ethereal hands reaching to him, and fanning him with green boughs, and shaking perfumed dew from the flowers upon his face. She sighed upon him with the rest and the heat of the nights, and, though he was single he felt eyes gazing down on him with the throbbing stars, tender and serene, and full of steadfast love.

He grew heart-sick of looking into every face and finding her not; and sometimes he looked back upon the hours he had wasted in dreaming of her in shame and sadness; and, pacing the solitary avenues by night, he would determine to put away from him this vague ideal, and take some good woman for his wife, and cease from dreams. And at such times, as he strode along the old walk, with the trees creaking and murmuring over his head, he seemed to hear a voice pleading with him and saying,

"With thou cast me off because I am a spirit, and cannot yet come to thee in human form? Fear not for time. I will surely come; and, though thy hair be grey before my coming, my beauty shall renew thy youth."

Pacing the Hunter's Room, Sir Stephen looks back upon that time, and then there seems to come a mist in which he sees himself bringing home to Aran Garth a beautiful woman, with a queenly step and cold, proud eyes; and it hardly seems two years after the marriage that he kisses those cold, proud eyes for the last time, and is left in Aran Garth alone with his sister and his infant son.

Again all is mist. What does he see now? His son grown up and going away from him to India. A little ward of his then comes to live with them at Aran Garth. He remembers the first evening she came, laying his hand upon her curls, and saying to his sister, half in jest, "Elizabeth, she shall be Hector's wife."

And when, year after year, he watched her nature unfolding purely and radiantly, like the white leaves of a lily showing glimpses of rich gold within, he had still said, but with a deeper meaning, "She shall be Hector's wife."

It became the chief delight of his life to write of her to Hector, repeating her sweet, girlish sayings, and picturing her beauty under all its different aspects; and he could but see by Hector's brief, soldierly letters that he must have used some means in doing so; for, brief and soldierly as they were, they showed Sir Hector that she was always in his thoughts, and that his heart often yearned, through the idleness and ease of his military life, towards the bride they were cherishing for him at home.

All this Sir Stephen thinks of as he stands in the cold December moonlight in the Hunter's Room; and all this while his stern, questioning eyes see no evidence that proves his charge against himself to be just.

But now! Ay, bend the proud head lower, and look back once again. Hector's ship is on the sea; he will soon be here to claim the bride they have chosen for him and taught him to love. Sir Stephen begins to say to his sister at night,

"Elizabeth, I shall miss the child sorely. She has made it all May Day in the house." Then Miss Blore reminds him that Hector and she will stay at Aran Garth when they are married just the same; but Sir Stephen shakes his head forward with an impatient warning her society with Hector, and he is startled and grieved to discover it. Fearful lest she herself should guess such a thought was in his heart, he kept quite still for a short time, and saw her at work in the hall by her guardian a little, or if she means to cast him off altogether when Hector comes? But the first time he makes this just a pair of eyes that lifted to his, and he with a look that plunges him into still deeper trouble. They rested on his face not more than a second, but he cannot forget them; they haunt him everywhere—blue, humid eyes, full of tears and love.

Then come nights of wild unrest—of dreams in which he sees a ship bounding to harbour; and he, tossing in the waves, pushes it back with beating hands; and the prow rises on, pressing against his heart till the sea foam is stained with his blood; and then he hears helm stands Hector, smiling and looking landwards towards his love.

And now—now it is the night before Hector's return, and Sir Stephen has come into the Hunter's Room to wrestle with his own heart.

First, he bids himself look steadfastly at his life—his life as it will be when Hector is no longer anything in common with it. So he folds his arms, and stands erect, and looks.

What! Begin the day without having touched her hand or met her smile? Eh, hour after hour in some room or other and never hear her step upon the stairs? Never again have those eyes lifted to his either in childish mockery or tender, wowsaly reverence? Never more catch the sweet thoughts flit over her face like cloud-shadows in a lake?

He stands before the window and looks out—far, far out on his future, no one will be in it. The winter evenings will come and bring nothing but dead men's bones, and his eyes grow dull and wild; a trembling seizes his whole frame, and he falls down with his head on the oak chair, and, with a loud cry on his lips—a hoarse, passionate cry, full of tenderness and sharp pain—

"Geneyra! Geneyra!"

As a martyr, to test his power of endurance, puts his hand into the fire that is to consume his whole body, so Sir Stephen laid out his heart to live a moment in his dark and desolate future, then snatched it back in shuddering agony, blistered and bleeding, but with a fierce joy at finding he can snatch it back—that there is yet a little space to live before the actual torture comes, a little space in which to call her sweet image before him once more and to sob his heart's farewell to her.

"Geneyra! Oh, my golden-haired! Oh, my life's sole love! My little May flower with the bashful head, who will cherish thee like me? Who but I my love? my sweet-children!"

While the head-oak chair could under the weight of his form, suddenly there comes a look of awe over his face, then a paleness, and his eyes are turned with a listening look towards the door. He hears a footstep and the sweep of a dress. Now shall he be reticent—silent but very near, he feels; and his heart throbs with such a dull hard beat that he thinks the listener without must hear it.

A tap at the door—so gentle and timorous—he could hear it.

He has risen to his feet, and stands leaning on the chair-back, looking at the door with wild eyes, like some grand but savage animal at bay.

Is it she? Has God, who alone knows the state of his heart, permitted her to come to him now? Now, in this bitter hour, when all the wild passions of his nature are let loose, and the battle that he came to fight unwon? Has one of her angels come down into the tide and bring him certain ruin. One word spoken by him in her presence would betray to her his love—his fierce, passionate love—for the woman who he had consecrated from childhood to his son.

She knocks again, and he bends over the chair back, looking towards the door, irresolute. What shall he do?

Oh, pitiful God! Shall he repulse from the door or bruise a butterfly's wing, how can it be so cruel now? Go away, GENEVRA! Go away, and hide your golden hair, that the fight may be fought fairly for the right hand he made honourable that is to give you to your bridegroom to-morrow!

But she taps again, and louder than before. He steadies his voice, and calls out hoarsely,

"Well! Who is there?"

"Sir Stephen, it is I. May I speak to you a minute, if you please?"

The sweet, timorous voice goes to his heart like music, but at the same time makes him fearful of himself, fearful that in a minute he will be groping to that door, and speaking uncontrolled words to her that will fill her soul with terror and grief.

Oh, if he could only make her go away suspecting nothing! If he could only speak to her in his natural voice! He tries:—

"Elizabeth, ladykin, it is you? Take your troubles to Elizabeth, my child; I am busy."

The words cost him more effort than any words he had ever spoken. Surely he will be repaid for them, and she will go away and sob her wounded pride to rest. No, there is the timid, pleading, voice again,—

"Oh, please let me come in. I have been waiting for you to come up stairs so long. I cannot go to bed; I cannot talk to Elizabeth. Do, pray, pray, let me speak to you."

Sir Stephen went to the door and set his broad palm against it. Somehow it seemed to him as if that wild yearning within him must draw it open, spite of bolt or bar. So he set his broad palm against it with all the strength of his body, and, with his other hand on his hip, he looked down on the floor and felt that those two fierce combatants in his heart, passion and honour, had got each other by the throat, and that before he took his hand from that door one must be conqueror.

What he did that moment—whether he invoked some Divine power to him to aid, or whether he thought of the helpless babe left in his arms when the coffin lid was closed over his wife's cold, proud eyes—he never remembered; but a great lull came over him, and when she called again—

"Sir Stephen, speak to me—you are not ill?" he took his hand from the door, drew back the bolt, and stood before her erect, calm, with a smile on his face.

The doors leading down into the beech-court were open, and the hall was flooded with moonlight; she stood in the midst, and you could scarcely tell whether the sweet light about her came from the moon or from her golden hair.

Sir Stephen smiled upon her and took her hand.

"Well, little one, what trouble now?"

"I was afraid you were ill; you have been shut up there so long. I have been walking up and down here and in the garden all the time. Will you come out now?"

Sir Stephen looked beyond her out into the night, and he felt that this newborn strength of his would have more chance of enduring under those calm stars and swaying trees than anywhere else. So he drew the hood of her cloak over her head, leaving only a pale gold rim visible upon her brow, and took her arm through his, and they passed out into the still, moonlit night.

"And what is it you wish to say to me, GENEVRA, my child?" he asks again.

Three times they pace the length of the court before she answers; and now they have come again nearly to the steps, and then Geneyra stops and draws her hand away, and they both stand still, looking at their shadows on the white pebbles. Sir Stephen does not look at the exquisite face set in its gold rim, but he knows that there are tears on it, and that the lips are quivering; and he is obliged to fancy himself standing with his pale shadow, and to wait once again, and then he speaks there is such a sadness in her voice that all the bright, clear night grows misty to him.

"Sir Stephen," she says, "I have asked many things of you since I have been here, but I have never asked anything yet that has given you pain to grant, have I?"

Sir Stephen is silent, and she is a little afraid of his silence, but goes on with a kind of timorous desperation,

"Because—because I am going to ask you something now that I know will pain you much; and I would not ask it, but that if I did not others may suffer as well as me; it is for his—for his—for Hector's sake—that I speak much more than mine."

"Speak, then, Geneyra."

She lifts both her little hands and folds them on his arm.

"I will. I will tell you all that I have longed to tell you so many days past, but I could not bear to pain you. Sir Stephen, I cannot meet Hector as—as you wish me, and you must tell him so."

"Geneyra!"

"Oh, do not speak like that. Tell him I am not worthy of him; tell him while he has been thinking of me as one whom he will try to love for your sake, I have been forgetting him, but worse—have been dreading his coming, because I know I can never—never—never love him!"

The night sight is very misty to him, and he has a vague sense of having lifted up his arm, on which her little hands are folded, and kissed them, and wetted them with tears; but now—now that the mist is passed away—he is standing before her with folded arms, and saying, in a hard, stern voice,

"Geneyra, you grieve me very much. What you wish said to Hector you must say yourself. As for me, I can do nothing—God help me! nothing! Go, child, to Elizabeth, and talk with her."

He stands and watches the drooping, hooded figure across the court and into the house; and when it has quite gone he no longer remembers that the moon and stars; but, descending the steps, puts out groping hands before him as if he were in pitch darkness. He goes on through avenue and wood till a space of sward opens before him crossed by a stream, and there he casts himself down, weary and sick—no longer trembling with stormy passions, but stricken with grief for Hector; and accusing himself not only of the treachery of loving her, but of the double treachery of having—no matter how unwittingly—won her priceless love away from him.

And so, all night, his heart crushed down with shame and anguish, he stayed out in the frosty air—now pacing the avenues, and now stretched upon the dead leaves or the grass. The moon had waned, and there was only one star left twinkling in the grey dawn, when something warm came and touched his stiff, cold fingers as he sat on the root of a tree. It was the lodgekeeper's dog; and in another minute the old man came up himself with a letter, which he gave Sir Stephen, and then passed on without a word to his master, and whistling away his dog.

Sir Stephen rose and leant against the tree trunk, sick at heart with a vague presentiment of some great calamity impending.

What does this letter mean, given to him at such an hour in the morning? It is Hector's handwriting.

He breaks it open with stiff, trembling fingers, and the light of the grey morning is just sufficient for him to read it by. This is Hector's letter:—

"My dear Father,—At twelve o'clock at night, in Jasper's lodge, I am sitting down to write to you. My letter must be brief, for I am off before five in the morning. A sharp thing here before starting from India I had resolved to be at Aran Garth a day or so before you expected me. Perhaps you can guess why? I wished to see *her*. As yet I had only seen her through your eyes, and, before we met I wished to see if she would be the same seen with my own. This evening I was by the wall when she came to walk in the court. Several times she disappeared into the house and returned again. Once, when I was watching for her shadow coming before her on the white ground by the steps, two shadows came, and then I knew by instinct all that was to follow. That one image which has been before me so long has lost nothing by the experience of to-night let the fact that I banish myself from home for a few years show you. I shall say no more, except that I conjure you not to mar your happiness in Geneyra's love by thoughts of me. I have only been dreaming a romantic dream of love, the effect of which a few years of active life will knock out of me. Remember me to Geneyra, and thank her for the brave entreaties which has opened my eyes to-night, and saved us all three on unspeakable wretchedness.

"HECTOR BLORE."

Sir Stephen stands leaning against the tree, with the letter in his hand, the small birds hop and twitter in the boughs over his head,

and the sweet dawn breaks about him, and soon two great drops roll rattling down upon the paper.

In another minute he is going towards the house.

"Elizabeth!" He does not wait to be answered, but pushes the door of his sister-room open. She is dressed, and kneeling at her prayers. Sir Stephen raises her with his arm and kisses her tenderly.

"Elizabeth," he says, giving her the letter, "read this, then take it to Genevra, and, if she is sleeping, lay it on her pillow."

She is sleeping, and Elizabeth lays the letter on her bosom and leaves her, and the morning dawns and brightens slowly at her window.

Sir Stephen sits in the quaint, old library, watching the sunshine creeping over the lawn. How slowly it comes! When will it touch Genevra's eyes and make them waken?

Hark!—a step—the door opens and closes softly.

Sir Stephen does not look up. He feels she is standing there—his spirit-love that he dreamed of under the blossoming chestnuts long ago; standing before him in the freshness of her youth and the glory of her golden hair. But he bows his head; she is so fair, so radiant, can she have love for him? She sees the sad doubt in his eyes, and smiles and kneels before him—

"My guardian, my dear guardian!"

Still his head is bent and his eyes despairing.

She lays her little hands on each shoulder, and looks into his face, sad smiles, and weeps:—

"My love! Stephen!"

"Oh, Genevra, Genevra!"

By this time the hazy sunshine has crept into the window, and it finds upon Sir Stephen's breast a rippling stream of gold that would make even July's sunbeams pale.

UNDER THE MISTLETOE;

A STORY OF TWO CHRISTMAS DAYS AND TWO KISSES.

BY THE AUTHOR OF "A DAUGHTER OF EVE."

I AM an old aunt, so old am I that, looking back, life seems so very long; and yet so short, that I do not quite know whether many things did not happen in a dream. I am hale and hearty, and merry, for the matter of that; and when I laugh my laugh rings out clearly and loud, they say; as much so that it makes the people around me, especially my grandchildren and nephews and nieces, laugh too. And when I laugh the old times come back when others, who are silent now, laughed with me, and the room is suddenly still, and the laugh dies away; and when I think of it its empty echoes fill my brain just as if it were sleep-laughter in a dream.

When I sing anything so suddenly—for the merriment and enjoyment, and, for the matter of that, the grief and pain of old men, are short and sudden, like those of children—my grandchildren, and nephews and nieces, have a great difficulty to stop too; and they choke, and nudge each other, and say, "Ah! that is a good story, Uncle; almost as good as the story you told yesterday."

Told yesterday; let me see what it was that I told yesterday? How long ago it seems; it must be longer ago than the time when I was only twenty years old, a stalwart, brave fellow in yellow breeches, black leggings, a heavy brass-bound leather helmet with a white plume tipped with red, and a clashing sword, which I now could not lift with my hands. I was a loyal volunteer then, prepared to resist the French; and I and some of my company were encamped a little north on the coast of Kent; and we had a song, too, a good song, about Bonny:—

We'll still make 'em run, and still make 'em sweat,
In spite of old Bonny and Brussels Gazette.

But I don't quite remember what that gentleman had to do with the inspiration of the *Gazette*. I don't know that I ever knew, for we young fellows were no politicians.

Then we had another song in our tents, or in our rooms, sitting round the fire, and shouting enough to blow the roof off:—

We'll rant and we'll roar like true British sailors,
We'll rant and we'll roar across the salt seas,
Until we catch sight of the shores of old England,
And I hope, my own true love, to see you again.

And in those days our voices did rant and roar, and the rafters rung again; but I've got a cold now, and my voice isn't what it was; and I must not make the little children, or the old ones either, now.

Yes; people think me very merry. And so, bless Heaven! I am; for I try to stand upright, four-square to the world, as a man should; but, being an old man, I have blank places in my heart now, where no love-light burns spots in my memory, and chill and numbed parts in my feelings wherein I cannot look back; and whereon I dare not tread and touch lest sudden pain should come back, like to the shooting pain of old wounds.

But I've merry recollections and green spots, too. Just as you see in churchyards where there are barren patches under the yewtrees, as there are elsewhere fertile ones, which slender hands love to deck; and little tombs, which, in the summer and the spring, are gay with flowers. Such pleasant graves are they, where some one lies with kindly remembrance about them—good children, sweet sisters, or dear wives—who lived in peace and died happily, and upon whose memory a halo rests like fleeting sunshine in a distant field. Such graves are pleasant, not for the old's sake, but for the young's—cool and happy go and sit the summer afternoon near to the grave, and plant sweet-smelling flowers in the mould, which blossom and spring up, and look gay still, like the calm memory of the happy dead.

But, stop, you! I am talking now like an old man, a very old man, as I think I am; but then I've got such spots in my dry brain yet, and pleasant ones to dwell on.

Been in love? Yes. I should think I have; how else could I have grandchildren, those people who laugh so well and heartily when I laugh, and make me tell how old I am a score of times, and say how well I am looking? Well, well; some of them want me to look ill, I think; but I'll laugh and live to spite 'em. No, no; I don't mean that, you know. How can I live but as long as I have breath? and breath and age are in the hands of One greater than us all?

Been in love! I think I was talking of that, was I not? Yes, been in love! Well, we just did love when I was a young fellow, and I recollect my wife, my Alice, that left me but now it seems, and yet it's twenty years ago; and I recollect her, as I loved her, when she was very young, and as I love her now. She was a merry one, was Alice; we used to walk, and laugh, and talk together like two friends. I think that she could do anything but drink and smoke, or tell an untruth, or do a wrong action. Her face was a sweet oval face, her hair a very dark brown, nearly black; and her eyes a deep blue, full of merriment at one moment, ay, at all moments, except when she heard a sad story or was touched with pain for any one else, and then they grew deeper and deeper as they filled with tears. Not for herself. She never cried for herself that I know of, for she never had a day's illness. But she was terribly cut up when her poor brother died, and that you see was how I knew her. Her brother was my right hand man in my company. Many's the time that he stood shoulder to shoulder with me, good at drill, good at a song—good at anything. He used to live near the coast; and, indeed, he joined us, and I was one of his tent-fellows, and his chum. Well, he knew people that I knew, and we were soon friends; and he took me home to show me Alice. He was always talking about her, and she about him; and, when he was there, scarce a look did she give me. My brother Joe—his name was Joe, and mine, too—could do everything, and was the be-all and end-all of the world, I used to think; and so one day I tried to run with Joe, and he beat me, and Alice laughed; and then I shot against Joe, and he beat me too, and she laughed the more; and I wrestled with him and threw him, and she didn't laugh then, but ran to see whether he was hurt, and said it wasn't fair for Joe to tackle a big fellow like me, although he was nigh an inch taller. In short, I could not please her any how!

Well, it was one day when we heard that the flat-bottomed boats of old Bonny were not coming over, and that the Army of Boulogne had melted bit by bit away, like a snowdrift, that we made a night of it. Ay, it was a night too! and, being hot and in the summer, we made sweet cups of the fun till the sun came up over the seacoast looking red and angry at our folly. Well, Joe and I—the two Joes, as they called us—ran down to the beach and washed our hot faces, and plunged in the fresh, salt waves, and were in a few moments as fresh and as merry as larks. And, after dressing, Joe must needs take a walk with me—who was nothing loth, you must know—along the edge of the cliff. The sea for centuries have been washing that chalk-bound coast, and at intervals there stand up pillars of chalk, with the sea around them, and with little green patches of land, a few yards square, on the top of them. The people call such a place "No Man's Land," and no man can own it, truly. Well, Joe came to one of these, a few feet—say twelve—from the cliff, and, turning to me, he said, "Joe Junior," said he—I think I see his bright face now—"I challenge you to leap up on that 'No Man's Land,' I do!"

"Joe," said I, hurriedly, "don't be a fool! It may be it would give way at top, and if it did not how could you jump back without a run? You'd be stuck a-top there, like a mad sentinel or a pillar saint. I'm not going to jump it."

"But I am!" said he. And, before I could hinder him, if indeed I had tried, he took a run and jumped.

It was so sudden that I could only stand aghast when I saw him there. He stood, indeed, but for a moment, and then he took a step back, and then he gave a low jump back, when I heard a rumbling sound, and half the top of the "No Man's Land" parted, and the chalk and earth, and Joe too, fell down with a crash upon the rocky coast below.

I ran round the little creek to the other side of the small bay and, throwing myself down on the turf, stretched my neck over, looked out, and cried out "Joe! Are you hurt, Joe?"

A faint voice came up, and I could see the poor fellow struggling under a huge piece of the chalk which seemed to hold him down in agony. He smiled in a ghastly way, with his whitened face, and said, "Run, Joe, run! *The tide's coming in!*"

Well, I did run; and we got round into the tents, and a few strong fellows held these as I swung over the cliff, just reaching poor Joe as the cold sea water was lap, lap, lapping up to his mouth, taking away his breath and then running back, crawling over him and leaving bubbles of salt foam, as if in sport. I got him out, but he could not stand. Some bones were broken, and he was sadly bruised; so that I was forced to tie him to a rope, and they hauled him up, and somewhere pulled me up, and we took him home.

Well, well! to make a long story short, Poor Joe died, with my praises on his lips, and poor Alice bowed her head like a broken lily. It was a long illness; and she got cold, and summer faded away into winter, and winter to summer, to autumn, and to winter again. The threatened invasion was all over; our swords were getting rusty, our uniforms dusty, and when the holidays came I left the line to which I had just become a partner, and went to spend a fortnight at my old friend's in Kent.

Alice was there, well and cheerful now, and reconciled to her loss, though we often talked of poor Joe; and as the days wore on we grew closer together, and she called me by my name, and seemed to have transferred her brother's love to me. She never told me so nor let others see it till one merry Christmas night, when she rejected all her cousins and her other friends, and would only dance with me.

We had the mistletoe, too. At last, one madcap fellow proposed that the kissing should be the gentlemen's reward for every dance they could; and Alice and I, who had subsided into solemn talk, and were speaking of poor Joe, were surrounded, and it was insisted that Alice should pay her toll; and she, in a merry mood, smiling sadly and yet sweetly too, took me beneath the Christmas bough and kissed me on my lips.

Ay, it's a good many years ago, but I feel it now. My heart beat so fast that I hardly dared return it; but I put my arm around her and took her gently to the bay window of the old hall, saying, as I pressed her hand, "Alice, dear Alice, did you mean that kiss?"

Well, I will not tell you what she said; fifty years ago—fifty years ago! and I am surrounded by Alice's dear grandchildren; and there is one, a little thing with light and golden hair that will deepen into brown, with large blue faces and eyes that will hold many stories, her sorrows, and her joys; so quick, so sudden, so hurried in their coming and their going that they are like my own, and, as we talk, we grow more confidential and companionable. Alice was to me.

Bless you, she understands it all! She is a woman in her pretty ways; her poutings, pettings, and quarrelings. She 'manages her household of one wax doll and two wooden ones, and tells me, for the wax doll is the favourite, and the wooden ones are only used for cups and stuff gowns, when they are impudent and do no work, and when they gossip with a wooden policeman, who belongs to her brother, Alice's son.

So we are fast friends, little Alice and I; and to-night, on Christmas night, I noticed that she would not dance nor play with the pink and shiny-faced little boys who were so unnaturally tidy and clean in their new knickerbockers with red stockings; but she came and sat by me and talked softly in the firelight as Alice did, and made me think of fifty years ago. And only think how old times come back and how we talk like the old; only just think that when her mother told her she should choose a sweetheart, she got a little bit of mistletoe, and climbing silly on my knee, holding me in talk as if to hide her purpose—though I guessed it soon, I'll tell you—she put her little doll-like arms around my neck, and holding the mistletoe above my head she kissed me again and again, and said I was her sweetheart!

So this child sweetheart brought the old times back—the old times that are still so distant and so near; and with sweet kisses beath the rustling leaves made me think of my dead Alice in the grave. The first kiss and the last; the last and first, and of all days in the world on Christmas Day.

LILY'S BALL

BY D'ARCY THOMPSON

LILY gave a party,
And her little playmates all,
Gaily dress'd, came in their best
To dance at Lily's ball.

Little Quaker Primrose
Sat and never stirr'd,
And, except in whispers,
Never spoke a word.

Tulip fine and Dahlia
Shone in silk and satin;
Learned old Convolvulus
Was tiresome with his Latin.

Snowdrop nearly fainted,
Because the room was hot,
And went away, before the rest,
With sweet Forget-me-not.

Pansy danced with Daffodil,
Rose with Violet;
Silly Daisy fell in love
With pretty Mignonnette.

But, when they danced the country-dance,
One could scarcely tell
Which of these two danced it best—
Cowslip or Heather-bell.

Between the dances, when they all
Were seated in their places,
I thought I'd narrow watch before
So many pretty faces.

But of all the pretty maidens
I saw at Lily's ball,
Darling Lily was to me
The sweetest of them all.

And when the dance was over,
They went down stairs to sup,
And each had a taste of honey-cake,
With dew in a buttercup.

And all were dress'd to go away
Before the set of sun;
And Lily said "Good-by!" and gave
A kiss to every one.

And before the moon, or a single star,
Was shining overhead,
Lily and all her little friends
Were fast asleep in bed.

RIDDLES.

1. What you'd say, were you earnestly praying a King
Or other great person to give you a thing.
And that person kept closest to state alone, with none
Two heroes whom England is happy to claim.

2. What 's as good as a mile, what no honest tradesman does, and what your father is, make the name of somebody who could easily make you cry.

FOR THE LATIN CLASS.

Given; two sighs and a lie, to spell Trinacria.

FOR THE SPELLING CLASS.

1. Spell Prestidigitator with seven letters.
2. If the alphabet lost its leader, where should it go to get another?

PUZZLE.

"Edward," said his wife, "I am weary of the Noise of those bells, and though the place I propose is not much visited by the Fashionable World, let us go down for a quiet afternoon, and you can fish." I have told you where they went: tell me.

(*The Answers to the Riddles and the Puzzle will be given next Week.*)

PRIZE ANIMALS AT THE SMITHFIELD CLUB SHOW.

ENGLISHMEN do not easily give up old associations. An established race is called "The Gold Cup:" long after it has become a mere affair of specie; and although cups have for two years past supplanted those highest tokens of victory in some of the departments, the gold-medal ox or sheep and the gold-medal cow or heifer are spoken of as familiarly as ever. We this year give Portraits of both of them. Mr. Charles Swainland's heifer "Oakbud" is a roan of three years and eleven months, and was bred by Lady Lubbock, of High Elms, near Farnborough, Kent. She came with a high reputation from Birmingham, where she won £40, the gold medal as the best cow or heifer in all the classes, and the Heath Ironkeepers' Plate. At Smithfield she was again first in her class, and was adjudged the silver cup as the best of all the cows and heifers; but, despite her many good points, she is not to be compared in style with some of her shorthorn predecessors. Mr. Heath, who is most distinguished Englishman in his tastes, and took a first and two seconds in the Devon and Scotch poll classes, won the silver cup for the best ox or steer with a Hereford ox, four years old and of splendid size and substance, which was bred by Mr. T. L. Mosley, of Pound Arbour, Shrewsbury. Good as the Herefords were, there was nothing like him, and, in the absence of the Birmingham President's cup ox and Mr. Steward's Darlington cup ox, he virtually walked over.

As an "all round" winner no one surpasses Mr. John Overman, of Burnham Market, and the cross between the Leicester and the Southdown has never had a more peculiar specialty. His sheep won the cup for the best pen in the Shropshire, Oxfordshire, and crossbred classes. They form a very beautiful combination between the two great races which Bakewell and Ellman might be said to found.

The Royal Show Farm, which has been renewing its ancient strength at Bingley Hall with a first and a second, took the gold medal (the only one which has not assumed cup shape) for the best pen of pigs in the yard, with a capital pen of whites, seventeen months and twenty-two days old, which had been bred on the farm and been fed simply on barley-meal and sharps. This is the fourth time that the gold medal has gone to a Royal entry.

1. MR. CHARLES SWAINLAND'S SHORTHORN HEIFER, WINNER OF THE SILVER CUP.

2. MR. WILLIAM HEATH'S HEREFORD OX, WINNER OF THE SILVER CUP.

PRIZE CATTLE AT THE SMITHFIELD CLUB CATTLE SHOW.—SEE PRECEDING PAGE.

1. MAJOR-GENERAL THE HON. A. HOOD'S PIGS, WINNERS OF THE GOLD MEDAL. 2. MR. JOHN OVERMAN'S CROSS-BRED SHEEP, WINNERS OF THE SILVER CUP.

PRIZE PIGS AND SHEEP AT THE SMITHFIELD CLUB CATTLE SHOW.—SEE PAGE 669.

OUR COLOURED SUPPLEMENT.

LITTLE RED RIDING HOOD.

WITH THAT ARTICLE SHAPED IN TWO OR THREE NEW FASHIONS.

DEAR little Red Hood! Hampshire lass!
You ever-welcome comer!
What lucky chance has brought to pass
That you come here—with Summer?

That grass is warm beneath your feet,
Your cheek is warm and rosy;
You've stolen to shelter, from the heat,
And picked yourself a posy.

Pray tell us, Miss, has Mr. Sant
Consulted with Brothers Leighton,
To give a picture which we shan't
Frame with its Christmas date on?

Or come you in that summer guise,
To check us in mid-volley
Of Christmas talk about mince-pies,
Snow, crackling logs, and holly?

And come you, fairy, at our Yule,
To change its wonted moral,
And bid us learn another rule,
And with old teaching quarrel?

While told to hid each heart expand,
Like eight-wived Johnny Bundle's:
To all our cousins give the hand,
And love our ugly uncles.

Come you to stop the festal cup;
Our sentimentals crushing,
By hint that you were eaten up
For being much too gushing?

That meeting, in you lonely wood,
The wicked wolf uncanny,
All came of hurrying off with food
For that old stupid Granny.

And have you learned, in fairy bower,
From wizards wise and gracious,
That you were quite in luck the hour
The wolf was so voracious?

You might have lived to come to grief
Of variegated pattern:
Your father might have turned a thief,
Your mother grown a slattern.

Suppose their rent were left unpaid
To Forest Ranger surly,
And you turned out, poor little maid,
To beg from Hyths to Burley.

And, from her carriage looking down,
Some Marchioness should spy you,
And think you pretty, though so brown,
And from your parents buy you;

And take you to her stately home,
And teach you all her toilet,
And you her lovely hair should comb,
Crisp, wave, plait, curl, and oil it.

Till, growing up in beauty, you
Presumed to have a suitor;
And dared to marry who knows who?
The chaplain, or the tutor?

Suppose my lady's rage and scorn;
Your husband faithless, may be;
And you left all alone, forlorn,
To nurse your little baby.

And then your marrying once again;
And being starved and beaten—
My pretty child, it's very plain
'Tis lucky you were eaten.

No, no; there's not the Christmas ring
About such cynic fiction,
And on my head it ought to bring
The fairies' malediction.

You never came to grief at all,
Nor did your kind relation:
That little dog, so fierce and small,
Upsets the whole narration.

He shows me how to read your tale
As no one else has read it;
And my new version cannot fail
In gaining instant credit.

He saw the wolf go prowling round,
Red fire in each eye-socket,
Then, with a furious bark and bound,
He shot out like a rocket.

His fangs were in the villain's gorge;
Then came a shout and clamour,
And rushed from yonder Forest Forge
Three blacksmiths, each with hammer.

Ha! they strike well, with certain aim
Dead! had he liven a dozen,
(I wish Three Blacksmiths I could name
So smote his Cossack cousin.)

And that brave boy, whose eager blow
Clove the wolf's head asunder,
If he struck something else, you know,
Indeed I should not wonder.

Nor if, years after, in that wood,
A wedding made a racket,
And Bride she wore a riding hood
And Groom a wolfskin jacket.

And grandmamma, who did not die,
But eat the "nice new honey,"
Paid for it, and the "cranberry pie,"
With all her hoards of money.

THAT'S TRUE. Let any pretty Miss
(*Quite* like the Pet before ye)
Blow Mr. Shirley Brooks a kiss
For finding out the story.

*** As one of us has just found out at last the true version of Little Red Riding Hood's story, and endeavoured to render it in suitable rhymes and measure, we have only to add—in the more appropriate medium of plain prose—two or three facts relating to the picture and its chromo-typographic reproduction at this season, which helped to a discovery so important both from a juvenile and antiquarian point of view. The original picture, by Mr. James Sant, A.R.A., was, then, exhibited at the Royal Academy in 1860. This artist has long established a sort of specialty in the estimation of the public by his representations of children; and he is justly considered more than usually happy in these representations when he has been free to follow his own fancy in choice of subject. Of all his pictures of this class, none is more felicitous in composition and expression, more solidly painted, or richer in colour than the "Little Red Riding Hood." Our facsimile of the picture must be left to speak for itself. We would merely remark that our copy is of the largest size we have attempted, and the figure itself, from the nature of the subject, has been necessarily rendered on a larger scale than in any of our preceding chromotypes—this enlargement, of, course, requiring a proportionate increase in depth and force of colouring. The original picture is the property of Charles Prater, Esq.

CHARADES.

I.

I KNEW a young lady—a lady of France—
And victim I fell to her beautiful glance;
But, making my offer, I said, which was true,
"I haven't my First, if that matters to you!"

To which the young lady responded, quite smart,
It does you much credit the truth to impart;
But if such is the case, I must tell you, Monsoo,
That my Second to me it's quite useless to do!"

I burst into tears, and the lady so mild
Said, "There, don't behave like a petulant child.
Take this rose as my Whole," and away the girl flew,
Leaving me *planté là* to bewail and boo-hoo.

II.

My First "the Jew
That Shakspeare drew,"
Objectionable reckoned.
But when that Jew,
Well play'd, 'n on view,
The boxes are my Second.
A negro critic said, with groan,
"Dat Whole, sar, bet am let alone."

III.

My First's a kind of mediæval curse,
Which left most folks no better and no worse.
My Second is a lawyer, whom I'd fee
If enemies brought actions *versus* me.
My Whole is said, to utter hideous screams,
A statement which you'll put mid idle dreams.

IV.

A King sent books unto my First,
When, to her rival, troops he sent.
So folks in wicked satire versed
Said one with ignorance was cursed,
The other one with discontent.
That Learning was void of learning,
While Learning loyalty was spurning.

Full many a meaning hath my Next,
Though meaning nothing now and then:
It may mean that you are vext,
Surprised, or sceptical, perplexed,
Hurt, or have writ Arabian ten.
Its worst place is 'twixt I and you,
As you'll allow when lawyers sue.

My Last is either short or long,
Ruled by the way you're occupied,
The first I'd say, and not be wrong,
If, in a voice as sweet as song,
Talked, next your heart, your promised bride.
The other, if you had to drag
Your old aunt Kate, all mag and knag.

My Whole, the herbalist describes
As full of virtues. It may be.
I'm not aware that any tribes
Would make me risk the chance of blibes
For saying that I liked its tea:
But, then, I hate its cousin pale,
And not much nicer—bitter ale.

V.

When Dido taught, twas held enough
To say, "My First hath said the thing."
Folks blest you, if 'twas right good stuff
Your Second made your cellarer bring.
As for my Whole, 'tis ruling hard—
Harder, I think, than this charade.

VI.

My First's a title out of date,
Like dandy, kiddy, mussoni;
My Second put in frantic state
(Till it was told at home to wait),
The Rider on the Little Pony.
My Whole crossed the mythic foes
Of one more fond of boasts than blows.

VII.

To beard the lion in my First,
And scape without my Second,
May not, I think, among the worst
Of mortal luck be reckoned.
Such luck will scare reward the games
Of those the drum that roll.
And rouse, by seizing what he claims,
The lion in my Whole,

VIII.

Sweetly my First may be heard when, in a boat just off Brighton,
Pleasantly smoking, you lie, regarding the crowded paraders.
Similar gratification, deducting the boat and tobacco,
You may obtain in my Second when Tamberlik sings as the Prophet
A man who is stated to look as if from my Whole just emerging
Has charm for a frivolous girl, but none for a right-minded lady

IX.

When a person's my First, he is said to be sold:
Don't appear in my Second, you'd far better not:
But no better breakfast is offered, I hold,
Than my Whole, nicely butter'd, and pepper'd, and hot.

X.

We'll be my First, ring bells, and hang out flags,
When from our necks my Whole shall cut away
The tax that like my Second hangs and drags,
And makes us grumble every quarter day.

XI.

My First, if my Second be triple, is strong,
My Next 's a conjunction, or cockney for hand,
Two initials most dear to a painter. You're wrong
If you've not got a name very dear to the land.

XII.

You'll say my Second's lost,
And in my First be seen,
If at my Whole, unto your cost,
You bet, while jolly green.

XIII.

Take a knock, and add to it three fourths of a Dane,
In the right place inserting this line's primal letter;
And written before you, you'll see very plain,
Where "Bragg" was "a good dog," but Grant was a better.

XIV.

When the fox for his life is a running my Second,
There has rung in his ears what concludes with my First.
To be able to quote from my Whole is still reckoned
The sign of a scholar in poetry versed.

XV.

If a little fair she-baby
Chanced to lose my First and Next,
Ma would call the nurse a gaby,
And be very justly vexed.

Then you'll hardly fail to see that
If those words united fast,
And a man should choose to be that,
He'd be far behind *my Last*.

If you've often chance of tasting
What's my Whole (a friend's, and free)
And such chances you are wasting,
You've less wise than you should be.

XVI.

Upon the pavement once I saw
My First, and then I fled,
Guarding my eyes, and wishing law
Would save me from such dread.

But law had taken my first in hand,
I heard a lawyer tell,
To use it on a wicked hand
Of rogues, who'd earned it well.

Then home I sped, and straightway heard
That it had got there, too,
Taken my pet canary bird,
Likewise my Irish stew.

This made me tear my hair in rage,
That made me look a Guy;
And I sent out my little page
My next and last to buy.

Then off to Paris did I go,
Though high the waves did roll;
Resolved to visit every show,
Especially my Whole.

But such is life: they told me there
My Whole I could not visit.
Such was the rule, that none should dare
To enter it. What is it?

XVII.

A coin the ancient Romans knew,
And tossed into their actors' laps,
A home, my love, where I and you
Could live in calm contentment—perhaps:
Tell where in June gay fashion reeks
Joy, far from hous, mid modern Greeks.

XVIII.

If our troublesome decimal friends have their way,
My First is a word you'll soon hear every day.
If my Second's about, just take care what you do,
Or the steps you will take may be hurtful to you.
My Whole, if perceived in a house, is a sign
Of a sad lazy wife, and I'm glad she's not mine.

XIX.

As my Second, take that which, of men or of boys,
My First last best be, if they're fond of a fray;
And you'll get a man's name who has made much more noises
(Let us hope to good end) than most men of his day.

XX.

Upon my First the billows breaking,
Afford a wild but pleasant sight,
Their rapid run so swiftly taking,
Then sinking 'neath the sea-line white.

My Second, when the ice you're breaking,
And talking—well, you scarce know how—
What joy to find the loved one taking
In pledge of matrimonial vow!

My Third is good, when fast you're breaking
(Not age-ing, but at breakfast set);
But should a Moslem friend be taking
That meal with you, that dish forget.

My Whole thus into three I'm breaking;
It names an English mansion fair,
We saw a husband lately taking
A sweet young bride as mistress there.

(The Answers to these Charades will be given next Week.)

NEW BOOKS.

OSWEGO

PREPARED CORN, for Puddings, Custards, Blancmanges, &c. Manufactured and Perfected by T. KINGSFORD and SON, of Oswego, State of New York. It is the original preparation from the farina of maize, established 1848, commands the highest price from the trade, and offers the best value to the consumer. It is a quarter stronger than any of the imitations, has a finer grain, and is more delicate. The Oswego has the natural golden tinge, and not the chalk white produced by artificial process. KEEN, ROBINSON, BELLVILLE, and CO., Garlick-hill, London.

KEEN'S GENUINE MUSTARD. There are many qualities of Mustard sold. Obtain Keen's Genuine Mustard and full approval is guaranteed. FIRST MANUFACTURED 1742. Sold by most Grocers from the Cask, and in 1lb. and ½lb. Canisters. KEEN, ROBINSON, BELLVILLE, and CO., London.

LETTERS PATENT 1823. PRIZE MEDAL 1862.

ROBINSON'S PATENT GROATS is the most valuable preparation for making pure and delicate gruel. Modern chemistry has shown that this food is easy of digestion and rich in nutriment. ROBINSON'S PATENT BARLEY makes a delicious custard pudding, directions for which have been given by Mons. C. E. Francatelli. It is appreciated as a non-inflammatory drink, is excellent for mothers nursing, and has long been used with great success for rearing children by hand. KEEN, ROBINSON, BELLVILLE, and CO., London.

STARCH MANUFACTURERS TO H.R.H. THE PRINCESS OF WALES.

GLENFIELD PATENT STARCH, awarded the Prize Medal, 1862. This unrivalled Starch is used in the Royal Laundry, and pronounced by her Majesty's Laundress to be the Finest Starch she ever used. Her Majesty's Lace-dresser declares it to be the best she has tried, and the above award by some of the most eminent scientific men of the age confirms its superiority. WOTHERSPOON and CO., Glasgow and London.

COALS.—COCKERELL'S COALS, price 25s., cash. Central Office, No. 13, Cornhill, E.C.

CURE OF ASTHMATIC COUGH, at the Age of 85, by Dr. LOCOCK'S PULMONIC WAFERS. Aug. 24, 1863.—William Taylor, The Cape, Smethwick, Birmingham, aged 85, says he for many years suffered from a husky, asthmatical cough. To get rest at night was almost out of the question, although he tried many things ; but for the last four years, since he commenced taking the Wafers, he can ensure a good night's rest, &c. Witness, R. Brown, chemist, 55, Spring-hill, Birmingham.—Price 1s. 1½d. and 2s. 9d. per Box, of all Druggists.

ARTIFICIAL TEETH, exquisitely enamelled to nature, detection impossible, purest materials and best work, on Mr. ESKELL'S patented and painless plan of self-adhesion. His Treatise free for seven stamps.—8, Grosvenor-st., Bond-st., W. ; and at 39, Bennetts-hill, Birmingham. Consultations free.

ANOTHER TESTIMONIAL.—CURE OF BRONCHIAL DISORDERS BY DR. LOCOCK'S PULMONIC WAFERS.—From Mr. Edward Thornton, Chemist, M.P.S., Lyme Regis, Nov. 18, 1863 :—"Dr. Locock's Wafers are excellent in Bronchial Disorders, and where there is great irritation." They have a pleasant taste. Price 1s. 1½d. and 2s. 9d. per box. Sold by all Druggists.

ASTHMA SPECIFIC.—DATURA TATULA. By immediate contact with the air-cells and passages, the fumes of this plant afford instantaneous relief. The remedy is adapted for use by all patients. Introduced into this country, and prepared only by SAVORY and MOORE, Chemists to her Majesty and H.R.H. the Prince of Wales, 143, New Bond-street ; 29, Chapel-street, Belgrave-square ; and 1, Lancaster-terrace, Hyde Park London.

DINNEFORD'S FLUID MAGNESIA is an excellent remedy for Acidity of the Stomach, Heartburn, Headache, Gout, and Indigestion, and as a mild aperient for delicate constitutions.—172, New Bond-street, London ; and all Chemists.

TEETH.—OSTEO-EIDON, Messrs. GABRIEL'S SPECIALITE.—The numerous advantages, such as comfort, purity of materials, economy, and freedom from pain, obtainable hereby, are explained in Messrs. Gabriel's "Pamphlet on the Teeth," just published, free by post, or gratis on application.—Messrs. Gabriel, the old-established Dentists, 27, Harley-street, W., and Ludgate-hill (over Benson's, silversmith) ; Liverpool, 134, Duke-street ; and Birmingham, 65, New-street. Diploma, 1815.

ALL afflicted with WEAK EYES may obtain instant relief by using Dr. WARNER'S EYE WATER ; it removes all inflammation arising from cold, dust, or constitutional causes.—Sold in bottles, 2s. 9d., 4s. 6d., by Sanger, Oxford-st. ; Prout, Strand ; Barclay, Farringdon-street ; Hooper, London-bridge.

WANTED, LEFT-OFF CLOTHES, Uniforms, Furniture, Miscellaneous Property, &c. The highest price given. Ladies or gentlemen waited on by addressing to Mr. or Mrs. G. HYAM, 10, Beak-street, Regent-street, W. ; or, Parcels being sent, the utmost value in cash immediately remitted. Established 1820.

BOOSEYS' MINIATURE PIANOFORTE, post-free 17 guineas, is wanted, French polished.—"We have had the pleasure of hearing this Instrument, and can conscientiously recommend it to our readers. It is a perfect miniature Cottage Pianoforte, of degree which has not previously been ever attempted. When heard in a small room it would be mistaken for a piano of the full size, and the most eloquent music with the voice of a full-grown man. It has the full compass of seven octaves, and the touch is perfect, and the tone is sweet; and the 17 guineas is the full instrument sent free to any part of the kingdom. No piano so small a price has ever before been produced."—Vide Musical World, DESCRIPTION and PRICE of the PIANOFORTE.—Boosey and Sons, Holles-street. Boosey and Sons, Holles-street, have the honour to announce that they have made arrangements for the manufacture of the above Pianoforte, and are enabled to produce this instrument at one third of the expense of any similar three-guinea Pianoforte.

An Illustrated Prospectus may be had on application to the Manufacturers, BOOSEY and SONS, Holles-street.

BOOSEYS' BIJOU PIANOFORTE, post-free 21 guineas, in Rosewood, or 27 guineas in Italian Walnut. The Bijou Pianoforte is a highly-finished and elegant case, suitable for any drawing-room. The workmanship is of the very best description, the touch elastic, and the tone of that pure quality that especially distinguishes the Pianofortes of this firm.
Boosey and Sons, Holles-street, London.

CRAMER'S PIANOFORTE GALLERY, 207 and 209, Regent-street (the largest in Europe). The most varied selection of Pianofortes are to be found in this Gallery.
The quality of every instrument may be relied upon as to best actual value, combined with the most elegant and tasteful cases. Pianofortes are taken in exchange, and every possible facility afforded to purchasers, without loss to the buyer, any time within six months. Pianofortes for hire, with option of purchase, on the most liberal and thought-destroying terms.
Pianofortes by every maker of eminence will be found in the Gallery.

CRAMER'S ENGLISH PIANETTE, 22 guineas.—Cramer, Wood, and Co. manufacture this capital small instrument. It has all the best qualities of the full-size Pianoforte, viz., fine tone, agreeable and powerful touch. The case is of polished oak. Its compass is from C to F in alt. Every part of the piano will be found to contain much more material than is usual in an instrument, loose in the top and worn in the bassoon. In rosewood, 25 guineas.—207 and 209, Regent-street.

Purchasers are particularly requested to observe that this instrument has not the nuisance of single action, but the double or check action; and that Cramer, Wood, and Co. are the only manufacturers of it in England.—207 and 209, Regent-street.

CRAMER'S INDIAN PIANOFORTE, for extreme climates. Cramer, Wood, and Co. have devoted much attention to the construction of Pianofortes for India, and have succeeded in producing instruments which will stand the effects of heavings and all other sufficiences necessary to make the climate of India destructive to Pianofortes. Nothing has been left untried by the piano-forte manufacturers of the Continent as well as the Cape has been secured by Cramer, Wood, and Co. Their Indian Pianofortes, in consequence, have been honoured with the highest commendations and their unrivalled quality of tone and touch.—207 and 209, Regent-street.

Cramer, Wood, and Co. deliver these Instruments free, packed and shipped for India, and guarantee them for five years. Price, in Mahogany, 5 feet 10 inches high; 6 feet 4 inches wide; 2 feet 4 inches deep, 50 guineas.

CRAMER'S ARTIST'S CONCERTINA, manufactured under the immediate superintendence of Mr. Wheatstone, F.R.S., and possessing the following qualities:—Great rapidity of articulation, and general perfection of mechanism; these instruments are supplied to the first professors, and are strongly recommended to the notice of amateurs. Price 12 guineas, in mahogany case. Cramer, Wood, and Co., 201, Regent-street.

MESSRS. ADDISON and LUCAS, MANUFACTURING MUSICSELLERS TO THE TRADE, respectfully direct the attention of purchasers to the following instruments:—

FLUTES.—Cylinder Bore, with old system of fingering, 8 keys, 3 rings, and 1 German silver joint, in case, 3 guineas; ditto, with 10 keys, 3 rings, and 2 German silver joints, in case, 4 guineas; Flutes with conical bore and new system, eight German silver keys, 3 rings, and 2 German silver joints, in case, 5 guineas. All examined and proved by Mr. Benjamin Wells, who attends daily at their Warerooms. Flutes exchanged if not approved of within one month. Flutes sent on approval to any part of the United Kingdom.—ADDISON and LUCAS, 210, Regent-street, W.

BRASS-BAND INSTRUMENTS.—Messrs. ADDISON and LUCAS have much pleasure in announcing to amateurs that to furnish the best Regimental Instruments Improved Cornets, with 3 rotary valves, in E flat, A flat, B flat, and C, £6 6s.; Cornets, with 4 rotary valves, in E flat, A flat, B flat, and C, £7 7s.; Bugles, £3 3s.; Saxhorns, £8 8s.; Bass Saxhorns, £9 9s.; Trombones, £8 8s.; Bass Trombones, £9 9s.; Tenor Horns, £4 4s.; Baritones, £5 5s.; Bass Trombones, £6 6s.; Ophicleides, £7 7s.; C Clarinets, £4 4s. Every instrument warranted. Messrs. ADDISON and LUCAS supply complete sets of instruments.—Addison and Lucas, 210, Regent-street, W.

CONCERTINAS.—Forty-eight Keyed, double-action, in case, £18 18s.; 56 keys, £21 10s.; 64 keys, £24 10s.; each instrument tuned to concert pitch. Lists of many thousands Concertina reeds, £10 10s., £15 15s., and £19 19s. each.

ORGAN ACCORDIONS, fingered same as Pianoforte. Twenty-eight keys, double-action, £7 7s.; in case complete. Bands, with pedal, enabling the performer to use both hands, £10 10s.

PORTABLE HARMONIUMS, folding into small compass, for travelling, with two sets of vibrators, four octaves, £17 17s. each. Descriptions when folded.—Lough, 201, Regent-street, corner of Vigo-street.

GUITARS.—The celebrated Panormo Model, in rosewood, £8 8s., to £10 10s. each; ordinary make, £1 1s., £2 2s., and £3 3s.

VIOLINS.—PRIZE MEDAL COPIES of CREMONA, Stradivarius makers, £5 5s. each.

METRONOMES.—MUSICAL TIME INDICATORS.—So made as complete without this indispensable instrument. Prices, 15s., 21s., 25s., and 30s. each.—Lough, 201, Regent-street, corner of Vigo-street. Lough's Metronome is Maelzel Semens's Improved Metronome, working without key, with bell, £1 15s. 6d.; without bell, £1 7s. Foreign Metronomes from £1 1s. each.

MUSICAL BOXES, by NICOLE, of Geneva. Large Tunes, four tunes, 1 guinea; six tunes, 2 guineas; eight tunes, 3 guineas; twelve tunes, 4 guineas. Fourteen tunes, 5 guineas. Twelve tunes, two barrels, 7 guineas; three tunes, 10 guineas; twenty-four tunes, 12 guineas. Lough, 201, Regent-street, corner of Vigo-street.

CRAMER'S PIANOFORTE GALLERY, 207 and 209, Regent-street.
PIANOFORTES by Broadwood, Collard, or Erard, for SALE or HIRE.—At CRAMER'S PIANOFORTE GALLERY, 207 and 209, Regent-street.

SECONDHAND PIANOFORTES.—Cramer, Wood, and Co. have a large assortment of Pianofortes by Broadwood, Collard, and Erard, at greatly-reduced prices.
Cramer, Wood, and Co. have also a large assortment of Pianofortes by other eminent manufacturers, whether or not the instruments have been originally purchased at their establishment, and can recommend without the slightest reserve, all the instruments they sell.
207 and 209, Regent-street.

REPAIRING PIANOFORTES.—Cramer, Wood, and Co. give great attention to the repair of the Pianofortes. The most skilful workmen only are employed, and the best materials are used. Estimates given previously to commencing repairs.

TUNE YOUR PIANOFORTES by the TEAR; 10s., 20s., 25s., according to instrument. CRAMER, WOOD, and Co., 207 and 209, Regent-street, will ENGAGE to TUNE the Musical Public.
207 and 209, Regent-street.

PIANO MECANIQUE.—CRAMER, WOOD, and Co. have a large assortment of these Pianofortes, and can supply them from 10 guineas. If with a keyboard, and can be played by the hand, 15 guineas. Cramer, Wood, and Co. can recommend this instrument in very strongly made, and warranted to stand any change of climate.—207 and 209, Regent-street.

SIX-GUINEA HARMONIUMS.—CRAMER, WOOD, and Co. have in stock a few of these useful instruments. Unlike the ordinary Parlo Instrument, it is put together in a substantial manner. The tone is full and powerful, and not of remarkable power. Polished oak case.—207, Regent-street.

CRAMER, WOOD, and CO.'S GENERAL MUSIC WAREHOUSE.—Every description of music and article to be found in London. Terms cash. Terms free to the trade.
Commencing business premises.
207 and 209, Regent-street.

CRAMER'S ARTIST'S CONCERTINA, manufactured under the immediate superintendence of Mr. Wheatstone, F.R.S., and possessing the following qualities:—Great rapidity of articulation, and general perfection of mechanism; these instruments are supplied to the first professors, and are strongly recommended to the notice of amateurs. Price 12 guineas, in mahogany case.—Cramer, Wood, and Co., 201, Regent-street.

MESSRS. ADDISON and LUCAS, MANUFACTURING MUSICSELLERS TO THE TRADE, respectfully direct the attention of purchasers to the following instruments:—

FLUTES.—Cylinder Bore, with old system of fingering, 8 keys, 3 rings, and 1 German silver joint, in case, 3 guineas; ditto, with 10 keys, 3 rings, and 2 German silver joints, in case, 4 guineas; Flutes with conical bore and new system, eight German silver keys, 3 rings, and 2 German silver joints, in case, 5 guineas. All examined and proved by Mr. Benjamin Wells, who attends daily at their Warerooms. Flutes exchanged if not approved of within one month. Flutes sent on approval to any part of the United Kingdom.—ADDISON and LUCAS, 210, Regent-street, W.

BRASS-BAND INSTRUMENTS.—Messrs. ADDISON and LUCAS have much pleasure in announcing to amateurs that to furnish the best Regimental Instruments Improved Cornets, with 3 rotary valves, in E flat, A flat, B flat, and C, £6 6s.; Cornets, with 4 rotary valves, in E flat, A flat, B flat, and C, £7 7s.; Bugles, £3 3s.; Saxhorns, £8 8s.; Bass Saxhorns, £9 9s.; Trombones, £8 8s.; Bass Trombones, £9 9s.; Tenor Horns, £4 4s.; Baritones, £5 5s.; Bass Trombones, £6 6s.; Ophicleides, £7 7s.; C Clarinets, £4 4s. Every instrument warranted. Messrs. ADDISON and LUCAS supply complete sets of instruments.—Addison and Lucas, 210, Regent-street, W.

CONCERTINAS.—Forty-eight Keyed, double-action, in case, £18 18s.; 56 keys, £21 10s.; 64 keys, £24 10s.; each instrument tuned to concert pitch. Lists of many thousands Concertina reeds, £10 10s., £15 15s., and £19 19s. each.

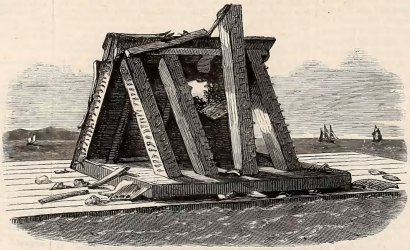
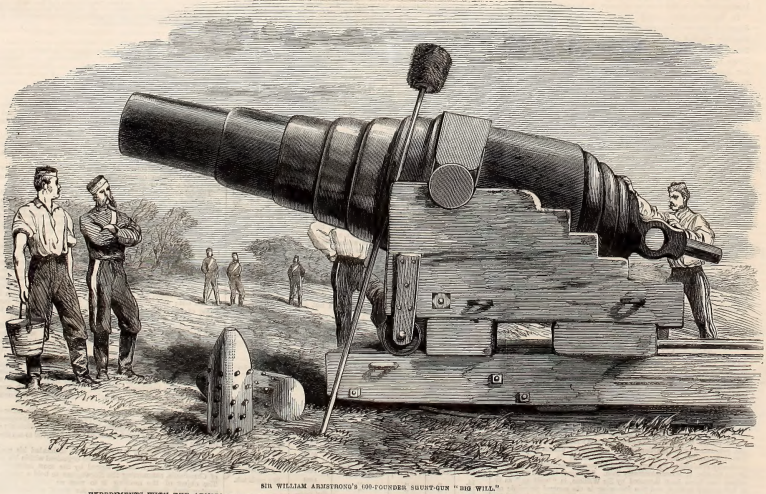
LONDON: Printed and Published at the Office, 198, Strand, in the Parish of St. Mary-le-Strand, in the County of Middlesex, by JOHN CRACKNELL, at the Office aforesaid.—SATURDAY, DECEMBER 19, 1863.



THE ILLUSTRATED LONDON NEWS.

No. 1238.—VOL. XLIII. SATURDAY, DECEMBER 26, 1863. WITH A SUPPLEMENT, FIVEPENCE



THE YEAR 1863.

EACH year of the world defies augury. Each possesses an individuality in reference to events; and for some time past those events have tended to the indefinite postponement of that period of millennial tranquillity which certain philosophical politicians tell us would specially come if we did what they would have us do. The prognostics for the year nearly closed indicated quiet at home and abroad, but the verification of facts shows us the whole world in a state of uneasiness and unsettlement almost unprecedented. Diplomatists have been kept at a constant strain to confine the turbulence of the world within the limits of war in America, war in Mexico, war in Poland, war in China, war in Japan, war on the frontiers of India, war in New Zealand, and war in St. Domingo. At present this list is not exceeded; but what is in expectation may well be judged by the proposition of a Monarch who more than any other holds the issue of peace and war in his hands, to avert, by a timely consultation of the Powers, a general war in Europe. Such are, broadly, the circumstances under which the present year comes to a close.

And what has England been doing during the last twelve months? The advantages of her insular position have been made more than ever manifest, by enabling her, in point of policy, to keep herself just so much severed from the rest of the world as to enable her to lay down as a positive rule that she will be no party to sentimental or ambitious wars; while the almost judicial position she occupies causes her influence to be felt and her power to be respected on all international questions. In the mean time, she has gone on adding to her wealth, extending her commerce, expanding her system of national works, such as railways, and reducing her taxation; and if, at a recent moment, there were apprehensions of a financial crisis, those apprehensions have passed away, and it is confidently believed that the foundations of her strength were never set upon a sounder basis. No doubt she has on her hands a couple of little wars in New Zealand and in the East, and the prospects of hostilities in Japan on a more extended scale than that hitherto adopted are by no means remote; but really this seems to be her normal condition, and when she is to be finally delivered from this trouble it is impossible to predict. In her internal history there has been recorded the marriage of the Heir Apparent to the Throne, occasion being taken of the arrival in London of the

REAR OF THE WARRIOR TARGET AFTER PRACTICE.

SIR WILLIAM ARMSTRONG'S 100-POUNDER SHUNT-GUN "BIG WILL."

EXPERIMENTS WITH THE ARMSTRONG 600-POUNDER AGAINST THE WARRIOR FLOATING TARGET MOORED OFF SHOEBURYNESS.—SEE NEXT PAGE,

bride of the Prince of Wales for a popular demonstration unparalleled in any time or country. The reception of Princess Alexandra was essentially that of the people, and, except that it was somewhat marred by awkward, blundering attempts at pageantry on the part of the Corporation of London, would have been as successful as it was unprecedented. In the course of the year it pleased the Queen to emerge for the first time from the dark solitude of her widowed grief, and to take part in a public ceremony, thus giving an indication of her Majesty's intention once more to assume the outward and visible duties of her great function. On the 1st of January there were doubts and perplexities with regard to the fate of the operatives in Lancashire, and the most sanguine could hardly anticipate that the ensuing twelve months would be got through without catastrophe. Happily, the wisdom and judicious care and forethought of the Government, and the unwearied zeal, tempered and directed by good management, of private charity, there has not only not occurred any special disaster to the working population of the north, but there has actually been a considerable improvement in their condition; and, rightly or wrongly, the opinion is now universal that the fearful crisis which has always been associated in men's minds with a failure of the cotton trade has been completely averted. The vigour, the great resources, and all the special characteristics of England as a body politic have never been more abundantly exemplified, and she looks forward to a new year with the calmness and the confidence which belong to her.

As usual, the necrology of the year is marked by several celebrated names. Amongst those who have passed away—most of them full of years and honours—are the Marquis of Lansdowne and Mr. Edward Ellice, with whose departure the party of Old Whigs has almost ceased to exist as a party. Sir George Cornewall Lewis succumbed to the inevitable doom of mortality, at a time when the country was beginning to look up to him as one of its foremost men and one who ere long would have taken the very highest place in the councils of his Sovereign. An acute lawyer, a subtle politician, a polished orator, and a keen wit, Lord Lyndhurst has fallen beneath the weight of years far beyond those allotted to the life of man. In Sir Cresswell Cresswell the nation lost an able Judge, whose peculiar function it was not very easy to supply. By the death of Sir Benjamin Brodie one of the last links between the older and modern surgery has been severed. The Earl of Elgin has fallen—another sacrifice on the great statesmen and diplomatists to the inhospitable climate of that dependency of the British Crown which, all gorgeous and magnificent without, is tainted within with many an element of destruction, both social and physical. The Bayard of India—Outram—has completed his career; and almost the last of England's Generals who had learnt the art of war during a period when military genius was personified in Napoleon and Wellington takes his sleep in Westminster Abbey; while the name of Colin Campbell Lord Clyde will live for generations to belonging to one of the most remarkable men of his time. Which has lost its ancient Primate, the Archbishop of Canterbury and Primate of All England, has been gathered, in the fulness of years, to his fathers.

In the brief sketch which has been here drawn of the condition of our own country, how singular, and how far-fortunately marked, is the contrast with the state of other nations! There is scarcely one of them, from Russia, with the insurgent Poles holding their own against her, down to Denmark, with her embarrassments in regard to the Schleswig-Holstein question, which has not lived through the year 1863 in trouble and in apprehension. If the Emperor of the French, all-powerful as he is, believed his position, and that of the country over which he rules, to be secure at all points, what need had he to ask for a congress which was to settle at once and for ever the vexx and distrbn Europe? As to the terrible contest which is going on in America, it is painful to be compelled to come to the conclusion that any hope of its early termination is altogether vain and illusive; and that we have to do as regards this matter is to continue as rigidly, or, rather, more rigidly, our system of non-intervention, and to wait and hope. Be it ours, in this happier country of the world, to commence the new year with a desire and a determination to be at peace with all men, and to improve and develop our institutions where they need renovation; to cling to the great principles of civil and religious liberty; to work each in his sphere to aid and elevate in the social scale those who, in the inevitable dispensation of human affairs, are poor and lowly;—and we may rest assured that when, at the corresponding period of next year, we take a retrospect of the previous twelve months, we shall find, not merely that England stands where she was, but that she has advanced in everything that can contribute to her real and substantial glory, her influence, and her prosperity.

THE 600-POUNDER ARMSTRONG GUN.

AMONG the many costly inventions connected with artillery, the latest, and apparently most satisfactory, production is the large rifled cannon designed by Sir William Armstrong, which we recently undergone a severe trial in presence of the Ordnance Select Committee at Shoeburyness. This gun is of sufficient size to throw an elongated projectile averaging 600 lbs., and is intended for the ponderous affair, weighing 22½ tons, and, as will be seen by the illustration on the preceding page, resembles a telescope of enormous dimensions. This appearance arises from the iron being so disposed as to be thickest at the breech, where the maximum strain has to be borne by the gun. As the shot leaves the bore, the gas generated by the ignition of the gunpowder exerts a gradually lessening strain, and the thickness of metal is, therefore, also gradually diminished by steps, as will be seen in the Engraving, until, at the muzzle, it is comparatively thin. The gun, in common with others that have been invented by Sir William, is "built up," as it is technically termed, and the following is the general principle of its manufacture:—A bar of iron about 9 in. or 6 in. thick is heated to a red heat, and one end being fastened on a mandril or thick roller, which is set in motion by machinery, the bar is then wound in a spiral coil round the roller like so much ribbon. It is then knocked off and left to cool. The cylinder thus formed is again heated and welded into a compact hollow tube by powerful steam-hammers. The whole gun is made up by a series of these cylinders or tubes being joined endwise together, or one over the other as required. This is one of the most important parts of the process of gun-making. Every one knows that a mass of twenty-two tons of iron cannot be welded at one forging; but it can be built together in smaller portions; and this ordnance is thus constructed. Several cylinders, being turned to a size, are joined together by welding on to form a tube; this is the heart of the gun, and is hammered towards the breech by a large solid forging, bored out to the exact diameter of the shot, and the breech-piece and muzzle then solid forging, because it is the portion which is first acted on by the explosion of the charge. Over this tube are built several coiled layers of thicknessing cylinders are put on hot, lying by heat expanded so as to slip easily over the tube, which is then cooled, a screw cut of wide shallow pitch through it. These various layers of metal thickening, before they are subjected to this expansion by heat, have each a screw cut of wide shallow pitch through it, to the exactness of a hair's breadth. When placed over the inner ring or cylinder and contracted by being cooled, they compress it with a force which no mechanical power can disturb; in this way strength is given where it is most needed to the gun. The chase, or outer half of these layers or cylinders, and is a triumph of mechanical skill. The breech is closed by a large iron plug, which is retained in its place by a powerful plug in rear of it, as the latter is screwed in. This arrangement seems slightly defective; but there are, no doubt, sufficient reasons for adopting it. The vent, or the arrangement for closing the breech of built-up guns of this description has been carried out in the Royal Arsenal.

The interior of this gun is rifled with ten grooves on the shunt principle, and like the shot is made to correspond to the rows of studs in the gunnetal, which fit into these grooves. Each row contains five studs, as shown in our Engraving; and the studs, being of a lower metal than the gun, will be worn away by the shot. It is 12 ft. in length, and the internal diameter of the bore is 13 3-10ths in. The external diameter at the muzzle is 1 ft. 11 in. At the degrees of elevation—that is, with the muzzle raised so that the bore of the gun forms that angle with the level on which the gun is placed—this gun will be quite piece of ordnance has thrown a shot over upwards of 12 miles. The shell that is to be used in the gun will be seen by the annexed table. Every alternate shot fired strikes on the line caused by the end even the greatest distance on every two fours yards. The bursting charge of a shell, when exploded, instantaneously converts the iron into thousands of splinters, so that four yards deviation is of little moment, and hardly diminishes the destructive effect of the shell. The shell, before it is filled and the gun loaded by means of a small gyn, and the breech is elevated or depressed with the greatest ease by a small hydraulic lever. It is proposed to make these guns in breaches as iron-clads, but there are anticipate great difficulties will arise in carrying out this intention. In a pair of wood even 68-pounder guns require break loose, and as they weigh only 112 cwt. and the 600-pounder weighs 22½ tons, it could be impossible to manage the latter on board ship in the narrow ranges of the latter. Should it be found practicable to carry these heavy guns on board ship, we should have could last as long as the ordinary guns of the 600-lb. steel shot. For fortresses and coast defences where a solid foundation to carry the enormous weight can be secured, and there is no necessity to lower the guns from play, such weapons as this would be invaluable. If placed to command an important position or tideway, the enormous range and destructive missions could be placed to attain an enemy's ships, even for half an hour, within comparatively safe distance of destruction from action.

We have stated that the average weight of the shot is 600 lbs. They are of three kinds: the first, solid, weighing 810 lb.; the second, 600 lb., common shell; and the third, 600 lb., shell for use in the ship (principally designed to be used against troops), a segment-shell, weighing 570 lbs. The latter is composed of cast iron, and, as regards the common shell; inside the case is built up a series of loose pieces of iron, so arranged that the shot will break up into a series of rings from the base of the interior to the top. From this it will be at once seen that the segments, as they are termed, are slightly wedge-shaped, and, when exploded, will fly in all directions. This may blow from the exterior merely wedges the pieces more firmly together, and the additional force thus made is required to splinter the fabrication and scatter the iron fragments in every direction. In the smaller description of shells one segment only is used; but in the 600-pounder shell a second series is built up within the first. There are 316 pieces or segments, each weighing 1 oz.; these are placed one over or shell make by the total weight, 5 lbs. 4 ozs. This fuse is set on the top of the shell, which burns externally for a certain time, according to the length of the fuse, and then communicates with the bursting charge (15 lb.) of gunpowder inside the shell, and shatters it into from 600 to 1000 fragments. These missiles proceed with about the same velocity, after bursting, and fall in a shower among the enemy; for the fuse is generally arranged to burn the shell about two yards short of the object aimed at; and it then has the effect of a volley of musketry from an entire regiment, with the advantage of the gun and its ammunition being at a 600-lb. shell, which is the fourth segment, weighing 6 oz., is in itself a very formidable projectile against troops, and will be found to be truly terrible in its effects when aimed, would be a most deadly and effective missile.

The 600-pounder, Big Will (for it is christened), was fired on the 11th inst. at Shoeburyness, and its powers tested against the floating target engraved on page 648. This target was made of of the best homogeneous iron, the same plate as the ship, thickly furnished with backing of solid teak 18 in. thick, which was again bolted to the target. The whole was strongly framed, and supported in rear by props of thick fir. After an experimental shot with a wooden target, and a 600-lb. shell, which passed through, the iron target was moored at a range of 1020 yards. The first shell, 810 lbs., with 15 lbs. of powder as a bursting charge, struck the target, the gun having 2 deg. 10 min. of elevation. At 3 deg. 3 min. the second shell struck a little to the left of the bull's-eye, and penetrated through the entire thickness of the plate. It is 1 ft. 8 in. in size, and laterally shivering the backing to fragments, as shown in our Engraving on page. The whole effect of the 4-inch iron backing was very torn away, the plate in front above that struck fell and the backing, and the target was driven back so that it was not considered worth while firing at it at the 2000-yards range, as at first intended. The target was surrounded by a mass of iron, which rendered the experiment a severe one, and that no ship afloat could stand the terrific force of these 600-lb. shells. Sir William Armstrong and artillerymen are to be congratulated themselves on the effect this gun has produced; and it is much to be regretted that it was not fired against the plates that are to be used for men-of-war. On forts, any thickness of iron plating can be applied; but this seems to be a question not considered at present by our authorities.

The following table of practice will give an idea of the accuracy of the 600-pounder. With 10 lb. of powder, 1 deg. elevation, the range is much less than with 70 lb., and the weight of the shell first with that charge was 90 lbs. heavier than the solid shot. During the last few shots it was getting dark.

Round.	Charge.	Elevation.	Projectile.	Range.	Lateral Deviation.
1.	70 lb.	1 deg.	510-lb. solid shot.	748	1 yard left.
2.	"	"	"	787	1½ yard left.

FOREIGN AND COLONIAL NEWS.

FRANCE.

The Emperor and Empress, with the Court, returned to the Tuileries, from Compiègne, for the winter on Saturday afternoon, and their time is likely to be fully occupied with the ceremonial and receptions which take place on the approaching days—first at the Tuileries, on Monday the Emperor received at the Tuileries a deputation of the Senate charged to present the address in reply to the speech from the Throne. His Majesty replied to the address in the following terms:—

Monsieur le Président,—Organ of the chief body of the State, you bring me words which deeply move me. I see with pleasure that the most opposite views have not prevented you from the love of the nation, and display the same confidence in me; it shall not be deceived. Good, as you know, is the sole motive of my actions. At home as abroad, I desire no oppressment of passion, and counsel and union. I most solemnly lose for the welfare of France. I am happy to think that under the shelter of public order and liberty it has developed its prosperity. Spain actually was that of the head of my family, now of myself. As Hortense, "Fighting is the fate of my race." I am ready to face the struggle, formerly a utopia, become anon a reality? Whatever may happen, it is my duty to reserve to France the position she has a right to hold above the prejudices of another age. Let us join our efforts for this noble object; let us not think of questions foreign to our interests, but of immediately urgent to silence it. Be good enough, M. le Président, to act as the interpreter of my thanks to the senate.

Unanimous shouts of "Vive l'Empereur!" (says the official journal) burst forth after his Majesty had uttered this speech.

M. Drouyn de Lhuys has addressed a note to the European Powers which have conditionally accepted the congress scheme stating that a programme of the questions which France proposes to discuss will presently be drawn up and submitted to their consideration. M. de Lhuys also proposes that a conference of Ministers shall be held previous to the meeting of the Sovereigns. The Government, therefore, agreed still to postpone the congress on an event likely to take place. "England's refusal to join the congress was the subject of some discussion in the Senate yesterday week, and the senators who spoke expressed their regret to see how many wishes are likely still to remain unfulfilled. It was decided that such decisions should be subject to the same rate of taxation as that upon the rentes of public stock.

DENMARK.

FUNERAL OF THE LATE KING.

The funeral of the late King took place yesterday week. The Royal corpse was conveyed to Roskilde Cathedral with extraordinary solemnities. Immense numbers of people were present at the ceremony. The Royal Coffin was followed by a representative of the King of Sweden, and a numerous deputation of Swedish Russian and Swedish students attended the procession. The coffin was placed in the Royal vault on Saturday.

CLOSING OF THE DANISH RIGSRAAD.—THE KING'S SPEECH.

The Danish Rigsraad was closed on Monday by the Minister President read the message from the King. His Majesty says :—

At the time when this assembly met, in 1858, it was hoped that the constitutional relations of the Danish monarchy would be settled in the manner the case but the Federal Diet declined itself to co competency. The Constitution of 13th of November was, however, the same basis in which the present Constitution for the whole monarchy. That Constitution also separated the common affairs of the monarchy from the separate affairs of the respective provinces composing it. It conferred on committees upon the Rigsraad an interfering the proposed laws for the latter provinces.

The message then states that his Majesty intended to give to his Federal provinces the same rights as the Danish provinces, but was prevented in connection with the monarchy possible. "The new Constitution was not agreeable to this effect. I, therefore, see a necessity to withdraw it on the part of the Powers not to recognise the treaties on that account." The King concludes by wishing success to the Rigsraad.

A decree to dismember the Danish monarchy has arisen in Germany. We hope, however, that Europe will nevertheless maintain our rights to the hereditary succession to the throne of Denmark, and that the Federal Diet see concerning the Danish provinces. German troops have occupied Holstein during almost four years, and have not yet withdrawn from that duchy. The Federal Diet has no recognise the election on the part of the German Confederation as justifiable, in withdrawing troops to the side of the Eider, in order to avoid a collision.

THE SCHLESWIG-HOLSTEIN QUESTION.

The Danish troops have been withdrawn from Holstein, as announced in the speech from the Throne to the Rigsraad; but it is not proposed to withdraw or modify the new Constitution for Denmark and Schleswig, and it is said that preparations for the Schleswig elections have already commenced. The Constitution of 18th inst. has been promulgated in Copenhagen under the Royal Sanction and Seal of the King.

According to a Copenhagen journal, England and Russia have already begun to negotiate concerning the Danish Question, but they have not joined them, and General Fleury, the Envoy of the French Emperor, was instructed from Paris to leave Copenhagen instead of co-operating with the Russian and English Envoys.

The Prussian Field Marshal Wrangel assumes the chief command of the Federal Execution in Holstein" sent into Holstein while Prince Frederick Charles of Prussia commands the Prussian contingent.

There is no abatement of the excitement in Germany on the Schleswig-Holstein question, and it feared the volunteers may precipitate a war by some aggressive measure.

The debate on the address to the King of Prussia, propounded by the Liberal party, in reply to his Majesty's demand for funds for the purpose of conducting the operations in Holstein, took place yesterday week in the Chamber of Deputies. It was not unexpected that the utterance of Herr von Bismarck against the House encroaching on the prerogative of the Executive, the address was carried by 207 against 107 votes.

A meeting of 900 members of the different German representative bodies was held at Frankfort on Monday, at which the resolutions were carried almost unanimously :—"That united endeavours should be made to secure the recognition of the rights of Prince Frederick of Augustenburg; that the Federal Diet be induced to recognise Prince Frederick as Duke of Schleswig-Holstein; that the rights of his rights be enforced, and the separation of the duchies from Denmark carried out; and, finally, that the independence and inseparable union of the duchies be established." A committee of forty-two members was appointed to carry out the above resolutions.

A meeting at Altona of the members of the Holstein estates having been prohibited by the police, the assembly was adjourned to Hamburg, where it was held on Tuesday. After a long and animated debate it was resolved, by a great majority, that the Prince of Augustenburg should be proclaimed Duke of Schleswig-Holstein, and the Federal Diet requested to assist the Prince in obtaining his rights. Herr von Plesser tendered his resignation as member of the Assembly; and was followed by a similar step on the part of others. Nearly half the nobility of Holstein it is asserted, have promised to support the claims of the Augustenburg succession in Holstein; and the city of Frankfort has voted a sum of about £14,000 to aid the Prince's ill-fated treasury.

The Duke of Coburg is said to have intimated his readiness to permit Augustenburg volunteers to be organised within his territories.

An appeal has been issued, signed by the most influential citizens of Christiania, summoning the Norwegians to hold a public meeting. The object of the meeting is to vote an address to the King, stating that Sweden and Norway are bound to assist Denmark in

defending her frontiers, that Scandinavian interests are endangered, and that the people are ready to bear whatever burdens may be imposed for the purpose. Letters from Copenhagen to the 16th assert that the Swedish Minister has declared that, under the present circumstances, Sweden believes herself unable to sign the defensive treaty with Denmark, prepared in July last. On the other hand, the Swedish semi-official journals declare that Sweden cannot and will not abandon Denmark in her hour of danger.

THE INSURRECTION IN POLAND.

Another proclamation of the Polish National Government has been published in Warsaw, in which the origin and object of the insurrection are again stated. The proclamation points out as principles of the movement, "Equality of all inhabitants before the law, and free landed property for the peasantry." The proclamation states, in conclusion, that the insurrection will be continued with undiminished vigour.

An attack has been made in the Government of Lublin by a very large Russian force upon an insurgent body. The latter appear to have been in much jeopardy, when a sudden attack made by another body of the insurgents on the Russian rear compelled the Russians to retreat with considerable loss.

AMERICA.

PRESIDENT LINCOLN'S MESSAGE AND PROCLAMATION OF AMNESTY.

Congress met on the 7th inst., and on the 9th President Lincoln delivered his annual message, which was accompanied by a proclamation suggesting terms for the reconstruction of the Union.

President Lincoln declares that he will never attempt to retract or modify his emancipation proclamation, or return to slavery any person freed by that proclamation, or by any act of Congress. Little can be done, however, towards reconstruction until the military ascendancy of the Federal Government shall be thoroughly established, and the chief care of the Federal authorities must be devoted to the army. The relations of the United States with foreign Powers are friendly; and the British Government has exercised its authority to prevent the departure of new hostile expeditions from British ports, while the Emperor of the French has likewise promptly vindicated the neutrality which he proclaimed at the beginning of the contest. Some questions arising out of the blockade of the Southern coasts have been discussed and accommodated in a spirit of frankness, justice, and national goodwill. It is proposed to refer to arbitration a question concerning the territorial jurisdiction of Spain in the waters of Cuba; and there have been some differences respecting the treatment of foreigners found residing in the Southern Confederacy.

The message states that the receipts during the year from all sources, including loans and the balance in the Treasury at the commencement of the year, were 900,000,000 dols. The disbursements during the year were 895,000,000 dols. The receipts from the Customs' were 69,000,000 dols., and from the internal revenue, 37,000,000 dols. The amount received from loans was 776,000,000 dols. The disbursements in the War Department amounted to 590,000,000 dols., and for the Navy Department to 63,000,000 dols.

The message further states that there are 100,000 freed slaves in the Federal service, half of whom are in arms.

The Treasury Secretary's report, which has been published along with the message, recommends that the taxes on spirits and tobacco be increased; states that 460,000,000 dols. must be raised by loan to defray the expenditure till July, 1864, and 545,000,000 dols. be provided for the expenditure of the year ending in July, 1865; estimates that in July, 1865, the debt of the United States will amount to 2,200,000,000 dols.; and declares that the Secretary will issue no more Treasury notes.

President Lincoln's proclamation, accompanying the message, grants not only an amnesty, but a full pardon and restoration of the rights of property, except slave property, to those taking the oaths prescribed in the proclamation. The amnesty is to be accorded to those in "the rebellious States" who take an oath of allegiance to the United States, and another oath to support the emancipation proclamation and all other proclamations issued by President Lincoln, as well as all acts passed by the Federal Congress, since the outbreak of the "rebellion." But all men who have held office under the Confederate Government, or who have served in the Confederate army or navy in a higher rank than that of colonel or lieutenant respectively, or who have resigned Federal commissions for the purpose of joining the "rebels," or who have treated coloured soldiers otherwise than as prisoners of war, are to be excluded from the benefit of the amnesty. If one tenth of the legal voters in any "rebellious State" will take the required oaths and establish a Republican State Government, that Government will be recognised and protected by the Federal authorities.

The *New York Tribune* and *Times* applaud President Lincoln's message. The *New York World* thinks the message to be good as an electioneering document, but considers his plan for a reconstruction to be absurd. The *New York Herald* believes the President's plan for a reconstruction will be a failure.

PRESIDENT DAVIS'S MESSAGE.

The Confederate Congress opened its Session at Richmond on Monday, Dec. 7, and at noon on Tuesday the annual message from President Davis was received.

Mr. Davis deplores the disasters which have befallen the Southern cause since he transmitted his last message, but declares that ultimate success is assured by the spirit and perseverance of the Southern people. "The determined and successful defence of Charleston against the land and naval operations of the enemy afforded (he says) an inspiring example of our ability to repel the attacks even of the iron-clad fleet on which they chiefly rely; while on the northern frontier our success was still more marked."

Taxation is recommended for the purpose of diminishing the existing depreciation of the Confederate currency.

The President complains bitterly of the partiality shown to the Federals by European Governments, and especially by the English Cabinet; and observes that the Southern Confederacy might justly retaliate by declaring a paper blockade of the Northern coasts and making prizes of neutral vessels trading to Northern ports, or by refusing any longer to recognise the principle that an enemy's goods shall not be seized in a neutral ship; but he does not recommend such a resort to retaliation, and prefers to await a return of England to true neutrality.

Mr. Davis recommends the abolition of the substitute system and the modification of the exemption law, so that the army may be largely increased as rapidly as possible.

He regrets the suspension of the exchange of prisoners, and that communication with the trans-Mississippi districts is so greatly obstructed.

In conclusion, he says:—"The enemy refuse proposals for the only peace possible between us. The only hope for peace now is in the vigour of our resistance."

WAR NEWS.

There has been no change in the situation of the belligerent armies in Virginia.

General Longstreet, whose losses during the siege of Knoxville are estimated by the Confederates at 600 men, has safely prosecuted his retreat as far as Morristown, East Tennessee. In the late battles near Chattanooga the Federals lost 4500 men. They took 6000 prisoners and 46 guns. The Federals are preparing for the winter defence of Chattanooga and Lookout Mountain. General Joseph Johnston has been appointed to the chief command of the Confederate army lately under the orders of General Bragg, who had been temporarily replaced by General Hardee.

Several successes are reported of the Confederates in Georgia and Kentucky.

General Banks has returned to New Orleans from the Rio Grande; and there is no further intelligence respecting the Texan expedition.

The siege of Charleston is proceeding at its usual slow pace. The Federals have ceased to bombard Fort Sumter, and are turning their batteries on other Confederate defences of Charleston. The monitor Weehawken, while anchored at the entrance to Charleston Harbour, suddenly sunk during a gale, and thirty of her officers and crew were drowned.

MISCELLANEOUS.

President Lincoln's health is improving.

In the Senate, Mr. Sumner, of Massachusetts, has given notice of a bill to repeal all Acts for the rendition of fugitive slaves.

In the Congress, Mr. Colfax, a Republican, has been elected Speaker. A vote of thanks has been passed to General Grant, and a medal ordered for him.

The commercial intelligence from New York has the stereotype heading, "Money tight."

A letter from Port Hudson states that a grand review of the whole Corps d'Afrique has taken place, and it is described by those who witnessed it as a magnificent affair.

The Senate of Georgia has ordered the enrolment of all citizens over fifteen years of age for the defence of the State.

Over 1000 vessels have been captured since the blockade was instituted. The naval force consists of 588 vessels, 75 of which are ironclads.

The steamer Chesapeake, from New York to Portland, was captured by sixteen Confederates, who left New York in the steamer as passengers. They landed the captain and crew at St. John's, but they killed the second engineer. A large number of steamers has left New York in pursuit.

The Federal ship of war Vanderbilt has visited Penguin Island, and destroyed a large quantity of coal stored there. She has also seized the British vessel Saxon, laden with the cargo of the Federal vessel Conrad, captured by the Alabama. The Saxon was sent to New York in the care of a prize crew.

INDIA.

The Bombay mail brings papers of the 29th ult.

The news of the death of the Earl of Elgin caused profound sorrow, and every mark of respect was paid to his memory at the respective seats of government and at all the military stations. The papers all appear in mourning.

The only other subject of much interest is the fighting with the hill tribes on the Punjaub frontier, accounts of which have been received by telegraph.

METROPOLITAN NEWS.

It is understood that the Charing-cross Railway will be opened to the public on the 1st of January next.

Sir Lawrence Peel has been unanimously elected president of Guy's Hospital, in the room of the late Mr. Bonamy Dobree.

The last brick of the subway of the new street in Southwark was laid on Thursday week by Mr. Thwaites, the chairman of the Metropolitan Board of Works. The ceremony of opening the thoroughfare to public traffic will take place on New-Year's Day.

There are ninety inmates of Whitecross-street Prison, of whom fifteen are County-court prisoners. The Lord Mayor, on Christmas Day, provided the inmates with beef and beer, &c. The Sheriffs of London and Middlesex will, on New-Year's Day, supply provisions to the prisoners.

Yesterday se'nnight a fire broke out in a City warehouse, and soon extended to a number of houses in Milk-street and Wood-street, occupied chiefly by firms in various branches of the "dry goods" trade. The value of the property destroyed is roughly estimated at £100,000.

It is stated that Mr. W. N. Rudge, of the Stock Exchange, has collected within the last few days from the members of that establishment £500 for the National Life-boat Institution.——Mr. E. W. Cooke, the distinguished marine-painter, has forwarded to the institution £200 towards the expense of establishing a life-boat on some dangerous point of our coast.

Dr. West, of Wimpole-street, has been presented by the medical professors of King's College with an elegant tea and coffee service, in silver, in acknowledgment of the valuable services he had rendered to the college last year by performing the duties of the Chair of Midwifery during the severe illness of Professor Priestley.

On Monday the customary distribution of her Majesty's Royal charities to aged and meritorious poor who had been recommended to the Lord Bishop of Oxford, as Lord High Almoner, by the clergy and other persons in the various parishes in London, took place at the Almonry Office, Whitehall, under the direction of his Lordship and the Rev. Dr. Jelf, sub-almoner, assisted by Mr. Joseph Handley, secretary and yeoman in ordinary.

The tenders for the second portion of the embankment of the northern side of the Thames—from Waterloo Bridge to the eastern end of the Temple Gardens—were opened by the Metropolitan Board of Works yesterday week. The highest tender was for £264,000; the lowest for £229,000. The latter was the offer of Messrs. Ritson and Co., and it was accepted, subject to the board's approval of their sureties.

Monday being St. Thomas's Day, the citizens of London, according to immemorial custom, met in wardmote to choose their representatives in Common Council for the year. It is usual on these occasions to discuss the topics that interest the City; but the principal subject discussed at the different ward meetings on Monday was the aggression threatened upon the City thoroughfares by the various railway projects now in contemplation. In most of the wards the old members were elected without opposition.

The Duchess of Sutherland had a narrow escape yesterday week. She was returning home in her brougham from Dr. Cumming's chapel, when the horse took fright. It dashed along several streets, and, one after the other, the footman and coachman were thrown from their seats and seriously hurt. The door of the carriage was also dashed to pieces. Finally, the animal was stopped opposite the War Office, in Pall-mall. The Duchess had remained quietly seated, and thus escaped injury.

Last week the births of 1927 children—994 boys and 933 girls—were registered in London. In the ten corresponding weeks of the years 1853-62 the average number (corrected) was 1817.——The deaths in London, which were 1357 in the previous week, declined to 1291 last week. The average number of deaths in the ten weeks corresponding with last week (taking the fifty-first in each of the years 1853-62) is, with a correction for increase of population, 1401. Smallpox was returned in 19 cases, measles in 18, scarlatina in 101, typhus in 51. The deaths referred to pulmonary diseases (exclusive of phthisis) were 261 against a corrected average of 316. Those from bronchitis were 147, from pneumonia 92. Phthisis was fatal in 150 cases. Forty-nine persons died at the age of eighty years and upwards. A widow is registered as having died in the Workhouse, Hampstead, on the 13th inst., at the age of one hundred years.

Law and Police.—On Thursday week the first meeting in connection with the affairs of the Great Ship Company since it has been consigned to the custody of the Court of Chancery for the purpose of investigating and winding up its affairs, was held before Mr. G. Whiting, chief clerk to his Honour the Master of the Rolls, at the Rolls Chambers, Chancery-lane, the object being to appoint an official liquidator under the Joint-stock Companies Winding-up Act. After much discussion, Mr. Hawes was appointed official manager, giving £3000 as security, it being understood that an appeal against the appointment would be made in favour of associating with the official liquidator either Mr. Harding or Mr. Cooper.——The case of Parry v. The Great Ship Company came before Mr. Justice Mellor, in the Judges' Chambers, on Tuesday, in a somewhat novel form. The plaintiff had levied an execution on the ship and stores at Liverpool. Claims of £100,000 had been made on the property, and, on the application of the Sheriff of Lancashire, an interpleader issue had been directed to try the question. The stores were to be sold, and the money paid into court to abide the result of the interpleader issue, which was to be tried in London.

Vice-Chancellor Kindersley has committed the editor of a Sheerness newspaper for "contempt," the offence being the publication of certain articles which, it was held, might influence witnesses in a suit now pending in his Honour's Court.

A church-rate suit has been depending for a long time in relation to the parish church of St. Mary's, Shrewsbury. Dr. Lushington yesterday week gave judgment in the matter, and condemned the opponents of the rate both to the payment of the sum in dispute and also to the heavy costs which had been incurred in the protracted legislation. The opponents of the rate gave notice of an appeal to the Court of Privy Council.

A gentleman who had purchased, under a sale in Chancery, the site of Tottenham-court-road Chapel burial-ground for building purposes, was on Saturday fined £5 and costs, at the Marlborough-street Police Court, for removing dead bodies without the authority of the Home Secretary.

An amusing action was tried yesterday week before Mr. Justice Blackburn and a common jury, in which a Mr. Hoffman sued Mr. Wilton, the keeper of a music hall, for refusing to pay the salary stipulated for the production of a ghost. The defendant's plea was that the plaintiff's ghost was a poor imitation of one, and that he did not superintend his work. The jury found for the plaintiff, but not to the whole amount claimed.

An offence, happily of extreme rarity, was committed on Wednesday week in the National Gallery, when a man named Stephenson was observed to be stabbing at and injuring one of Turner's pictures in the "Turner Room" of the National Gallery. Happily, the injuries he inflicted are reparable, and the picture—"Regulus leaving Rome"—will not be perceptibly injured. The language and bearing of the offender when apprehended were little better than those of an idiot, and yet there were no symptoms of insanity about him. He did not deny the charge, and was committed for trial.

More than a week of the sittings of the Court of Queen's Bench has been monopolised by a suit in which the shipping firm of which Mr. W. S. Lindsay, M.P., is the head seek to recover against one of the underwriters, Mr. Leathley, the amount insured in several policies on their iron steamer, the Harbinger, abandoned by their captain as lost in Algoa Bay, on the east coast of Africa, in February, 1859, although its value was above £15,000. It was insured for that amount, and the underwriters were called upon to pay as for a total loss. Some paid, some resisted, and hence this action. The substantial question was whether the vessel was rightly abandoned. On the 8th day of the trial occurred the novel incident of raising an objection to a juryman after he had been for seven days engaged on the case. The objection was that he was related by marriage to the partner of the plaintiff. The juryman withdrew by consent of both parties, the Chief Justice remarking that the only danger arising from the gentleman's relationship was that his desire to be impartial might unconsciously lead him to do injustice to his own friends. The cause was therefore decided by a jury of eleven, who on Tuesday found a verdict substantially for the underwriters; but, as leave was given to move for a verdict for the owners, on the ground that a partial loss had been incurred, the underwriters agreed to settle the matter by paying the owner £4500, each party to pay his own costs.

It is stated that Lord St. Vincent has withdrawn his claim upon Cambuscan and Archimedes, and that there is no doubt they will remain in Lord Stamford's stable.

The Swiss Embassy is about to quit Japan, having informed the Federal Council that it is impossible to enter into diplomatic relations with the Government at Jeddo.

The seventy-third anniversary of the birthday of the King of the Belgians, on Wednesday week, was celebrated at Brussels with great rejoicings, and all the public buildings were gaily decorated with national flags.

The Sultan, in the course of the past week, presented to the Grand Vizier, as a token of his warm appreciation and regard, a superb diamond ring, weighing 34 carats, and valued at about £500 sterling.

Circassian refugees are arriving at Constantinople from all parts of the Black Sea, on the crowded decks of every steamer, at the rate of about a thousand a day. They are in a state of great distress.

A Protestant church has been opened in Mexico, a French clergyman officiating. According to report there was great opposition on the part of the Regency, or, at least, one of its members, but General Bazaine insisted, and carried his point.

In addition to the metropolitan turnpikes to be abolished on the 1st of July next, an Act of Parliament was passed at the close of the last Session, to continue, until the 1st of November next and "no longer," nearly eighty Turnpike Acts, unless otherwise directed by Parliament.

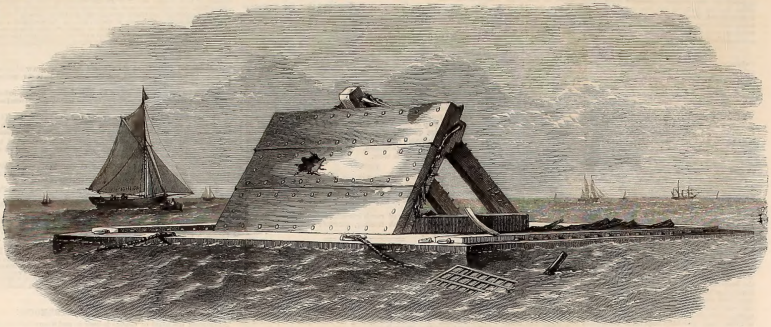
The competition for the Westmorland Scholarship and Potter Exhibition at the Royal Academy of Music took place at the institution on Monday. The candidates elected were:—For the Westmorland Scholarship, Miss Emily Wynne; and for the Potter Exhibition, Mr. Ridley Prentice. The following candidates were specially commended:—Misses E. Pitt, S. Neighbour, E. M'Donald, and E. Wolfe; Messrs. T. W. Walstein and G. E. Bambridge.

FOUNDER'S DAY AT CHARTERHOUSE.

Although the hand of change is busy in and about Smithfield, it is gratifying to add that the princely foundation "of good old Thomas Sutton," known as Charterhouse, is intact; and that on the 12th inst. the anniversary of the death of the founder was celebrated with the customary religious, educational, and festive observances. In the long roll of English benevolence, the philanthropy and munificence of this merchant-prince are scarcely equalled. Persevering, through a long series of years, in his purpose of dedicating his vast estates to charity, he died on Dec. 12, 1611, having previously left the whole of his possessions, save a few thousands (in comparatively small legacies to friends and kinsfolk), in trust, to be for ever wholly distributed, converted, and employed for the maintenance of an hospital as "a happy port or haven" for the aged, and a free school for the education of youth.

The site upon which this complete scheme of philanthropy has been worked out is nearly upon the verge of Smithfield—once the public green of old London. It has a strange history of two centuries and a half: it was first a burial-ground for 50,000 victims of the Plague of 1349; upon this plot was subsequently built a chapel; then a good Bishop bequeathed £2000 (equal to £30,000 of our money) to found thereon a convent for monks of the Carthusian order; and afterwards Sir Walter de Mauny obtained from King Edward I., in 1371, a Royal license to found the monastery; one of the attesting signatures to this charter being William de Walworth (afterwards maior), the same who struck down Wat Tyler. Sir Walter added to the original plot of three acres more than ten acres and a half; so that the site of the monastery and the present establishment are integral and identical, and, having been from time to time increased, embrace several adjoining streets as well as Charterhouse-square.

The Hospital was enriched by the gifts and bequests of pious kings, nobles, and commoners, through two centuries, until its treasures and possessions were seized by Henry VIII.; and, after the dissolution and sacking of the monastery, the site was granted to the North family, one of whom sold the property, in 1565, to the Duke of Norfolk for £2500. Within six years the Duke was executed in the Tower, when his estates were vested in the Crown, and devised by Queen Elizabeth to Thomas Goodwin; but, on their being restored to the Norfolk family, Charterhouse fell to Lord Thomas Howard, the Duke's second son. The Howards built the great hall and other noble apartments, which remain to this day, with a few portions of the monastery, whose blackened walls contrast with the stately magnificence of the additions. The present kitchen, for example, was the hall of the old priory, and other Carthusian remains are incorporated with still more recent enlargement. The cloisters and the surmounting terrace are of the earlier date. The group of mixed buildings and the land were bought by Thomas Sutton for his noble foundation, for which he obtained a charter of incorporation from James I., June 22, 1611. The chapel is late Jacobean, and its site appears, from a plan, date about 1500, to be identical with that of the monastery. The ante-chapel, with a groined roof, bears the date of 1519. The subsequent additions we need not particularise.



The commemoration on the 12th inst. commenced with evening service in the chapel. Here the noblest feature is, very properly, the costly tomb of Sutton: there is abundance of carved oak, and the mural monuments are interesting. The Master occupied a canopied seat. The old brethren wore their dark cloaks; and the gown-boys, of various ages, were seated in the body of the chapel; in the gallery sat the families of the Master and officers; and there was a sprinkling of Old Carthusians in the congregation. The preacher was the Rev. Henry Tweed, late Fellow and Tutor of Oriel College, Oxford, who delivered a sermon of much pith and point, upon the text, "Honour all men;" the preacher contrasting Christianity in its educational and social aspect with other religious systems, and arguing that no slight evidence of its Divine origin is afforded by the fact that it has enriched our land with such noble institutions as Charterhouse and other public schools, and has produced such worthies as the Wykehams, the Waynfletes, and the Suttons, in successive ages. There was an impressive solemnity in this special service, almost within earshot of the roar of the working-day City. The first tribute to Sutton's memory, preached here, and printed in 1629, is now as rare as a manuscript.

From the chapel the company adjourned to the Governors' Room, a noble apartment, either built or decorated by Thomas, fourth Duke of Norfolk, whose arms enrich the ceiling, which is somewhat Holbeinesque. It has a chimneypiece of wood, reaching to the ceiling, architecturally enriched and sumptuously painted, but now dim with age; and upon the walls hang six pieces of tapestry. Queen Elizabeth, on her six days' visitation to Charterhouse, is said to have held her Court in this magnificent room; wherein, also, when he tarried at Charterhouse, on his entry into London, May 7, 1603, knighted eighty gentlemen.

The company proceeded by the grand staircase—with its carved therms and balusters and landings, very picturesque—to the apartment just described, to hear the Latin oration by the senior gown-boy, or foundationer, the orator this year being Mr. E. Courtenay E. Boyle, who is the son, the nephew, and the brother of old Carthusians, and is about to proceed to Oxford with a Charterhouse exhibition.

A procession having been formed, the Master of the Charterhouse, the Venerable Archdeacon Hale, now entered the room, followed by the stewards, Lord Truro; the Rev. Sir Charles Clarke, Bart.; Mr. John Leech, the Rev. J. S. Horner, Colonel Clark; Mr. Charles C. Clifford, M.P.; the Rev. James Marshall, and the Rev. G. J. Blore, bearing their wands of office; after whom came the rest of the company, including the masters of the school, the Preacher (the Rev. Dr. Currey), the Very Rev. the Dean of Peterborough (formerly Head Master), Mr. W. M. Thackeray, the Hon. Mr. O'Grady, the preacher of the day (the Rev. Mr. Tweed), Messrs. Babbington, Pennell, Keightley, Nicholson, &c. The lower end of the room was graced by the presence of a large number of ladies, mostly the wives, mothers, and daughters of "old Carthusians" or the sisters of "present Carthusians."

The Master and company having taken their seats, Mr. Boyle ascended the rostrum and delivered the oration with grace and feeling. The chief events of the past year were the staple of the address—as the marriage of Princess Alexandra with the Prince of Wales; the melancholy wars in America and Poland; and the deaths of Lords Lansdowne and Lyndhurst (Governors of Charterhouse), Lord

EXPERIMENTS WITH THE ARMSTRONG 600-POUNDER AGAINST THE WARRIOR TARGET MOORED OFF SHOEBURYNESS: FRONT OF THE TARGET AFTER PRACTICE.—SEE PAGE 646.

Clyde; a former Head Master, Dr. Russell; and Sir Cresswell Cresswell, an old and attached Carthusian, who presided over the festival on the last Founder's Day. The orator then adverted to the successes of Carthusians at the two Universities and at the competitive examinations for the Indian Civil Service during the past year; and closed with a tribute of respect and regret to the Head Master of the school, the Rev. E. Elwyn (who has been obliged to resign on the score of weak health), auguring all that is favourable of his newly-appointed successor, the Rev. Mr. Haig Brown.

As soon as the oration was concluded the Master rose and placed his donation in the orator's cap amid loud cheers: his example was freely followed, the collection amounting to £150 towards meeting the expenses of Mr. Boyle's career at the University.

The banquet was, after an interval, served in the great hall, where gas lighted up the large whole-length portrait of Sutton, the "founder of the feast," which hangs at the east end; the light also set off the carved therms of the gallery-front, the screenwork, and the nobly-sculptured chimney-piece, and the arcaded entrance, at which end was a small buffet of bright Carthusian plate. The Master was in the chair, supported by the stewards, the Preacher, the Dean of Peterborough, the present Head Master, and the Head Master elect; Mr. Thackeray, and some distinguished visitors. As soon as the cloth was removed and grace had been said by the orator, the chairman gave the usual loyal toasts of "Church and Queen," the Prince of Wales and the rest of the Royal Family;" and the "Army and Navy," to which Lord Truro responded. The time-honoured toast, "Floreat æternum Carthusiana domus," was then proposed by Mr. Thackeray with much *verve*, and was received with three times three and one cheer more. To it succeeded the "Governor of the Charterhouse," to which the Master spoke as the oldest Governor in point of standing, bearing testimony to the zeal and attention which these noblemen are in the habit of bringing constantly to bear upon the interests of the hospital and school. Next followed "The Masters and Officers of the Hospital" and "The Masters of the School," proposed by the Preacher, who referred to the high merits of Mr. Elwyn, and expressed the regret of his colleagues and pupils at his early retirement. To this toast Mr. Elwyn replied, with much feeling. Then followed the toasts, "The Preacher of the Day;" "The Stewards," to which Mr. Leech replied; "The Stewards of Next Year," "The Orator of the Day," &c., all which were speedily disposed of, and the party broke up earlier than usual, owing to the next day being Sunday, and so many clergymen being unable to absent themselves from their respective parishes. The guests retired from the tables, the young Carthusians and the company who had witnessed the festive scene from the galleries withdrew, and thus closed "Founder's Day" of 1863; and, doubtless, many were the aspirations for the prosperity of this noble foundation for the education of youth as well as the support of old age.

The School is especially an object of concern: the governors have raised the number of foundationers from forty-four to fifty-four, and two presentations to the foundation are given annually by public competition to boys under fourteen years of age. These are important additions towards the maintenance of the high reputation of the establishment. With the advantage of several acres for recreation, Charterhouse is the best located public school in the metropolis, and will soon be rendered of easier access by railway—of no small promise to the fulfilment of *floreat æternum*.

FOUNDER'S DAY AT THE CHARTERHOUSE: THE BANQUET IN THE GREAT HALL.

A FRENCH CHRISTMAS BOOK ON A FRENCH CHRISTMAS LEGEND.*

DIVIDED as the Christian world generally is by sectarian differences and senseless struggles for mere earthly supremacy, it is a happy thing for the world's progress that, throughout the length and breadth of Christendom, the anniversary of our Saviour's birth offers a natural ground upon which Christians of all denominations can meet in peace, and joy, and mutual congratulation. The contemplation of the circumstances attending the birth of Jesus is, indeed, of itself so delightful a subject, and His advent of such universal importance, that all minor difficulties of worldly creation disappear in its presence, and the various shades of Christians form really for the nonce one great flock, united in the utterance of hosannahs to the praise and glory of the Great Shepherd. It is this charming transition from Christian dispute to Christian love that renders the present period of the year so universally agreeable, because free from sectarian discussion. On the holy ground of the universal redemption of sinners, the banner of dispute would be raised with the worst of grace; and, indeed, the presence of the Infant Jesus, easily realisable by the spirit of faith, would suffice to dispel the slightest tendency to irritation with regard to details that disappear entirely when the mind abandons itself to the contemplation of the history of the Infant, who was born in the stable of Bethlehem, but who now sits on the right hand of his Father, in heaven.

We have alluded to this community of sentiment for the purpose of introducing a sample of its influence to the notice of our readers in the production of the French Christmas stories above mentioned, from which we have borrowed two beautiful engravings illustrative of the legend of Le Sabot de Noël, the title of the very clever and truly religious work, which is fully in conformity with the idea of Universal Christianity, and remarkable for the absence of anything like sectarian treatment, either in its text or illustrations.

The Sabot de Noël is the interesting recital of the eve of Christmas as understood by the legend, which tells how Saint Nicholas, disguised as an old man, arrives at the woodman's hut, relates to the children the history of the birth of Christ, and announces that the *Enfant Jésus* will visit them in the night by the chimney and deposit gifts in their *sabots*, or wooden shoes, if duly and faithfully ranged in the fireplace on retiring to rest. The apparition of Jesus in their sleep, the midnight mass, and the ultimate reception of the gifts (of the fond parents who indulge the harmless whim of the tradition), occupy the five admirably written chapters of the exceedingly apropos book of the season, from which we shall only extract a passage or two relating to our illustrations.

The third chapter of this timely volume for young persons is devoted especially to the *sabots de Noël* placed in the chimney by confiding children of small or large growth, who never lack faith in the custom, although they may be occasionally wanting in belief in the tradition, universally current in France, where it is encouraged among the youthful population, so as to prevent parents from abandoning the pretty illusion of their *jeunesse*. Let us translate a passage which alludes particularly to the accompanying Engraving of "The Shoes in the Chimney":

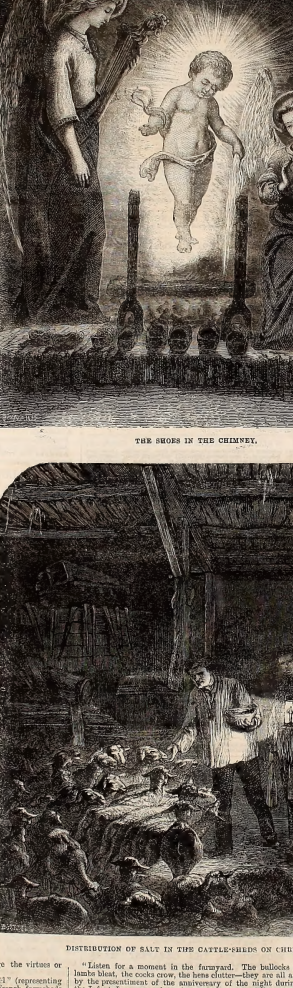
"Midnight was sprouching" . . . .

"A piece of blackened log smoked somewhat crookedly across the fireplace; it was the remains of the Christmas log. It still emitted a weak flame to warm up the Divine Infant—a frail blue and red flame, that leaped with joy. On each side of the chimney, after having shaken the soot from their wings, angels had taken up their position like waltzers laden with blossom. They had previously hung up their batterns on the rings of the *crémaillère*, and held in their hands the harp of gold with silver strings, and the silver lyre with golden strings. One especially tuned the harp of King David, which the king had lent for this night only. Another bore the lyre, which shines in the heaven at night and is well known to astronomers—the Lyre of the Northern Hemisphere, with ten strings attached above and below, with nails of fire. God the Father had taken it out of the firmament, and confided it to the keeping of one of His angels (with a special recommendation to take great care of it) to gratify the protégés of the Infant Jesus with delicious music.

"Ah, my children! I have heard, because I am a savant, the music made by the poujoles and the bluebells in the corn, when the wind sweeps among the ripening ears;

"I have heard the serenades given by the falling stars as they dance in their swift course through the heaven;

"I have heard the concert of the drops of water trickling into the streams under the grottoes in the rocks;



"But I never heard anything so mild, so melancholy, so delightful as the concert of the angels on Christmas Eve. They played so delicately that the ashes on the hearth, whitened in time with the sparks from the log; and the very spiders, wondering, came down with astonishment as far as their thread would permit them."

The angels are afterwards supposed by the author to sing a Christmas-song, which finds a place in the volume, whereupon the "Infant Jesus," radiant with light, appears beneath the chimney, where the row of *sabots*, some spilt, some nailed, and some with straw in them, testify the *jeunesse* left vacant to encourage the virtues or recompense the conduct of their owners.

Our second Illustration from "Le Sabot de Noël" (representing the custom of distributing salt to the cattle in the French farmsteads on Christmas Eve) is extracted from the fourth chapter, "Minuit," which treats in the most poetical yet truthful manner the general agitation prevailing throughout the country parts as the hour approaches when the bells of midnight announce with their ding dong, ding dong, "Jesus is born! Jesus is born!" All nature seems on the stir.

* "Le Sabot de Noël." By Aimé Giron. Illustrated by Leopold Flameng. Large 8vo, thick board. Dentu, 59, Rue de Seine, Paris.

LE SABOT DE NOEL.

THE SHOES IN THE CHIMNEY.

DISTRIBUTION OF SALT IN THE CATTLE-FIELDS ON CHRISTMAS EVE.

"Listen for a moment in the farmyard. The bullocks low, the lambs bleat, the cocks crow, the hens cluttter—they are all awakened by the presentiment of the anniversary of the night during which the Infant Jesus came into the world. . . . When the hour of midnight strikes, slowly and piously the cattle fall upon their knees. It is the only night in the year, and the only blessed hour, when they bend the knee thus in their bed of straw. If you wish for confirmation of the fact, ask the old peasant of the plain, or the fervent mountaineer who lives on the high hills near the sky. The stable-master is well acquainted with the circumstance, and hurries through his folds, his hat in hand, to distribute the mouthful of salt sent by the Infant Jesus to the sheep and the cattle, who with joy at once set about ruminating the midnight token of peace and goodwill."

In fine, all the earth is gay; for Christmas is come! Welcome, Noël! with all thy pure desires and charitable intentions! Such are the ideas sought to be conveyed to the youthful mind by the author of this volume, M. Aimé Giron, who has been powerfully aided in the execution of this unassailable book by M. Léopold Flameng, the artistic contributor of twenty drawings on wood and six splendid *eaux-fortes* printed on India paper; and by M. Jules Janin, whose introductory preface to "Le Sabot de Noël" is an elegant and graceful composition worthy of his pen.

The letterpress of this magnificent volume, with red and black title and dedication, has been very carefully printed; and altogether this literary *cadeau de Noël* (which is a rarity in France, where the New-Year's Day usually takes the precedence for novel productions) is well worthy of being presented to all Christian children sufficiently conversant with the French language to be able to understand its simple yet intelligently pious construction.

REMAINS OF ROMAN ART IN GLOUCESTERSHIRE.

In a field named Wycombe, near Andoversford, situated in a pleasant, fertile, well-watered valley, amid the Cotswold Hills, about six miles east of Cheltenham, excavations were made last September by the energetic proprietor, William L. Lawrence, Esq., of the Manor House, Sevenhampton, which led to the very interesting discoveries, two specimens of which we are able to present to our readers, selected from photographs kindly given to us by Mr. Lawrence himself. Although it had long been known that Roman remains existed in the spot in question—many relics of antiquity being frequently turned up by the plough—no real attempt at exploration was made till the present autumn. Mr. Lawrence, having observed a decided variation in the aspect of the crop of wheat in various parts of the field, was induced to mark the lines of change as bases of operation, and his investigations have been amply rewarded. We have much pleasure in laying before our readers a few of the facts with which he has supplied us.

It is believed that Wycombe and the adjacent land were first the site of a British village, which afterwards became a large Roman military station, with a village or town attached to it, situated at the convergence of an ancient road from Cirencester to Gloucester, with others leading to Tewkesbury, Stow, and Gloucester. Those who know the country will readily acknowledge the advantages of such a site for a camp, being on the eastern slope of the Cotswold range, which looks down on the valley of the Severn, and contains the sources of the Thames; and there is no doubt that these hills were long held by the Romans in order to restrain the incursions of the yet unsubdued British tribes of Wales. The field, Wycombe, is about twenty-four acres in extent, and lies almost directly north and south. The remains of buildings which have now been partially traced begin not far from its southern or upper end, on the left of a road, which appeared before the corn was cut for the late harvest to pass nearly down the centre of the field. They consist of a large number of foundations of considerable extent, but which are not yet fully developed, and are intersected by a wall of cut stone, 145 ft. long. Below this, and on the right of the road, is a semicircular wall, 75 ft. long, supposed to be part of an amphitheatre. Still further on, and at the point near which the road appeared to turn both to the right and left, is a mass of foundations subdivided into various rooms, in the form of a half horseshoe, 73 ft. long and 50 ft. broad, probably the half of a barrack. A little lower in the field are other very considerable foundations, not fully excavated—some joining each other, others separate, but, in all probability, parts of one or more masses of building. At the lower extremity of the field is another large and important foundation, running into the next ground, and not yet traced. The walls and foundations are of varying structure and thickness. Some are of the best cut stone-work, others are less carefully built; some are 2 ft. in thick, others 18 in. to 10 in.; some of the pavements are of hewn stone, the greater number of them planking, or gravel concrete. The stone employed was probably brought from a large, now disused, quarry about two miles distant. The buildings, which probably consisted of barracks, storehouses, and dwellings for camp followers, and also a temple, seem to have been roofed with a kind of thick stone slates, many of them having holes, no doubt for the insertion of pegs, specimens of which were found near them. Many hypocaust tiles have been found, but, as yet, no tesselated pavements; but more extensive excavations cannot fail to lead to their discovery. Among the relics which have rewarded Mr. Lawrence's energetic exertions are enumerated large quantities of the pottery termed Samian; several hundred coins, mostly Roman, and small brasses, extending from the earlier Emperors to Arcadius; British-Roman coins of the subsequent period; several very good fibulæ, specimens of the style of the sacrificatory and other knives, keys, articles of the toilet, &c.

The bronze statuette represented in our illustration is three inches in height. It was at first thought to be that of a Roman General; but as now considered to be the god Mars. It had probably been 4100 years in the ground. The right hand is raised aloft, and had something in it, which is, unfortunately, lost. It may have been a small bronze axe, which was found near the spot, or perhaps was a spear, if the figure be that of Mars. Independently of any artistic merit which the figure may possess, it is of much value, as giving the costume of the soldier, whether Greek or Roman, of the period, and is in excellent preservation.

Our other Illustration shows a rudely sculptured stone, in the collection of the country—size, 10 in. by 7 in.—representing three figures in deep relief, apparently a comic scene, of parties dressed in character,

and, it may be, wearing masks, the central figure representing a chief in military costume, that to the right wearing a sort of crown and pouch, and playing on a musical instrument, and laughing immoderately. The other figure is defaced, but is also playing on a musical instrument. With these were found a small and very rude votive offering, with figures of a female in long dress and children, possibly ancient British; and also bones of animals in large quantities, cores of the horns of the Bos Longifrons, and a cranium of a female of that species, perfect in the upper portion of it, and having the cores inserted in their places.

It will certainly be matter of the deepest regret, after the success which has attended the present limited excavations of Mr. Lawrence, if a full and searching investigation be not made on this interesting spot. This, however, cannot be done by individual enterprise. Mr. Lawrence and his friends have, therefore, not only appealed for aid to the antiquaries of Gloucester, promising to place the fruits of discovery in a country museum, but he has also sent some of the relics discovered to the Society of Antiquaries, London; and we understand that the council of that learned body will shortly lend its foster the research. We gladly inform our numerous readers that contributions for the furtherance of the work may be deposited in the several branches of the County of Gloucester Bank.

CALENDAR FOR THE WEEK ENDING JANUARY 2.

SUNDAY, Dec. 27.—First Sunday after Christmas. St. John, Apostle and Evangelist. Baptism John Davis, discoverer of Davis's Straits, killed by Japanese, 1605.

MONDAY, 28.—Innocents: Childermas. Death of Queen Mary II. of smallpox, at Kensington, 1694.

Chronometer, Duplex, Lever, Horizontal, Vertical, Repeating, Centre Seconds, Keyless, Independent Seconds, and Pocket Watches, from 20s. upwards to a guinea each. An Illustrated Pamphlet and Price-list of every description of Watch post-free for two stamps.—J. W. BENSON, Manufactory, 33 and 34, Ludgate-hill. Establishments, 62, 63, and 64, Cornhill. By special warrant of appointment, Watch and Clock Maker to H.R.H. the Prince of Wales.

BENSON'S CHURCH, TURRET, and STABLE CLOCKS. Chronometer, Astronomical, Complex, and Turret Clocks, to be furnished with Rectangular and Dead-beating Escapements, Compensation Balances, Gravity Escapements, and Keyless Clocks, chiming tunes on any number of bells. A short pamphlet on Church and Turret Clocks sent free for two stamps.—J. W. BENSON, Manufactory, 33 and 34, Ludgate-hill. Establishments, 62, 63, and 64, Cornhill. By special warrant of appointment, Watch and Clock Maker to H.R.H. the Prince of Wales.

AGENTS REQUIRED.

THE ROYAL INSURANCE COMPANY is prepared to undertake Applications for Agency Appointments from gentlemen having command of Fire and Life Business.

The ROYAL has always been conspicuous for its liberality and promptitude in the Settlement of Claims.

Total Annual Income is now upwards £350,000
And its Funds in hand exceed £1,000,000

Transfers of Policies from other Companies received without charge for Policy, whether of the annual...

Address JOHN B. JOHNSTON, Secretary, Royal Insurance Company, 29, Lombard-street, London.

SIX PER CENT DEBENTURE.—The Directors of the SEVENNES PATENT BREAD-MACHINERY COMPANY (Limited) have received an application for a Loan of £1,000, for which they are prepared to issue Debentures for Five Years, bearing Six per cent Interest, free of income tax, payable half-yearly. Coupons will be attached for the interest, which will thus be rendered payable to Bearer.

The Machine Factory and Bakeries are now in full operation. Apply, on or before Dec. 27, to the WORKING BREAD COMPANY, 139, Cheapside, E.C.

PROVIDENT CLERKS' MUTUAL LIFE ASSOCIATION, Established 1840.

Annual Income, £56,000.
Accumulated Funds, £250,000.
Policies effected prior to Dec. 31 will secure an additional year's bonus at the next division of profits.
No. 31, Moorgate-street, E.C., Dec. 1, 1863. W. T. LINCOLN, Secretary.

LONDON and SOUTH-WESTERN BANK (Limited).
Capital, £500,000, in 5000 Shares of £100 each
(With power to increase to £1,000,000).
DIRECTORS.

George Page, Esq. | James W. Johns, Esq.
John V. F. Farrer, Esq. | W. S. Montagu Scott, Esq.
Silvers H. Hadley, Esq. | Lord George Paulet, G.B.
Wm. Hall, Esq. | Thomas Weguelin, Esq.
C. H. Humphreys, Esq. | Wm. Wyndham, Esq.
Secretary—W. REDMORE. Bankers—The Bank of England and Messrs. Glyn, Mills, and Co.

The Bank now receives deposits at the Head Office, as above, at the undermentioned rates:—
Deposits at seven days' notice, 2 per cent.
Deposits at fixed periods of not less than six months, 3 per cent.
Dec. 13, 1863. GEORGE S. ANDERSON, General Manager.

NEW ZEALAND.—BRITANNIA-BANK.—THE BANK OF NEW ZEALAND (Incorporated by Act of General Assembly), Capital £500,000, paid-up Letters of Credit, Bills, and Circular Notes issued on the Bank's Branches throughout the several provinces.

For further particulars on application at the London office.
No. 66, Old Broad-street, E.C. ROBERT P. LARKWORTHY, Managing Director.

PUBLIC SCHOOLS CLUB, 17, St. James's-place, S.W. Chairman—Sir G. W. U. DE CRESPIGNY, Bart.—The COMMITTEE of this CLUB have the honour to announce that the HOUSE for the SECRETARY and STEWARD of Gentlemen who have been educated at one of the following public schools only are eligible:—Eton, Westminster, Rugby, Harrow, Charterhouse, and Winchester.

NOW READY,
Price One Shilling, beautifully Printed in Colours,
THE ILLUSTRATED LONDON ALMANACK
FOR 1864,
containing Fresh-Water Fish, from Drawings by H. L. Rolfe, with interesting descriptions, by James G. Bertram, printed in the highest style of the Chromatic Art by Leighton Brothers' Three-Fair-Engine; Astronomical Diagrams of Remarkable Phenomena, with Explanat ry Notes; and Twelve Original Designs, Drawn to the Subject, by F. W. Fairholt. In pages also include a vast amount of useful and interesting information.
Published at the Office of the ILLUSTRATED LONDON NEWS, 198, Strand, and sold by all Booksellers and Newsagents.

ANSWERS TO THE CHARADES IN LAST WEEK'S NUMBER.

RIDDLES.—I. Speak and grunt. 2. Miss Bate-nan.
ANSWER FOR THE RIDDLE.—Ink-stand.
ANSWERS FOR THE SPELLING CLASS.—1, Juggler. 2. To the a marze'.

THE ILLUSTRATED LONDON NEWS.

LONDON: SATURDAY, DECEMBER 26, 1863.

THE last mail from America suggests at least one consideration to which we may venture to look with a certain amount of complacency. We have fresh and valuable testimony to the impartiality of Englishmen in reference to the American quarrel. It may be useful to note this, as hereafter, when the war shall be over, and the new state of things, whatever that may be, shall have been inaugurated, it will be extremely convenient to be able to appeal to facts, as admitted by the Americans themselves, in order to prove that we have never departed from the principle of fair play in our treatment of the unhappy war. We have taken neither one side nor the other; we have recognised the gallantry of each combatant, but we have refused to permit the sentiment of admiration for a people fighting for what it considered its rights to influence in the recognition of those to whom we could not even have sent an Ambassador in safety. Nor have we allowed our detestation for the slave system to induce us to give material aid to those who, at the outset of the war, not only had not set it down for the object of their continued slavery as the price of the preservation of the Union. That we have held the balance fairly has been hitherto chiefly proved by the abuse lavished upon us by Northern speakers and writers; but the South, now that nothing can be gained by forbearance, is taking up the anti-English cry, and Mr. Davis is as "bitter," if not as vulgar, as the *New York Herald*.

Here it must be remarked that the Southerns are simply returning to their original state of mind. When the South had opened fire, the first cry was to prove that it had no desire to destroy the Union. For years previously nearly all the serious and earnest American attacks upon this country were made by the paper above mentioned, and other papers which, if issued in the North, were in the hands or at the command of the slaveowners. The "peculiar institution" of the "chivalric" press were not things to be much regarded—they were the effervescent effusions of national prejudice, and little more. We caricatured the Yankee, and he called us names; but these interchanges of blows broke no bones. The power in the Union was Southern power, and for years all the more important offices were filled by able men, who foresaw what Washington had foreseen, and who, as we now know, were preparing everything for the outbreak. They knew that there was one great question in which England could be with the Southern interest—the question of slavery; and there was, in their attacks upon this country, a reality of hatred which it would be absurd to confound with the petulances we exchanged with the mere Yankee. We are not complaining of this. The South believed that it could not exist without the "domestic institution;" and, as Mr. Davis fairly says, England thought that institution necessary in days gone by. At the same time, he has no more right to visit the sins of our fathers upon us, or to assail us for having nobler views as to our duties to our black fellow-creatures than our fathers held, than he has to upbraid us

for discarding oil for gas, and stage waggons for railway cars. Letting this unreasonable taunt pass, as little in accordance with the spirit of progress so much talked about in America, we would say that the South, and those in the North who had Southern interests, hated England for a very good and natural reason, and lost no opportunity of imparting that fact. It is one which this Journal, in the recollection that its pages are not prepared for the day only, but will be referred to for the history of the times we live in, has repeatedly brought under the notice of our readers at the time when the gallant struggles of the South were exciting an admiration that tended to make a generous nation like our own forgetful of certain antecedents, which, nevertheless, ought not to be forgotten.

But the Sumter gun silenced the anti-English Southerns, and the Confederates fought on in a way which has never failed to command English sympathies. We were never brought face to face with the slavery question, for the reason that the war, when it began, had nothing to do with slavery. Or, if we had to touch the topic, it was forced upon us by the hypocrisy of certain folk in the North, who had the coolness to describe the war as waged for the liberty of the blacks, while the Chief Magistrate was solemnly offering him as a perpetual slave to those who would make submission to the Union. Having ridiculed that outrageous nonsense, we had ample leisure for admiring the skill of the Southern leaders and the bravery and endurance of their men. These points became more and more worthy of note as the war went on, and the North, after its first clumsy struggles, went to work with more earnestness, made a real blockade, and by enormous levies from a worthless population which it was only too glad to expend, measured its military purse, so to speak, against that of the South, but to a large extent gave counters for sovereigns. When the sea was blocked up for the South and it was forced to take to manufactures which it had previously despised, and when its citizens were sent out to sacrifice their valuable lives against the rabble which the North hired for the fray (be it ever remembered that we speak only of the earlier levies of the North, and that we do all honour to the Federal citizens who, later, responded to the call of Government), it was almost impossible not to wish well to the Confederates, who were contending against nearly all the disadvantages that can be opposed to a people in arms. And we may safely appeal to themselves, and also to the Northern press, which flamed with indignation at England's courtesies to "rebels" (there were some rebels in America, if we remember aright, in George III.'s time, and they saw no sin in rebellion), whether the British press and British society generally were niggardly in recognising Confederate exploits and endurance. But we would not recognise Mr. Davis, because, among other reasons, it would have been rather humiliating to England had a nobleman sent out with credentials to that gentleman been snapped up by a Federal cruiser, and compelled to write to the Foreign Office from Lord Lyons's house.

The Federals, having abused us for three years for not sympathising with them and wishing Mr. Seward the success over the Confederates which he wishes the Emperor of Russia over the Poles, have begun to understand us a little better. Mr. Beecher came with his treacle, and ever since his return has put very little brimstone into it, not more than could be expected from a political clergyman. Mr. Lincoln is almost complimentary, and is not afraid to say that we have not encouraged the breach of treaties, and have shown some good faith in restraining the supply of armaments to be used against a friendly nation. The *Herald* certainly menaces us with a Monitor or one of her sisters, which is to be moored "opposite London," and is to make the capitulation of the metropolis a necessity; but, as the American ironsides seem to have an unpleasant habit of sinking at their moorings, we may regard this threat as a friendly joke for the present. We behaved well, it seems, in informing the Federal Government of the conspiracy in Canada; and, upon the whole, in spite of the threats to tear old Mother England's hair, we believe that the North is regaining its good sense, and, even should the war end in three months, as Lord Lyons is reported to believe it will, we shall not, we think, be attacked by a Federal fleet on this side Midsummer.

But now it is the Confederates' turn; and they resume the line of argument and invective of old days. We are selfish and timid, and, at the same time, sentimental and bold; and we are so autocratic that we abhor the idea of a new and a free State; and we are so democratic that we detest the natural aristocracy of America. We do not care in the least about the slave; but we let our interest in him make us blind to the claims of the free man. We are glad to see the Union split up, and we desire that the yoke of the White House should be imposed upon those who detest it. We are horribly afraid of a war with France, and we have menaced Napoleon with the fall of his dynasty if he interferes in behalf of those against whom the Orleans Princes fought. The floodgates have but just opened, and this is nothing to the cataract that is coming.

Well, it is Christmas, and we are bound to have no ill-feelings against anybody. But, even were we not chronologically fettered, we could entertain no anger against the South for thus bearing large and valuable testimony to the impartiality of England. We have pleased neither party, and a judge who gives a just sentence is usually similarly unfortunate. But the displeasure of extreme people is the crown of the moderate and righteous. Therefore, we are well pleased at the close of the year to add to our record that the South is as angry with us as was the North.

Mr. Charles Dickens gave readings from his works at the Chatham Mechanics' Institute, of which he is the president, on Tuesday week, to a numerous audience. The institute benefited between £70 and £80.

THE COURT.

The Queen, whose anticipated departure from Windsor Castle on Thursday se'nnight was delayed at the last moment, owing to the boisterous weather prevailing in the Solent, left for Osborne at three o'clock on the following day. Her Majesty was accompanied by Princess Helena, Princess Beatrice, Prince Leopold, the Princess of Hohenlohe, and Countess Blucher. The suite in attendance consisted of the Countess Dowager of Mount-Edgcumbe, the Hon. Mrs. Bruce, the Hon. Caroline Cavendish, Lord Alfred Paget, Lieutenant-General the Hon. C. Grey, Colonel the Hon. Sir C. B. Phipps, Dr. Holyman, and Mr. Buff.

On Saturday last Prince Alfred and Prince William of Hesse, attended by Major Cowell and Captain von Zangen, arrived at Osborne, where Prince Alfred will pass the Christmas holidays. His Royal Highness i expected to return to Holyrood Palace at the end of a fortnight. Lord Stanley of Alderley also arrived at Osborne and had an audience of her Majesty.

On Sunday the Queen, Prince Alfred, Princess Helena, Princess Louisa, Prince Leopold, and Prince William of Hesse, attended Divine service, performed at Osborne by the Rev. G. Prothero.

On Monday the Queen, accompanied by Princess Louisa, walked and drove in the grounds of Osborne. Princess Helena, attended by Lady Caroline Barrington, drove to Ryde. Prince Alfred accompanied Prince William of Hesse to London, en route for Germany. Prince Alfred returned to Osborne.

Lord Stanley of Alderley left Osborne for London.

The Queen is in the enjoyment of excellent health, and, with the Royal family, takes daily walks and drives in the vicinity of Osborne.

THE PRINCE AND PRINCESS OF WALES.

The Prince and Princess of Wales, attended by the Countess of Macclesfield and Lieutenant-General Keppel, left Frogmore House for Osborne, on Tuesday, at a quarter past ten o'clock. Their Royal Highnesses travelled in a saloon carriage attached to the ordinary train, and proceeded, viâ Basingstoke, to Gosport, where they arrived at two o'clock. The Prince and Princess went on board the Royal yacht Fairy, which crossed at once to Osborne.

The Prince and Princess will remain at Osborne about ten days, and afterwards return to Frogmore House.

On Thursday se'nnight the Prince and Princess gave a dinner-party at Frogmore House. Princess Helena and Princess Louisa were present.

On Friday se'nnight the Prince and Princess drove to the Windsor station of the Great Western Railway, and took leave of the Queen upon her departure for Osborne. Subsequently the Prince, attended by Lieutenant-Colonel Keppel, went out pheasant shooting in the preserves of the Home Park. The Duchess of Cambridge and Princess Mary lunched with the Prince and Princess at Frogmore House, and returned to Kew in the afternoon.

On Sunday the Prince and Princess attended Divine service in the Chapel Royal St. George. The Prince occupied his own stall as Knight of the Garter; the Princess sat in the Royal stall adjoining. The Rev. Seymour Neville and the Rev. Mr. Tapisfield were the officiating clergymen.

His Royal Highness the Duke of Cambridge has arrived at Gloucester House from visiting the Marquis and Marchioness of Bath, at Longleate, Wiltshire.

Their Royal Highnesses the Duchess of Cambridge and Princess Mary are passing the Christmas at Kew.

His Excellency the Belgian Minister and Mdme. Van de Weyer left town on Saturday last for New Lodge, Windsor Forest.

The Duke of Newcastle left town on Tuesday for his seat, Clumber Park, Nottinghamshire.

The Duke and Duchess of Montrose left Belgrave-square, a few days since, on a visit to the Earl of Powis, at Powis Castle.

The Duke and Duchess of Somerset have left the Admiralty for their seat, Stover Park, Devonshire.

Emily Duchess of Beaufort has left Hill-street, to join the circle assembled at Badminton House, Gloucestershire.

The Marquis and Marchioness of Ailesbury have arrived at Savernake Forest, Wilts, from a tour of visits.

The Earl and Countess of Craven and the Ladies Craven left town on Tuesday for Ashdown Park, Berks, for the Christmas holidays.

The Earl and Countess of Mount Charles have left Rutland-gate for their seat, Bridge, near Canterbury, for the winter.

The Earl and Countess of Malmesbury have left Stratford-place for their seat, Heron Court, Christchurch, Hants.

The Countess Dowager of Tankerville left town on Tuesday for Broadlands, on a visit to Viscount and Viscountess Palmerston.

Viscount and Viscountess Palmerston left Cambridge House on Saturday last for Broadlands, Hants.

Viscount Walden has left town to join the family circle assembled at Yester House, Haddingtonshire.

Viscountess Jocelyn and the Hon. Misses Jocelyn have arrived at Broadlands, Hants, from Torquay, for the Christmas holidays.

The marriage of the Rev. Professor Stanley, D.D., Dean of Westminster, with the Lady Augusta Frederica Elizabeth Bruce, daughter of the late Thomas, seventh Earl of Elgin (and sister to the late Governor-General of India), took place on Tuesday in Westminster Abbey, by special license. The wedding was private, in consequence of the recent decease of the Earl of Elgin, in India.

The marriage of the Hon. Leonora Caroline Digby, second daughter of Lord and Lady Digby, with Mr. Baring, is fixed to take place on the 5th of January.

CHURCH AND UNIVERSITIES.

An ordination service was held at the Chapel Royal, Whitehall, on Sunday morning, by the Bishop of London.

Dr. Stanley's appointment to the deanery of Westminster is officially announced in Tuesday's *Gazette*.

The Rev. Francis Jeune, D.C.L., Canon of Gloucester, Master of Pembroke College, Oxford, and Rector of Taynton, Gloucestershire, has been offered by Lord Palmerston, and has accepted, the deanery of Lincoln, vacant by the lamented death of Mr. Garnier.

After twenty years' active service in overlooking the Church in Tasmania, failing health has compelled Bishop Nixon to resign. The Hobart Town papers bear witness to the great zeal and ability with which he administered his diocese.

On Sunday, the 13th inst., the village church of Grimley, near Worcester, was reopened. The chancel, which was much dilapidated, has been restored, and the north wall rebuilt. The eastern wall of the nave and the chancel arch have also been rebuilt, by the landowners chiefly.

Mr. George Cubitt, M.P., has provided an endowment of £150 for a new district church in the parish of Islington, and has intimated his willingness to erect, upon a site which he has given at a cost of £4000, a free church capable of accommodating 1000 persons, at an expense of £7000, provided the parish and district will undertake the smaller work of erecting the necessary permanent school buildings.

The Rev. W. Durst, Curate of Ladywood, Birmingham, has been presented with a gold watch and chain, an oak envelope and blotting case, and a small library timepiece, by the congregation, on his resigning the curacy. The parishioners of Hook Norton, Oxon, have presented a handsome inkstand and a purse, containing upwards of eighty guineas, to the Rev. J. R. Rushton, upon his return, after a short absence, as a mark of their esteem and as an acknowledgment of his faithful services to his flock and general kindness during the twenty-two years he has resided amongst them.

The Cape mail brings the intelligence of the opening of the proceedings against Bishop Colenso before the Metropolitan of Capetown and two of his suffragans—Dr. Cotterill and Dr. Twells. The Dean of Capetown had opened the case in a long and learned argument, and was followed by Archdeacons Merriman and Badnall. The latter was speaking when the mail left. Bishop Colenso had, by a personal friend, not a professional adviser, impugned the jurisdiction of the Court, then leaving it to take its course. Upon this question of jurisdiction the case will probably be brought before the Privy Council.

PREFERMENTS AND APPOINTMENTS.—The Rev. G. Maddison, Vicar of Grantham, to be Prebendary of Welton Parnshall, Lincoln; Rev. R. H. W. Miles, Rector of Bingham, to be Prebendary of Welton Beckhall, Lincoln; Rev. W. H. Milner, Vicar of Horncastle, to be Prebendary of Welton Rival, Lincoln; Rev. R. Ainslie, Vicar of Great Grimsby, to be Prebendary of St. Martin, Lincoln. *Rectories:* Rev. S. G. Baker to North Cheriton; Right Rev. J. Chapman (late Bishop of Colombo) to Wotton Courtney; Rev. J. Hull to Eaglescliffe, Yorkshire; Rev. S. Price to Yspytty Ifan, Denbighshire. *Vicarages:* Rev. R. Agassiz to Great Clacton with Little Holland, Essex; Rev. A. Newton to Preston, near Ledbury; Rev. J. Price to Bangor. *Curacies:* Rev. F. B. Hurcomb to Lyminster, Sussex; Rev. A. D. Murdoch to St. John's, Edinburgh. The Rev. J. S. Gilderdale, Second Master of Forest School, to be Chaplain of the Merchant Seamen's Orphan Asylum, Wanstead. The Rev. J. Bell to be Warden of Trinity Hospital, Clun.—*Guardian.*

THE UNIVERSITIES AND PUBLIC SCHOOLS.—A vacancy having been created in the chair of Scots law at the University of Edinburgh by the death of Mr. George Ross, the Faculty of Advocates met yesterday week to select two names to be presented to the curators of the patronage. The Faculty unanimously selected as the first name Mr. George Moir, Advocate, Sheriff of Stirlingshire. The second name chosen was the Dean of the Faculty (Mr. Moncrieff, Lord Advocate, M.P.), who is sent to the curators as a nominal candidate in the expectation that they will, as usual, choose the first on the list.

The winter speeches which are made at the conclusion of the half-yearly examination at the Merchant Taylors' School were delivered on Tuesday afternoon. The speeches consisted of scenes from Aristophanes, Molière, and Lytton Bulwer's "Money," and were delivered with great spirit and effectiveness. These were followed by a variety of translations by the boys from our best English poets, which did credit both to the scholarship and the elocution of the writers.

On Thursday week the delivery of the winter speeches took place in St. Paul's School, when Dr. Kynaston, the Head Master, bestowed the Thurston Memorial Prize on Mr. Clement Smith, the Captain of the school. E. A. Knox, South, and Cowle, who were highly commended, also received prizes.

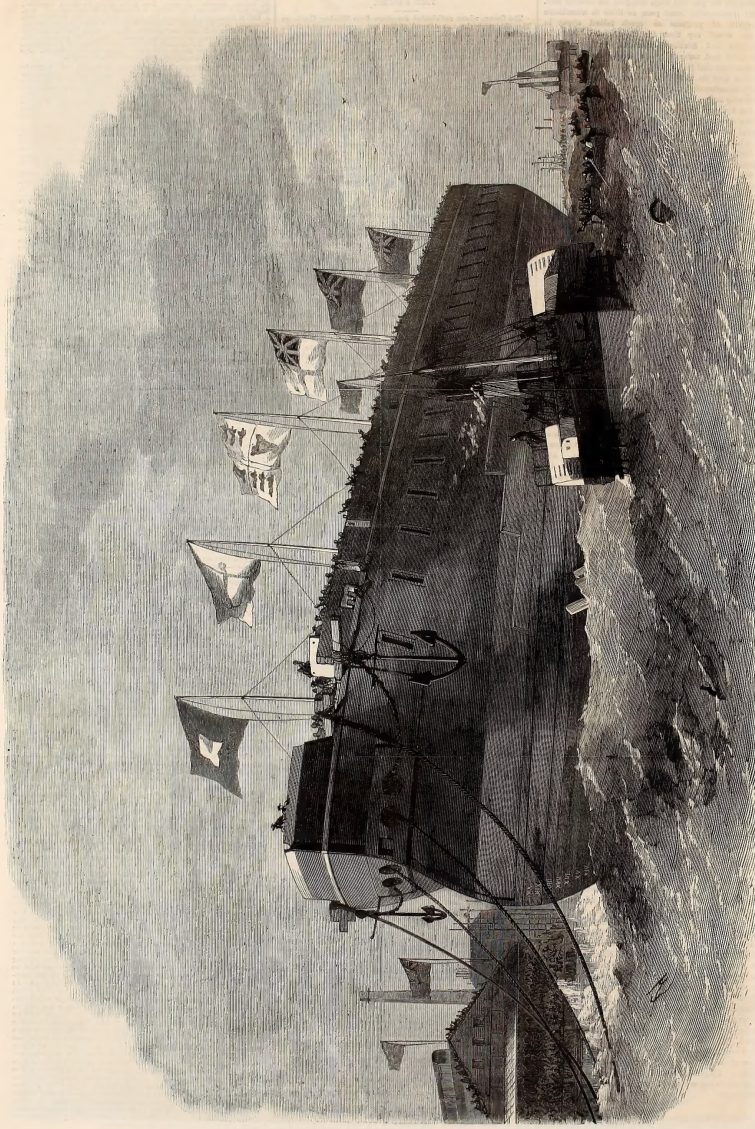
On Thursday week the Christmas speeches came off at Forest School. There was an unusually large assembly, and the performances, Greek, Latin, French, German, were excellent. The English part, Shakspeare's "Twelfth Night," represented in costume, was very successful. The school now numbers near 110 boys, and there is some idea of a further extension by enlarging the school buildings and adding another master's house for boarders.

On Monday, at the Grammar School, Farnham, the public *vivâ voce* examination, which usually follows the written one, was presided over by the Bishop of Winchester, who himself examined the boys in English and Latin. There were present also the Bishop of Mauritius and the Ven. the Archdeacons of Surrey and Winchester: the two latter gentlemen taking part in the proceedings. The Right. Rev. president and Archdeacon Utterton paid, each, a well-deserved compliment to the ability and worth of the Head Master, Mr. Charles Stroud. The prizemen were Hart, Hart (minor), for classics and mathematics, and Edmonds, for drawing.

Several grand hunting-parties have just taken place in the forest of Hertogenswald, near Dolhain, in Belgium. The Count de Flandre took part in them, and killed two wild boars and a large number of deer.

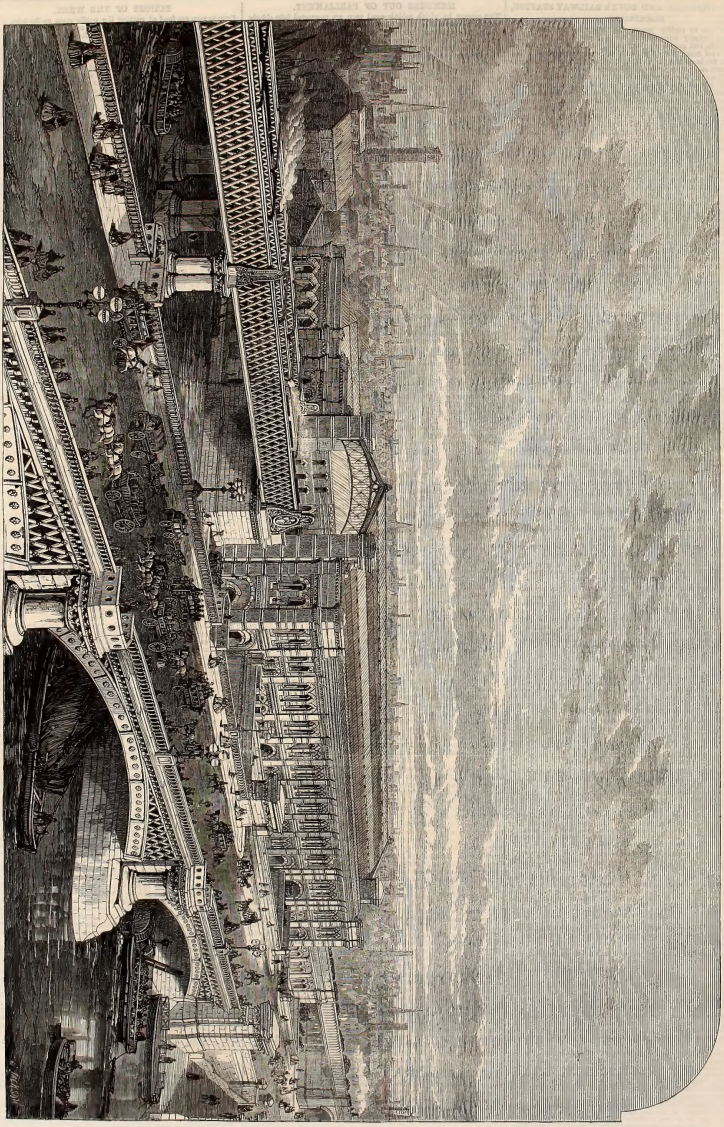
The *Moniteur* publishes a despatch from Suez, stating that the fresh-water canal is completed. The water was a mile and three quarters from Suez.

A number of English gentlemen living in Paris have lately organised a football club, to which is to be added athletic indoor exercises of a gymnastic character. The football contests take place in the Bois de Boulogne, by permission of the authorities, and surprise the French amazingly.



In our Impression of the 12th inst. we omitted to mention that the owners of the twin screw-steamer Far East are Mr. Abbott Dunbar, Messrs. Gellatly, Hankey, and Sewell, of the firm of Dunbar and Co.; Mr. D. Fletcher, of the firm of Fletcher and Co., China; Messrs. J. Davies and Henry Jones—the latter gentleman being the commander.

The late Mr. Riddell, Advocate and antiquarian, directed that his papers, consisting of many rare ancient MSS., should be sold to the Faculty of Advocates for "a moderate sum," if they wished them. Lord Lindsay has offered to give £500 for them, and to bequeath them to the Advocates' Library by will; so that the Faculty of Advocates, who, at the meeting on Friday, accepted his Lordship's offer with thanks, will ultimately receive these valuable documents for nothing.—*Scotsman.*



THE LAUNCH OF THE MINOTAUR.

HER Majesty's iron-clad screw steam-ship Minotaur was launched on Saturday week from the yard of the Thames Ironworks and Shipbuilding Company, Blackwall, in the presence of an assemblage computed at 10,000. Admirable arrangements were made by the company for so large a gathering, and although probably not fewer than 3000 persons were conveyed by pontoon and small boats across the creek that divides the yard—the creek into which the ship was launched—not a single accident occurred. The dimensions of the Minotaur exceed those of any other ship afloat; and when the Agincourt is launched from the yard of Messrs. Laird at Birkenhead, and the Northumberland from the yard of the Millwall Company, there will be three ships of the class. All three were ordered by the Admiralty on Sept. 2, 1861, and should, according to contract, have been launched six or seven months ago; but many changes have been introduced into all the ships, and hence the delay. The launching of the Minotaur was managed to perfection. When the last supports had been knocked away, the first effort of the hydraulic ram moved her. Mrs. Romaine then dashed the bottle of wine against the iron bows, and the huge vessel glided majestically into the river, amid the cheers of thousands. The work of fitting the Minotaur with her five iron masts, and generally completing her for sea, will be effected in the Victoria Docks.

The length of the Minotaur between perpendiculars is 400 ft., her breadth 59 ft. 4 in., and her depth 41 ft. 6 in. She is of 6812 tons burden, builders' measurement, and she is to be propelled by engines (in course of making by Messrs. Penn) of 1350-horse power. Her armament is not yet fully decided upon, but it is expected that she will carry fifty guns of the largest calibre. Her internal construction is of the most massive description. The ship is built up from a keelson, formed of a huge bar of iron, about 40 in. deep. To this the iron ribs are bolted at intervals of 23 in. and 28 in. only. These ribs do not, however, rise in unbroken lengths through the whole framework of the ship, but are constructed in short lengths for the convenience of bolting to other longitudinal girders. The lower series or portions of the iron ribs vary from 10 ft. in length and 3 ft. in depth to 4 ft. in length and 18 in. in depth. These vertical sections or ribs, meeting with and joining the longitudinal girders, divide the lower part of the ship into a number of square cells, forming, in fact, a huge honeycomb of iron. Viewed externally, these ribs form the side upon which the inner skin of iron plates is secured, and upon which, again, rests the timber backing, and over this the armour plates—both the timber and armour plates resting on a ledge formed on the outer side of the ribs, and commencing about five feet below the water-line. Glancing again at the interior, it will be seen that above the lower section, or joints of the vertical ribs, there are five longitudinal girders, which stretch along the whole length of the sides and unite at the bow and stern; these intersect the ribs, and serve to give unyielding strength to the massive sides of the ship. The sides are held firmly towards each other by the thick and deep girders of iron, which stretch across the ship, and upon which the decks are laid. The upper deck is covered with iron plate, but above this is a flooring of oak. The height from the floor to the lower deck is 21 ft., main deck 9 ft. 2 in., and upper deck 7 ft. 2 in. in the clear. Running along each side of the ship, and shut off by iron bulkheads, are what are called the "wing passages;" they are 42 in. wide, and correspond with the height between decks. The wings again are divided into smaller water-tight compartments, so that in the event of a shot passing through the outer skin of the ship the water from the leak will be confined to its compartment, and through entrances by the man-holes the leak can be stopped and the fractured plate repaired. In the lower portions of the ship arrangements are made by which several hundred tons of water may be admitted into the water-tight compartments, the effect of which would be to steady the ship in rough weather, so as to enable her to fight her guns better, and, by lowering her several feet in the water, diminish the mark which she would otherwise offer to an enemy. The cutwater of the ship has a circular projection, similar in outline to the breast of a swan, and placed below the water-line, so that the ship may be used as a ram to run down an enemy. This circular bow, with a fine edge not thicker than two or three inches, is formed of a solid forging of iron, and it projects about 7 ft. beyond the apparent line of the bows. The weight of this prominence, or beak, is more than thirty tons. The armour-plates on the waist of the ship are 5½ in. Towards the head and stern, however, they are reduced to 4½ in. The total weight of the vessel, when completed, will be about 10,000 tons. Already, with only a part of her armour-plates on her and her engines to come, she weighs over 6000 tons. Yet it is confidently expected that her speed will be about fourteen knots per hour.

THE NEW IRON-CLAD FLEET: LAUNCH OF HER MAJESTY'S SCREW STEAM-SHIP MINOTAUR, 50 GUNS, FROM THE YARD OF THE THAMES IRON SHIPBUILDING COMPANY AT BLACKWALL.—SEE PRECEDING PAGE

THE LONDON, CHATHAM, AND DOVER RAILWAY STATION AT BLACKFRIARS.—SEE NEXT PAGE.

LONDON, CHATHAM, AND DOVER RAILWAY STATION, BLACKFRIARS.

THIS work, now so rapidly progressing, comprises two levels, the lower being entirely appropriated for a goods depôt, the upper for both goods and passengers—the main portion of the upper or passenger level being carried on iron columns and girders. The approach to the booking-offices is by an inclined road, commencing in the new street and passing over Holland street to the east side of the station. The passenger platforms, which, with their lines of rails, are included under one roof, are 700 ft. There is a cab and carriage road to the arrival platform, commencing on the south side of the new street, where it adjoins Blackfriars-road, and carried by an inclined road on arches alongside the high-level viaduct, and thence over the new street, by girders, to the platform. An entrance and exit for cabs and carriages is provided at the north end of the station, near the bridge, communicating by staircases with the platform and offices. The arrangements for the goods traffic, which has to be passed from the high to the low level, will be worked by means of hydraulic lifts. The goods level has direct communication with the River Thames, so that goods can be landed or embarked readily. A great novelty of construction can be observed in this building by the introduction of terra-cotta, brown stoneware, and blue Staffordshire materials manufactured under Taylor's patents, the application of which is not, as in many cases in the case, ornamental only, but constructive, in heads of different colours, keys and springers to arches, drip heads of brown stoneware in the face of the buildings, copings, cornices, blocks, sills, and labels to arches all built at the time of construction with the brickwork, and being fixed with cement, and indestructible, producing such an effect as the smoke of London will not easily obliterate. Terra-cotta has been previously used in this country ornamentally only, we view with pleasure this step in its use as a constructive material, successfully supplying in a brick building the place of stone, thus saving the expense of uniform in its texture and all kiln-burnt. The variety of colour introduced in such as adds greatly to the effect of the building, being judiciously distributed; relieves in a high degree the large masses of brickwork which are necessary in the station. The new station, like many others that are erected along their metropolitan line minor stations of a similar description, is a model of combination of construction and economy, and with equally good effect. Mr. Joseph Cubitt and Mr. T. F. Turner are the engineers, the architectural department having been intrusted to Mr. John Taylor, junior.

NAVAL AND MILITARY INTELLIGENCE.

WAR OFFICE.

1st Dragoons: C. Faith to be Cornet, vice Hall.
5th Dgns.: Capt. H. Dumaresq to be Captain.
7th Hussars: Cornet H. T. Hall to be Second Captain: Cornet O. P. T. Annesley to be Lieutenant.
6th Foot: Capt. G. C. Rose to be Captain: Brev. Major G. W. A. FitzGeorge to be Lieutenant-Colonel, by Battle of Inkermann: Lieut. A. Chichester to be Captain: Lieut. R. Hamilton to be Lieutenant: F. Hayes to be Ensign: Sergt. E. H. O'Dowd to be Paymaster, vice Hamilton, promoted: Sergt.-Major J. Hall to be Quartermaster: Sergt. J. Wall to be Lieutenant: Sergt. J. Hughes, from 41st: Sergt. J. W. Hall to be Paymaster, with the honorary rank of Major. 47th: Lieut. J. Dawson to be Captain: Ensign W. Bennett to be Lieutenant: F. Hall to be Ensign, by purchase.
8th Foot: Ensign Robertson—Ensign R. M. E. Ferguson to be Lieutenant: F. B. P. White to be Ensign.
Lieutenant-Colonel Hamilton to be Colonel.
Brevet.—Captain T. Scott to have the honorary rank of Major. Lieutenant-Colonels R. Dyas, C.B., and Lieutenant-Colonel C. Yorke to be Colonels.

ROYAL MARINE LIGHT INFANTRY.—First Lieutenants J. H. Squires to be Captain; Second Lieutenant W. Hall to be First Lieutenant: First Lieutenant H. S. Jones to be Captain; Second Lieutenant F. E. Champion to be First Lieutenant.

The Admiralty sent an officer to America some time ago to inspect and report upon the Monitors.

The next examination for direct commissions will take place at Chelsea Hospital, on Monday, the 1st of February, 1864.

The cruise of the 84 days since for the discharge of a large number of the workmen at Chatham has been countermanded.

The boys of Wellington College gave their annual concert on Monday evening in a manner creditable to the management, ingenuity, and energy. The performances were most successful.

The Lord of the Manor of Hendon has granted the fine screw frigate Aurora, recently put into commission at Devonport by Captain the Hon. F. Egerton, R.N., to be in attendance off Osborne during the residence of her Majesty in the Isle of Wight.

The Duke of Cambridge, as Governor of the Royal Military Asylum, and Colonel of the Corps of Military Staff-sergeants, will "break up" at Woolwich on Monday, and delivered the prizes to those schools to which they have been awarded by the Board for efficiency in study and exemplary conduct during the past half year.

THE LATE MR. MOSTYN MOSTYN.

A handsome testimonial of silver plate has been presented to Lieutenant Wallace, who has been the Quartermaster of the Civil Service Rifles since the corps was ordered to signal service in the Crimea. This has lately received an official appointment, which necessitates his leaving London: and as a token of the esteem in which he is held by his comrades, an unsolicited yesterday to bid him farewell, when the plate was presented to him. The chair was occupied by Lieut.-Col. Gale.

The prizes won at a supplementary prize meeting of the Victoria Corps were presented to the successful competitors by Captain the Duke of Wellington's riding-school, Knightsbridge. The distribution was made by Colonel Peel. The value of the prizes amounted to upwards of £140, the greater part being given from a fund half of which was contributed by the Duke of Wellington, Lieutenant-Colonel Somerset, and others, and half voted by the committee from the funds of the corps.

The Lord Mayor distributed the prizes to the members of the West Middlesex was made yesterday week by Colonel M'Murdo, Inspector-General of Militia, assisted by Lieutenant-Colonel Somerset and Captain Radcliffe, the Lieutenant-Colonel of the corps, in opening the proceedings, said that the regiment was in a most flourishing condition than it had been in any of the previous years of its existence.

The quarterly competition for three University tankards, given by Messrs. Searle, Sons, and Co., took place on the range at Wimbledon on Saturday at Hailsham. A large number of promising shots competed for the tankards, which were won by the following members of the 1st Lieutenant Christie, 24 marks; Private Thomas, 30 marks.

Last week the whole of the non-commissioned officers and privates of the 20th (North) Middlesex Rifles presented their Adjutant, Captain H. Wallis Watkins, with a handsome testimonial.

The twenty-fourth match for the Inland Revenue challenge cup took place on the Wimbledon range on the 17th inst., between ten men of the St. James's company, Queen's Westminster, and ten men of the Adelphi company, C.S.R.V., from within the St. James's company, for the third consecutive time, proved the winners.

THE FASHIONS.—The article written by our Correspondent in Paris to accompany the Engraving of the Fashions had not arrived when we went to press.

A Frenchman has patented an invention for pulverising the refuse of state and mixing with it some substance which produces a most durable material which answers the same purpose as some kinds of our most valuable stone.

At a meeting of the committee of the Birmingham Musical Festival, held on the 17th inst., it was announced that the next triennial festival take place on Tuesday, the 6th of September, and three following days, in the forthcoming year, and that Mr. Costa be appointed conductor.

A postal convention has been concluded between England and Italy for the transmission of commercial samples, the new arrangement on the 1st of January next. Another convention between Italy and France is on the point of being concluded relative to the exchange of money.

The *Times* of Wednesday says, in reference to the court-martial on Colonel Crawley:—"The exact terms of the finding are for the present a secret, but it is pretty well understood that the Court took a favourable view of Colonel Crawley's conduct, making ample allowance for the circumstances in which he was placed."——A subscription has been set on foot to defray Colonel Crawley's expenses, and the Earl of Cardigan heads the list with £100.

The one hundred guineas offered, in three premiums, for the best picture exhibited at the Glasgow Institute of the Fine Arts were awarded as follows:—20 guineas, for the best figure-picture in oil, to J. Neil Paton, R.S.A.; 10 guineas, for the best landscape in oil, to Samuel Bough, R.S.A.; 20 guineas, for the best water colour, irrespective of subject, to Henry Tidey, London. The competition was confined to British artists, and 8 pictures painted within the last two years.

MEMBERS OUT OF PARLIAMENT.

THE process by which middle-aged men are converted into elderly men is nowhere to be better observed than in the House of Common. The middle-aged men who were stalwart members, in the physical sense, twenty years ago, are decidedly elderly, and something more now. We remember, about so many years ago, seeing Sir Charles Wood, when passing through St. James's Park with two of his young sons, leap lightly over a hurdle at which the boys hesitated. Could Sir Charles leap over a hurdle now? Take Mr. William Williams, for example—who more sturdy, erect, and exemplifying bodily strength than he? But, at a recent meeting of his constituents, when he attempted to speak, he found the difficulty that he was heard three rows of listeners off from the place on which he stood. But even this circumstance was characteristic of Mr. Williams, whose steady—almost dogged—adherence to the discharge of his duties to his constituents, in and out of Parliament, is well known, and is still appreciated, we presume, in Lambeth. Every body is aware that Mr. Williams's aim as a member of Parliament has been in the habitual discharge of duties which, if not brilliant, is financial reformer-in-chief to the nation. That he failed to attain the end he desired, is certain, for he never attained the necessary weight with the House; but it would be untrue to say that he has done nothing in the vocation to which he devoted his Parliamentary life. More than one suggestion of his with reference to the management of the public treasure has been accepted by Mr. Gladstone, and he has been thereby enabled to effect—notably, the system of including the charge for the collection of the revenue in the financial statement of every year: the benefit of which publicity supervision of Parliament on items of expenditure amounting to six or seven millions, as to the saving of which Mr. Williams has never ceased to plead. Even if this were all, it must be acknowledged that thereby Mr. Williams has done the State some service.

There can be few more trying ordeals than the meeting face to face of subordinate members of the Government and their constituents, after the fashion of the Lambeth Mr. Williams. Constituents of this sort are apt to deal a little more harshly with officials than they would with a private member, because they have a feeling, with a not unnatural idea that, as they made the member, by consequence they made the man. On the other hand, the official has, on a occasional alarm, lest he should commit himself on some point of public policy, and so get a wigging from his chief when he returns to the governmental fold. Mr. Layard, for instance, must have been publishing themselves amongst their constituents; and, certainly, if ever were to come out of his reserve, it would be amongst they whose complacent self-esteem would carry them through all difficulties with ease. But, even if we have an understanding between them and their own electors, one would select the Marquis of Hartington and Mr. Layard. Although the latter has held office since he entered the talks and conducts himself in the house as if he were one of the Nestors of politics. Having exhausted the pleasures of office, he felt the want of a change, and, as he was willing calculated to keep a man awake; and there is no doubt that he does his work in the House. Before July it will be seen what work is more than can be said. Tall, slim, possessing the sources of voice, presence, and manner, he would be a formidable foe. The languid nonchalance which is another characteristic of the race, he looks, when he rises in the house to represent his department, about the last man in the world to be suspected of having a hard office should be intrusted in that place. But soon after he has begun to speak you perceive that he has got his subject well in hand, that he is well informed, and that for the rest, whether his manner be pleasant or disagreeable, he is master of his work. He has shown what he says to be accepted, *foi de noblesse*—speaking, as he does, not as a trumpery Under-Secretary, but as a Marquis, who will some day be a great Duke. Having by recent elections become a Whig star in a part of his constituents, got himself within the range of the Yorkshire Whigs, he is endeavouring to attach to his person all the qualities of coolness and indifference to what any one says or thinks about him that have been ascribed to Mr. Layard. We have somehow a notion that the Marquis is not a long-lived politician, and that he occupies this public room only as a stepping-stone to that when Mr. Layard was chosen to represent this borough (and his election was by no means a foregone conclusion), he was unattached, and therefore called himself an independent politician, while he had not heard of in votes as a Radical candidate. He, therefore, he slipped into place as Under-Secretary for Foreign Affairs, which, not being technically an office under the Crown, but, in fact, a head-clerkship, he was not obliged to resign his seat, and so stood at the House to be vacated and involve a re-election, the Southwarkers had to that day of Mr. Layard's return. Mr. Layard has also to deal with eyes of unlimited and unalloyed favour on this their representative. He is, indeed, so steady a supporter of the ministry, in his way, quite as much an "attaché" of the Government as Mr. Layard; for he accepted a recordership from them, and is regularly returned as one of the Whigs. Mr. Layard's acceptance of the recordership rendered necessary Mr. Locke's coming to his constituents for re-election. Mr. Locke, indeed, has a great deal to thank for that office only for the judicial dignity which attaches to it, and for the ownership that the Crown has given him of a most valuable property-stain in Westminster Hall. They therefore more easily condoned his Ministerial proclivities than they did those of Mr. Layard. Mr. Locke is a bar man, and has always been a better lawyer than his own than Mr. Layard. His self-confidence is really charming, from a certain simplicity which goes with it. He is so supremely unconscious that he believes in himself; he has within such a sense of superiority over every one else, that he is always perfectly at his ease. He is deep in the ruins of centuries; he is so imperturbably convinced that a man who has made a great deal of money at the bar must be a foreign politician, that, do what you will, you cannot but accept him on his own estimation when he is talking to you. At his meeting in Lambeth he is evidently prepared to find enemies, and that his expected would have flowed smoothly on, unbroken except by interesting doubts, which were immediately answered and another set in: he caught this hope; they badgered him a little, and, to say truth, enough out of the way to make the meeting lively, but not successful, to adapt and readapt his oration to the occasion. If, however, we were an Under-Secretary, desirous of tasting as much as possible of the sweets of office, and anxious to have as little trouble or interference, we should prefer to be elected of any other than a party metropolitan constituency.

While discoursing of an Under-Secretary for Foreign Affairs, "in posse," we may remark that Lord Stanley is understood to have been proclaiming himself and asking for a judgment on his merits at Kendal. Mr. Warton Mr. Seymour Fitzgerald to be a political writer of the current political period. Before 1848, if any one man familiar with the House had been asked what sort of member Mr. Seymour Fitzgerald was, he would have replied that he was a Whig. He was active rather in the lobby than in the house, and had there a well-bred, lounging position in the House, and a speech one night when he exhibited most decided symptoms of what in another place would be called "stage-fright." Well, Lord Derby put him into no very responsible office, inasmuch as he represented in the Commons the weakest department in the Conservative Ministry, and, as we have said, he continued to be a political writer tion; and now there is not a bolder or more decisive critic on foreign affairs than the whilom timorous and by no means pommel member for Horsham. There is no doubt that when in office he contributed very much to the success of Lord Derby's Ministry, having been a member of the Committee on the Kitchen and the Refreshment Rooms of the House, he had previously been in a manner forced into acquaintanceship with most members of all classes; and if, as is likely, he showed real in his function of saying that these creature comforts were attended to, he naturally made way almost into their affections. Altogether, Mr. Fitzgerald has secured a foremost position in the House, and will keep it, if he does not fall too deeply into a failing which seems to beset him—that of making long speeches.

The State apartments of Windsor Castle are open to the public, under the usual regulations.

ECHOES OF THE WEEK.

PUBLIC men are fond of putting the public press on its trial, if so dignified an expression may be allowed to do duty for the vituperative expression of inexcusable rage. Earl Russell, some seven or eight years since, described modern journalism as "a rabid press," for no other reason than that he had become careless as to modern reform. Mr. Cobden has recently had his say, until everybody is tired of saying another word on the subject; and, later still, Colonel Crawley has lavished the terms of his delicate vocabulary with unctuous perspicuous on the same subject. But, to some extent, there is some justification for the Colonel. Undoubtedly, he has suffered much from the press: but then the press could no more avoid inflicting sufferance—once granted that the Crawley case was a fit subject for print—than Colonel Crawley, according to his own account, could avoid inflicting suffering on Sergeant-Major Lilley—once granting the Sergeant-Major to be a fit subject for suffering. It is more a question of the people than of the press. The House of Commons did not satisfy the country until the debates were reported and widely circulated; and thus an outcry existed which no Parliamentary debate with Mr. Cockburn's speech should occasion no wonder. For the rest, the press has been accused on this subject on two principal State papers, and if the Colonel desire the legitimacy of such channels of information, any attempt to enforce them must be hopeless. In the early stages of any discussion, and later, press as well as public must necessarily be liable to much mutability of opinion; but for that reason it does not follow that there should be no opinion at all. As well might it be said that the man who stakes money against a horse or a yacht is standing trainer or helmsman, and that he is unjust to refuse an opinion before race or match comes off. Such matters usually evolve themselves in the end; if they do not, there is no injustice done. During the late trial public opinion frequently changed day by day. It changed enormously when Colonel Crawley had read his defence. Again, it veered somewhat after the prosecutor's reply.

A habit of change, founded probably upon a love of it, belongs to most men. The French are celebrated for it, and it is constantly exercised by the English on matters of the highest importance to the welfare of the country. This tendency was lately humorously described by the Count de Beaumont in the French Senate. Public dinners are given, and the guests, the chief of whom are great men, take, say, six or that, and straightway the people agitate passionately, which, before dessert is agitated to the least point, other meetings, dinners, and Ministers are before them, with a totally different cry, and the people forthwith set about agitating against the Ministry which they had before agitated about. Allowing for a Frenchman's exaggeration, the caricature will be recognised. It is not bad satire on what has occurred in our own country, and in the present system—a coalition Cabinet. Most certainly, looking back at the great events of the early stage of governments by party, it may be confessed that, from Prime Minister down to hungry expectant of sweets of place, no two individuals of a party ever talked two sides of a question to the English people.

In many ways the Parisians would scarcely like to be told that they are beginning to closely resemble Londoners. Yet it is that is related. During the years 1861-61 the population of the City decreased 30,000, while the suburbs of Paris gained considerably more than half a million. But all this time there was a strong emigration to the suburbs, and which is increasing year by year. The railways seem likely to extend London from Windsor to Ascot, from Hertford to Reigate. A line of railways leads to a line of houses, and more and more Londoners congregate in the suburbs. Even in Paris the same flexibility may be observed, according to the accounts of a recent architectural and scientific traveller. In Paris improvements, the new streets for old ones—and all founded on sound principles for making artillery effective—have already driven very many of the good people of Paris into the country to dwell, where small brick houses are beginning to sprout up in a night, very much after the fashion of our "villa residences." Even the old detached gardnies, which have emanated from private public spirit, or the desperate wickedness of the Emperor finds a railway pass as far as this or that side of Versailles, perhaps, more comfortable, more healthy, and much cheaper than the old style of living in a gay magnificent boulevards, in straight lines and at right angles. The concept of "progress failed" has come to do in assisting to confound political mind and teaching the harassed human heart to "rest and be thankful."

Suburban fresh air is becoming more and more an important subject amongst ourselves. Surely, if the parks of the Regent, Hyde, Green, or St. James' may be called the lungs of London, the commons and fields which lie outside may be looked upon as the "breakers" of the metropolis, which feed the fresh breeze to it, and serve to clear the over-incumbent brow. Recently, some gentleman, whose project is better than his English, proposed the name of Epping Gravesey, a part of the common, and demanded of the Board of Works permission to inclose sixty-three acres of the same, with a view to building upon it large pavilion residences, conveniently organised, and the landowner promptly informed that the manor will give a fine for the enfranchisement of the property, that they will procure to building, and that they are willing to purchase the manor back at the price which they have given. This is a quaint way of estimating the value of money, and the lord of the manor did not leap very high at the suggestion. Let us hope to do with the Board of Works who can say? They do not know themselves; and they are at present uncertain regarding an Act of Parliament which protects such places from encroachment, and yet appears to authorise the inclosure with some reservation about copyhold, and sense scarcely the kind of intention most calculated to secure the object of that beautiful common, the people, the Metropolitan Board of Works. People should take advantage of the Metropolitan Open Act to secure for the retention of this great space. Whilst Londoners of all classes are undeniably being driven out of London, it is surely as well to keep such commons as Wimbledon, Epping, Hampstead, and Highgate for the most open-air crowded geese who already inhabit them.

Out of evil comes good. Of late recent severe accidents have afforded to pet the public mind greatly to rest. The storm in which the Royal Charter was lost off the Welsh Coast was unexpectedly ready to have been lost did but serve to show how astonishing was her strength. Her framework was not strained, her plates were not shaken. But if large vessels are to ever a ship's side the fault at least cannot be laid to the ship. The captain, master, or pilot, or whoever may be responsible in these days of Royal Navy national command, may be unable to bring the ship's head to the safest quarter, but the wind in heaven may be far too powerful for any human opposition. But the ship cannot be at fault; and therefore the fierce tempest did but show the strength of the vessel and the skill of her builders, and give extra interest to the launch of the Monstrous. Similarly, the disastrous fire off Cherbourg is convincing proof of the excellences of our private builders. A well-built ship-of-war will resist even a very extraordinary fire, and, with tolerable good luck, there can be no fear of the conflagration spreading from out its original birthplace. At present it is uncertain, but the damage done may be the means of forming the nucleus of another handsome City street. Everywhere they are wanted.

From a bankruptcy report it appears that Signori Tamburini, Garbini, and others of the Italian company invest their early-won fortunes in a joint-stock Court millinery establishment in Regent-street, and that, after a short experience, these gentlemen carried their wealth with sufficient ease to induce them to spend it freely amongst the people who pay their way in cash. But, no; they "never" would take a double profit out of their fine voices. Wait will the ladies think of you now, Elvino, *Amor! Tu sapevhe!*

Thulbergé gave his farewell concert at Richmond on Saturday last, and left on Monday for Naples. It is said that the provincial tours of 1861 and 1862, in England, Ireland, and Scotland, have yielded a net profit of some eight or ten thousand pounds.

Accounts from Yarmouth state that the number of fishermen sent away from smacks connected with the eastern coast during the late gale is now ascertained to be thirty-three, and, as intimation smacks are expected to arrive, which number among them ninety-one men and boys, the total of victims amounts to 124 persons.

FINE ARTS.

DRAWINGS FROM THE HOLY LAND.

THERE is now being exhibited at the gallery of the Institute of Painters in Water Colours, Pall-mall, a set of thirty drawings, by Herr Carl Werner, of Jerusalem, Bethlehem, and the Holy Places. The public will welcome these drawings because, taking the whole series, they will probably be deemed the most important, complete, and satisfactory illustrations of the most interesting and historic sites in the Holy Land which have yet appeared. Herr Werner brought special qualifications to the delineation of such scenes. He is one of our most vigorous colourists and most accurate draughtsmen of architectural subjects. His linear perspective and knowledge of construction are scarcely ever at fault—resulting, we believe, from the artist having originally studied architecture with a view to making it his profession. He has, besides, passed upwards of a year in the Holy Land, executing these drawings "on the spot;" with what amount of personal discomfort those who have experienced domestic life in Palestine will best understand. Moreover, he has obtained permission, through the intervention of the Prussian Consul, to paint views—as, for instance, the "House of Pilate," never before represented. He was allowed to paint the interior of the "Mosque of Omar," with the large rock, covered with a rich silken awning, in the midst—the rock on which the Mussulmans believe Mohammed was raised to Heaven, and which afterwards returned and placed itself on its old site—and all that was to be seen within the Temple area, two janissaries having daily accompanied him on his sketching visits in order to protect him from the fanatical Mussulmans, and from the thirty negro keepers of the temple, who are armed with "mazzas," and knock down every one they find within the temple precincts without a special permission. One of the finest of these drawings was exhibited in the same gallery in the last exhibition of the Institute of Water-colour Painters, of which Herr Werner is a member. We allude to "The Jews' Wailing-place," a wall of immense stones, a portion, it is believed, of the substructure of the ancient Temple of Solomon, and where every Friday the Jews now congregate to pour out lamentations for the loss of country and political nationality, and to pray for their restoration. Other drawings in which the artist is seen to especial advantage are the following:—"Chapel in the House of the High Priest Caiaphas," now a little Armenian convent, and showing the entrance of a small room where Christ is said to have been confined on the night before the crucifixion—a highly-finished drawing, beautiful in colour. "Vestibule of the Church of the Holy Sepulchre," with the stone of unction, whereupon, tradition says, the Saviour's body was laid and embalmed previous to its burial; and the enormous brass candlesticks—two belonging to the Catholics, two to the Armenians, and two to the Greeks. "The Holy Sepulchre," consisting of two rooms, the second of which contains the sarcophagus itself, and is illuminated by about forty silver lamps belonging to all confessions—suggestive of the mighty wars and contentions those holy places have occasioned between nations of rival creeds. This drawing has a very fine, mellow tone. The splendid "Interior of the Greek Chapel" in the Church of the Holy Sepulchre; "Cœnaculum," erected by the Crusaders on the spot where, according to the oldest known tradition, the Last Supper was held and the Holy Ghost descended upon the Twelve. Some of the traditions relating to the Holy Places are of the wildest description, and yet, apparently, very remarkably confirmatory evidence of, at least, the exactitude of some of the reputed sites have from time to time been produced. "The Saviour's Birthplace" and the adjoining "Manger." A silver star is let into the pavement, which indicates, it is maintained, the exact spot where the birth took place! Many lamps burn over it night and day. This is a very impressive drawing, intensely rich, and with the lambent glow in the shrine very finely rendered. "Jerusalem from the North Side," with a caravan issuing from the Damascus gate. There are several other drawings of scarcely inferior interest and merit.

The only drawback to our unreserved admiration of the finished drawings (to a few sketches here our observation does not apply) is that they convey an impression upon lengthened examination of being less minutely accurate than they seem at first sight obviously, and almost ostentatiously, to be. When we analyse this impression, we find it arises from, as it appears to us, a too violent insisting upon the partial effects of daylight, especially when a ray penetrates the otherwise sombre interiors and strikes on the worn textures of stone. The skill shown in the textural imitation is undeniable; but we feel it is rather obtruded for effect, especially as the means employed are somewhat mechanical. The results are exactly those of photography. The camera exaggerates these effects, because, while it gives them their full force, its limited scale of chiaroscuro does not permit true relative value to be given to the broader masses of light and shade. The mechanical uniformity of the execution is betrayed in a bed of prickly pears, which have a regularity of growth unknown to that eccentric species of cactus. Nevertheless, making full allowance for their shortcomings, even the technical merits of these drawings are scarcely inferior to their interest and collective value. We understand the whole series are to be reproduced in chromolithography, and published by Messrs. Moore, M'Queen, and Co.

ARUNDEL SOCIETY.

The publications of this society for 1863 have just been issued to subscribers. These publications are instalments of two series in course of being produced. The intrinsic excellence and essential importance in the history of art of the originals from which these are taken we have dwelt upon more than once. First on the list of the present issue is a line engraving of "St. Stephen thrust out before his Martyrdom," in continuation of the series from the frescoes of Fra Angelico, in the chapel of Nicholas V., in the Vatican. This engraving, by Herr Schäffer, from a drawing by M. Kupelwieser, is a work of singular delicacy, and bears unmistakable evidence of fidelity to the saintly feeling which characterises every production, whatever its subject, of the unworldly monk of Fiesole. A less scrupulous copyist would infallibly have rendered this subject less severe and more dramatic. We think the society has acted very wisely in preferring line engraving to chromolithography for translating the works of a painter whose paramount merit was expression—always an evanescent attribute of art only to be seized by the utmost accuracy and delicacy of form. The conduct of the lines in the engraving is based upon those modern conventional principles by which the modelling is indicated by lines more or less curved, and which are, of course, far in advance of the science exhibited in the execution of the early Italian painters, but this does not at all diminish the fidelity of the ultimate effect.

The remaining annual publications are five chromolithographs, in continuation of the series from the famous frescoes in the Brancacci Chapel, in the Carmelite Church at Florence. The largest of these is the apochryphal subject, "Sts. Peter and Paul Raising the King's Son, and the Homage to St. Peter," the two subjects, as is common in the naive conceptions of the early painters, being represented synchronically and in one picture. This fresco, by Masaccio and Filippino Lippi, like that of "Peter Baptizing the People," in the same chapel, is remarkable for containing an admirably drawn nude figure—that of the King's son, newly restored to life, which very distinctly marks the immense stride in advance, at least as regards technicalities, made by Masaccio, and at the same time shows art ripe for the influence of the antique and the full development of the Renaissance. Two smaller chromolithographs, mounted on one sheet, are "Sts. Peter and John Healing the Sick by their Shadows," and "Sts. Peter and John Giving Alms." Two heads from the first and third of these frescoes, on the scale and aiming at being in exact imitation of the originals, complete the set for this year's subscription. Two important occasional publications have likewise lately appeared—namely, "The Conversion of Hermogenes," from a fresco by Andrea Mantegna, in the Church of the Eremitani, at Padua, remarkable, like other of that master's works, for its architectural background; and "The Annunciation," from a fresco by Fra Angelico, in the Convent of S. Marco, at Florence—perhaps the sweetest of the many versions of this subject, and a strikingly successful specimen of all that it is possible to accomplish by chromolithography.

Mr. Foley has been commissioned to execute the statue of O'Connell for Dublin.

The statue of "Memory," which we inadvertently attributed to Mr. Alexander Brodie in our notice of this gentleman's statue of the late Duke of Richmond, was by the sculptor's brother, Mr. William Brodie, of Edinburgh, who is now engaged upon a statue of the Prince Consort for Perth.

Mr. John Everett Millais and Mr. Edward William Cooke have been elected Royal Academicians.

WILLS AND BEQUESTS.

The will of the Right Hon. Katharine Stewart, of Bryanston-square, London, and New Steine, Brighton, was proved in the principal registry by her daughter, Miss Susan Katharine Stewart, the sole executrix. The personalty was sworn under £16,000. Her Ladyship was the sister of the seventh Earl of Wemyss, and married, in 1805, the Hon. Edward Richard Stewart, who died in 1851. Her Ladyship bequeaths the property left to her under the will of her mother, the late Dowager Lady Elcho, to be divided between her children. To her son Edward she has left her library, with the exception of 200 volumes, to be selected by her daughter Susan, whom she has appointed her residuary legatee. The plate is to be divided amongst her sons and daughters, in certain proportions.

The will of Mrs. Willyams, of Tor-Mohun, Devon, widow of Lieutenant-Colonel James Brydges Willyams (Royal Cornwall Militia), was proved in the London Court, on the 11th inst., by the Right Hon. Benjamin Disraeli, M.P., P.C., the surviving executor, the personalty being sworn under £40,000. The will bears date Nov. 18, 1857; and was attested by Charles Kitson, solicitor, Torquay, and S. Johnson, his clerk. The testatrix, after leaving legacies to the amount of about £6000, has bequeathed the remainder of her property to the Right Hon. Benjamin Disraeli, expressed in these words:—"In testimony of my affection and of my approbation and admiration of his efforts to vindicate the race of Israel; with my views he is acquainted, and will no doubt endeavour to accomplish them;" and, further, has expressed her wish that he should obtain permission of her Majesty to use the surname and arms of the family of Lara and Mendez de Costa, in addition to or precedent to that of Disraeli.

The will of Samuel George Smith, Esq., of Sacombe Park, Ware, Herts, and of Lombard-street, banker, was proved in London by his sons, Samuel George Smith, Esq., M.P., and Frederick Chatfield Smith, Esq., the executors. The personalty was sworn under £500,000. To his eldest son he has bequeathed his farms and lands, The Beeches, Herts, and all his landed estates in Adelaide and Australia, and his interest in the banking business, "Smith, Payne, and Smith, Lombard-street." To his son Frederick he has bequeathed his interest in the banking establishment, "Samuel Smith Brothers, Hull." To his daughter a legacy of £30,000. The residue of his property to be divided amongst his four sons, Samuel, Frederick, Rowland, and Horace. There are legacies left to each of the clerks in both the banking establishments of £10. Also £100 to each of the infirmaries at Nottingham, Derby, and Hertford.

The will of the late Major-General James Farrer was proved in London by his son, William H. Farrer, Esq., J. Stedman, W. C. Lambert, Esqrs., and the Rev. Hugh W. Helyar, the executors. The personalty was sworn under £25,000. To his wife he has bequeathed a life interest in his estates, subject to the payment of two annuities of £300 each to his son and daughter, who will, on the decease of his wife, share the residue.

The will of Eugene Thomas Curzon Whittell, Esq., of Helmsley Lodge, Yorkshire, was proved in the London Court under £60,000 personalty, the executors and trustees being H. C. Allhusen, Esq., of Elswick Hall, near Newcastle (the testator's cousin), and Charles Wilkin, Esq., Tokenhouse-yard, London. The testator died at the age of thirty-one, and was the only son of Joshua Francis Whittell, Esq., Barrister-at-Law. The will is dated June, 1863. There are liberal legacies left to his father, mother, and sisters; and the freehold, devised to him by his late greatuncle, Joshua Field, Esq., and all other estates he leaves to his father for his life; and upon his decease they are to be divided equally amongst his (testator's) four sisters.

COUNTRY NEWS.

Mr. C. P. Melly has offered to erect twelve additional drinking-fountains in Liverpool.

At a public meeting held in the Leeds Townhall, on Monday night, it was determined to erect a monument to the late Sir Peter Fairbairn.

Two men were killed and three injured by a collision on the Scottish Central Railway, at Dunning, on Friday se'nnight.

At Arranmore a new lighthouse, built of granite, has been completed, at an expense of about £10,000. The light is to be a flash-revolving one of the first class.

The Whitworth Institute, erected at Fleetwood, Lancashire, by Benjamin Whitworth, Esq., at a cost of £2000, was opened on the 15th inst. by a tea and public meeting.

On the 1st proximo an Act of Parliament will come into force making it compulsory in Ireland to have all children born after the 1st of January vaccinated within six months of their birth, under a penalty of 10s.

The session at the Royal Agricultural College, Cirencester, closed on Thursday week with the usual award of diplomas and distribution of prizes, in the presence of the Hon. William Bathurst and Mr. Edward Holland, M.P. Among the five successful candidates for the diploma is a Dane.

The *Dundee Advertiser* states that the committee of the Albert Institute have received subscriptions to the amount of £14,850, and Sir David Baxter has intimated that, whenever the general public make the subscription £17,000, he will become responsible for the remaining £3000.

The heroes of the late pugilistic encounter, King and Heenan, with their seconds and backers, were brought before the Sussex magistrates at Mark Cross, on Tuesday, to answer for the breach of the peace committed by them at the recent fight near Tunbridge Wells. They were bound over to be tried at the next Quarter Sessions.

Sir William Somerville, one of the members for Canterbury, has been raised to the Irish Peerage, under the title of Baron Athlumney. His creation does not necessarily cause a vacancy in the representation of Canterbury. The new Peer may continue to hold his seat in the House of Commons, but while he does so he is not entitled to what is called the "privilege of peerage."

The usual half-yearly examinations of the teachers in training at the normal schools of the National Board—numbering 205—were brought to a close in Dublin, on Monday, by a public examination before the Lord Lieutenant. At the conclusion his Excellency addressed the teachers and expressed himself highly gratified with everything he saw and heard, and renewed his declaration of adherence to the principles of the National Board.

The case of the lunatic at Flushing, in Cornwall, the tale of whose miseries created so much commiseration in the public mind a few weeks ago, was again brought before the magistrates of Falmouth on Monday. The witnesses then examined detailed a horrible story of inhuman neglect on the part of the lunatic's brother, extending over a period of about ten years. The magistrates bound him over in heavy sureties to take his trial for ill-treatment of his lunatic brother.

The munificent bequest of the late Mr. Drummond—amounting to £20,000—to found a school at Dublin for the education of children the orphan daughters of soldiers, has been securely established for the object intended by the testator. Not only has the amount of the bequest been paid into the Court of Chancery by the executors, but a scheme for the future management of the charity has been approved by the Master in Chancery, printed, and circulated. The school will be managed, as nearly as possible, on the plan of the Royal Hibernian Military School for soldiers' sons.

Several valuable additions to the collection of Royal pictures at Holyrood are about to be made by command of her Majesty. In the large collection in Hampton Court there are a good many duplicate portraits of Royal personages connected more or less directly with Scottish history; and on the attention of the Queen being drawn, through the proper official channels, to this circumstance, and the suggestion made that some of these might be spared from the richly clothed walls of Hampton Court Palace to the more needful and not less Royal and appropriate Holyrood, her Majesty at once acquiesced in the propriety of the transfer and exhibited much personal interest in the selection of the pictures.—*Scotsman.*

The celebrated "LL Whisky" case has recently been decided in the Dublin Court of Chancery. It was a petition from the Messrs. Kinahan and Co., of the Carlisle-buildings, Dublin, asking the Court to restrain Mr. Bolton, of Westmoreland-street, from using on his whisky bottles their trade mark, "LL." The Lord Chancellor said he had no difficulty in coming to the conclusion, at an early period of the case, that the letters "LL" constituted a trade mark in the strictest and plainest sense of the words. It was proved that the peculiar mode in which the whisky in question was prepared was invented by a former member of the firm; that there was a secret connected with it, which is kept carefully in a book under lock and key. For forty years the whisky had been sold under that name, and it was a well-known article of commerce to those engaged in the trade. Under all the circumstances he was of opinion that "LL" was as distinct a trade mark as ever came under the cognisance of a court of justice. The Court would not allow a trade mark and design belonging to an article which one man had discovered to be usurped and used by another man, so as to lead the public to believe that they were purchasing from him the same article as the one prepared and sold by the inventor. The Court would always jealously guard property of that kind. The petitioners, therefore, were entitled to maintain the suit. The respondent should pay the costs and account for all his sales for the last six years.

A meeting of the general committee of the Hartley Colliery Relief Fund was held last week in the Guildhall of Newcastle-on-Tyne, for the purpose of apportioning the surplus of the fund among various districts, to be applied to the relief of distress occasioned by future accidents. The committee reported that, having ascertained as accurately as possible the quantity of coal raised in each district, they found that the proportions to which each district would be entitled on an average on that basis were:—Derby, Nottingham, Leicester, and Warwick, £1201; North and East Lancashire, £1587; North Durham, Northumberland, and Cumberland, £2342; North Stafford, Shropshire, and Cheshire, £1106; South Durham, £2320; South Staffordshire and Worcestershire, £2104; South Wales, £2077; South-Western, £1473; West Lancashire and North Wales, £1826; Yorkshire, £2034; Eastern District of Scotland, £1063; Western District of Scotland, £1236. The executive had been engaged in appointing trustees and committees to receive and appropriate the proportions of the surplus to which each district might be entitled, and had satisfaction in being able to state that the requisite arrangements were almost completed. The recipients of relief number 419—viz., widows, 93; adults, 33; and children, 293; and, from the financial statement attached to the report, it appears that the balance in hand on the 1st of September last amounted to £74,149. The report was adopted, and the executive committee was empowered to dispose of the surplus among the various districts according to the bases laid down by them.

A further increase of about 1700 has taken place in the number of persons receiving parochial relief in the cotton districts; and, although in anticipation of a revival of trade, a considerable number of new mills are in course of construction, the Central Executive Relief Committee have come to the conclusion that it is their duty to husband their resources and prepare for frequent changes in the state of employment. They at present hold a balance of about £225,000, while the Mansion House, Liverpool, and Bridgewater House Committees have still at their disposal a sum which may be put down, in round numbers, at £185,000. This gives a total reserve of upwards of £400,000. To this must be added the relief that may be expected from the Public Works Act, under the provisions of which applications to the amount of £1,117,605 have already been reported on. A few weeks ago Mr. Farnall issued circulars to the relieving officers in the cotton-manufacturing districts asking for information as to the present position and employment of those labourers and factory operatives who have ceased to receive parochial relief since the 6th of December, 1862, when pauperism attained its maximum. Some of the returns which have been received are incomplete; but, making the best use he can of the data with which he has been supplied, he frames the following estimate:—"That 15,564 persons who were paupers in December, 1862, cannot be traced by the relieving officers; that 54,474 persons have resumed their usual work; that 25,940 are employed in outdoor work; and that 7782 have either removed or emigrated." Grants were made from the general fund to the following places:—Hurst, £120; Tintwisle, £100; Glossop and Hadfield, £1800; Bamberbridge, £100; Salford, £700; Heywood, £500; and Hulme, £600. Several smaller grants were also made.

MONETARY TRANSACTIONS OF THE WEEK.

(From our City Correspondent.)

THE demand for accommodation, both at the Bank of England and in the open market, has been much less active this week, and the rates of discount for the best short bills have declined to 7¼ ½ per cent. The imports of the precious metals have been on an extensive scale, and about £200,000 has been sent into the Bank. The export inquiry has fallen off, and the supply of capital in all quarters is increasing. There has, consequently, been an improved feeling in the market for Home Securities. The business doing has been only moderate; nevertheless, the quotations have rather advanced. Consols, for Money, have realised 91¼ ⅜; Ditto, for Account, 91⅜ ½; Reduced and New Three per Cents, 91¼ ⅜; Exchequer Bills, 9s. to 4s. discount. Indian Securities have moved off slowly. The Five per Cents have marked 106¼ ½; the Bonds, 8s. discount to par. Rupee Paper has sold at 103½ to 104½, and 113 to 114. Mexican Bonds have commanded more attention, and the quotations have improved. Greek Bonds, however, have suffered rather a heavy decline. The Confederate Scrip has been done at 37 to 39. Most other foreign bonds have met a very inactive market. Joint-Stock Bank shares have sold freely, at very full prices, and about an average business has been passing in Miscellaneous Securities. The Railway Share Market may be considered firm. Most of our Continental advices state that the demand for money has fallen off. At New York the premium on gold has declined to 50½. There is still a fair profit on shipments to this country. The exchanges in France and Germany are rather more favourable. It is presumed, therefore, that money has, at length, seen its highest range in this country.

THE MARKETS.

THE corn trade has been in a very inactive state this week, although the supplies of produce on offer have not been, to say, extensive. Wheat and inferior barley have given way 1s., and grey peas have declined 1s. to 2s. per quarter. In the value of other articles very little change has taken place. The fat stock markets have been very dull, and the quotations generally have had a drooping tendency. Tea has moved off slowly, at late rates; but the sale for both raw and refined sugars have been tolerably firm. Coffee has moved off freely, on former terms. In rice, however, very little business has been passing. The provision trade may be considered firm. Tallow, however, has sold slowly, at 40s. 9d. to 41s. per cwt. for P.Y.C. on the spot. Oils, generally, have met a dull inquiry, at about last week's prices. The coal trade is in a healthy state, at full quotations. In the value of hay and straw no change has taken place. The wool trade has become inactive; nevertheless, prices are supported. Potatoes, owing to large arrivals coastwise and by land carriage, are dull, at from 50s. to 90s. per ton. In the various other markets, as is generally the case at this period of the year, very little business has been transacted, on former terms.

THE LONDON GAZETTE.

FRIDAY, DECEMBER 18.

BANKRUPTS.

J. WELCHMAN, John-street West, Blackfriars-road, dealer in jewellery.—H. HALL, St. Martin's-le-Grand, City, iron merchant.—C. G. ELLIOTT, Shoe-lane, City, bookseller.—J. RUFF, Kingston, Surrey, British wine manufacturer.—T. HIND, Halford-terrace, Walworth, builder.—J. MARTYN, Rosemary-cottages, Shepperton-street, Islington, wholesale milliner.—T. WILLIAMS, Rose-lane, Ratcliffe, cooper.—J. MARTIN, Millbank-street, Westminster, late blacking manufacturer.—J. GALE, Portswood, Hampshire.—E. UPJOHN, Lower Belgrave-street, Eaton-square, dairyman.—J. OSBORNE, St. John's-road, Hoxton, upholsterer.—H. J. CLARKE, South-parade, Brompton, builder.—R. R. WILLIAMS, Bury-street, St. James's, major in the militia.—B. M'GRATH, Liverpool, provision-dealer.—J. V. DE FLEURY, Addington-square, Margate, artist.—W. GRIFFITHS, High-street, Poplar, grocer.—W. J. GINGER, Bexley-heath, Kent, carpenter.—W. JARRETT, Minster, Kent, market gardener.—W. S. MARSHALL and B. WILLIAMS, Strand, tradesalers.—H. J. BALLARD, Southampton, tailor.—W. RANDALL, Norwich, corndealer.—R. CASE, Upper Thames-street, oil merchant.—D. T. DANCER, Sloane-square, cab proprietor.—G. ZANNI, Holborn-hill, meat-screen manufacturer.—J. SCULPTURED STONE.

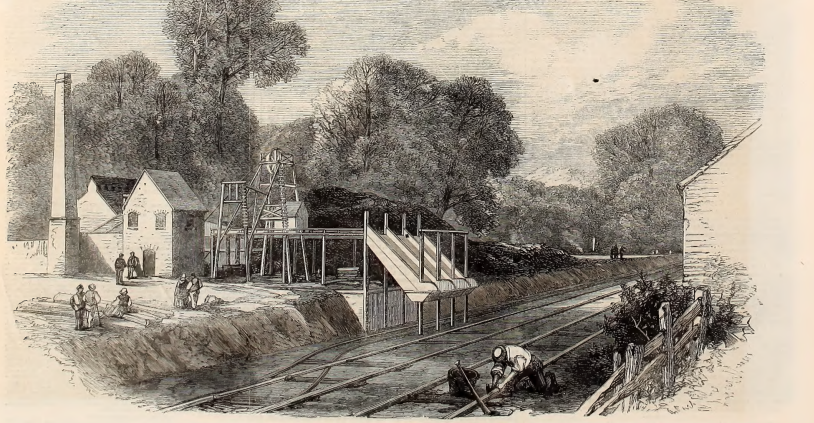
BRONZE STATUETTE.

REMAINS OF ROMAN ART AT WYCOMBE, NEAR ANDOVERSFORD, GLOUCESTERSHIRE.—SEE PAGE 649.

LAMBTON COLLIERY, AUSTRALIA.

THIS colliery is situated about five miles from the city of Newcastle, New South Wales, and is the property of the Scottish Australian Mining Company. It is one of the most recently commenced, and bids fair to be one of the most productive of the Australian mines. The coal trade of that colony is gradually and surely developing itself, and in time, no doubt (like that of the mother country), will become its great source of wealth, especially when the real value of the coal for steam purposes becomes known. Great credit is due to the several Australian coal companies for the energy with which they combated the various impediments which must of necessity accompany such enterprise in a new country, where the cost of labour is nearly treble what it is in England, and the conveyance of goods so difficult, owing to the scarcity—in fact, total absence—of good roads.



The Lambton works have been constructed on the newest principles of mining engineering; and great credit is due to the company's manager, Mr. T. Croudace, for the masterly manner in which they have been completed. The working shaft is lined throughout with freestone, carefully jointed, and is the only example of the kind at present in the colony. The coal is conveyed from the pit's mouth by a branch railway, two miles and a half in length, to the Great Northern line, and by that to Newcastle, where it is shipped. "Ere many years," writes the gentleman who obligingly furnished us with the sketch from which our Engraving is taken, "we may hope that Newcastle, the capital of the coal trade of New South Wales, will vie with the town from which it takes its name, and that the noble waters of the Hunter River will bear forth yearly as goodly a freight as does the coaly Tyne of the old country."

MR. HARDING.

JAMES DUFFIELD HARDING, the distinguished landscape-painter in water colours and well-known teacher, who died on the 4th inst., was born at Deptford, Kent, in 1797. He was the son of an artist of some reputation, but whose talents were chiefly engaged in teaching. To the instruction of his father and that also of Prout, together with the careful study of Turner's "Liber Studiorum," the deceased artist confesses he was largely indebted for the earliest formation and cultivation of his taste. A casual remark of his mother, suggesting that it might be more profitable to him to go and study directly from nature than to copy the works of men, seems to have made a deep impression on the young artist's mind. For a while he acted upon this suggestion, and prosecuted his studies in this narrow but sure path to excellence with great ardour and devotion. He became, however, discouraged with the apparent slowness of his progress, and disheartened at difficulties, for none was now at hand to enable him to surmount them, and at this period there were very few aids to art-instruction. For a time, indeed, Harding abandoned the pursuit of painting altogether, and applied himself to engraving. A year was spent in this new field of study, and we must not deem the time lost, for the knowledge of the principles of this branch of art then acquired, doubtless proved of service to him in various ways, but especially in the obvious assistance it would be to him in his subsequent efforts in lithography.

Again, however, Harding resolved to be a painter, and again he applied himself with renewed energy to the study of nature. It may be interesting to mention that Mr. Harding himself states that he became, early in his career, dissatisfied with the methods of representing the atmospheric greys and negative hues of shadows then in vogue. These were painted first, and the "local" or "self" colours of objects passed over them, contrary, the artist argued, to the analogy of Nature herself; for, in nature, the effects of atmosphere and shadow must necessarily intervene between the eye and the objects viewed. Convinced of the erroneousness of the principles then commonly practised, the artist thenceforward adopted and taught exactly the opposite method of painting the local colours first, and upon them the greys and shadows. While still young, the Society of Arts awarded the artist a silver medal for a water-colour drawing. In 1820, as lithography began to be employed in this country, Harding turned his attention to it. He soon appears to have discovered that, although it could not be brought to compete with engraving in finish and completeness, the capabilities of lithography (with its granulous texture and facility of execution) for the exhibition of the best qualities of a sketch and all the rudimentary kinds of drawing could scarcely be over-estimated; and that, therefore, it was the best medium for diffusing good examples for instruction. Several series of sketches, published from time to time under the titles "Lessons on Art," "Lessons on Trees," "Elementary Art," and "The Principles and Practice of Art"—known not only to every artist and amateur, but to every tyro in art—attest the perfection to which Mr. Harding brought the practice of lithography. Less generally known are several illustrations in water colours of Byron, which were published on a large scale. Some little time previous to the publication of these illustrations the artist was elected into the ranks of the Old Society of Painters in Water Colours, of which society he afterwards became a leading member. About the same period the Académie des Beaux Arts awarded him two gold medals for his lithographic drawings.

In 1830 he went to Rome and Naples, and brought back sketches on coloured paper. He was one of the first also to introduce the use of opaque as well as transparent colours in water-colour painting, much against the prejudices of the founders of the

LAMBTON COLLIERY, NEAR NEWCASTLE, NEW SOUTH WALES.

art in England—a practice now, however, very generally adopted, particularly by Cattermole, Nash, Lewis, and W. Hunt. In 1836 he published his "Sketches at Home and Abroad." In this admirable work was for the first time shown the advantages afforded by the printing of a tint, especially for representing atmospheric effects. The result exactly resembles chalk drawings on tinted paper, touched with white—a favourite description of drawing with the great Italian masters. During the the latter years of his career he, like another great master n water colours—David Cox—painted pictures in oil, several of which were exhibited at the Royal Academy. These, however, met with little favour from the hangers, and, in truth, made little impression upon critics or the public. The artist seemed, in them to have stepped a little out of his own proper sphere. Marvellous facility of execution and abundant evidence of great knowledge of art-principles were there; but yet they conveyed an impression of inadequacy and incompleteness, perhaps resulting from an insufficient conception of the peculiar exigencies of the new material. Mr. Harding was a man of varied mental acquirements, and his reputation is great, abroad as well as at home. Critics of the most opposite views have acknowledged his great merit as landscape water-colourist, draughtsman, and teacher. Mr. Ruskin has paid him the highest eulogiums, though Harding's principles were almost diametrically opposed to those of the Pre-Raphaelites. Perhaps no living artist is more skilled in the use of every appliance of his art. Perhaps no living artist has depicted a greater variety of scenery, English and foreign. His landscape sketches are among the finest that could be named. His drawings of foliage, though slight, and therefore necessarily conventional, and though representative rather than imitative, are singularly suggestive of character. Estimated by the services he has rendered the artistic public as a teacher, both by pen and pencil, he takes, we think, the very first place. We must, however, in the interest of art, not ignore the fact that there are higher aims in painting than can be attained by any means which do not rise far above sketching, however dexterous, diversified, and valuable to the student.

Our Portrait is from a photograph by Messrs. Cundall and Downes, New Bond-street.

THE LATE MR. J. D. HARDING, LANDSCAPE-PAINTER.

"THE FOOT-BRIDGE IN THE LANE."

THERE is little to be offered in the way of description or otherwise of the landscape engraved below, beyond what our Engraving itself will afford. The view, though undoubtedly taken in all its details from nature—the rural lane, with its broidered greenery, the rambling hedgerow dotted with shady beech, graceful ash, or hazel bush, the rippling brook running shallow from summer drought, at which the thirsty dog slakes his parched tongue, and into which that little loiterer gazes, forgetful alike probably of message and parcel, watching glancing trout and minnow or sinuous track of eel, the crazy plank bridge so primitive in construction, the sunlit field beyond, where the cattle lie dozing, and a sky overhead checquered with fairest azure and fleeciest white—all is but a glimpse of the ordinary features of our delightful homely English scenery, and requires, therefore, no localising designation. The artist, too, is one whose honest painstaking and skilful fidelity to nature identify him with many others who ably contribute to sustain those best characteristics of the English school of landscape-painting. If it be asked why we choose Christmas time for giving a representation of Nature in all her midsummer bravery and beauty, we might, perhaps, consider it a sufficient answer that we do so upon the principle of the effectiveness of contrast. But may we not add, because this is the season to remember, with absent friends and benefits purchases long forgotten, the blessings of a bounteous Providence during the past year, so conspicuous in a long and glorious summer, and in the timely abundance of harvest? And, though some of us may have fully appreciated the delights of summer while they were yet ours, the retrospect or anticipation of them can hardly fail to add new zest to our enjoyment of the comforts of winter, especially if we endeavour that all shall share them with us.

"THE FOOT-BRIDGE IN THE LANE," BY F. W. HULME, IN THE WINTER EXHIBITION.

**** The charge for the insertion of Births, Marriages, and Deaths is Five Shillings for each announcement.*

BIRTH.

On the 15th inst., at Newstead Abbey, Notts, the wife of William Frederick Webb, Esq., of a daughter.

MARRIAGES.

On the 3rd ult., at the British Consulate, Beyrout, John Adie Rattray, Esq., to Harriet Ann, only daughter of the late Rev. Thomas Edmund Hiscock, B.A.

On the 30th ult., at the British Consulate, Cairo, Egypt, by the Rev. G. Washington, M.A., William, youngest son of Penrey Kirton, Esq., of Southampton, to Margaret Anderson, eldest daughter of J. C. Low, Esq., of Dundee. No cards sent.

DEATHS.

On Tuesday, the 15th inst., Percy, second and much-beloved son of Joseph and Matilda Moore, of Wollaton, Nottingham, aged 3 years and 11 months.

On the 19th inst., at St. Leonard's-on-Sea, George Carr Clark, Esq., late of Ellinthorp Hall, Tasmania, in his 75th year.

TO INVENTORS.—The GENERAL PATENT COMPANY (Limited), 71, Fleet-street, obtains PATENTS for INVENTIONS, and affords unusual facilities to inventors. Printed information gratis. R. M. LATHAM, Sec.

ON VIEW DAILY. THE PATENT CASKET MINIATURES and LOCKETS, presenting a solid lifelike bust, in an inclosed cube of crystal, with a truth and beauty wholly unattainable in a flat portrait. CASKET PORTRAIT COMPANY, 40, Charing-cross.

THE GLORIES of the HEAVENS seen by a New Telescope, for £5, which will also distinguish the features of a man four miles, and time by a church clock ten miles. This instrument is guaranteed to be equal in the most important respects to telescopes costing £70.—SOLOMONS, 39, Albemarle-street, Piccadilly. Persons are invited to apply for a diagram, with full particulars, and seven sheets of closely-printed testimonials from scientific and other gentlemen, sent free by book-post. Powerful Opera, Race, Field, and General Outdoor Glasses, 35s. each.

POCKET BAROMETER, COMPASS, and THERMOMETER, all in one, the size of a watch, for telling the weather, the heights of mountains, direction of winds, and temperature of the air. Guaranteed for 12 months. Price £4 15s., sent free.—S. and B. SOLOMONS, Opticians, 39, Albemarle-st., Piccadilly.

ACHROMATIC MAGIC and DISSOLVING LANTERNS.—The advantage of achromatic lenses over the common lenses now in use is brilliancy and beautiful definition. No additional charge is made upon this improvement, as a large sale is anticipated. Catalogue sent free.—S. and B. SOLOMONS, Opticians to the Government, 39, Albemarle-street, Piccadilly.

DEAFNESS.—The SOUND MAGNIFIER and INVISIBLE VOICE CONDUCTOR, for Deafness. It fits into the ear not perceptible, removes singing noises in the head, and enables deaf persons to hear distinctly at church and at public assemblies.—S. and B. SOLOMONS 39, Albemarle-street, Piccadilly.

SPECTACLES.—THE PATENT TINTED SPECTACLES are patronised by the majority of the Nobility, including Viscount Palmerston. They give extraordinary relief by day and night to weak, dim, and defective vision. The adaptation of spectacles to imperfect vision by experienced persons is, indeed, of vital importance. One of the Firm who has had great experience and practice attends to this branch only.—S. and B. SOLOMONS, 39, Albemarle-street, Piccadilly. Opposite the York Hotel.

MAGIC LANTERNS and DISSOLVING-VIEWS on a recently-improved construction. A large assortment of slides, comprising the newest subjects, at greatly-reduced prices. Illustrated catalogue free by post for two stamps.—KEYZOR and BENDON Wholesale Opticians, 50, High Holborn.

MAGIC LANTERNS.—Dissolving Views, Lantern, and 35 Pictures, 7s. 6d.; larger size, 10s. 6d. The greatest variety in the world. Sale or Hire. New Instrument, Microscope and Telescope combined, 25s. Catalogues for two stamps. BERNARD DAVIS, Optician, 430, Euston-road, N.W.

A NEW-YEAR'S GIFT.

NEW PSALM AND HYMN TUNES, TE DEUM, and 24 ORIGINAL CHANTS. By R. COOPER. "It is, in fact, a work which, without owning any pretension to the status of a New-Year Gift-book, is in reality more fitted to the dignity than many of those at ten times its price, and, if used as such, will unquestionably be productive of present interest and future gratification."—Brighton Guardian.
Post-free, 2s. 6d.
NOVELLO and Co., 69, Dean-street, Soho.

Warranted First Class.
P. and S. BEYFUS, 144, Oxford-street.
Illustrated Catalogues gratis and post-free on application.

WALNUT SUITE OF DRAWING-ROOM FURNITURE, almost new, warranted for two years, to be SOLD, for the very low sum of 30 guineas, a very great bargain. Comprises a beautiful 5-feet chiffonier, fitted with plate-glass back and doors and marble top, fine walnut centre and occasional tables on richly-carved supports, a handsome and large chimneyglass, six prettily-shaped drawing-room chairs, a settee and two easychairs, covered in damask, en suite. To be seen at LEWIN CRAWCOUR and CO.'S, Upholsterers, &c., No. 73 and 75, Brompton-road, Knightsbridge. Established 1810.

ANTIQUE FURNITURE for DINING-ROOM, old Oak, in good preservation, of a very choice character, suitable for mediæval decorations; the carvings are unique, chaste, and elaborate. The dining-room set consists of ten high-backed chairs, a pair of elbow chairs to match, large set of telescope dining-tables with extra leaves, dumb waiter, &c.; truly beautiful sideboard, fitted with plate-glass back. Price of the foregoing, 64 guineas, half its value. On view at the BELGRAVE FURNISHING COMPANY, No. 12, Sloane-street, Belgrave-square.

COSTLY FURNITURE for DRAWING-ROOM, Dining-room, and Bedroom.—The BELGRAVE FURNISHING COMPANY, No. 12, Sloane-street, Belgravia, have for disposal (part of the contents of a mansion) three suites of furniture of a most superb recherché character. The drawing-room is complete, in the style of Louis Seize, richly gilt and covered in silk brocade, also includes three truly beautiful and very large chimney-glasses, with console and girandole to match. The dining-room is equally magnificent, in oak, consisting of all the usual requisites. The bedroom is likewise very superb, and comprises all the necessaries in rich Italian walnut. This is an opportunity rarely offered.

FURNITURE, CARPETS, and BEDDING Carriage-free.
See our Illustrated Catalogue, forwarded gratis.
LEWIN CRAWCOUR and CO., 73 and 75, Brompton-road, Knightsbridge.

TEA! TEA! TEA! The ELEPHANT AND CASTLE TEA COMPANY beg to announce that they have OPENED their spacious PREMISES for the SALE of the
CHOICEST TEAS, COFFEES, and SUGARS.
COUNTRY CUSTOMERS.—Feeling sure that many persons in the country never taste fine tea, as it is impossible that teas in packets exposed in the shops of chemists and confectioners can retain that delicate fragrance and aroma so essential to the making of a CHOICE CUP OF TEA,
we invite our friends, before ordering a quantity, to send the value in stamps of a quarter of a pound sample of our Congou at 2s. 8d., 3s., 3s. 4d., 3s. 8d.; our "Elephant" Mixture, at 4s.; or our "Company" Tea, at 4s. 8d. per lb., which shall be sent by return of post, free.
A detailed Circular sent on receipt of stamp.
Elephant and Castle, London, S.E.
TTTTTTTTTTTTTTTTTTTTTTTTTTTTTTTTTTT

STARCH MANUFACTURERS
TO H.R.H. THE PRINCESS OF WALES.
GLENFIELD PATENT STARCH, used in the Royal Laundry, and awarded the Prize Medal, 1862.

QUININE. WATERS'S QUININE WINE sold by all Oilmen and Grocers.

FOR GENERAL WEAKNESS, LANGUOR, and SALLOWNESS of the COMPLEXION, Sir James Clark, Sir Charles Locock, and Dr Jenner, her Majesty's Physicians, recommend Iron as the most reliable remedy. DR. BEAUMONT'S STEEL WINE is the purest preparation of this invaluable medicine, and is as pleasant to drink as a glass of sherry. Prepared only by REEVES and HEDGES, Analytical Chemists, London.—Office, 15, Great Titchfield-street, W. Single bottles, 7s. 6d.

PHILOSOPHERS ON LIFE.—Wise men are often impressing upon people the worthlessness of life without health; but, having led us into the wood, they leave us to find our own way out. Health can easily be preserved and life rendered an inestimable blessing by using Dr. LANG'S ESSENTIAL SPIRIT OF MELISSUS. Its restorative effects are unequalled. Sold in 1s. 9d. and 3s. 6d. bottles by all Patent Medicine Vendors throughout the country. Directions for use on wrapper.

DYSPEPSIA.—MORSON'S PEPSINE WINE is a perfectly palatable form for administering this Popular Remedy for Weak Digestion.
Manufactured by T. Morson and Son, 19 and 46, Southampton-row, Russell-square, W.C., in bottles, at 3s., 5s., and 10s. each.
Pepsine Lozenges, in boxes, at 2s. 6d. and 4s. 6d. each.

SCENT FOUNTAIN FINGER RING, PIESSE and LUBIN'S.
THE GREATEST NOVELTY OF THE DAY, for FUN and AMUSEMENT.
Each Ring can be filled with White Rose, Stolen Kisses, or any other Fashionable Fragrance. Price 1s. 6d. Sold at all the Fancy Dépôts, Perfumers, &c. Factory: 2, New Bond-street, London.

NUTS FULL OF SCENT.—PIESSE and LUBIN'S new and pretty CONCEITS for evening parties, scent crackers, perfume, bon-bons, scented shells, scenting gems. The walnut and the cracker contain a model bottle of scent, stolen kisses, ever-sweet, &c., a snap and a new motto. 4s. per dozen; 12 dozen delivered free anywhere for 40s. No. 2, New Bond-street.

LOVE AND KISSES.—PIESSE and LUBIN have made several new perfumes for the festive season—LOVE and KISSES, the Congress of Flowers, the Sandringham Bouquet. "The rose looks fair, but fairer we it deem for that sweet odour which doth in it live." Three bottles in an appropriate case, very pretty, 10s.; a sample of any perfume, 2s. 6d. Laboratory of Flowers, 2, New Bond-street, London.

EUCHRISMA.—Prepared only by H. P. TRUEFITT, Burlington-arcade.—This truly elegant preparation, combining a hair grease and wash in one clear fluid really prevents hair falling, checks greyness, and removes dandriff
In Bottles, at 3s. 6d., 5s., and 10s. 6d.
Notice.—H. P. Truefitt's only establishments are Burlington-arcade and Aldershott.

NEW MUSIC.

CHAPPELL'S COLLECTION OF OLD CHRISTMAS CAROLS, with the tunes to which they are sung; chiefly traditional, with some few of more modern date. Harmonised for one or more voices. Sixty pages, from engraved plates, and with ornamental cover. Price 2s. 6d.
The above collection of Carols has been gathered from various sources. Sometimes from the lips of the rustic singer, sometimes from old MSS., and sometimes from printed books. They have been carefully harmonised and arranged: some as solos, and others for four voices, and may all be played on the pianoforte alone, or sung by a single voice accompanied by the instrument. The present collection (unlike others) consists of the old traditional carol tunes with the original words.
CHAPPELL and CO., 50, New Bond-street.

CHAPPELL'S COLLECTION of NURSERY RHYMES, with FAMILIAR TUNES, for Voice and Pianoforte. Adapted to the capacities of young people. (Sixty pages from engraved plates.) In ornamental cover. Price 2s. 6d.
This work has been prepared for the express gratification of the young, and contains a large number of the well-known ditties of the nursery:—"Sing a Song of Sixpence," "Little Bopeep," "Girls and Boys," "Three blind Mice," "What are little Boys made of?" &c, &c. They have been carefully arranged for the Pianoforte (to suit the most juvenile performers), and may be played alone or sung to an accompaniment, as desired.
CHAPPELL and CO., 50, New Bond-street.

BOOSEYS' MINIATURE PIANOFORTE, price 17 guineas, in Walnut, French polished, has the full compass, is in a simple but elegant case, and possesses great brilliancy, as well as an excellent touch.
Boosey and Sons, Holles-street, London.

BOOSEYS' BIJOU PIANOFORTE, price 26 guineas, in Rosewood, or 27 guineas in Italian Walnut. The Bijou Pianoforte is in a highly-finished and elegant case, suitable for any drawing-room. The workmanship is of the very best description, the touch elastic, and the tone of that pure quality that especially distinguishes first-class English pianos.
Boosey and Sons, Holles-street, London.

ENGLISH CONCERTINAS, by LACHENAL, Full Compass, with all the latest Improvements, warranted for Hot Climates, and to keep well in Tune, from Two guineas, with Case, Lock and Key, &c.
HOPWOOD and CREW, 42, New Bond-street.

CHISSHOLME AND SONS, Pianoforte Manufacturers (from Messrs. Broadwoods'), 61, Berners-street, Oxford-street, W. Studio Pianos, in solid walnut, mahogany, or ash cases, from 20 guineas. Pianofortes on hire from 10s. per month.

CRAMER'S PIANOFORTE GALLERY, 207 and 209, Regent-street (the largest in Europe). The most varied selection of Pianofortes are to be found in this Gallery.
The quality of every instrument may be relied upon as at least equal to representation. Pianofortes of the very inferior class are carefully excluded from the stock. Every facility is afforded to exchange, without loss to the buyer, any time within six months, should an instrument of a higher class, or by a different maker, be thought desirable.
Pianofortes by every maker of eminence will be found in the Gallery.

CRAMER'S ENGLISH PIANETTE, 22 guineas.—Cramer, Wood, and Co. manufacture this capital small instrument. It has all the requisites of the best Pianoforte—check action, solid touch, agreeable and powerful tone. The case is of polished ash. In practising on this Pianoforte the fingers of the player will be strengthened much more rapidly than on an old instrument, loose in the key and worn in the hammer. In rosewood, 25 guineas; in walnut, 26 guineas.
Purchasers are particularly requested to observe that this instrument has not the common or single action, but the double or check action; and that Cramer, Wood, and Co. are the only manufacturers of it in England.—207 and 209, Regent-street.

CRAMER'S INDIAN PIANOFORTE. Cramer, Wood, and Co. manufacture for India a superior COTTAGE PIANOFORTE, in solid Mahogany, with metallic bracings and all other appliances necessary to resist the effect of extreme climates. Nothing has been left solely to the glueing. The mechanism of the Instrument as well as the Case has been secured throughout by screws. Unusual skill and attention have therefore been bestowed upon the manufacture, and they have obtained the highest commendations for their excellent quality of tone and durability.
Cramer, Wood, and Co. deliver these Instruments f.o.b., packed in cases lined with zinc, at any home port, for 50 guineas. Size:—Height, 3 feet 11½ inches; width, 4 feet 4½ inches; depth, 2 feet 1½ inch.—Pianoforte Gallery, 207 and 209, Regent-street, London.

THE NEW PIANOFORTE.—CRAMER'S
Seven-Octave Semi-Oblique Pianoforte,
45 guineas in Rosewood and 50 in Walnut.
Advantages to the Pianiste.—Power and refinement of tone; susceptibility of touch; full scale of seven octaves.
Advantages to the Vocalist.—Height diminished to 4 ft. 8 in.; freeing the voice from interruption; width enlarged to 4 ft. 6 in.; affording increased convenience to the accompanyist, together with greater elegance of position.
In introducing this instrument prominently to the notice of the public, Cramer, Wood, and Co. may be permitted to observe that it is alike remarkable as regards power and quality of tone, firmness and elasticity of touch, durability of tuning, and the capacity to develop its resources. The tone may be forced by the powerful finger of the artist or drawn out by the less accustomed hand of the amateur. In the one case there is no harshness, and in the other its charmingly vocal qualities are called forth with little effort. The action, or mechanism, is of the very best description, being somewhat similar in its principle of construction to that of the semi-grand. The stringing is complete, there being three wires to each note, like the full grand. Cramer, Wood, and Co. guarantee these instruments for any reasonable length of time, and forward them to all parts of the country without risk to the purchaser, and at a very trifling cost.
Pianoforte Gallery, 207 and 209, Regent-street
(the largest in Europe).

PIANOFORTES by Broadwood, Collard, or Erard, for SALE or HIRE.—At CRAMER'S PIANOFORTE GALLERY (the largest in Europe), 207 and 209, Regent-street.

SECONDHAND PIANOFORTES. CRAMER, WOOD, and CO. have a number of INSTRUMENTS, by Broadwood, Collard, and Erard, at greatly-reduced prices.
It is often difficult for a purchaser to ascertain the precise state of a secondhand instrument, whether or not the hammers have been renewed, &c. Cramer, Wood, and Co. give this information without the slightest reserve, and warrant every instrument they sell.
207 and 209, Regent-street.

REPAIRING PIANOFORTES. CRAMER, WOOD, and CO. give great attention to this Department of the Business. The most skilful workmen only are employed. Every care is taken to renew defective or worn mechanism.
207 and 209, Regent-street.

TUNE YOUR PIANOFORTES by the YEAR: 15s., 20s., 25s., according to instrument. CRAMER, WOOD, and CO.'S staff of experienced TUNERS are well known to the Musical Public.
207 and 209, Regent-street.

PIANO MÉCANIQUE.—CRAMER, WOOD, and CO. supply Debain's Piano Mécanique. Any one can play upon it. Price 55 guineas. If with a keyboard, enabling it to be used by a Pianist like an ordinary pianoforte, 90 guineas. The instrument is very strongly made, and warranted to stand any change of climate.—201, Regent-street.

SIX-GUINEA HARMONIUMS.—CRAMER, WOOD, and CO. supply the best of this size that is manufactured. Unlike the ordinary Paris Instrument, it is put together in a substantial manner. The tone is charming in quality, and of remarkable power. Polished oak case.—201, Regent-street.

CRAMER, WOOD, and CO.'S GENERAL STOCK of HARMONIUMS is one of the most extensive and varied to be found in London. Prices from 6 to 100 guineas.
Secondhand Instruments of all kinds.
201, Regent-street.

CRAMER'S ARTIST'S CONCERTINA, manufactured under the immediate superintendence of Mr. Richard Blagrove. In purity of tone, delicacy of touch, noiseless rapidity of articulation, and general perfection of mechanism, these instruments are unrivalled. The vibrators are of tempered steel, and retain their perfect tuning in any climate. Price 12 guineas, including case.—Cramer, Wood, and Co., 201, Regent-street.

SECONDHAND PIANOFORTES. CHAPPELL and CO., have a large Stock of SECONDHAND PIANOFORTES for SALE, by BROADWOOD, COLLARD, ERARD, &c., &c., that have been hired for the season, at very reduced prices. Also, New Instruments of every description.
Chappell and Co., 50, New Bond-street.

PIANOFORTES at CHAPPELL'S.—The largest Stock in London, by Broadwood, Collard, Erard, &c., for Sale or Hire.—50, New Bond-street.

CHAPPELL'S FOREIGN PIANINO (the only Pianino to which the Prize Medal was awarded).—A very elegant Pianoforte, of small size, the full compass, check action, and most perfect touch, admirably adapted to Small Rooms, Yachts, Boudoirs, &c. Warranted to keep in tune, and to be the best and cheapest Pianoforte, with check action and all the latest improvements.
Price, in mahogany, rosewood, or walnut, 25 and 26 guineas. A great variety may be seen at
Chappell and Co.'s, 50, New Bond-street.

CHAPPELL and CO.'S ENGLISH MODEL COTTAGE PIANOFORTE.—To amateurs preferring the pure English tone of the Broadwood or Collard quality, the English Model will be found the most perfectly satisfactory instrument, at a moderate price. The action is of the same simple description as the above makers', and therefore especially adapted to the country, where the more complicated actions are objectionable to many of the tuners. In elegant rosewood case, with full fret, similar in every respect to other instruments at 50 guineas, price 35 guineas; in walnut, 40 guineas.
Chappell and Co., 50, New Bond-street.

CHAPPELL'S FOREIGN MODEL PIANOFORTE, price 50 guineas in rosewood; or in walnut 60 guineas. This instrument has Three Strings and the fullest grand compass of Seven Octaves. It is strengthened by every possible means to endure the greatest amount of wear and to stand perfectly in any climate. The workmanship is of the best description; the tone is round, full, and rich; and the power equal to that of a Bichord Grand. The touch is elastic, and the repetition very rapid. No pianoforte, in all respects comparable, has hitherto been made in England at the same price. Every instrument will be warranted and (if desired) exchanged within six months of the purchase.
Chappell and Co., 50, New Bond-street.

BROADWOOD, COLLARD, and ERARD. The best Pianofortes of every description, including all the newest kinds by these celebrated makers, may be tried side by side (and hired with option of purchase) at the new Showrooms of
CHAPPELL and CO., 50, New Bond-street.

ALEXANDRE'S DRAWING-ROOM MODEL HARMONIUM, the best that can be made, price 60 guineas; other varieties at 25 and 35 guineas. Illustrated Catalogues of Pianofortes and Harmoniums upon application to
CHAPPELL and CO., 50, New Bond-street.

SIX-GUINEA HARMONIUM, by ALEXANDRE, with five octaves, two footboards, and in oak case. These instruments are lower in price and superior to all other cheap Harmoniums. Descriptive lists on application to
CHAPPELL and CO., 50, New Bond-street.

SECONDHAND HARMONIUMS, by ALEXANDRE, nearly (if not quite) as good as new, at greatly-reduced prices, at CHAPPELL'S, 50, New Bond-street.

ALEXANDRE'S PRIZE EXHIBITION MODEL HARMONIUM, for the CHURCH, 13 stops, 4 rows of vibrators, and Venetian swell, worked by the heel of the right foot, in oak case, 32 guineas. A large assortment may be always seen at CHAPPELL and CO.'S, 50, New Bond-street.

COLONEL CRAWLEY.

LIEUTENANT-COLONEL THOMAS ROBERT CRAWLEY is one of four brothers, sons of an old officer who was severely wounded in the Peninsular War and thereby disabled at an early age. Three of these brothers—Colonel Crawley, of the Inniskillings, included—obtained commissions from Sandhurst at the ages of sixteen by passing highly-distinguished examinations. The fourth purchased his commission, and, as a Lieutenant of the 80th Regiment, fell at Sobraon while spiking a gun which he had gallantly captured from the enemy, having previously shared in the dangers of Moodkee and Ferozeshah with his distinguished corps. One of the brothers served in all climates and in the Crimea for twenty-eight years in the 20th Regiment, from which he retired as a Major, with the rank of Lieutenant-Colonel. Another brother died in the 4th Regiment from the effects of the climate in India. Lieutenant-Colonel Crawley, of the 6th, or Inniskilling, Regiment of Dragoons—whose Portrait we give, from a photograph by J. De Szerski, Aldershot—entered the Army as an Ensign in the 43th Regiment. He has served for several years in all parts of India—on the Staff of the late Sir Jasper Nicolls, when Commander-in-Chief in India; of General Sir John Aitchison; of Lord Metville, in the Punjaub campaign; and, lastly, as Aide-de-Camp to the late Sir Harry Smith.

The court-martial on Colonel Crawley reassembled on Thursday week, when the court was crowded to hear the prisoner read his defence. He began by condemning in strong terms the mendacious course pursued by his enemies and by a portion of the press, whose object was, through him, to attack a system and to abolish military discipline. He congratulated himself that he was at length brought to answer to the charges against him before a Court in whose judgment he had full confidence, and could safely say he believed that the day of his trial was the day of his deliverance. It had been said that at the Mhow court-martial he had been guilty of the grossest persecution and had suborned false testimony. If there had been any ground for such a charge, why was it not proceeded with? It had been said that he had been guilty of unwarrantable cruelty in causing the arrest of the three Sergeant-Majors; but, if he had, why did not that charge form part of the present indictment, that he might have had the opportunity of answering it. Those who knew the facts were aware that he had acted properly, and the opinions of those who did not he could afford to despise. He had no wish to shield himself under the protection of superior officers, though it was gratifying to him what the course he had adopted had met with the approbation of his superiors. It was said he had acted under the influence of ill-feeling towards Sergeant-Major Lilley; but surely no one would charge Major-General Farrell, Sir W. Mansfield, and Sir H. Rose with having so acted, or with having approved of his conduct because they, too, held a grudge against the Sergeant-Major. He held that the severity he had exercised was necessary to the restoration of discipline in the regiment, which, if he had been allowed, he would have proved was in a state of insubordination when the court-martial on Paymaster Smales was instituted. He should like to have had the opportunity of proving what was the state of the regiment when he took the command, by the production of the letter from the Horse Guards to Colonel Shute. This, however, had been denied him, and it was not open for him now to assert what he might, had his application been allowed, have proved. He called upon the Court to consider what was his position when he took the command of a regiment in a state of insubordination arising from a long-standing demoralisation. This was evident from the letter of the Commander-in-Chief. Of all cases of insubordination that which existed above the ranks was the most fatal and irremediable. It was necessary that soldiers should be subject to a stricter discipline than civilians, and his having acted in this spirit had prevented, as he believed, a catastrophe. He had intended, and had been always ready, to proceed with the trial of the Sergeant-Majors. If they were not tried the fault was not his, but his superiors'. He contended that the question at issue between him and the officers and non-commissioned officers of the Inniskillings was that of mutiny or no mutiny. Referring to the specific charges

LIEUTENANT-COLONEL THOMAS ROBERT CRAWLEY, OF THE 6TH, OR INNISKILLING, REGIMENT OF DRAGOONS.

THE WAR IN AMERICA: BATTLE OF CHICAMAUGA—THE CONFEDERATE GENERAL HOOD, WOUNDED.—FROM A SKETCH BY OUR SPECIAL ARTIST.—SEE NEXT PAGE.

upon which he was arraigned, he complained of their vagueness; adding that it was difficult for him to know what he had to meet. But, accepting the charges in all their vagueness, he appealed to the Court, now that the evidence for the prosecution was concluded, was there any proof whatever—admitting that the arrest was justifiable—that in the mode of carrying it out there was anything bearing the character of "unnecessary and undue severity," or "great or grievons hardship." As he was not charged with the illegality of the arrest he was justified in assuming that the arrest was necessary. Then he came to the charge of undue severity. Why, close arrest was necessarily severe, and it was not his fault, nor did it justify any change from the ordinary course of proceeding that Sergeant-Major Lilley was of plethoric habits, and had a sick wife. If it did, then the sooner such men left the service the better. Even in civil life at home, the physical condition of the criminal or his domestic circumstances did not alter the punishment when a conviction for crime took place. If anything ought to be laid to his charge it was rather excess of leniency than too great severity. He might have placed Sergeant-Major Lilley in solitary confinement; but, considering the condition of Mrs. Lilley, he did not wish, even in his disgrace, to deprive the Sergeant-Major of the solace of his wife's society. He then proceeded to show that the bungalows were not "bomb-proof ovens," nor like the "hold of a slave-ship," and contended that the death of Lilley was not, to any appreciable extent, due to his confinement. He also asserted that the privacy of Mrs. Lilley was not intruded upon, but, if it were, it was clearly not his fault, but that of Lieutenant Fitzsimon. He laid stress upon the fact that Lilley had never complained. Finally, he contended that, on every ground, he was entitled to a complete acquittal. Colonel Crawley's address, which occupied some hours in the delivery, was listened to throughout with the greatest attention, and was greeted with hearty applause at the close.

Several distinguished officers were then called, and bore strong testimony to Colonel Crawley's gentlemanly, honourable, and humane character.

The public proceedings of the court-martial closed yesterday week, when Sir Alfred Horsford, the prosecutor, replied on the case. He defended the witnesses from the charge of perjury, which Colonel Crawley had insinuated rather than charged against them. He contended that the arrest, as carried out by Colonel Crawley, was not only cruel but illegal; for Paymaster Smales had a right to communicate with his witnesses, which he could not do in the case of Sergeant-Major Lilley; and, by the articles of war, no prisoner ought to be subjected to military confinement for more than eight days without being brought to trial. The release of the Sergeant-Major ought to have been carried out a fortnight sooner than it was, and for what happened during that fortnight Colonel Crawley was responsible.

The court was then closed, and the members proceeded to consider their finding, which will not be known till confirmed by the Horse Guards.

ILLUSTRATIONS OF THE WAR IN AMERICA.

Some more sketches by our Special Artist and Correspondent in the South have, after considerable delay, reached us through one of the many gaps in the blockade. Three of these are engraved on pages 661 and 664 of our present Issue, and appended are some details by our Correspondent respecting them:—

BATTLE OF CHICAMAUGA—THE CONFEDERATE GENERAL HOOD RECEIVING HIS WOUND.

The battle of Chicamauga, of which your readers will doubtless have heard long before this sketch can reach you, was one of the most brilliant victories ever gained by the South, though, unfortunately, not decisive in its results, for, owing to the incompetency or apathy of the Confederate Commander-in-Chief, the Federal General was allowed to collect his scattered columns behind the intrenchments of Chattanooga. The fight commenced on the 19th of September, and fluctuated throughout the day with varying chances, both armies occupying their respective positions when darkness put a stop to the conflict. At twelve o'clock on that night General Longstreet, to the great delight of every one, arrived on the field from Virginia, and immediately assumed command of the Confederate left wing, consisting of his own corps of tried veterans from the banks of the Rappahannock and Potomac, and Buckner's division from the army of East Tennessee. On the morning of the 20th the battle was renewed, General Longstreet sweeping everywhere from his front the right of the Federal host, crushing them back before the advance of his victorious brigades. From the nature of the ground, which was thickly wooded, I found it impossible to make anything like a drawing of the battle, not being able to see more than a hundred yards either way; but I have selected an incident for illustration, which occurred in almost the only open portion of the field. You will recollect that General Hood was severely wounded in the arm at Gettysburg, and though still suffering, and compelled to carry the injured limb in a sling, he accompanied his glorious division to the banks of the Tennessee. General Hood is, to my mind, the Bayard of the Confederate army, literally *sans peur et sans reproche*, and those who have seen him, as I have seen him at Fredericksburg and elsewhere, at the head of his gallant Texans, will admit I eulogise him no more than he deserves. About two o'clock on the 20th General Hood found his division in front of an opening in the woods, which ascended abruptly for some three or four hundred yards to a most formidable Yankee position on the skirt of a dense piece of forest. Fallen timber served to make its natural strength much stronger, and behind this fortification of logs were posted large bodies of Federal infantry and numerous pieces of artillery. General Hood determined at once to carry the position by assault, and, forming his men into two lines, gave the order to advance. The leading column moved forward half way across the opening, under a most withering fire, then paused for an instant and discharged their rifles, rushing on, with the bayonet, through the smoke. At this moment General Hood was cheering forward the second column when an Enfield ball passed through his right thigh, smashing the bone to pieces, and as he was removed from the field he heard the shouts of his soldiers proclaiming their success and his revenge.

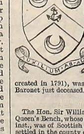
CHATTANOOGA AND THE FEDERAL LINES FROM THE LOWER RIDGE OF LOOKOUT MOUNTAIN.

In this view the exact positions of Chattanooga and General Rosecranz's army are, I think, tolerably well defined, the town and camps of the Federalists lying in a bend of the Tennessee river, which here forms the letter U. By drawing a curved line across the superior portion of the letter you have the defensive line of works thrown up by the Northern Commander, and will thus see that his is a position of great strength from the fact that his forces are concentrated in a small space, his left and right resting on each bend of the river. The Confederate lines run from the river at the base of Lookout Mountain, extending along Missionary Ridge, and terminating again on the river to the extreme right, the Federals having the inner side of an arc, and the Confederates the outer. Missionary Ridge is formed by the range of hills running from the right across the middle distance, and from amidst the foliage may be seen peeping here and there the sparse tents of the Southern army. Beyond, still to the right, are the lofty peaks of the Unaka mountains, forming a portion of the Alleghany chain, and the whole scene of valley and distant purple hills, with cloud shadows sobering the rich tints that sparkle in the golden autumn sunshine, make up a landscape that requires no further assistance of nature to make it perfect.

VIEW OF CHATTANOOGA AND THE FEDERAL POSITIONS FROM THE LEFT CENTRE OF THE CONFEDERATE LINES.

The point of view of the accompanying Illustration was the lower slope of Missionary Ridge, near General Preston's head-quarters. The lofty hill on the left is Lookout Mountain, round the base of which, extending to the Tennessee River, the extreme left of the southern line runs. Beyond, to the right, is Racoon Mountain, and next comes Waldron's Ridge. These are spurs of the Cumberland Range, clustered round the town of Chattanooga, which lies under the shelter of Cameron's Hill, a thickly-foliated mamelon. In the middle distance are the Yankee camps. On this side of them, near the centre of the Engraving, lies the Star Fort, while on the extreme right is indicated another very strong redoubt, both being united by lesser works and a continuous chain of trenches. At the foot of the elevation from which my sketch was taken may be seen the Confederate line of breastworks, and in the wooded middle ground the pickets of the opposing armies confront each other within speaking distance. The drawing, however, which I made from the lower ridge of Lookout Mountain, will, I think, give a better idea of the relative positions of the contending forces, as in that the Tennessee River is seen, and even the inside of the Federal works.

OBITUARY OF EMINENT PERSONS.



THE EARL OF ELGIN.

His Excellency the Right Hon. Sir James Bruce, K.T., G.C.B., P.C., eighth Earl of Elgin and twelfth Earl of Kincardine, Baron Bruce, of Kinloss and of Torry, in the Peerage of Scotland, Baron Elgin, of Elgin, in the Peerage of the United Kingdom, Viceroy and Governor-General of India, a leading statesman and diplomatist of his time, was (by his second wife, Elizabeth, youngest daughter of J. T. Oswald, Esq., of Dunnikeir, in the county of Fife, M.P.) the eldest son of Thomas, seventh Earl of Elgin, celebrated as the collector of the "Elgin Marbles." He was born in London, July 20, 1811, and was educated at Eton, and Christ Church, Oxford, where he was first class in classics in 1832. He was afterwards a Fellow of Merton College, and graduated M.A. in 1835, and D.C.L. in 1856. He was elected M.P. for Southampton in the summer of 1841, but was its representative only to the 17th of November of the same year, when he succeeded his father as eighth Earl of Elgin and twelfth Earl of Kincardine. He was, March 16, 1842, appointed Governor of Jamaica. He was made Captain-General and Governor-in-Chief of Canada, Sept. 16, 1846, and, amid the troubles he had there to contend with, displayed unflinching impartiality and a determination to deal with both the vexatiously hostile sections of the Queen's subjects—the Upper and Lower Canadians—on a footing of equality. In mark of the ability and success of his administration, he was named a Knight of the Thistle, July 12, 1847, and was created, Nov. 13, 1849, a Peer of the United Kingdom, as Baron Elgin, of Elgin. He retired from the government of Canada, Dec. 18, 1854, and went as Special Ambassador to Washington in 1854, and was made a P.C. in 1857, and went in that year, as her Majesty's High Commissioner and Plenipotentiary, to China. On arriving at Galle, he was startled with the alarming news of the disaffection of the north-western provinces of India. At Singapore he took it on himself to divert British troops on their way to China, and sent them on to India, while he resolved himself not to leave Singapore till ample and complete arrangements had been made for the transmission of this force to the scene of mutiny. That done, he proceeded to Calcutta, and was received enthusiastically there. He conferred with Lord Canning, the Governor-General, and he remained in India till his Chinese force was replaced by 1500 marines. He returned to China in September, 1857, and joined his French colleague, Baron Gros. Then ensued acts of Chinese treachery, and the consequent bombardment of Canton. The Treaty of Tien-Tsin was signed June 26, 1858. From China Lord Elgin went to Japan, his object being to break up the odious monopoly which had excluded all foreigners except the Dutch from commerce or intercourse with the Japanese people. The Treaty of Jeddo, opening the ports to the British, was signed on the 26th of August, 1858. Lord Elgin, having returned home, took his seat in the House of Lords on the first day of the Session, 1859. He had been made a G.C.B. in 1858, and a D.C.L. of Oxford two years previously, at the Grand Commemoration. Lord Derby, at the time Prime Minister, publicly complimented him on "his zeal, skill, and ability." He was installed Lord Rector of Glasgow University Dec. 22, 1859. When Lord Palmerston returned to power, Lord Elgin accepted the office of Postmaster-General. In 1860 it was again necessary that the Emperor of China should be compelled to fulfil the engagements into which he had entered with the British, but which he was evidently determined, if possible, to evade. Lord Elgin went out, retaining the office of Postmaster-General till September, 1860. On his voyage he was shipwrecked at Ceylon, and had a narrow escape from death, but was put on board another vessel, and proceeded to Hong-Kong, and then to Shanghai. The Taku Forts were taken, the Summer Palace destroyed, and the Chinese submitted themselves. Lord Elgin signed, Oct 24, 1860, at Pekin, the ratification of the treaty of June 26, 1858, and also the convention putting an end to hostilities in China. In January, 1862, Lord Elgin was selected, with universal approbation, to succeed the lamented Lord Canning, his friend and schoolfellow, as Viceroy and Governor-General of India. How, in his Indian administration, he pacified angry feelings, established loyalty among doubtful chiefs, promoted education, furthered religion without offending the natives—all these things are matters of recent history. Though his viceroyalty has been short, it will have left its mark for good on Indian history. His devotion to thus carrying out the duties of his office cost him his life. He was, in the midst of his labours, overtaken by severe illness, and he died at Dhurmshalla on the 20th of last November. Lord Elgin was as popular in private as in public life, being loved and respected by all who knew him; and there is a universal feeling of deep sorrow at his untimely death. Lord Elgin married, first, April 22, 1841, Elizabeth Mary, only child of Charles Lennox Cumming-Bruce, Esq., of Roseisle, in the county of Stirling, M.P., and by her (who died July 7, 1843) leaves a daughter, Elma. He married, secondly, Nov. 7, 1846, Lady Mary Louisa, eldest surviving daughter of John George, first Earl of Durham, and sister of the present Earl of Durham, by whom he had four sons, of whom the third, Charles, died last June, and the eldest, Alexander, now in his fifteenth year, succeeds his father as ninth Earl of Elgin and thirteenth Earl of Kincardine, and second Baron Elgin. Of the late Lord Elgin's distinguished brothers the eldest survivor is the Hon. Sir Frederick William Adolphus Bruce, K.C.B., now her Majesty's Envoy Extraordinary and Minister Plenipotentiary to the Emperor of China. This family of Bruce is of the blood Royal of Scotland, and of kin to the house of Stuart, and to the reigning house of Brunswick. It derives immediately from the marriage of Robert de Bruce, Lord of Shelton in Cleveland, with Agnes, heiress of the Lords of Annandale. It obtained the barony of Bruce in 1602, the earldom of Kincardine in 1647, the earldom of Elgin in 1633, and its barony of Elgin of the United Kingdom in 1849. Between the Sir Edward Bruce, of Blairhall, English Commissioner at the nuptials of Mary Stuart with Francis, Dauphin of France, in 1588, and the late Earl of Elgin, there has intervened a line of noblemen and their issue, warriors, statesmen, and diplomatists of high distinction, and every way worthy of the name of Bruce. The reputation of the Earl just dead gives additional splendour to the race.

SIR HENRY MARTIN, BART.

Sir Henry Martin, third Baronet, of Lockynge, in the county of Berks, was the only son of Sir Henry William Martin, the second Baronet, by his wife Catherine, daughter of Thomas Powell, Esq., of the Chestnuts, Tottenham, Middlesex. He was born on Oct. 3, 1801, and succeeded his father as third Baronet on Feb. 3, 1842. He married, on March 8, 1825, his first cousin, Catherine, daughter of Sir Thomas Byam Martin, G.C.B., Admiral of the Fleet. Sir Henry died, at Tunbridge Wells, without issue, on the 4th instant, and is succeeded by his first cousin and brother-in-law, Sir Thomas Byam Martin's eldest son, Admiral Sir William Fanshaw Martin, G.C.B., now the fourth Baronet, who was born in 1801, and married, first, in 1826, the Hon. Anne Best, daughter of William Draper, Lord Wynford, by whom (who died in 1836) he has a surviving son, William Best. He married, secondly, Sophia Elizabeth, daughter of R. Hurt, and by her has also issue. Sir William's next brother is the distinguished Admiral Sir Henry Byam Martin, K.C.B. This family is of old Irish descent. The first Baronet, Sir Henry Martin (so created in 1791), was Comptroller of the Navy, and was grandfather of the Baronet just deceased.

MR. JUSTICE WIGHTMAN.

The Hon. Sir William Wightman, S.L., First Puisne Judge of the Court of Queen's Bench, whose sudden and lamented death occurred at York, on the 10th inst., was of Scottish origin, and the scion of a highly respectable family, long settled in the county of Dumfries. He was born in 1784, and was educated at Queen's College, Oxford, where he was a Fellow on the Mitchel foundation, and where he took the degree of M.A. Having attached himself to the study of the law, he entered at Lincoln's Inn, and first practised as a special pleader, and obtained a large and lasting business and a great number of pupils. He was, in 1821, called to the Bar, and went the Northern Circuit, where, and in London, he steadily rose to high standing and repute. He was in 1830 appointed a commissioner for inquiring into the practice and proceedings of the superior courts of common law, and in 1833 a commissioner for digesting the criminal law. He was in 1841 made a Judge of the Court of Queen's Bench, and, during the now nearly a quarter of a century that he has worn the ermine, has been remarkable for his profound legal acquirements and high character, his dignified and impartial bearing, his perfect equanimity of temper, and his courteous and kind demeanour. In private life his amiability and pleasing, social manners made him very popular with the profession, and won him the affection of all who knew him. Sir William married, in 1819, Charlotte Mary, daughter of James Baird, Esq., of Lasswade, near Edinburgh, by whom he leaves issue. Sir William Wightman had attained an age when he might have retired with credit, but an apparent strength of constitution and a sense of duty deterred him from doing so; and his demise, but a few hours after he had been sitting in the court at York, is another instance, like that of Sir Cresswell Cresswell, of an English Judge's absolute devotion to his calling and to the public service.

DEAN OF LINCOLN.

The Very Rev. Thomas Garnier, B.C.L., Dean of Lincoln, late Chaplain of the House of Commons, whose lamented demise occurred on the 7th inst., was the second and last surviving son of the Very Rev. Thomas Garnier, D.C.L., now in his eighty-eighth year, Dean of Winchester, and Rector of Bishop's Stoke, Hampshire, by his wife, Mary, daughter of Caleb Hillier Parry, M.D., of Bath, and sister of the late Admiral Sir W. E. Parry, and was cousin of the present William Garnier, Esq., of Rookesbury, Hampshire, J.P. and D.L. He was born April 15, 1809, and was educated at Worcester College, Oxford, graduating B.A. 1830, and, like his father, was elected Fellow of All Souls'. He proceeded B.C.L. in 1833. He was ordained Deacon in 1833, and Priest in 1834. After having been for a short time Curate of Old Alresford, Hampshire, he was successively Vicar of Lewknor, Oxfordshire, and Rector of Longford, Derbyshire. He was, in 1849, appointed Chaplain to the House of Commons, and undertook, also, the ministry of the Lock Hospital Chapel. In 1850 he became Rector of Trinity, St. Marylebone. As Chaplain of the House of Commons, he was most highly respected and esteemed; and also in his large London parish, where he worked with unflagging energy, ability, zeal, and success. In 1859 Mr. Garnier was appointed Dean of Ripon, and in the following year was transferred to the deanery of Lincoln. An accident, which resulted in his death after more than two years' illness, prevented him from carrying out those designs for the benefit of his cathedral and of the diocese on which he had set his mind. The Very Rev. Dean married, May 23, 1835, Lady Caroline Elizabeth Keppel, youngest daughter of William Charles, fourth Earl of Albemarle, by his wife, Elizabeth Southwell, daughter of Edward Lord de Clifford, and by her he leaves a family of sons and daughters. His eldest son, John, born August 24, 1838, is a Lieutenant in the Royal Engineers; and his second daughter, Anne Emily, is wife of Lieutenant-Colonel Edward Newdegate, late Rifle Brigade; and his third daughter, Emily Caroline, is wife of P. O. Papillon, Esq., M.P. for Colchester. Dean Garnier was author of a pamphlet on "The Poor-law Amendment Act, 1835," addressed to the labouring classes, with a view of removing the false notions and groundless fears entertained by many of the poor on the proposed change. He published also "Sermons on the Domestic Duties," a production of an excellent, forcible, and practical character. His eloquent and affecting discourse preached in 1847 in St. Michael's Church for the starving Irish produced double the amount collected on any previous occasion in that church.

THE REV. JOSIAH FORSHALL, M.A., F.R.S.

The Rev. Josiah Forshall, M.A., F.R.S., some time Fellow and Tutor of Exeter College, Oxford, and subsequently Keeper of MSS., and also secretary of the British Museum, was educated at Exeter College, which he entered, as a commoner, in 1814. He graduated B.A. in 1818, obtained a first class in mathematics and a second class in *lit. hum.* In 1821 he proceeded M.A.; in 1820 he was ordained Priest. Mr. Forshall's first appointment to the British Museum dated from 1824, when he was nominated Assistant Keeper of the MSS. by Archbishop Howley, who always entertained the highest opinion, no less of his personal worth, integrity, and gentlemanly bearing, than of his scholarly accomplishments and great learning. This, too, was the opinion of all who knew him, whether in private or in his public capacity. Mr. Forshall's active connection with the British Museum was only severed in 1851, when he retired from the secretaryship in the enjoyment of a pension. At the period of his death Mr. Forshall was preparing for press, at his own expense, "The Holy Gospels in the Received Text of the Greek, with various readings." Mr. Forshall's works are numerous. Among them are "A Catalogue of MSS. in the British Museum," three parts, 1834-40, folio; "Catalogus Codicum MSS. Orientalium qui in Mus. Brit. Asservantur," Part 1—"Codices Syriacos et Carshunicos Amplectens," folio, 1838; "Description of Greek Papyri in the British Museum," Part 1, 1839. He, in conjunction with his learned and able friend, Sir Frederick Madden, K.H., published "The Holy Bible in Earliest English Versions, by John Wycliffe and his Followers, with Introduction and Glossary," Oxford University Press, 1850, 4to. The only clerical preferment that Mr. Forshall ever held was the chaplaincy to the Foundling Hospital, a post which he filled for thirty-three years. Mr. Forshall died on the 18th inst., at his town house, 49, Woburn-place, Russell-square.

THE FARM.

The cup for the best fat beast at the Dublin show has been adjudged to Mr. Gavin Low's 2 years and 9 months' heifer, a cross between a shorthorn bull and a Hereford cow. Among others she beat Mr. Challoner's Flora's Queen, and Mr. J. H. Pollok's and Mr. Featherstonhaugh's capital Hereford cows, bred at Bedstone and Cronkill. In the heifer sections Mr. Allen Pollok won three first prizes for a shorthorn, a West Highland, and poll; but, as he did not choose to contend for the cup, which he gave himself, his best animals had gone to England. Mr. Murray Marshall's Southdown wethers were a leading feature at Guildford, and one of them, 32 months old, weighed 269 lb., or, as it was jocularly said on the ground, within an ounce or so of its master. This Magog of wethers is by a Goodwood sheep. The Artington herd of shorthorns were well to the fore, as heretofore; and the black Sussex pigs were in good force, and all the better for a cross with the Berkshire. At the Tredegar show the Hereford bull-calves, with a majority of 2 to 1 in the entries, beat the shorthorns out of the field for the Bank prize, and *the* prize of the meeting—the Corporation Plate—was awarded to Mr. Wigmore's Hereford cow Stately the Third, beating the celebrated bull Tambarine and two others. The sales all over the kingdom have been remarkably good; and it is rather curious that at the Stoke Edith sale the shorthorns fetched more than the Herefords. Mr. Heath's gold-medal Smithfield ox was sold for £80, the same price that was got by Mr. M'Combie for his prize black poll. Sixty-eight out of the seventy poll bullocks sent by the latter gentleman to London and Liverpool made all prices, from £52 to £36, and the two worst £34 each.

The latest report of the Royal Agricultural Society gives the sum total of members as 5443, being an increase of 266 within the year. The funded property of the society consists of £16,488 17s. 10d. in the New Three per Cents, and the arrears of subscription, including the present year, reach £631. Sheep in future are to be "really and fairly shorn bare" after the 1st of April, and the date of shearing is to form part of the entry certificate. Two inspectors are also to be appointed to report any cases in which the shearing rule has not been properly complied with. At the Newcastle meeting, which commences on the 18th of July, no less than £2820 will be given for live stock, being an increase of £625 over last year; and £550 for implements. This year, in conformity with the new triennial arrangement, the trials embrace tile and brick machines, draining implements, grubbers, ploughs, cultivators, clod-crushers, rollers, and harrows; and there will be prizes for Ayrshires, Scotch horned and polls, and Cheviot and black faced sheep, as well as Channel Island cattle.

By the accounts of the Worcester committee, it seems that the society, after saving considerably on their forage and losing by the apathy of the railway companies, were exactly £279 3s. 9d. out of pocket. Mr. Duckham drew attention at the half-yearly meeting to the necessity of a different understanding with the railway companies, who at present seem to expend their energies in delivering a number of most bewildering passes and instructions on different-coloured paper to herdsmen in the showyard, and then keeping them, in some instances fourteen hours, exposed to the night air and wet at the station before they condescend to load the cattle. He also urged the advisability of all societies adopting a uniform date for the commencement of the breeding year.

The *Veterinarian* gives in full the introductory lecture of Professor Tuson, at the Royal College, in which he points out forcibly to the students how much their labours, both in anatomy, physiology, and several other medical subjects, will be facilitated if they bring high scholastic excellence with them. The theatre was crowded by pupils, new and old, and the Veterinary Surgeon-General of the Army and several members of the medical profession joined the audience. Dr. Busteed's, of New York, string halt theory is again strongly handled in this number. The effects of Alsike clover on the mouths and heels of horses is also pursued, and testimony brought to bear in its favour; and it is strongly queried in an article on cotton-cake whether it is a safe food for calves. We are glad to hear that great additions are being made to the college accommodation in nearly every department.

Lady Pigot has named the bull-calf by Brian Borue from Spicey, which was offered when a few days old at the sale for 80 gs., "Shan O'Neil." Her Ladyship's red heifer by Ravenspur from Medora by Booth's Corsair has also been named "The Pirate's Bride." Mr. Chandos Pole Gell's Almack's Belle and Mr. Churnside's Castanette have each had a bull-calf by Ravenspur, whose calves are much liked at his present quarters, Branches Park. Colonel Towneley's shorthorn sale has been fixed by Mr. Strafford for March 17, and The Sarsden for March 22. We may rest assured that the "without-reserve" condition will be carried out at both in its strictest integrity, without any "jollying" or "repurchasing."

CURRENT LITERATURE.

A Welcome. By Alfred Tennyson; illuminated by Owen Jones. (1 vol. Day and Son.) Our tale of gift-books was by no means completed in the list of last week, as this superb volume, if it were unaccompanied by others, would triumphantly testify. Pen and ink cannot express the princely gorgeousness with which Mr. Owen Jones has illuminated, the publishers have bound, and the score or so of simple but perfect lines in which Mr. Tennyson echoed the sentiments of welcome with which the (supposititious) "sea-king's daughter from over the sea" was received by her adopted people. And here objection may be taken to the wording of the titlepage, which sets forth that the lines are "a welcome to H.R.H. the Princess of Wales, from the Poet Laureate," seeing that the welcome came from the whole nation, of whom the Laureate was the melodious mouthpiece; for he himself gives out these utterances:—

> Saxon, and Norman, and Dane are we,
> But *all of us* Danes in our welcome of thee.

And again,

> Welcome her, welcome *the land's* desire.

Parables of Our Lord and Saviour Jesus Christ (1 vol., Routledge, Warne, and Routledge): *The Golden Harp*, adapted by H. W. Dulcken (ditto): *Aunt Maddy's Diamonds*, by Mrs. Harriet Myrtle (ditto). The first of these three books is a magnificent issue of the parables of Him who spoke as never man spoke. It is illustrated by John Everett Millais, who took six years to complete his pictures, and the pictures have been engraved by the Brothers Dalziel. The second is a collection of "hymns, rhymes, and songs for the young," translated or adapted from the German, with fifty-two illustrations—by J. D. Watson, T. Dalziel, and J. Wolf—engraved by the Brothers Dalziel. The third is a story for children, duodecimo in size, and the "diamonds" alluded to are good words.

The Boy's Own Volume. (1 vol. S. O. Beeton.) This is an amusing book of adventure, edited by the publisher. It embraces fact and fiction of various kinds, and is abundantly illustrated. Boy-nature has become strangely altered by the modern system of moral suasion and other novelties if it be not attracted by the savour of such a work.

Vatican Sculptures. Briefly Explained by Robert Macpherson. (1 vol. Chapman and Hall.) A pretty little duodecimo volume bound in vellum, wherein a competent authority (so far as we can pronounce a decision) explains an interesting series of sculptures in the order in which they are found in the galleries.

The Wars of Wapsburgh. By the Author of "The Heir of Redclyffe. (1 vol. Groombridge and Sons.) A pretty, fanciful, fable-like tale told by a favourite author. A wasp is in some circles called a "waps," and, when to that fact is added this other—that the chief personage of the story is a certain Queen Vespa, which the smallest schoolboy knows is Latin for a wasp, a sufficiently broad hint will have been given of the kind of fabulous history to be expected.

The Black Panther, by Sir Lascelles Wraxall, Bart. (1 vol. Sampson Low, Son, and Marston.) "The Black Panther" is rare fare for boys who hunger for exciting literature. It is an account of a boy's adventure amongst the redskins chiefly, and, as the author has never been further west than (we think he says) Killarney, he has borrowed and adapted "situations" from a German author. Louis Huard has furnished graphic designs, and the designs have been engraved by Edmund Evans.

The Book of Common Prayer (1 vol., John Murray): *Wedgwood*, an Address by the Right Hon. W. E. Gladstone (ditto). The Book of Common Prayer has never been issued in more graceful form than that in which it now challenges attention. The floral borders are particularly beautiful, and the type and paper leave nothing to be desired. The Chancellor of the Exchequer's excellent address is probably still fresh in many memories; and those who would like to have it always by them have now the opportunity offered them of obtaining it in sightly form, with the accompaniment of two portraits (by Flaxman) of the illustrious Wedgwood. One is an "early" and the other a "late" portrait.

Poems of S. T. Coleridge (1 vol., Bell and Daldy, and Sampson Low, Son, and Marston): *The Works of George Herbert* (ditto): *White's Natural History of Selburne* (ditto): *Milton's Paradise Lost* (ditto): *Milton's Paradise Regained* (ditto): *Lamb's Tales from Shakspeare* (ditto): *Southey's Life of Nelson* (ditto): *Poems of Robert Burns* (ditto): *Songs of Robert Burns* (ditto): *The Robin Hood Ballads* (ditto): *Sea Songs and Ballads*, by Dibdin and others (ditto): *The Poems of Henry Wadsworth Longfellow* (ditto): *The Lieutenant and Commander*, by Captain Bazil Hall (ditto): *The Midshipman*, by Ditto (ditto): *The Complete Angler*, by Izaak Walton and Charles Cotton (ditto): *Parables from Nature*, by Mrs. Alfred Gatty (ditto). With the exception of not more than one or two, the books enumerated form a charming series of little dumpy volumes, as like as peas to one another, and are the joint issue of two well-known firms. The contents of nearly all of them are, or ought to be, so familiar to the educated that comment would be impertinent. It is pertinent, however, to observe that they are printed after the fashion which was generally admired in the publications of the late Mr. Pickering.

Knowledge for the Time. By John Timbs. (1 vol. Lockwood and Co.) A grateful public has, we believe, shown a proper appreciation of those useful compilations which Mr. Timbs has from time to time, with careful pains, put together for instruction and entertainment's sake. He has now prepared a new volume as a sort of supplement to his "Things not Generally Known," and undiminished popularity is likely to attend his new labours. The frontispiece represents Captain Cole's famous turret-ship "cleared for action and the bulwarks down."

Pet Marjorie. (Edinburgh: W. P. Nimmo.) This is a reprint, partially or entirely, of an essay which has already appeared in at least one periodical. The author is Dr. John Brown, whose "Rob and his Friends" has met with such wonderful, but still such deserved, success. If the author's name be not sufficient to provoke curiosity or a better feeling, it remains to be told that "Pet Marjorie" was an "infant phenomenon" who lived on terms of great intimacy with the "Wizard of the North," and to whom the great novelist used to say a nonsense lessons." To our thinking, Marjories are by no means so few as the world imagines; it is the paucity of great men who will condescend to childhood which confines their wonderful sayings and doings to the traditions of the nursery or the treasury of the mother's heart.

Undertones. By Robert Buchanan. (1 vol. Moxon and Co.) A tastily-appointed volume of poems, the writer of which stands as high above the average throng of versifiers as the son of Kish stood above the congregation of Israel. He takes his lyre in hand and discourses sweet music to such effect that one is occasionally inclined to think he might challenge the equal of Shelley to a flight of imagination or a bout of melody. It is grievous to observe the bitter tone of disappointment in which his short preface is written, for his performance is excellent and his promise great. Let him forgive us, however, if we hint that obscurity is not always profundity, that affectations (e.g., the word *chrism*) are not always winning, and that it is a liberty to put into Horace's mouth *Favonus* instead of *Favonius*.

Their Majesties' Servants. By Dr. Doran. (2 vols. W. H. Allen and Co.) In two portly volumes, and under a title which is now obsolete, or a mere formality, Dr. Doran has published a bulky contribution to the history of the English stage. His annals embrace a period extending from Betterton to Edmund Kean, inclusive in both cases, and his style, no less than his subject, will, no doubt, ensure him numerous readers. It is the very nick of time for showing Englishmen that we really had once great actors, when English tragedy is enacted with most applause by aliens from France and America.

The Madrid journals state that a lawsuit has just been decided there which had now lasted for two centuries and a half. The subject of litigation was the inheritance of Francis Pizarro, an entailed estate left by a Gonzales Pizarro, and certain property which formerly belonged to Ferdinand Pizarro, brother of the celebrated conqueror. The right to the whole was claimed by the Count de Concelada, the Duke de Noblejas, and the Marquise de la Conquista. The tribunal decided that the inheritance of Francis Pizarro belonged to the Duchess de la Concelada, now Marquise del Douro and wife of Marshal Concha, and the entailed estate to the Marquise de la Conquista, while the property left by Ferdinand Pizarro was ordered to be distributed among the charitable establishments of Madrid.

MUSIC.

AT COVENT GARDEN the last representation of "Blanche de Nevers" took place on Saturday, the audience on that occasion being somewhat larger than has of late been the case. Miss Louisa Pyne was unfortunately suffering from indisposition, and was obliged, consequently, to omit much of her music. The illness of this excellent artist, however much to be deplored, is scarcely to be wondered at, her arduous exertion during the past season being taken into consideration. It is to be hoped that the long rest she will enjoy during the run of the pantomime will completely restore her to health. We fear that the season has been, hitherto, anything but a profitable one to the managers, and we are, moreover, much inclined to question the wisdom of the policy pursued by the "firm." For many weeks past it has been quite palpable that neither Mr. Wallace nor Mr. Balfe has in his latest productions succeeded in altogether "hitting" the popular taste. Under these circumstances, it would surely have been the wiser course to have occasionally fallen back upon some of the many available operas in the repertoire of the company. Auber's sparkling music, both in the "Domino Noir" and in "The Crown Diamonds," has already been excellently interpreted by the troupe; and in both operas Miss Pyne and Mr. Harrison shine to great advantage. Benedict's "Lily of Killarney," too, one of the most masterly productions of the day, has far from outlived its popularity. And any of these operas might, we are convinced, have been revived to the satisfaction of the public and the advantage of the management. The forthcoming pantomime, of which report speaks highly, will doubtless do much to replenish the treasury; and we trust that at its expiration the Pyne and Harrison régime may, by the production of successful novelty, be enabled to bring their final season at Covent Garden to a conclusion with éclat and with pecuniary success.

"Infant Phenomena" are, as a rule, objectionable, and the talents they display but superficial. This rule, however, like all others, has its exceptions, and amongst them we are glad to place a juvenile pupil of Mr. Benedict—Master Cowen, who gave a pianoforte recital at the concert-room attached toHer Majesty's Theatre on Thursday in last week. Master Cowen, who is but eleven years old, displayed a command over the instrument quite astonishing for one so young, while his execution of many different schools of music was admirable. He has evidently greatly profited by the instructions of his excellent professor, and, if his young head be not turned, may ultimately attain a high position in the profession. Master Cowen is, moreover, a composer, a creditable MS. song of his being sung by Miss Emma Heywood, in the absence of Mr. Renwick from indisposition.

"The Messiah" has been repeated to huge audiences at Exeter Hall by the Sacred Harmonic and National Choral Associations. The latter, under the direction of Mr. W. G. Martin, has made surprising progress lately, the choir now fairly competing with that of any other society. A somewhat unseemly disturbance took place at the last performance of the Sacred Harmonic, owing to the overcrowding of the gallery, by which Mr. Sims Reeves was for a time prevented from proceeding with his opening air. Order was, however, soon restored, and the performance listened to with the usual attention.

At St. James's Hall, the first subscription concert of Mr. Henry Leslie's choir was given on the Thursday in last week. The perfection to which the indefatigable founder of this choir has brought the forces under his command was never more perceptible than on this occasion. The programme included Spohr's "Ode to St. Cecilia," and new compositions by Mr. Henry Smart and Mr. Henry Leslie. Spohr's music was admirably given, but failed to excite much interest. The solos, by-the-way, were beautifully sung by Mdme. Lemmens-Sherrington. Of the new compositions, Mr. Leslie's, "The Lark's Message," was the most successful. It is exceedingly pretty, is skilfully harmonised, and was done ample justice to. The most attractive portion of the evening's entertainment was, however, undoubtedly, the faultless rendering of the old English madrigals and part-songs by the choir. Pearsall's madrigal, "Sing we and chant it," was loudly encored, as also was Callcott's "First twitter of spring." In addition to the choral element of the programme, M. Lotto played two solos; Mdme. Sherrington sang "Je suis sauvée enfin," from the "Domino Noir;" and Herr Blumner played Beethoven's "Thirty-two Variations" and Lizst's fantasia on the march from the "Tannhäuser."

M. AGUILAR'S performances of pianoforte music, at his residence, 17, Westbourne-square—of which two have already taken place, attract numerous and distinguished audiences, who evidently highly appreciate the intellectual treat afforded them. The entertainment, which only lasts about an hour and a half, consists entirely of M. Aguilar's performances. The programme—always admirably arranged—comprises various compositions by the great masters and standard writers for the piano, together with several of M. Aguilar's own charming compositions, all of which are given in that gentleman's best style.

The last MONDAY POPULAR CONCERT before the Christmas holidays attracted another large audience on Monday evening last. Although there was no novelty in the programme, it was again a capital one, comprising, as it did, Haydn's delicious quartet in D minor (No. 76); Hummel's grand septet, in the same key; Mendelssohn's quartet in E flat, op. 44; and last, and not least, Weber's sonata in C major, repeated by desire, and most magnificently played by Mdme. Arabella Goddard. Mr. Santley and Mdme. Rudersdorff were the vocalists, and the fine rendering by the gentleman of Schubert's "Wanderer" produced an enthusiastic encore. This fine song was given by Mr. Santley in English, the excellent and scholarly version of the words being from the accomplished pen of Mr. Campbell Clarke.

THE THEATRES.

CHRISTMAS PIECES.

WE have already given the titles of many of the entertainments projected for the Christmas weeks. The majority of theatres are yet under the necessity of depending on pantomimes and burlesques at this season—a dependence which is no doubt of immediate injury to the regular drama, but which may not be superseded until an improvement in the principle of management takes place, and the popular mind be better prepared for the highest art both in drama and acting. As the matter stands, the great gatherings of the people at festive seasons, instead of being taken advantage of in the interest of all that is excellent in such art, are used for the subordinate purpose of finding employment for a multitude of grotesque performers, who hold their saturnalia for a month or two, and retire for the remaining ten into contented obscurity. The institution they represent, however, is a very old one, traceable even into classical ages, and perhaps to be predicated also of those pre-historic times in which most old stories and solemn ceremonials had their beginnings. There are large classes by which it is reverenced, and during the provisional periods which must yet elapse before any reform implying a dramatic millennium can possibly arrive, we must expect that it will be extensively patronised. As literary productions, pantomimes have a far higher value than they could boast of a few years ago, and we may perceive a gradual process of transformation, by which it is likely that they may be conducted finally into compositions that may worthily address the fancy or even the imagination of cultivated minds. Assuredly there is a movement for the better at all the theatres—a very slow one, granted, but perhaps all the more sure, and of fuller accomplishment in the end. For the present, the LYCEUM stands alone in doing without a pantomime; but in future years other enlightened managers may be found to follow the example of Mr. Fechter.

The title of the pantomime at COVENT GARDEN has been already given. To the legend of "St. George and the Dragon" Mr. Byron is said to have added many new points. He claims to have made the Dragon an agreeable scoundrel rather than the stock pantomime monster. There is a scene in the Dragon's nursery which we are promised will be immensely droll; and the transformation-scene is to be "the most magnificent, tasteful, and elaborate that Mr. Grieve has ever executed." It is an eminent chivalric display—knights, squires, pages, real armour, and all that may be comprised in the half dozen words, "the glorious panoply of feudal war."

Mr. Blanchard, at DRURY LANE, has endeavoured to transfer to the stage the fascinations of the Arabian Nights. But he puts a meaning into the fable. At the Great Pyramid, Cheops and the Mummies are resuscitated to impede the progress of Young England (Miss Rose Leclercq) on the road to discovery, who, notwithstanding, reaches the source of the Nile and becomes possessed of the long hidden secret. Sinbad departs from the port of Bassora, and arrives at the Court of the Indian King; after which he takes his flight from the Diamond Valley on the back of the mighty roc. Then there are the acted legend of the Old Man of the Sea, the Kingdom of the Dwarfs, and the Flowery Land of the Eastern Genii. The scenic effects are extraordinary, and the best that Mr. William Beverley has ever produced. The harlequinade will be supported by a double company—Messrs. Harry Boleno and C. Lauri, Clowns; Messrs. Barnes and J. Morris, Pantaloons; Messrs. Cormack and Saville, Harlequins; and Mdme. Boleno and Miss Gunniss, Columbines. Costumes and appointments will be supplied, regardless of expense.

HAYMARKET.—The title of Mr. William Brough's extravaganza has a lofty sound, "King Arthur; or, The Days and Knights of the Round Table." The piece is stated to be original. Of course Merlin, the enchanter, is a principal character, and he is enacted by Mr. Tilbury. The old Druidical Temple at Stonehenge is the scene wherein he utters his spells, which have for their object the discovery of the rightful heir to the throne, by means of a naked sword embedded in a block of stone, removable only by the true king. Watched in his incantations by Vivien (Miss E. Romer), Merlin is angry, but is afterwards coaxed into submission. Arthur (Miss Louise Keeley) can alone draw out the magic weapon. The enchantress Morgan (Mr. Clarke) is enraged, and enters into an understanding with Cheldric (Mr. Rogers), which Vivien overhears and discloses to Merlin. Arthur, however, is led away into the enchanted forest, where he is assailed by all the powers of witchcraft; nevertheless, though deprived of the assistance of Merlin by Vivien's imprudence, Arthur resolves to deliver his queen, Guinevere, from prison. The attempt is successful, and Vivien at the same time, by a counterspell which she has found, sets Merlin free from the tree wherein the wizard had been confined.

At the PRINCESS' the title of the Pantomime is "Harlequin Little Tommy Tucker; or, the Fine Lady of Banbury Cross, and the Little Old Woman who Lived in a Shoe and had so many Children she Didn't Know What to Do." The Brothers Grimm have supplied the incidents. The scene opens with Old Cocker's Cabinet of Calculation, occupied by an old dame who is kept in constant fear by Taffy the Welshman—the thief who has stolen Mary, the daughter of Old King Cole, and transformed her into a marble statue. But Old King Cole "calls for his fiddlers three" to disenchant her; however, the honour of the achievement is reserved for Tom, the old lady's son. Mr. Charles Hall has composed the music and Mr. Lloyd has furnished the scenic illustrations. A large number of juveniles will be engaged in the performance.

At the OLYMPIC a new style of composition will be attempted, something after the manner of the old morality which was so popular just before the advent of the immortal Shakspeare. The piece is entitled "Sense and Sensation; or, the Seven Sisters of Thule." In it we are told that Sense has vacated her throne to Sensation. Courage is, however, determined to make a bold stand against the usurper, and, with her sister virtues, starts for earth. Both parties struggle for supremacy, and the action passes in review the various quackeries of the year. Of course, Sense and Courage are ultimately successful. The piece terminates with a brilliant allegorical tableau, presenting the Temple of the Virtues in the realms of Utopia. The drama is interspersed with music. Probably, the first representation of the piece will be deferred until a few nights after Christmas.

The NEW ADELPHI presents a burlesque fairy drama, written by Mr. H. J. Byron, entitled "Lady Belle Belle; or, Fortunio and his Seven Magic Men." This burlesque has already been represented at Mr. Henderson's Theatre, Liverpool, and consists of one of the Countess D'Anois's stories condensed into one act. It is full of wondrous feats, which, to be appreciated or described, must be witnessed.

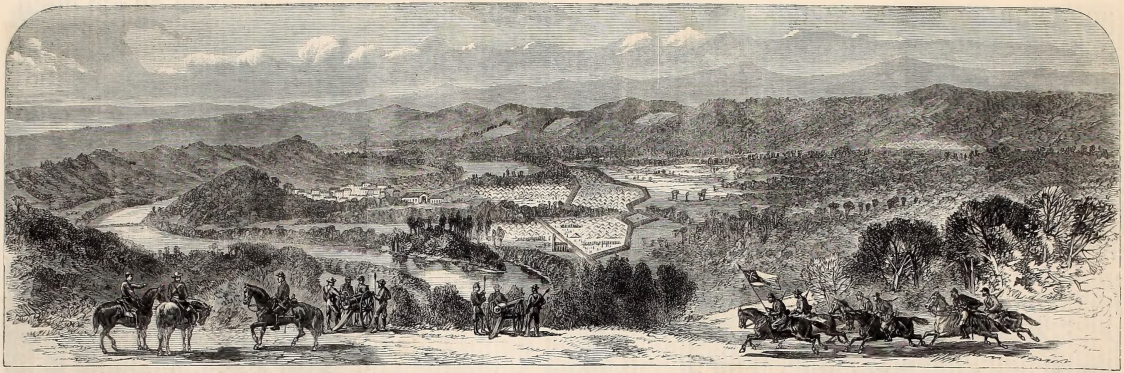
At the STRAND, also, we meet with Mr. Byron and a Christmas Extravaganza, entitled "Orpheus and Eurydice; or, the Young Gentleman who Charmed the Rocks." Miss Marie Wilton personates Orpheus, and Miss Ada Swanborough Eurydice. The latter is in danger from Aristæus, a sportsman, who means to carry her off. Eurydice flees from him through a garden, and is bit in the heel by a serpent. She is followed by her pursuer to the Styx; Orpheus, with a lyre given to him by Apollo, effects her rescue. Other matters are introduced, the pure inventions of Mr. Byron's brain, which we must reserve to an after notice. Orpheus, as in the fable, looks back after his wife and loses his chance. But his magic lyre redeems all; not only softening his enemies' hearts, but splitting rocks, and so making way for a splendid transformation-scene. The scenery is by Mr. Fenton.

At the NEW ROYALTY, Mr. F. C. Burnand provides a comic drama, with many tableaux, entitled "Madame Berliot's Ball; or, the Chalet in the Valley." A long story pertains to this drama, which we cannot undertake to relate until we have an opportunity of witnessing the performance. It appears to be full of character and incident.

We meet with Mr. Byron again at the ST. JAMES'S, in a sort of *revue*, entitled "Sensations of 1863," which has a far longer title. Mr. Toole, it is understood, will in this piece assume many disguises, and will be assisted by Mr. Paul Bedford and other members of the Adelphi company.

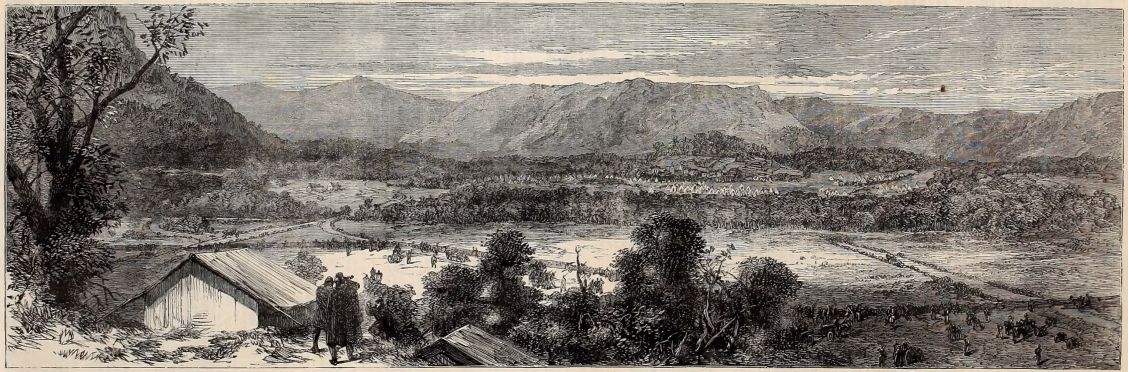
SADLER'S WELLS, under its new management, promises a stirring pantomime by Mr. Cheetham. It is entitled "The Prince of the Peaceful Islands; or, Harlequin, the Magic Pearl, the Centaur, and the Fairy Amazon." There is a subtlety in the fable of this piece which compels us to reserve our criticism on its plot until we have seen how it works. The account rendered of it is certainly suggestive. The scenery is painted Mr. Charles S. James, and the music is selected, composed, and arranged by Mr. B. Isaacson.

The STANDARD Theatre presents a pantomime, under the superintendence of Miss Marriott, called "The Prince and the Lion King; or, Harlequin, the Invisible Cap, and the Fairy Queen that was Changed into a Frog." The text has been furnished by Mr. W. E. Suter, the scenery painted by Mr. John Crawford, and the music composed by Mr. George Chapman, jun.



Mr. Nelson Lee, at the CITY OF LONDON, now under his sole direction, presents his 217th comic pantomime, under the title of "Black Beard; or, Harlequin Dame Trot and her Comical Cat." A full detail of the plot must be reserved, particularly as it consists of complicated effects and novel combinations.

ASTLEY'S, under the sceptre of Mr. E. T. Smith, is likely to be resuscitated. The pantomime, engrossing the names of Friar Bacon and John of Gaunt, represents the loves of Geoffrey Chaucer and the characters of his Canterbury Pilgrims. The theme is certainly an ambitious one, and we believe will be most effectively treated. The transformation-scene, by Mr. Gates, will be brilliant. Throughout the piece an enormous number of persons will be introduced, and Mr. Batty's horses exhibited. We expect to be able to give a good account of this spectacle.



The GRECIAN is always great in pantomime, and will this year, perhaps, exceed expectation. The subject is a magnificent one, and appears to be copiously treated. It is entitled "Robinson Crusoe; or, Harlequin and his Man Friday, and the Magic Pearl," and is the composition of Mr. George Conquest and Mr. H. Spry.

The SURREY next claims, and, in this department, will reward, attention. The pantomime is entitled "Harlequin Old King Cole; or, Ride a Cock-horse to Banbury Cross, and the Frog that would a wooing go." It is produced by Mr. Shepherd. The transformation-scene is by Mr. Brew. The opening is written by Mr. Dutnall, and the incidents promise to be various and amusing.

The MARYLEBONE, under the direction of Mr. Cave, is a great success, and we have no doubt that his pantomime will be a most meritorious production. It is entitled, "Jolly King Christmas; or, Harlequin Jack Frost, the Giant, the Beanstalk, and the Little Fay of the Silvery Waterfall," and written by Mr. F. Marchant. Not to be outdone by larger rivalry, Mr. Cave has engaged a double troupe of pantomimists, consisting of Laurence and Cooper, Frederick Vokes, Fawdon Vokes, Victoria Vokes, Rosina Vokes, and Jessie Vokes, from the Théâtre Funambules, Paris.

COCOANUT-TREE AT SION, ISLEWORTH.

IT is chiefly to the liberality and to the interest taken in such matters by our nobility that horticulture is indebted for it extraordinary development, for they furnish scientific men with opportunities for carrying out experiments from which they gain such an amount of knowledge as enables them to set the harsh climate of our cold northern island at defiance, and, in the artificially created tropical climate which they day and night maintain in their great glass houses, set before us, in luxuriant growth, all the wonders of vegetable creation. From the sunny slopes of the lofty Himalayas; from the mountains of China, the islands of the Indian Archipelago, and those that scent the tropical breeze with their spicy odour; from the depths of the South American wilderness, and from the deserts of Africa, are brought specimens of every description of vegetable production, some curiously minute, others of colossal size, some whose annual growth is almost imperceptible, and others that increase their height ten feet in a week. Those, therefore, who may not have had opportunities for travelling may see the plants, vegetables, and fruits of far-off lands grow, flower, and bear fruit, almost as well as those who have; for it is only in very rare instances that our eminent horticulturists have failed in fruiting the plants of other climates, be their natural peculiarities of position, soil, or temperature what they may. The subject of our Illustration on page 665 is an example of the skill and energy displayed in this department of science; for it is to Mr. Smith, of Isleworth, who has the management of the grounds and conservatories of his Grace the Duke of Northumberland at Sion, that the merit is due of producing the first cocoanut ever grown in Europe. There is now at Sion a cocoanut-tree, in luxuriant condition, bearing numerous flowers, both male and female, and fruit which is rapidly increasing in size. The first formed is now nearly ten inches in diameter, and bids fair to become a nut of large size. This success has been brought about entirely by the ingenuity with which Mr. Smith contrived to manipulate the pollen, and bring about, by purely artificial means, such results as are produced by winds or birds when the tree is growing in its native soil.

BRONZE STATUE OF FATHER MATHEW, BY J. H. FOLEY, R.A., TO BE ERECTED AT CORK.—SEE NEXT PAGE.

THE CHURCH OF ST. LUKE, SHIREOAKS, NOTTINGHAMSHIRE. SEE NEXT PAGE.

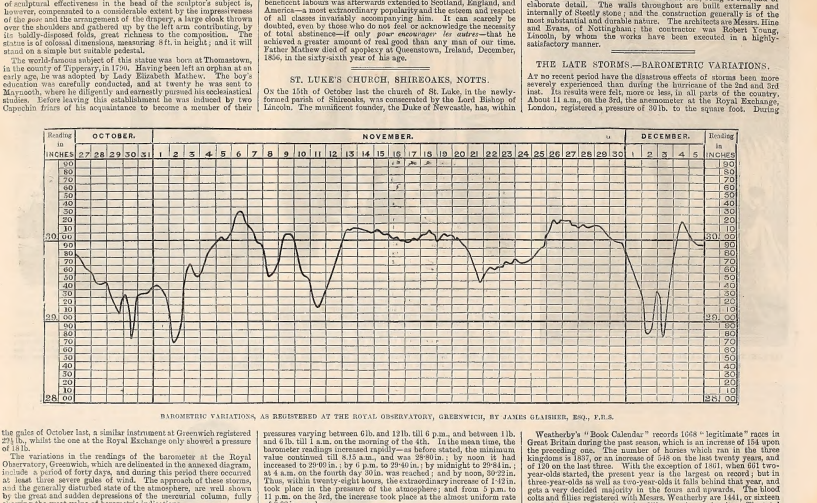
Associated with this curiosity of Sion are many other rare plants. The mangosteen here bears luxuriant crops. There are also the date, palm, dwarf bananas, ripe vanilla plants, loading the rafters of the house with pods; likewise cinnamon, cotton, tea, allspice, and breadfruit.

PARIS FASHIONS FOR JANUARY.—SEE PAGE (5[illegible]

STATUE OF FATHER MATHEW.

A HANDSOME statue of Father Mathew, sculptured by Mr. J. H. Foley, R.A., will shortly be erected at Cork. It is the result of a public subscription, the citizens of Cork, headed by the Mayor, Mr. J. F. Maguire, M.P., being the principal contributors. Mr. Maguire has distinguished himself not only by the zeal with which he has promoted the acquisition of this statue for Cork, but also by his full and able biography, just published by Messrs. Longman, of the remarkable man—so eminent for goodness, that best of all greatness—whom the statue will commemorate. It was intended that Mr. Foley's work should have been set up during the present month, before the close of the present term of Mr. Maguire's Mayoralty; but as that gentleman has been re-elected, its erection will be postponed for a short time, in order to avoid any risk from hastening the casting. However, as we have the truthful model of the statue before us (from our Engraving on page 665 was taken), we can unhesitatingly predict that the earliest work of all worthy sustain the sculptor's high reputation. The great Apostle of Temperance is represented in the attitude of addressing an audience: and his impressive, empassioned manner is well indicated in the action of the right hand and the slightly forward inclination of the head. The likeness is admirable, and the expression seems with benevolence, goodness, and amiability; and it must be admitted that the rounded contours of the head, features neither very characteristically executed in detail nor strongly marked in combination, a close-shaven face and short hair, did not form a sticklingly picturesque example or type of head such as would allow a sculptor to display the finest effects of light and shade. The want of sculptural effectiveness in the head of the sculptor's subject is, however, compensated to a considerable extent by the impressiveness of the pose and the arrangement of the drapery, a large cloak thrown over the shoulders and gathered up by the left arm contributing, by its boldly-disposed folds, great richness to the composition. The statue is of colossal dimensions, measuring 8ft. in height; and it will stand on a simple but suitable pedestal.

The world-famous subject of this statue was born at Thomastown, in the county of Tipperary, in 1790. Having been left an orphan at an early age, he was adopted by Lady Elizabeth Mathew. The boy's education was carefully conducted, and at twenty he was sent to Maynooth, where he diligently and earnestly pursued his ecclesiastical studies. Before leaving this establishment he was ordained by my Capuchin friars of his acquaintance to become a member of their order, and with them he went to Kilkenny, where he remained until appointed to Cork. From an early age his manners were noticed as naturally polished and singularly agreeable, and now these drew all classes in the neighbourhood to his friary. In the confessional his popularity rapidly grew, till he acquired a greater spiritual influence than perhaps any Catholic clergyman has ever enjoyed in a like capacity. As a zealous friend to the poor he had also made himself widely known and esteemed. He had established a religious society for visiting the sick and indigent, similar to those founded by St. Vincent de Paul; and so beneficial was its operation that the Poor-Law Commissioners sent to Father Mathew (in 1840) special authority to its composition and working. His great influence was always exerted for good, and never in a way which could give rubbage even to Protestants; and it was the universal esteem in which he was held that induced the leaders of the teetotal movement, which had already been set on foot in Cork, to apply to Father Mathew for assistance. At a meeting of teetotallers at Cork, in 1838, it was resolved to call a "requisition" to him entreating him to join in their operation. His reply being favourable, a total abstinence society was formed, of which he became immediately president. He entered upon the great crusade against the use of intoxicating liquors with characteristic energy; and in the course of five months he had made no less than 156,000 converts in Cork and its neighbourhood alone. The improvement in health noticeable in many of these led to a belief in his miraculous powers, and his fame spread, and produced a corresponding increase of popularity. We have not space to follow him to Limerick, where the excitement was still more extraordinary—nor need we remind the reader that the sphere of his indefatigable and benevolent labours was afterwards extended to Scotland, the mainland, and America—a most extraordinary popularity and the esteem and respect of all classes invariably accompanying him. It can scarcely be doubted, even by those who do not feel or acknowledge the necessity of total abstinence—*if only your encourager be entire*—that he worked a great amount of real good than any man of our time. Father Mathew died of apoplexy at Queenstown, Ireland, December, 1856, in the sixty-sixth year of his age.



ST. LUKE'S CHURCH, SHIREOAKS, NOTTS.

On the 15th of October last the church of St. Luke, in the newly-formed parish of Shireoaks, was consecrated by the Lord Bishop of Lincoln. The munificent founder, the Duke of Newcastle, has, within the last few years, opened extensive colliery works at this place, which, situated as it is on the Sandsetter, Sheffield, and Lincolnshire line of railway, is destined as no distant period to rise to importance. In order to meet the spiritual wants of those engaged in this colliery, he has built and endowed this most beautiful building, capable of holding 450 worshippers within its walls. The foundation-stone was laid by his Royal Highness the Prince of Wales, two years ago, on St. Luke's Day, and since then an imposing architectural structure has risen, furnished with all the appurtenances belonging to the house of God. A noble work, conceived in a noble spirit, has been carried out in a most worthy manner.

The church is of English Gothic of the fourteenth century, and consists of a clerestoried nave, north and south aisles, an apsidal chancel, and a lofty tower surmounted by a handsome spire. The tower occupies a central position between the nave and chancel, and is flanked by an organ screen on the north side, and by a vestry on the south. It is supported on massive piers and pointed arches of considerable height. The nave is lighted by deeply moulded and splayed, from clustered marble shafts on richly-carved corbels, which contribute in no slight degree to the general effect of the interior. The extreme length of the church is 108 ft., and the breadth 46 ft. The windows throughout are of geometric patterns with traceried heads, and in each case are surmounted by a hood-mould terminating in carved bosses. The roofs are of good pitch, and are open timbered, the flat spaces between the open being filled with ornamental ceiling; painted decoration is also applied to the walls in the form of inscriptions. The church is filled with open benches, those in the chancel, together with the communion-table and lectern, being of oak, and elaborate detail. The walls throughout are built externally and internally of Steetley stone, and the construction generally is of the most substantial and durable nature. The architects are Messrs. Hine and Evans, of Nottingham; the contractor was Robert Watkins Lincoln, by whom the works have been executed in a highly-satisfactory manner.

THE LATE STORMS.—BAROMETRIC VARIATIONS.

AT no recent period have the disastrous effects of storms been more severely experienced than during the hurricane of last Sunday and last inst. Its results were felt, more or less, in all parts of the country. About 11 a.m., on the 30th, the consternation at the Royal Exchange, London, registered a pressure of 30lb. to the square foot. During

BAROMETRIC VARIATIONS, AS REGISTERED AT THE ROYAL OBSERVATORY, GREENWICH, BY JAMES GLAISHER, ESQ., F.R.S.

the gales of October last, a similar instrument at Greenwich registered 29½lb., whilst the one at the Royal Exchange only showed a pressure of 18½lb.

The variations in the readings of the barometer at the Royal Observatory, Greenwich, which are delineated in the accompanying diagram, include a period of forty days, and during this period there occurred at least three severe gales of wind. The approach of these storms, and the generally disturbed state of the atmosphere, are well shown by the great and sudden depressions of the mercurial column, fully showing the great value of barometric indications.

The first of these storms occurred on the 30th of October, and was 1st part ushered in by steady decrease of the barometer from 29·93 in. on the 27th to 29·10 in. on the 29th; and, although it increased slightly to 29·24 in. on the morning of the 30th, it was but to decrease with greater rapidity to 28·80 in. by 3.30 p.m. This rapid decline of the readings of the barometer to the amount of half an inch in nine hours only fully indicated the approaching squall; indeed, with the first symptoms of this rapid decrease, the wind commenced to blow heavily from the S.W. At noon at 9.30 a.m. a gust of 15 lb. pressure on the square foot took place, which was accompanied by a heavy shower of rain; but, from 10 a.m. to 2 p.m. the pressure never exceeded 5 lb.; after 3 p.m. the wind became extremely violent, success only reaching pressures of 12, 13, and 17 lb.; and finally, the extreme pressure of 29 lb. was recorded at 3.30 p.m., being coincident with the time of the minimum reading of the barometer. This pressure was unprecedented as regards the present century, the extreme pressure in all preceding years from 1841 having been 21 lb.

On the morning of the 2nd of November another minimum value of the reading of the barometer was reached—viz., 29·74 in., which was accompanied by a heavy rainfall, to the depth of half an inch, and by a S. and S.W. wind, which blew briskly, although not heavily.

The second storm which we have to announce occurred on the 14th of November, and was foretold by the rapid decline of the barometer from 29·93 in. on the night of the 10th to 29·70 in. on the morning of the 13st, and then to 29·44 in. by 5 p.m., accompanied, as before, by an extreme gust of 17 lb. The gusts of pressure continued only between 4 and 5 p.m.

The third, and by far the most remarkable, storm occurred on the 22nd inst., and was amply presaged by the rapid fall of the barometer from 29·46 in. on the night of the 18th to 28·84 in. on the morning of the 20th. This, however, did not begin to blow heavily until 2.30 p.m., when a sudden gust of 9 lb. was recorded; from 2.30, till 3.30 the pressure varied from 9 lb. to 9 lb. It then increased greatly in force. At 2.50 p.m. there was a pressure of 16 lb., and at 3.15 p.m. one of 22 lb. From 3 p.m. to 5 p.m. the pressures varied between 10 lb. and 15 lb., with one gust to 20 lb. Afterwards no pressures to greater amounts than 7 lb. and 8 lb. were registered. At the time of the extreme pressure in the gust of 22 lb. the reading of the barometer had turned to increase, and was reading 28·95 in. The minimum having been 28·84 in., three hours previously; it was then increased to 29·38 in. by 9.30 p.m.; and after 11 p.m. again decreased rapidly, reaching a minimum value of 28·60 in. at 7.30 a.m. on the 23rd; and at this reading the barometer continued stationary through a period of one hour. During this decided barometric decline, the wind had recommenced, blowing strongly from 3 a.m. till 8 a.m., pressing with forces varying between 2 lb. and 8 lb.; at 8.10 a.m., whilst the barometer was at its lowest reading, the maximum pressure of this gale occurred—namely, 21 lb. on the square foot. The wind at the same time veered from south-west to west, and continued from this quarter throughout the greater part of the day, still blowing with much strength, the pressures varying between 6 lb. and 12 lb. till 6 p.m., and between 1 lb. and 6 lb. till 1 a.m. on the morning of the 4th. In the mean time, the barometer readings increased rapidly—as before stated, the minimum value continued till 8.15 a.m., and was 28·80 in.; by noon it had increased to 29·03 in.; by 3 p.m. to 29·21 in.; by midnight to 29·44 in., at 4 a.m. on the fourth day 30 in. was reached; and by noon, 30·22 in. Thus, within twenty-eight hours, the extraordinary increase of 1·42 in. took place in the pressure of the atmosphere; and from 2 p.m. till 11 p.m. on the 3rd, the increase took place at the almost uniform rate of 0·04 in. per hour.

The subordinate gales of this period have also been accompanied by corresponding barometric depressions. In the preceding remarks the connection existing between the decline of barometer readings and the then approaching gales are very plainly indicated. A more steady lesson from these examples than the chief security of a gale may be expected at or near the time of minimum barometer reading.

NATIONAL SPORTS.

We have not heard the last of the unfortunate Stamford sale; and, in fact, fresh complications arise at every step. It will be remembered that two days after the sale it was officially announced that Lord Stamford had "repurchased" the seventeen lots bought by Lord Bergbley, Captain White, Mr. Ten Broeck, Mr. Cartwright, and Mr. Wallace. And at the last meeting of the Jockey Club Committee, Mr. Naylor put in his claim, and his Lordship at once allowed it. During the course of last week Lord St. Vincent, who had 1900 gs. for Cambuscan and 2900 gs. for Archimedes, followed suit, and claimed delivery of both of them "within four days," and notice of demand was also served on Mr. Cartwright for Lord Stamford. At present his Lordship declines to accede to it, and on Monday Captain White's solicitor waited by Hyde Park Gate to tender the amount in full (9000 gs.) which he bid for both colts, and said that he had the money in his pocket provided all the others failed. The Messrs. Tattersall declined to receive his money, and there at present the matter rests till a trial or some mutual friend decides it. There is no doubt that Lord Stamford has the strongest possible case. Lord Burghley bid 5100 gs. for Cambuscan, "I'm done, I shall bid no more;" then why was he not told Stamford, and not commence to pull the colt from Lord Burghley, why did he not make his claim as last week *fully* open? Or why did Lord St. Vincent wait till the end demand him three weeks ago? We hear nothing of his anxiety to have the colts delivered to him previous to the Derby week. The case of Archimedes is equally open to observation, as it was formally announced that he was "repurchased" by Lord Stamford from Captain White, and Mr. Ten Broeck's bid was declined by him giving up Sloth, that Mr. Ten Brock's purchase was not a bona fide one, and was merely a matter of course. Lord and Captain White's purchase of Archimedes was the same. Not a whisking of the 6000 gs. was paid to Messrs. Tattersall, and there after tenders to bar Lord St. Vincent do not help the Captain's claim at all. We trust that Lord St. Vincent will not be persuaded to give up his point, as it is absolutely necessary that some step should be put, if possible, to the strange abuses which have sprung up in these "without reserve" sales. If the sale of lots can be evaded by the use of such a convenient term as "repurchase," all security for buyers is gone; and the Legislature will have ere long to step in. The examination of Lord Stamford and the quintet from whom he "repurchased" would furnish elements for a sensation trial such as the Turf has never known yet. The Reindeer, Tarragon, and Tomato syrubbles would be nothing to it.

Weatherby's "Book Calendar" records 1068 "legitimate" races in Great Britain during the past season, which is an increase of 154 upon the preceding one. The number of horses which ran in the three kingdoms is 1837, or an increase of 348 on the last twenty years, and of 120 on the last three years. With the exception of 1861, when 611 two-year-olds started, the present year is the largest on record; but in three-year-olds as well as two-year-olds it falls behind that year, and gets a very decided majority in the fours and upwards. The blood colts and fillies registered with Messrs. Weatherby are 1441, or sixteen more than last season, but the fillies are in a minority. The total return of brood mares is 2256, and of these 323 are barren. There are some very good names on the foal list and some very bad ones. The sixth as Son of a Gun by Artillery, Greased Lightning, Fiddle de Dum, *L'Enfant Gâté*, 31, Split the Difference. The Broken Bow, Limber Magna, Fireball, Game Boy, Owlet, and Vic. The number entered to some of the principal sires is as follows:—The Cure, 9; Dundee, 11; The Duke, 13; Emigrant, 27; Knight of Kars, 39; Lambton, 19; Leamington, 37; Lord of the Isles, 35; Newminster, 98; Rataplan, 84; Sir Albon, 29; Stockwell, 33; Voltigeur 21; Wild Dayrell, 31; and Orlando, 8. Among the foals we find own brothers to Fandango and St. Albans, and own sisters to Dundee, Innes, Kettledrum, Caller Ou, and Buccaneer.

The returns of owners' winnings in the *Life* place Lord Stamford at the head, with £30,819, and Mr. Naylor second, with £18,463. Then, after a great gap, comes Mr. Merry, £10,617; Lord Glasgow, £9573; Baron Rothschild, £9143; and Lord St. Vincent, £8841; while Mr. Ten Broeck, Mr. Valentine, Sir Joseph Hawley, Count Le Grange, and John Osborne all stand at upwards of £6000. It will thus be seen that three out of the four brothers Dawson, who are private trainers, stand in the first four. Barring this unfortunate "without reserve" system, the Turf was never in a more healthy state. A remodelled Prince of Wales Stake, with 200 sovs. added, is announced for the First Spring Meeting at Ascot, to consist of 200 sovs., is added to the Ascot Cup; and the Doncaster Corporation (which now gives £200 to the Cup) intend to do the same. We trust, too, that these own hands after the next anniversary) now add £200 to their Two-year-Old Stake, which closes on Jan. 1.

The weather continues very open, and excellent for coursing. In the Vernon Cup, which, as usual, brought out many of the cracks, Bilbury and Spider were drawn together. Mr. Gril beat Colchester, by Cardinal York, in the run-up. A Canarden won the Sudbury Stakes, Mr. Hawley, both by Lord Derby, and by him, divided the Dove Stakes. In Dumfriesshire Mr. William Sharpe has been carrying off a cup with his Tak Tenh.

The Brenham Moor foxhounds have had some very good runs lately—to wit, one 17 miles in 1h. 50m. and with a kill in the open, and another of 12 miles in 1h. 20m. without a check as the crow flies, and hounds stopped in consequence of the darkness. The Quorn had a splendid run of fifty minutes from Swithland Wood to Quenby, skirting Bradgate Park, on for Ben's Cliffe, and back again by Roe Cliffe House, where the fox went over the cover by Mr. Clarke's house into the sheet of water below. Goddard went round with a few of the leading hounds, and killed him, and one of the whips, in a pleasure-boat, fetched him out. It was all that Goddard and the other whip could do to keep the body of the pack from going over the cliff. A correspondent describes it as one of the most picturesque scenes he ever witnessed, and regrets that not a tenth of the field were up to enjoy it.

The Portraits of Sir John Lawrence and Lord Wolseighan which appeared in our last Supplement were from photographs by Messrs. John and Charles Watkins, of Parliament-street.

COLUMN FOR THE CURIOUS.

By the new Part of the *Proceedings of the Society of Antiquaries*, just issued, we are reminded of two very interesting documents relating to Charterhouse, lately exhibited at Somerset House. The first is, probably, the earliest description of this noble foundation, and is contained in a letter from Peter Hooker, dated "Sutton's Hospital, Jan. 10, 1616," when he entered upon his duties as Master. On the same evening was shown to the Society the deed (Jan. 16, 1658) appointing Philip, Lord Jones, a governor of Charterhouse, on the resignation of the Lord Protector, Richard Cromwell.

The Bartlow Hills, we are told, are saved from railway destroyers. At the recent meeting of the Archæological Institute, Mr. Purnell, the secretary, read the correspondence which had passed with the Great Eastern Railway Company in reference to the contemplated destruction of these famous grave-mounds. The engineer-in-chief, in one of his letters, deprecates the idea that it was ever his intention to injure the hills; but in the same letter he confesses his design to bring the new line between two of them—a bisection presumed to be a greater engineering difficulty than the writer of the letter is aware of.

The contemplated improvement at the east end of the Poultry, which we have already detailed, is likely to be accomplished, the City Commission of Sewers having passed a resolution to the effect that they are willing to carry out the work in question, provided the Metropolitan Board of Works will undertake to contribute half the expense. It is stated that to reclaim, for the purpose of such improvement, 36 ft. of ground by 12 ft. 9 in. at the spot in question, may cost the enormous sum of £17,500 in purchasing freeholders' and householders' claims, or at the rate of £1,600,500 an acre! By-the-way, we see considerable credit is claimed for the Board of Works having abolished, revised, and adjusted hundreds and thousands of names and numbers. Some of their changes involve archæological identity, and it would have been better had the Board been less in haste to emblazon the "circle" distinctions of the Post Office, already given up.

The curious in calculations, and readers who have a higher aim, will be interested in the following passage from a striking paper on the "Physical Constitution of the Sun," by Mr. E. W. Brayley, in the "Companion to the Almanac for 1864":—

A railway-train, at the average speed of thirty miles in an hour, continuously maintained, would arrive at the moon in eleven months, but would not reach the sun in less than 352 years; so that if such a train had been started in the year 1512, the third year of the reign of King Henry VIII., it would reach the sun in 1864. When arrived, it would be rather more than a year and a half in reaching the sun's centre, three years and a quarter in passing through the sun, supposing it was tunneled through, and ten years and one eighth in going round it. How great these dimensions are may be conceived from the statement that the same train would attain the centre of the earth in five days and a half, pass through it in eleven days, and go round it in thirty-seven days.

Attention has been called in the *Builder* to the disappearance of the "Resurrection" carving of the churchyard-gate of St. Giles-in-the-Fields. Of this curious work we prepared an account several weeks since, and have delayed its publication in expectation that the carving would be replaced, which we learn will now be shortly done.

On the 3rd inst., Thomas Davies, a superannuated pilot, died at Frog-street, Swansea, having attained the age of 100 years, within twenty-two days. He was born on the 25th of December, 1763. Consequently, had he survived until yesterday (Christmas Day) he would have been 100 years old.

The 9th inst. was an evening of miscellaneous interest at the British Archæological Association—Mr. G. Godwin, V.P., in the chair. Mr. Gunston exhibited a portion of an iron buckler, with spike as an umbo, found at Dowgate Hill; the iron plate is studded with minute brass knobs, and the spike corresponds with that of a similar buckler from the Brocas Collection, at Wakefield Park, Berks. Mr. Irvine exhibited a brass lock of the time of Elizabeth, the key having a Viscount's coronet and the letters R.M., presumed to be those of Brown, Viscount Montagu. Mr. S. Wood exhibited some spoons of the time of Elizabeth, found on pulling down an old house at Maidstone. Mr. Baigent showed an interesting series of bosses, in the vaulting beneath the tower of Winchester College. Mr. Baskcomb exhibited an ancient nutcracker and a sportsman's companion, found at Tutbury Castle; and Mr. H. Godwin showed a fine silver watch of the seventeenth century. Mr. Saxe Bannister read a notice of two MS. lives of Henry V., unpublished, in the British Museum and the Lambeth Library; he read extracts relating to the King's prisoners, and the second campaign in France, and his diplomacy; also to his political economy in reforming the coin of his French conquest, and to some proceedings towards the Lollards and the Welsh people. The Rev. S. Kell described a further find of Roman coins in the Isle of Wight; and Mr. Roberts read a paper on Brixworth, one of the most remarkable of the Northamptonshire churches.

To the account of the discovery of Roman remains at Norton, in the East of Riding of Yorkshire, noticed in our column of Nov. 28, we have to add the finding of a considerable deposit of human bones, and one perfect skeleton, at about two feet below the surface. Part of an urn, of unbaked clay, and fragments of pottery, evidently Roman, fix the date of the interment. These and the former discoveries above referred to give an idea of the place having formed the Roman cemetery for the station Derventio (Malton), of which the intrenchments still exist on the opposite side of Derwent.

Talking of veterans, since the decease of John Webb, one of Admiral Rodney's gallant crew, who expired on the 26th of September last, there died a few days ago the last of the veterans, James Mayoss, who fought under Rodney on the memorable 12th of April, 1782, in the action between the English and French fleets, upon which occasion Count Gras surrendered his sword into the hands of the British Admiral. Rodney directed in person every manœuvre of this great action, which lasted twelve hours, during which time he never quitted the quarterdeck for a minute, nor took any refreshment except from a lemon, which he held constantly in his hand and applied frequently to his lips. Mayoss was on board the Barfleur, commanded by Hood. In the same year he was bought out of the Marines, and enlisted in the 77th regiment of the Line, proceeded to the East Indies, and was one of the "forlorn hope" at the capitulation and storming of Seringapatam. He next enlisted in the 66th Foot, was at the siege and bombardment of the Isles of Bourbon and Mauritius, 1810; and, on proceeding to Ceylon, was at the reduction of Colombo. Another veteran, one of the few Tyne seamen spared, who fought under Nelson, died lately, at the age of eighty-seven. He was aboard the British fleet at Ostend and Copenhagen, and fought under Lord Nelson and Admiral Duncan.

Evidences of flint implements continue to accumulate. Mr. Tite has exhibited to the Society of Antiquaries a model of a stone axe found on the Moor, near Whitby, and of a smaller axe from the same place. Mr. Tite also presented two forged stone axes from Yorkshire. The Rev. F. G. Lee has forwarded a flint arrow-head and a metal ornament found in Aberdeenshire. Flint implements have lately been ploughed up near Lake Erie, in Canada. This class of discovery has now been carried beyond the Pyrenees; and two *haches* have been found on the slope of the valley near the River Manzanares, in the drift deposits, which Casiano de Prado considers to be inferior to the ordinary drift of the plateau. See an interesting notice in the *Reader*, Dec. 5, wherein it is also stated that at the Berlin Academy of Science Herr Parthez has exhibited a "photograph of plaster casts of the bodies of some of the inhabitants of Pompeii who were buried in the shower of ashes which destroyed that city," with an explanation of the way in which these casts were obtained.

Roman remains of considerable interest were exhibited to the Society of Antiquaries on the 26th ult. Mr. W. L. Lawrence communicated an account of a Roman villa recently discovered on his own property at Wycombe, in Gloucestershire, with a bronze statuette, fragments of votive sculpture, &c., found on the site. Of Roman London Mr. W. H. Black illustrated the original extent, site, and circumvallation, as shown by recent excavations; and Mr. Tite exhibited some remains lately found at Queenhithe. Mr. Lewin also made some remarks on the Celtic city of *Lud*, which he believes to be the *oppidum* described as the capital of Cassivelaunus. To the British Archæological Association, on the 25th ult., Mr. J. Moore forwarded further Roman remains found at the Chessells, consisting of coins of Lucilla and Allectus, a harp-shaped fibula, a chain, a style, and spatula. Mr. Gunston exhibited two ampullæ, 6 in. in height, recently found with Roman sepulchral remains, in Moorfields; and the Rev. H. Jenkins communicated a paper on the Iters of Antonine, leading to and from Colchester to London.

CHESS.

TO CORRESPONDENTS.

I. L. D., MARCUS, AND OTHERS.—We are still compelled to remain in arrear with our replies to very many correspondents; but your communications are not forgotten.

H. F. L. M., Hanover.—1. The problems just received shall have due attention. 2. Your solution of Problem No. 1028 is the true one.

HANDY ANDY.—There is no mate in the way proposed; and, if there were, it would be quite devoid of interest or ingenuity.

H. CHARLICK, Adelaide, South Australia, is thanked for the specimens of colonial play which he has been good enough to transmit to us.

SOLUTIONS OF PROBLEM No. 1033, by Felix, A. Z., Delta, J. Palmer, Charley, D. C. L., Fergus, M. P., Pip, Derevon, T. C. D., 1853, Anne, Lionel, Vernon, J. F. B., I. C. W., Marcus, D. D., Peregrine, Lex, W. R., Tyro, Œdipus, I. B. H., A Lady, Boston Stump, Tanni; I. W., Huddersfield; Gamma, R. B. W., F. C. S., Quidnunc Randolph, Medicus E. S., L. M. W., Percy, Georgy; L., of Tamworth; D. A. C., Larry, Nereus, T. M., Major H., Box and Cox, Lucy, Neptune, Ghost, I. B. C., W. H., Sebastian, De la V., Kenneth, A. R. D., R. G., G. W. D., A Clerk, Ibis, Nathaniel, George, Taurus, L. S. D., Peter, Fanny, R. T. K., Omicron, W. M. S., R. D. T., William Burton, Old Joe, I. M. Harvey, H. E. K., Thadeus; F., of Bodmin: Cosmos; R., of Paris; N. D. M., St. Omer, G. L., Etonensis, Fidele, Cantab, Antony, H. B., Histrion, Jupiter; V. H., Guernsey; S. B., Iota, Subscriber, Penn. Stanley, T. 3. R to Q 4th (ch)	K takes R		

PROBLEM No. 1035.

By the late I. B., of Bridport.

A Competing Problem in the Chess Tourney of last year.

BLACK.

WHITE.

White to play, and mate in three moves.

CHESS IN FRANCE.

The following hardly-contested Game came off recently in Paris between Mr. PETROFF and a Swedish Amateur of high promise, Mr. LINDEHN.

(*Allgaier Gambit.*)

BLACK (Mr. Lindehn.)	WHITE (Mr. Petroff.)
1. P to K 4th	P to K 4th
2. P to K B 4th	P takes P
3. Kt to K B 3rd	P to K Kt 4th
4. P to K R 4th	P to K Kt 5th
5. Kt to K 5th	Kt to K B 3rd
6. B to Q B 4th	P to Q 4th
7. P takes P	B to Q 3rd
8. P to Q 4th	Kt to K R 4th
9. B to Q Kt 5th (ch)	K to B sq
10. Kt to Q B 3rd	Kt to K Kt 6th
11. R to K Kt sq	Q takes K R P
12. Q B takes P	Kt to K 5th (dis. ch)
13. P to K Kt 3rd	Q to K R 7th
14. R to K B sq	B to Q Kt 5th
15. Q to Q 3rd	B to K B 4th
16. Castles	Kt to Q 3rd
17. Q to Q 2nd	

(Mr. Lindehn, we suspect, must have overlooked the importance of now playing his Kt to Q 7th. By that temporary sacrifice he would have obtained a much finer game, if we do not miscalculate, than by exchanging Queens. For instance:—

17. Kt to Q 7th (ch) — B takes Kt, or (*a*)
18. R to K R sq — B takes B
19. Kt takes B — Q to K Kt 7th
20. Kt takes Q B P
and Black has a winning position.

(*a*) 17. — Kt takes Kt, or (*b*)
18. B takes Kt (ch) — Anything
19. Q takes B
and again the advantage is all on Black's side.

(*b*) 17. — K to Kt sq
18. Kt to K B 6th (ch) — K to Kt 2nd
19. Q Kt to K 4th
and still Black has the superiority.

There are other variations, and the play of Black in those given might perhaps be improved, but sufficient has been done to prove that Kt to Q 7th would have been a stronger move than Q to Q 2nd.)

BLACK	WHITE
17.	Q takes Q (ch)
18. B takes Q	B to K Kt 3rd
19. B to K R 6th (ch)	K to K 2nd
20. Q R to K sq	K to Q sq
21. B to K 2nd	P to K B 4th
22. B to Q 3rd	R to K sq
23. Q R to K 2nd	Kt to Q 2nd
24. Kt to Q Kt 5th	Kt to Q Kt 3rd
25. P to Q B 3rd	Kt takes Q P

(In a game of any moment Mr. Petroff would have hesitated before giving up a piece thus:)

BLACK	WHITE
26. P takes B	Kt takes P
27. B takes P	

(He should rather have taken the K Kt with Kt.)

BLACK	WHITE
27.	Kt takes B
28. Kt to K B 7th (ch)	B takes Kt
29. R takes R (ch)	B takes R
30. R takes Kt	Kt tks Q R P (ch)
31. K to Q 2nd	P to Q B 3rd
32. Kt to Q 6th	K to Q 2nd

(There seems to be danger in attempting to preserve the Q Kt Pawn.)

BLACK	WHITE
33. Kt takes P	B to K Kt 3rd
34. Kt to Q B 5th (ch)	K to Q B 2nd
35. B to K B 4th (ch)	K to Q Kt 3rd
36. Kt to Q R 4th (ch)	K to Q R 3rd
37. R to Q B 5th	Kt to Q Kt 5th
38. R to Q B 4th	K to Q Kt 4th
39. P to Q Kt 3rd	P to Q R 4th
40. B to Q B 7th	Kt to Q 6th

(White's position is so intensely critical that the least miscalculation would be fatal.)

BLACK	WHITE
41. Kt to Q B 3rd (ch)	K to Q R 3rd
42. R tks Q B P (ch)	K to Q Kt 2nd
43. R to Q B 4th	B to K B 2nd
44. P to Q 5th	Kt to Q Kt 5th
45. B to K B 4th	Kt takes P
46. Kt takes Kt	B takes Kt
47. R to Q B 7th (ch)	K to Q Kt 3rd
48. K to Q B 3rd	B to K 5th
49. R to K 7th	R to Q B sq (ch)
50. K to Q 4th	B to Q B 7th
51. R to K 6th (ch)	K to Q Kt 4th
52. R to K 5th (ch)	K to Q Kt 3rd
53. R to K 6th (ch)	K to Q Kt 2nd
54. R to K 5th	B takes P

(A remarkable error, and the more remarkable because unobserved by Mr. Lindehn.)

55. R takes Q R P

(It is evident that Black might have won the Bishop by checking with his Rook at Q Kt 5th.)

BLACK	WHITE
55.	K to Q Kt 3rd
56. R to K R 5th	B to Q B 7th
57. R to K R 6th (ch)	B to K Kt 3rd
58. K to K 5th	R to K B sq
59. R to K R sq	R to K B 4th (ch)
60. K to K 6th	K to Q B 4th
61. R to K R 2nd	K to Q 5th
62. R to K B 2nd	K to Q 6th
63. R to Q 2nd (ch)	K to K 5th
64. R to K B 2nd	P to K R 4th
65. R to Q Kt 2nd	B to K B 2nd (ch)
66. K to K 7th	P to K R 5th
67. B to Q Kt 8th	P to K R 6th

The game, in effect, is already won by White, but nearly thirty more moves were made on each side before the victory was finally achieved by him.

CHESS ENIGMAS.

PRIZE PROBLEMS OF THE LATE CHESS MEETING IN GERMANY.

The four Enigmas which follow will be studied with interest, the two first having won the chief prize in the Dusseldorf Problem Tourney, and the other two having carried off the second prize.

No. 1371.—By Mr. JOHN BERGER, of Graz.

White: K at K R 2nd, Q at K 8th, R at Q R 3rd, Bs at K R 7th and Q R sq, Kts at K B 2nd and Q Kt 6th; Ps at K Kt 3rd, K B 5th, K 6th, and Q B 5th.

Black: K at K 4th, Q at Q Kt 2nd, B at Q 3rd, Kts at K Kt 7th and Q R 3rd; Ps at K Kt 4th, K B 3rd, and Q 5th.

White to play, and mate in four moves.

No. 1372.—By Mr. JOHN BERGER, of Graz.

White: K at Q R 6th, Q at Q Kt 8th, Rs at K 2nd and Q Kt 7th, B at K Kt 5th, Kts at K Kt 3rd and K 8th.

Black: K at Q B 4th, Q at K R sq, Rs at K R 2nd and K R 8th, B at K B sq, Kts at K B 8th and Q sq; Ps at K R 3rd, K 3rd and 5th, Q 4th, Q B 6th, and Q R 2nd and 5th.

White, playing first, mates in five moves.

No. 1373.—By Mr. V. KNORRE, of Nicolajew.

White: K at K 8th, R at Q 6th, B at Q R 5th, Kts at K B 4th and Q 2nd; Ps at K R 3rd, K Kt 5th, K B 2nd, Q 3rd, and Q Kt 2nd and 5th.

Black: K at K 4th, B at Q R 6th, Kt at Q sq, Ps at K B 4th and K 3rd.

White to play, and mate in three moves.

No. 1374.—By Mr. V. KNORRE, of Nicolajew.

White: K at K 7th, B at K B 2nd, Kts at K Kt 4th and K B 7th; Ps at K R 5th, K Kt 2nd, K B 3rd, K 5th, and Q 6th.

Black: K at K B 4th, B at K B 5th, P at Q 2nd.

White, playing first, to mate in five moves.

SCIENTIFIC NEWS.

ASTRONOMICAL DISCOVERY.—We learn from *Cosmos* that a new planet (the eightieth of the series) and a new comet (the sixth for the year) have been discovered by M. Julius Schmidt, director of the observatory at Athens, on the 13th of November. The positions of the comet do not form any analogy with those of the comet recently discovered by M. Tempel. We have just been informed that the supposed new planet is a re-discovery.

THE ELEMENTARY TISSUES OF PLANTS.—M. Lestiboudois has submitted his memoir on this subject to the Paris Academy of Sciences. After mature consideration of the internal structure of plants, he arrives at the conclusion that we cannot consider as a general and, so to speak, exclusive apparatus those reservoirs which show very dissimilar dispositions, which contain very heterogeneous liquids, and which are wanting in the greater number of vegetables. As to the vessels stated to contain transparent and granuliferous liquids, and to branch out and become anastomosed, like certain lacteal vessels, M. Lestiboudois is not able to affirm their presence. He frequently met with transparent tubes, filled in various degrees with granuliferous liquids; but these tubes were straight, and not anastomosed. "We cannot, then," he says, "admit that there is in plants a special circulatory apparatus. All the parts of diverse forms may concur in the transport of nourishing liquids: and, whatever be the diversity of the conformations belonging to the organic elements and the proper functions which may be assigned to them, we cannot rationally consider the unity of tissues in vegetables to be established."

THE VELOCITY OF ELECTRICITY AND THE DURATION OF THE SPARK have been made the subject of elaborate experiments by M. R. Felici, who has inserted some notes thereon in the *Annales de Chimie*. In his opinion, the best method of measuring the velocity of electricity is the observation of the sparks which arise at the interruption of an uncovered conducting-wire freely suspended in the air, and without an envelope of gutta-percha or silk, and traversed by the discharge of the Leyden jar. When we employ a battery and wires covered with gutta-percha, and in the very variable condition of telegraph wires, causes of error are introduced, as has been demonstrated, principally by Professor Faraday. M. Felici also expresses his doubts as to the propriety of employing for this purpose the galvanometer or the electro-magnet. In a memoir lately published he stated that by his apparatus he had determined the velocity of electricity to be, in round numbers, about 260,000 kilometres a second. Since then he has had new and improved apparatus made, which he describes in detail. With regard to the duration of the spark, he observed in his experiments a phenomenon already noticed by Mr. Wheatstone and M. Feddersen—viz., that when the spark has a sensible duration it is composed of several sparks of an intensity successively more feeble and separated in themselves by infinitely small intervals of time. There is, consequently, one whole spark and some partial sparks of exceedingly small duration. According to M. Felici, the duration of the spark depends on the relation between the tension and the quantity of the charge. By augmenting the tension and diminishing the charge the duration of the spark is also diminished. The duration of the spark (he says) also depends on the state of the surface of the metallic balls or points. Our limited space prevents the insertion of further particulars of the experiments.

CHROMATE OF LEAD IN BUTTER.—In September last the Conseil d'Hygiène of Paris charged M. Poggiale with the chemical examination of a specimen of paste which had been seized in the shop of a butter-merchant, and which was intended for giving a good appearance to bad butter. When calcined in a platinum capsule, it left considerable residuum. The fatty matter was separated by means of ether; and, after filtering the etherated liquor, a yellow substance was found, composed of chromate of lead and a vegetable colouring matter, presenting all the characteristics of turmeric. The presence of the chromate of lead was proved by suitable reactions. The paste was finally shown to consist of rancid butter, chromate of lead, turmeric, chloride of sodium, and all the saline matters found in sea-salt. As the chromate, like all the salts of lead, is poisonous, its introduction into butter is highly culpable, and should be repressed with severity. If it be true, as the maker of the paste asserted, that he did not use the chromate, the turmeric itself must have been adulterated with it.

THAT DEPRESSIONS IN THE MOON'S DISC exist has long been known. In the last number of the monthly notices of the Astronomical Society, the Rev. H. Cooper Key records his observation of certain large depressions in the western limb of our satellite, not of comparatively small gullies lying between elevated ranges, but of vast tracts, the general level of which lies very considerably beneath the mean level of the moon's surface. On the 20th of September last, while using his new 12-inch glass speculum, about six p.m., he turned the telescope upon the moon, then a few hours past her first quarter. He had no sooner focussed his instrument, than he was astounded at observing that the limb of the moon was entirely out of shape; that it was, in fact, irregularly polygonal, as if several large segments had been cut off the spherical limb. He took proper care to ascertain that the cause of this extraordinary appearance was not in the telescope. The Rev. T. Webb, of Hardwick, to whom Mr. Key communicated his observations, was at first incredulous; but, on Sept. 30, wrote, saying that there was no doubt whatever about these depressions; that he had tried them with the micrometer, and the immediate presence of the wire proved that they were actually flat. One was a little concave.

CHEMISTRY OF WINE.—An interesting communication, being the first of a series of studies on this subject, one of vital importance to French commerce, has just been made to the Paris Academy of Sciences by M. Pasteur, so eminent for his researches on fermentation. It relates to the action of oxygen in the process termed "vinification." He states:—1. That the must of the grape does not contain any oxygen gas in solution, but only carbonic acid and nitrogen; and that he has operated on different species of white and red grapes. One experiment on must gave him—carbonic acid, 78·5; nitrogen, 21·5; oxygen, 0. 2. If the must be abandoned, even with a large surface, it does not oxygenate. He finds in it, in proportion as fermentation appears, only carbonic acid and nitrogen. Consequently, the oxygen of the air combines with must only in proportion with its solution in the oxydisable principles naturally contained in the juice of the grape. 3. This combination of the oxygen of the air with the must is not rapid. We obtain this result by agitating the must in the air, analysing the gases dissolved after agitation. Five litres of must were agitated in a large bottle containing ten litres of air. Fifty cubic centimetres of gas, extracted from the must a quarter of an hour after agitation, left thirteen cubic centimetres of gas not absorbable by potash, which contained 20 per cent of oxygen. The combination of the oxygen of the air with must modifies its colour, gives it an agreeable odour, and exercises a very considerable influence on its fermentation. We have no space to pursue the subject further, but must refer those interested to the *Comptes Rendus* (vol. lvii., No. 23). M. Pasteur says, in conclusion, that the facts which he has brought forward will suggest new ideas on the methods to be pursued, both for the conservation of wines, the giving them the qualities of age, the action of currents of air in cellars, the influence of old and new casks as more or less suitable for evaporation, and the effect of bottling as diminishing in a great measure the aeration of the wine. M. Pasteur announces his intention of studying the changes which occur in wines, and their diseases, and of giving the results in a future communication.

THE FOOD OF THE SALMON.—Some notes on this subject and on the parasites of this fish appear in the last number of the *Journal of the Linnean Society*, contributed by Dr. W. Carmichael M'Intosh. Some time ago Dr. Knox, in a paper read before the society, controverted the views of Valenciennes, who describes the salmon as voracious and a devourer of fishes, adding that "from the time it enters the fresh water it ceases to feed, properly speaking, although it may occasionally rise to a fly, or be tempted to attack a worm or minnow, in accordance, seemingly, with its original habit as a smolt; and that, after first descending to the ocean and tasting its marine food, it never again resorts to its infantile food as a constant source of nourishment." He also stated that "nothing whatever is found in the stomach or intestines of the fresh sea salmon but a little reddish substance, which he found to be the ova of some species of Echinodermata," and affirms that such is the sole food of the salmon in the sea. Yarrell asserts that the salmon feeds on small fishes and marine animals, while Dr. Fleming says that their favourite food in the sea is the sand eel. To test the accuracy of these statements, Dr. M'Intosh, with regard to the Tay, examined the stomachs and intestines of upwards of a hundred salmon and grilse caught in the river this year from February to June. He found the stomachs of the parr from Stormontfield pond gorged to an extreme degree with beetles, flies, and minute crustacea, and also those of the smolts well filled. "Such being the nature of the fish from its earliest life," he says, "one is sceptical as to the statement that grilse and salmon do not feed in fresh water. In its usual condition, the stomach is coated internally with a consistent white mucus of great tenacity, well calculated to hold any animalcules introduced from without; yet in few or none did such occur, cellulo-grandular matter and oil globules alone appearing. In ten instances only did remnants of fishes occur, and in all these nothing remained but vertebral columns, cranial and other bones, with the dense tissues, as the lens, &c. The number of bones in several cases showed that the animals had enjoyed a most ample repast, since they belonged to fishes from eight to ten inches in length. Some pieces of cartilage, skin, and pigment-cells seem to belong to smelts, but most of the vertebræ belonged to larger fishes. The other kinds of food found in the stomach consisted of fragments of small fresh-water crustacea, with a portion of a shrimp in one or two fishes, and an occasional piece of insect-cuticle." In summing up the evidence Dr. M'Intosh expresses his opinion that it is a mistake to suppose that salmon do not feed in fresh water at all, as well as to suppose that they feed voraciously. The true state of matters would seem to be that in fresh water they feed rarely, and at intervals, but not from want of voracity, as the contents of the above-mentioned stomachs show, and, further, that such food is occasionally found in the stomach from February to August.

ERRATA.—A correspondent, Mr. C. H. Adams, of Edmonton, has kindly drawn our attention to two errors in page 590 of our Number for the 12th inst. In the article "Planets for December," through a slip of the pen, Venus is made an evening instead of a morning star. At the end of the article "The Sun's Parallax," the solar parallax, as deduced by Mr. Stone, is stated to be 8 min. 94 sec., instead of 8·94 seconds, which last, our correspondent observes, must be very near the truth.

NEW BOOKS.

BROWN AND POLSON'S

PATENT CORN FLOUR. Packets, 8d. Tins, 1s.

OSWEGO

PREPARED CORN, for Puddings, Custards, Blancmanges, &c. Manufactured and Perfected by T. KINGSFORD and SON, of Oswego, State of New York.
It is the original preparation from the farina of maize, established 1848, commands the highest price from the trade, and offers the best value to the consumer.
It is a quarter stronger than any of the imitations, has a finer grain, and is more delicate.
The Oswego has the natural golden tinge, and not the chalk white produced by artificial process.
KEEN, ROBINSON, BELLVILLE, and CO., Garlick-hill, London.

KEEN'S GENUINE MUSTARD. There are many qualities of Mustard sold. Obtain Keen's Genuine Mustard and full approval is guaranteed. FIRST MANUFACTURED 1742. Sold by most Grocers from the Cask, and in 1 lb. and ½ lb. Canisters.
KEEN, ROBINSON, BELLVILLE, and CO., London.

LETTERS PATENT 1823. PRIZE MEDAL 1862.

ROBINSON'S PATENT GROATS is the most valuable preparation for making pure and delicate gruel. Modern chemistry has shown that this food is easy of digestion and rich in nutriment.
ROBINSON'S PATENT BARLEY makes a delicious custard pudding, directions for which have been given by Mons. C. E. Francatelli. It is appreciated as a non-inflammatory drink, is excellent for mothers nursing, and has long been used with great success for rearing children by hand.
KEEN, ROBINSON, BELLVILLE, and CO., London.

CHEESE—STILTON in perfection. HAMS—Small, first class. BUTTER—Aylesbury, Fresh Daily.
CRAFT, Cheesemonger, Knightsbridge.

STARCH MANUFACTURERS TO H.R.H. THE PRINCESS OF WALES.

GLENFIELD PATENT STARCH awarded the Prize Medal, 1862. This unrivalled Starch is used in the Royal Laundry, and pronounced by her Majesty's Laundress to be the Finest Starch she ever used. Her Majesty's Lace-dresser declares it to be the best she has tried, and the above award by some of the most eminent scientific men of the age confirms its superiority.

DR. DE JONGH'S (Knight of the Order of Leopold of Belgium) LIGHT-BROWN COD-LIVER OIL, prescribed by the most eminent Medical Men throughout the world as the safest, speediest, and most effectual remedy for CONSUMPTION, CHRONIC BRONCHITIS, ASTHMA, COUGHS, RHEUMATISM, GOUT, GENERAL DEBILITY, DISEASES OF THE SKIN, RICKETS, INFANTILE WASTING, AND ALL SCROFULOUS AFFECTIONS, is incomparably superior to every other variety.

SELECT MEDICAL OPINIONS.
Sir HENRY MARSH, Bart., M.D.,
Physician in Ordinary to the Queen in Ireland.
"I consider Dr. DE JONGH'S Light-brown Cod-liver Oil to be a very pure Oil, not likely to create disgust, and a therapeutic agent of great value."

DR. GRANVILLE, F.R.S.,
Author of the "Spas of Germany."
"Dr. Granville has found that Dr. DE JONGH'S Light-brown Cod-liver Oil produces the desired effect in a shorter time than other kinds, and that it does not cause the nausea and indigestion too often consequent on the administration of the Pale Oil."

EDWIN CANTON, Esq., F.R.C.S.,
President of the Medical Society of London, &c., &c.
"For several years past I have been in the habit of prescribing Dr. DE JONGH'S Light-brown Cod-liver Oil, and find it to be much more efficacious than other varieties of the same medicine which I have also employed with a view to test their relative superiority."

DR. DE JONGH'S LIGHT-BROWN COD-LIVER OIL is sold only in capsuled imperial half-pints, 2s. 6d.; pints, 4s. 9d.; quarts, 9s.; labelled with his stamp and signature, WITHOUT WHICH NONE CAN POSSIBLY BE GENUINE, by respectable Chemists and Druggists, Sole Consignees,
ANSAR, HARFORD and CO., 77, Strand, London W.C.

ASTHMA SPECIFIC.—DATURA TATULA. By immediate contact with the air-cells and passages, the fumes of this plant afford instantaneous relief. The remedy is adapted for use by all patients.
